The "Piracy" Case of WJAZ

NEWS accounts throughout the country have carried vivid stories telling how WJAZ, the Zenith station in Chicago, has "taken" the wave length of 329.5 meters. The wave is reserved, without treaty, for Canadian use. Undoubtedly everyone by now has read about the matter, so there is no need to go into a detailed rehearsal of the news.

What can the U. S. government do about the matter? If unsuccessful, will the air be crowded to the point of pandemonium by others who strive to duplicate WJAZ's success?

We believe that no harm can result from the test case inaugurated by the Zenith station. E. F. McDonald, Jr., is placing his resources and his station in the balance to determine really just what the status of Radio is in the United States.

If the secretary of commerce is shown to have abused his discretionary powers by granting favors to certain firms and not to all, then we must remedy the situation.

Congress must take Radio away from Secretary Hoover and his successors in that event.

Perhaps the solution will be to form a non-partisan, representative body such as the interstate commerce commission, this body to handle with full discretionary powers (with the courts for appeal) all matters pertaining to Radio, the distribution of wave lengths, the division of time by broadcasters, etc. The new body might well be called the interstate communications commission, and besides Radio, it could handle wire telegraph and telephone affairs.

Other countries have such bodies, and have had them for some time. Witness the ministry of telephones and telegraph of France. This ministry also has charge of the administration of Radio. In Great Britain the post office department is the administrative head of all Radio and communication services.

Whether or not Mr. Hoover is shown to have abused his powers as chief of the Radio service, the commission suggested should be formed. No one man can assume, without being called partial, the responsibility that now rests upon the shoulders of the secretary of commerce.

The Radio bills now before the senate and house of representatives would give Mr. Hoover, or his successor, even more power. If these bills are passed unamended, the secretary of commerce will be czar of a vital means of propaganda.

Will this czar always be honest with this dangerous weapon in his hand?

The WJAZ case may bring much to light that will interest the senators and representatives now engaged in the study of bills which will determine the future method of Radio administration.

"Program Coming in Fine"

WE SPOKE recently concerning the cost of broadcasting. In our editorial we advised that the better class of broadcasters were worthy of our good will, or quoted, "It is our duty to support them with our good will."

As a result, one of our consistent readers begs to challenge.

"If my conception of the phrase is at fault," this reader remarks, "I offer my humble apologies, but nevertheless, the situation has actually assumed serious proportions. I have heard people remark that they do not care to buy a receiving set in order to hear nothing but telegrams and other messages."

He is quite right. We did not mean to say that people should telegraph and telephone stations to show their good will. A silent good will, or bad will, is more effective.

If a station violates good broadcasting ethics by making up its evening's entertainment of telegrams and letters received, it is our duty to quit writing and telegraphing that station. That is where the "silent bad will" will begin to take effect.

It is not our duty to list the numerous "telegram-program" stations. There are entirely too many, suffice to say.

We have recommended many means of clearing the air of its present congestion. Perhaps one very effective manner would be to cancel the license of every broadcaster found reading telegrams.

RADIO INDI-GEST

THE RADIO BUILDERS

Whether the light comes from the sun or incandescent glow,
We toil and think in factory bright to make your Radio.
No task is so world wide as ours—all craftsmen play a part
We make of Nature's giant powers the slaves of Radio art.

For us Montana miners toil the copper ore to dig,
That we may make the Mystic coils and all your "aerials" rig.
Steel workers grim with blast on blast, make up our sheets and bars,
Their furnace roars the whole night through, so bright it fades the stars.

Down south below the equator's line, in jungles of Brazil.
The Indians smoke the milky sap to feed our rubber mill.
No task is so world wide as ours, all craftsmen play a part,
For you we spend our working hours and search out every mart.

In China, worms on Mul'bry trees, the silk cocoons do spin;
In Singapore the coolies toil to send us precious tin.
For us a thousand ships now sail with metals, ores and gums,
Through seven seas in storms and calm, while our machinery hums.

For us a thousand freight trains roar, with felt and wood and glass,
And metallurgists make alloys of Tungsten, chromium or brass.

From trees in far off India, the Hindoo strips a wax
Which insects laid to hold their eggs—it makes our best shellacs.

For us from Georgia's trees of pine, the rosin gum is stealing,
For us the mills in Caroline, the cotton spools are reeling.

No task is so world wide as ours, all craftsmen play a part,
We tame electrons in the "lab" and use them in our art.
The miners, sailors, smelters, all who toil from morn till late,
Are listening to the Radio call, their labor helped create.
Is romance dead? From countless throats, we hear a mighty NO!
For all do either build or hear, our country's Radio.

By Charles M. Ripley and Frederick A. Hull
Schenectady, N. Y.

Should Have Been Harmonicas

Dear Indi: Ha! Zenith is right. Mr. Hoover and his department of commerce are attempting to put Radio on the fritz. The following headline, taken from the latest "Radio Service Bulletin" of the commerce department, proves our contention. Here 'tis:

BROADCASTING STATIONS EQUIPPED SO AS TO SUPPRESS HARMONIES.

GUM SHOE

Jah Wohl, Er Hat Narrheit

Dear Indi: I gott a ledder from Coussin John who iss inn Germany de odder day. He sez dey are macking Wernier controlls fawr gass stoffs and stoff pipe dahmphers.

HERR WALT

Was ist los mit Ihnen, meiner freund? Wissen sie nicht dass it is nach dem Deutschen law Wernier knobs und controls on den gas range auch stove pipes zu put? Deiner Freund hat ein screw loose in his kopf geworden sein, nicht wahr?

Paging King Tutt

Dear Old King Tutt: Had pleasant feeling reading your poem, "You Mean Hearing." There are no more cats fighting and panthers yelling in my set. I twist the dials of a good 8-tube super under a beautiful blue sky and Havana and Chicago come nicely like Heaven.
Yours sincerely, JUAN DEL RIO H.

There you are, King Tutt, a post card for you from Cuba. If you will send in your address to me I will deliver to you a beautiful picture of Parque Marti, Manzarillo Oriente, and a little more of the love note from Juan.

Might Grow Whiskers

Dear Indi: There is a Radio problem in our town. A local barber has a Radio receiver in his shop and when we want a shave, he turns on the set and starts jazzing to the music. We want to get a shave but are afraid to, and as he is the only barber in town, we are in a rotten fix. Can you help us out of this predicament?

One day this barber was listening to a prize fight and hit one of the customers on the jaw, putting him unconscious.

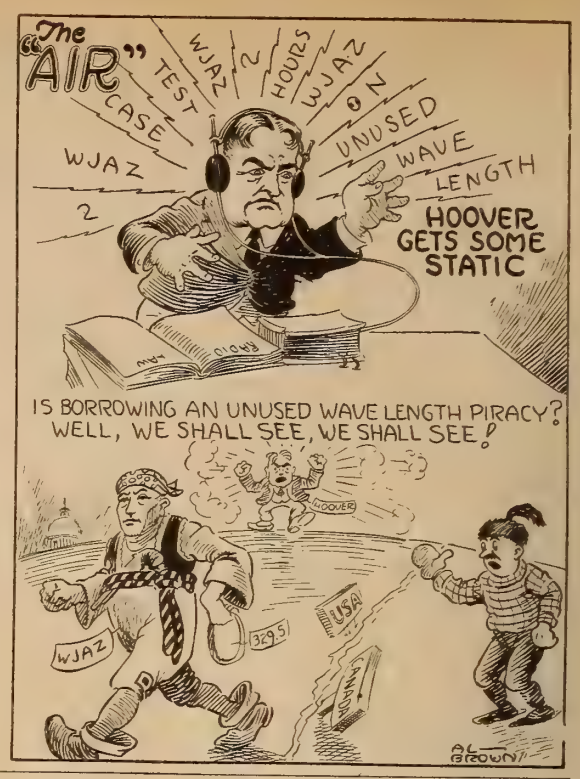
Hoping you are the same, yours truly,
JUSTIN TIME

It was really unfortunate, Walt, that Indi got your letter on pay day or you might have found him the same. Must be conscious on that occasion. Probably your tonsorial artist has been tuning in on "The Barber of Seville" and thinks he is like the chirurgeon who bled his customers as readily as he shaved them. Suggest he get Ford and Glenn or the Harmony Girls with their barber shop chords, or the Smith Brothers over WEAF. Anyway, whad'ya kickin' about? You want a close shave when you go in there, don't you?

Ours Broke Our Window

"Striking of clock hinders reception" is a headline on one of the stories in this week's Digest. Blooper says that's nothing compared to what the ringing of an alarm clock hinders.

Hoover Tunes in 329.5



Condensed

BY DIELECTRIC

They certainly do take to dancing in Florida, if the preponderance of dance numbers on the programs of broadcasters there are fairly indicative. And such playing! As listeners heard one after another of the modern selections played by an orchestra through WMBF, Miami Beach, their consensus of opinion would have been that those players attacked the music with all the enthusiasm of brand new works, with none of the faltering unfamiliarity might have produced. And the announcements are clear and sufficiently slow to be understood by all.

It is possible with some orators addressing us in a foreign tongue to catch the drift of their remarks, though this is less likely to happen than where the words are set to music. Given Norse songs, with their fire and adventure, sung by Norwegians with trained voices and an expert leader, no one stops to note the unintelligible words. This experience was had by those tuned to WOAW, Omaha, not long ago, and a repitition of such a program should prove popular.

Instances of broadcasting from the stage of some theater in the large cities of this country are becoming more numerous—possibly more entertaining. Few features of the kind excell in general interest the broadcasting by Station WEBH, Chicago, from the Uptown theater in that city, where one may listen to a very good little symphony orchestra in a variety of musical presentations. Transmission is good.

Station WCAU, Philadelphia, presented a quartet of male voices known as the Jolly Four which supplied as much entertainment as that station can be credited with for some time past. Not all of their numbers were selected from among those songs heard almost nightly, but included a few new ones. More particularly one feels inclined to commend the pleasing blending of the four voices, none of which predominated nor marred the uniform effect of unity—both tone and expression.

Once more we feel obliged to the Victor company for an evening of almost unalloyed pleasure; "almost" appears, due to rather poor modulation during the singing of the famous Prologue by Titto Ruffo. However, we have no regrets for having offered us such artists and especially the Flonzaley quartet, to which there is no equal. When one may listen to the playing of these four men there is nothing to wish further. Again I suggest our commendation would not be amiss.

These community concerts are attracting attention not only to the cities sponsoring them but to the possibilities within them of providing musical talent and entertainment well worth a hearing. It may develop a national contest of community choruses with the listening public as judges, thus promoting a friendly rivalry by Radio and at the same time increase knowledge of choral music. WSAI, Cincinnati, had one such concert with piano selections including some of the best musical literature for the instrument, as well as vocal solos chosen from such composers as Grieg, Rachmaninoff etc.

A midnight dance program fostered by Station KDKA, Pittsburgh, had little to make it stand out above a host of other dance features presented at the same time, yet many fans remained to imagine themselves a part of the interfraternity ball given under the auspices of the University of Pittsburgh. It's probably the audiences present and audible to listeners which make such an event attractive.

ABC Radio Fundamentals for Everybody

Chapter V—The Detector or Converter

By Milo Gurney

VERY often truly great inventions revert to the commonplace early in their life, through association with previous methods, which refuse to step aside, other than very slowly, because of a lack of understanding of the invention's inherent greatness. Such seems to be true of the triode or three-element vacuum tube, whose function in a Radio receiver detector or converter circuit will be the subject of this article.

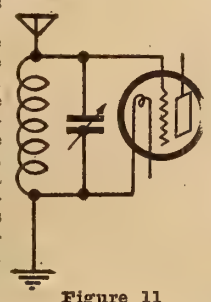


Figure 11

In order that the discussion may be made clear, figure 11 of last week's article is repeated, while figure 14 pictures the same arrangement, with the addition of a detector tube, together with the batteries and head phones required to complete an audible circuit.

Recall, if you will, the method of tuning outlined in last week's article and note with the addition of the vacuum tube, wires are connected to the coil which run to terminals G (or grid), and plus F (or filament). (The latter wire is also connected to minus filament, though never in a detector circuit.) The purpose of the wire connections is to act as conveyers to the detector tube for the radio frequency currents or inaudible frequencies of the station selected. At the detector they are to be converted into audible frequencies.

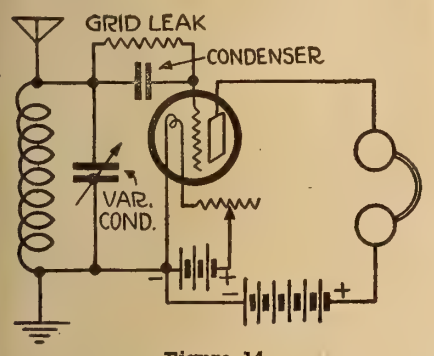

Figure 14

It is this conversion, which so mystifies those not versed in Radio technique, and which the author hopes will, following his explanation, create a profound respect for the inventors of the vacuum tube, Dr. J. A. Fleming, an English inventor, and our own Dr. Lee De Forest.

Structure of Tube

Figure 15 is diagrammatic of such a tube, comprising an evacuated glass bulb, together with its internal elements, and their respective locations within the bulb. —F and +F represent the terminals of a continuous wire, termed a filament, somewhat similar to the filament of an ordinary electric lamp; a plate (P), which as the name implies, is but a plate or sometimes a circular disc of metal, with its connecting terminal; and a grid (G), which is also of metal, but provided with several ladder-like openings in its structure. The grid is placed between the filament and the plate, the filament terminals are connected to a battery, with one arm directly connected and the other in series, with a resistance, to the opposed terminal of the battery.

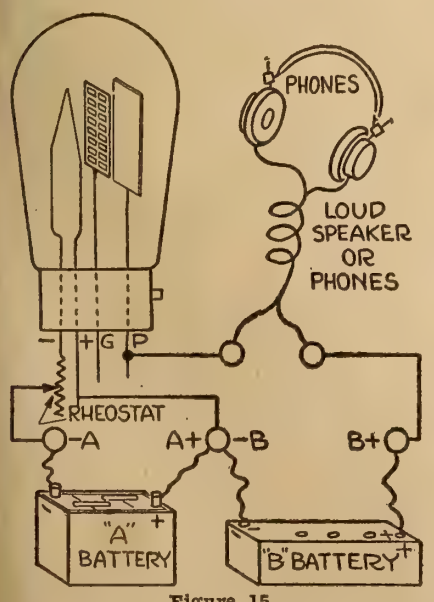

Figure 15

Since the function of this battery, which is known as the A battery, is to supply current to heat the filament, the resistance, or rheostat is made variable in order that the current from the battery may be so regulated as to heat the filament to the desired temperature.

For a great many years prior to the invention of the vacuum tube it was known that a metallic filament or wire, when heated within a vacuum, would give off minute particles, or negative charges of electricity. These negative charges are known as electrons, and are boiled out of the filament in much the same manner as water particles are shot out from boiling hot water.

It was discovered by Dr. Fleming that if a metallic plate, such as P in figure 15, was introduced into this vacuum and connected to a positive charge of electricity, then following the law that opposites attract, while likes repel, the negative electrons which were emitted from the filament under heat would be attracted to this positively charged plate. It was also found that the mass flow would be equivalent to a current passing over this space between filament and plate. It is this current flow which is known as the space charge. It was further noted that, while a considerable space charge would flow in the direction indicated, little if any could be made to flow in the opposite direction. Following this discovery, it was but a step in application, to realize that the final result was a true one-way valve which, if placed in series with an alternating current, one-half of the alternations would be suppressed, thus converting it into a pulsating direct current. Such converted current is analogous to the current explained in a previous article as being used in wire telephony. An example of the space charge is given in figure 16.

De Forest Invents Control

It is now apparent to the careful reader that the above result, of itself, would be of doubtful value, unless some means were provided to control the electron flow. Dr. Lee De Forest, America's wizard physicist, stepped into

The Best Radio Affords!

$1.00 down!

FREE

Hydrometer and Voltmeter

As an *extra special* offer to those who hurry their order for the Radiotone Loud Speaker offered below, we shall include absolutely free a highest grade *Hydrometer* to test your "A" battery and a guaranteed accurate *Voltmeter* to test your "B" batteries. You need these two accessories if you want to keep your radio always at its best efficiency. A genuine $3.00 value—and given *free* on this special sale, while it lasts. So act quick!

Radiotone Loud Speaker

Only $1.00 with the coupon below brings this Genuine Radiotone loud speaker to your home on approval for 30 days! No radio is complete without a *good* loud speaker. Here's a first class loud speaker at an astounding rock-bottom price, direct—and on easy, monthly payments besides! Special now—Hydrometer and Voltmeter, $3.00 value, included FREE, if you send at once.

Makes Your Radio Complete

The Radiotone is super-sensitive, brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial—$3.00 a Month

Straus & Schram, Dept. R9412 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker. I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total price $25. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8726A—$25.00. **Hydrometer and Voltmeter FREE**

My Name _____

If you have ever bought goods on credit by mail, tell us from whom. If there is anything else you wish to tell us about yourself, write on a piece of paper and enclose it with this coupon. But the coupon alone, fully filled out will do.

That's all we want to know and we're ready to ship the goods at once. No formalities. No C.O.D. We trust rich and poor alike when they merely show us that they are honest.

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker that you have ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent. But if you decide to keep the Radiotone, pay only $3.00 a month until you have paid the total rock-bottom direct price—only $25.00. See if you can equal this offer anywhere on such amazingly liberal terms. You'll scarcely feel those small monthly payments.

Send Coupon NOW!

Only $1.00 with the coupon brings the Radiotone on 30 days' trial, satisfaction guaranteed, your dollar refunded if not satisfied. Send the coupon now while this special offer lasts. **Hydrometer and Voltmeter FREE, if you act quick.**

A B C'S OF RADIO SETS

(Continued from page 23)

the tube development at this stage, through discovering that if an additional valve, now known as the grid (G) was introduced into the tube and was placed between the plate and filament so that

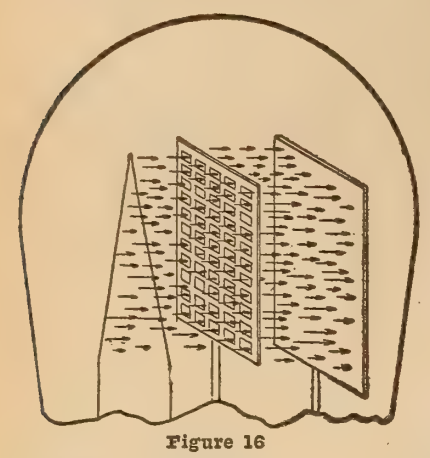

Figure 16

it would intercept and cause the electrons to pass through it on their journey to the filament, it could be made to function as an automatic gate to regulate the flow of electrons to the plate. This discovery and its application almost revolutionized the possibilities previously attributed to the vacuum tube and made ready a paved road to wonders of achievement.

The subject is much too important to pass over without a detailed explanation of the grid element and its associated grid leak and condenser, but space demands that it be taken up in next week's article.

Uses of Vacuum Tube

I desire, however, to impress upon the reader's mind that, while many consider the vacuum tube as a one purpose device, its total limitations are far from realization. Its principle uses at the present time may be enumerated as follows:

1. As a detector, to rectify high frequency oscillations.
2. As an audio frequency amplifier, to magnify the feeble voice currents after they have passed the detector output transformer.
3. As a radio frequency amplifier, to build up the weak antenna signals in order that they may be rectified.
4. As an oscillator, to generate high frequency currents for both receiving and transmitting.
5. As a modulator, to mould or modulate the voice currents impressed upon the high frequency currents.

And last, but surely not least, it plays a most important part in modern surgery, diagnostic surveys of heart murmurs and lung disorders. Transcontinental, or extreme long distance telephony would be impossible were tubes not used as boosters at intervals along the line to maintain voice volume.

When a device secures such universal application, one wonders how it can be considered by the populace as "but a bulb." Surely the world moves rapidly.

(Next week Mr. Gurney will explain the fundamentals of the grid leak and condenser, which should prove very interesting for those who do not know why or how their receiver functions.—Editor's Note.)

Radio Restores Hearing of Young Lady Who Knew World as Place of Silence

For Twenty-Two Years, Miss Elsie Hayes, Winnipeg Girl, Could Not Distinguish Sound Until Ear Phones Brought Music and Awakened the Aural Sense

WINNIPEG, Man.—For twenty-two years, Miss Elsie Hayes, 25-year-old book bindery worker of Winnipeg, knew the world as a place of silence. Today, due to Radio, she has begun to hear some of the things that are going on about her, and has hopes that gradually the nerves of her ears, long is disuse, will begin to function again.

Radio, the miracle science, is credited with responsibility for at least the beginning of Miss Hayes' return to hearing, for it was when induced to listen to music broadcast from Station CNRW, the Canadian National Railway's station at the Fort Garry hotel, Winnipeg, that Miss Hayes first was able to distinguish the sound of orchestral selections and later solo numbers which were on the program.

Sickness Caused Deafness

When 3 years old, Miss Hayes was stricken with bronchitis and pneumonia, followed by pleurisy. These attacks left in their wake paralysis of the nerves of the ear, and the little girl who had previously been "brimful of music," according to her mother, was found to be deaf. Gradually she lost also the power of speech, except for an occasional sound.

Distinguishes Program

Having read of many experiments wherein it was claimed Radio had assisted deaf persons in recovering their hearing, H. J. Metcalfe, a friend of the Hayes family, arranged for Miss Hayes and her mother to visit his home when Station CNRW was broadcasting a special program. As the broadcast proceeded, the deaf girl began to beat time and move with the rhythm of the numbers. It was obvious that Radio had penetrated the veil of silence which had hung over her life for two decades. Then, as the program closed, Mrs. Hayes spoke to her daughter. The girl turned at the sound of a human voice and nodded her recognition, then she uttered a sound which was very close to the word "mother."

On the following morning, as she left her home to go to work in the book bindery of a Winnipeg publishing establishment, Elsie Hayes heard the rumble of a passing street car for the first time.

Hope to Train Nerves

Her next sound of music came when friends played a phonograph with a loud needle and the girl was able to distinguish the sound of the records. After carrying on her conversations for twenty-two years by means of words written on a pad of paper, her friends have hopes that in time her aural nerves may be trained to function again; at least well enough that she may hear some of the things going on about her.

Scientists and local ear specialists say there is no reason why this should not have occurred, but to them it is no miracle; it is a combination of concentration and psychology. With the Radio headsets over her ears, Miss Hayes was concentrating on her hearing in a way that she had not done for years, and since the aural nerves had not gone, but hearing was really possible, she received the necessary vibrations to allow her to distinguish sounds again.

Second Case on Same Set

WINNIPEG, Man.—J. A. Bennett, a compositor, deaf since childhood, heard Radio for the first time recently when he listened in to CKY at the home of H. J. Metcalfe. This is the second experiment which has been tried by a deaf person on Mr. Metcalfe's Radio. Miss Elsie Hayes has had a similar experience, though she had been deaf since 3 years of age. Mr. Metcalfe is a photographer by profession and an amateur Radio fan. His set is a three-tube, one he assembled himself.

Learn to Play a Harmonica via Radio

To stimulate interest in good music by teaching people to *play* instead of merely *listen*, a series of harmonica programs and lessons, known as the "Hohner Harmony Hour," are being broadcast through Stations WEAF, New York; WJAR, Providence; WEEI, Boston; WOO, Philadelphia; WCAP, Washington; WGR, Buffalo; and WWJ, Detroit.

In addition to the musical numbers, ranging from the "bluest" of jazz selections to classical and operatic compositions, a series of harmonica lessons are broadcast by a well-known instructor.

If you want to enjoy one of the most popular features "on the air" and learn to play a harmonica for pleasure or profit, procure a copy of the Free Instruction Book and "tune in" for the "Hohner Harmony Hour." If your dealer cannot supply you Address M. Hohner, Inc., Dept. 233, 114 East 16th St., New York.

HOHNER Harmonicas

Photogravures of Your Favorite Artists
GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS Only 10c Each -- 3 for 25c To cover cost of mailing and postage

Size Eleven by Fourteen Inches

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
4 Paul Small, who won fame through Radio
5 Coon-Sanders' "Nighthawks" at KYW
6 George Hay, 1924 Gold Cup announcer
7 Harmony Girls, Edith Carpenter, Grace Ingram
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
11 Britt and Finch, popular songsters
12 Bob Emery, Big Brother of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
19 Aunt Jane, ladies' adviser at WOC
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
22 S. W. Barnett, ex-WOC, now WBAL
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" of WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ
28 Indiana Male Quartet, popular at WEBH
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, "Sweetheart of the Air" at KPRC
33 Pat Barnes, vaudeville announcer at WHT
34 R. V. Haller of KGW Hoot Owls fame
35 Henry L. Dixon, ukulele wizard of KYW
36 Quin Ryan, WGN's Uncle Walt and sports announcer
37 "Willie the Weeper," Ernest Rogers, WSB
38 Walter Wilson, "Uncle Bob" of KYW
39 Jack Chapman of Drake hotel repute
40 Ray-O-Vac Twins, known country-wide
41 Art Linick, KYW's Mrs. Schlagenhauer
42 Fred Hamm of WTAS, now WLIB, fame
43 Meyer Davis' Le Paradis orchestra of WRC
44 "Senator Schultz, WLW's illiterate comic
45 "Uncle John" Daggett of KHJ
46 D. R. P. Coats, 1925 Silver Cup announcer
47 Gene Rouse, WOAW's popular announcer
48 Freda Sanker, WKRC jazz orchestra director
49 Irish Ruth Pavey, KOA's invisible stage beauty
50 Queen Titania, star of KHJ Fairyland

If your favorites are not in this list, send in a request to have them included in the Gallery of Radio Stars.

COUPON Numbers 6 and 7

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage, or two photogravures when accompanied by 20 cents.

This coupon together with either coupon number 5 or 8 will entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

Order by Number.....

Radio Digest Publishing Co., 510 N. Dearborn St., Chicago

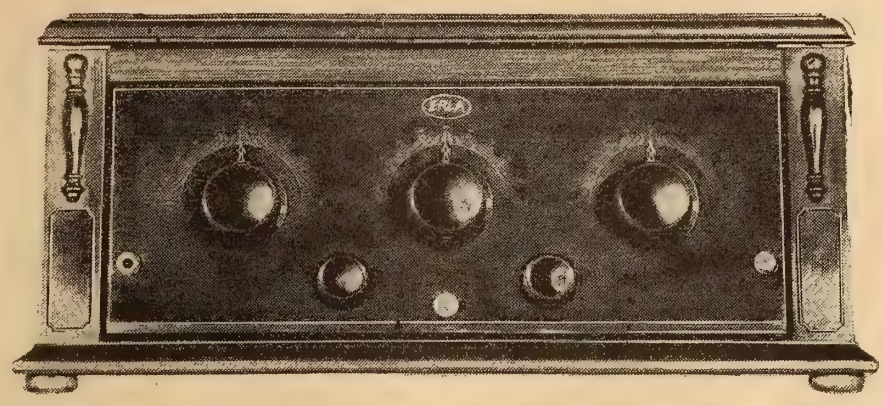
OPERATING AND TROUBLE SHOOTING

OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of an Erla Circloid 5 Receiver

RADIO receivers of the present season portray in a marked degree manufacturers' realization that artistry in cabinet design is of equal importance with that of Radio reception efficiency as a graceful and appropriate fitting for the home beautiful. A most worthy example of such forethought is the cabinet housing the Erla Circloid 5 receiver.

There could not be any division of opinion regarding this point as the outstanding feature of this receiver, with its two-tone mahogany finish, ornamental carved panels and top, were it not that a glimpse of its interior reveals a striking example of the application of the now popular balloon type Circloid coils as the media for radio frequency amplification. This type of inductance has found



favor with several manufacturers, not only because of its efficiency in radio frequency amplifiers, but primarily because such amplifiers require no balancing for the elimination of coil interaction, and are practically immune toward the influence of nearby broadcast stations.

The Panel

One's attention is at once attracted to the symmetry and balance of the sloping front panel of etched bronze, upon an antique background, upon which is mounted the operating dials, together with the loud speaker and filament controls.

Many detail conveniences are provided within the cabinet to insure not only the avoidance of error in connecting the receiver, but to also insure its most efficient operation upon a variety of lengths of antenna. A commendable part of the interior assembly is the provision of a cable of wires connected to the proper binding posts, together with a blue print drawing which indicates the exact connections to the operating batteries.

Laboratory Test

Our laboratory test upon this receiver included a careful inspection of the total assembly, the quality of the materials used, and whether the workmanship indicated that repeated inspection tests had been made. In addition to the above, the usual tests for selectivity and quality of reproduction over the broadcast wave band were made. In each instance the high average which we expected, because of the well-known reputation of the manufacturer, was well maintained, as evidence of the apparent "team-work" idea in design, through building each part to work in harmony with the whole.

Antenna and Ground

As this receiver is provided with antenna posts for both short and long aerials, our experience indicated that a single copper wire not exceeding 80 feet in length should be used, and connected through its lead-in wire to either the post marked L— Ant or S— Ant, according to the degree of selectivity one desired. This antenna should be well insulated from the ground and surrounding objects, and placed as high above the earth as possible within the limits of 45 feet. The ground connecting wire should run as direct as is convenient and be fastened by a ground clamp to a cold water pipe, which has been thoroughly scraped. If this is not possible, a like connection to a six-foot length of galvanized pipe which has been driven in moist earth should be made. Both the antenna and ground wire used should be No. 14 copper wire, while the lead-in to the receiver from the antenna may be made with the same gauge wire but well insulated.

Tuning

Three dials are provided for tuning, the smaller knobs, just below, acting as radio frequency control and rheostat control for the detector filament. After connecting the batteries and placing the tubes in their respective sockets (five 201-A or 301-A being recommended), the battery switch at the bottom of the panel should be pushed in to light the filaments of the tubes. Set the lower right hand knob with the arrow in a vertical position if the A battery is new or a little beyond this point if not fully charged. Turn the three large operating dials to their zero position. Turn the detector rheostat, which is the small knob on the right, until a slight hissing noise is heard, then retard it just below this point, or until the hiss disappears. The receiver will then be ready for operation.

To tune in a station, first turn the lower left knob to the right until a rushing sound is heard, being careful not to turn this knob too far or this sound will stop and it will have to be retarded. Next, rotate each of the larger dials forward from their zero reading slowly and with each in step, or at approximately equal setting. When a station is heard, each dial should then be individually adjusted for volume. Very often one will find that after a station is tuned in, a slight readustment of the lower left knob will be of benefit. It doubtless is not necessary to caution the operator to shut off the receiver, by pulling the filament switch out when through operating. Failure to do this means but an added expenditure of battery current and shortening of the tube life.

Trouble Shooting

While this receiver is so designed as to be practically foolproof, there may, at times, occur minor troubles which are annoying, but which are not defects within the receiver. Assuming that your antenna is well insulated and strung tight enough that it does not swing, also that your ground connection is well made, and your batteries in good condition (the A battery should register between 1250 and 1300 with a hydrometer and each block of B battery should register not less than 38 with a reliable voltmeter), the incidental troubles and their remedy may be classified as follows:

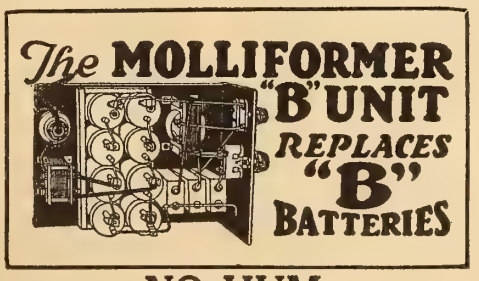
NO ACIDS



NO TUBES

NO HUM

BUILD YOUR OWN

Here is the B-ELIMINATOR your set needs and you can save money by building it yourself. The Molliformer B Unit is guaranteed to operate any set from one to ten tubes with a vast improvement in the quality and tone, and a big increase in volume.
It is absolutely noiseless—all A. C. hum being banished forever due to exceedingly high inductance. No expensive rectifying tubes are used —employs only improved electrolytic full wave rectifiers.

The MOLLIFORMER B UNIT will furnish you with ideal B-current for years to come.

Model FW4 is designed especially for 5 or 6 tube receivers, requiring no more than 100 volts on the amplifiers. This and model FW8 can be readily assembled by the home builder with every assurance of perfect results.

FREE—Write for Mr. Jacobs' complete description of the Molliformer B Unit

PRICES

The kits listed below include all the essential parts necessary to assemble the unit complete.

Model F W 4—complete kit, 60 cycle A C $17.00
Model F W 8—complete kit, 60 cycle A C 22.50
Model F W 4—Assembled complete 24.50

25 and 40 cycle transformers $2 additional
Kits include rectifiers. **Parts sold separately.**

OPERATING THE ERLA

(Continued from page 25)

Have you closed the battery switch? Are the connections to your A and B batteries secure? Are these connections made correctly—that is, not reversed? Do all of the tubes light? If not, remove the offending one and bend up the socket springs slightly. If the receiver gives a sharp click in the head phones or loud speaker when the attachment plug is inserted in the jack, this indicates the B battery connections are correct. If not, their connections may be reversed, or one of the wires broken.

Noisy Reception

A continuous low-toned hum is usually due to your antenna running parallel rather than at right angles to a power line or electric light wires. Leaky transformers also will create this effect. After changing direction of antenna, if this hum still obtains, report your trouble to the lighting company.

If this hum is high pitched, the grid connection has become loose or the grid leak is not in its position. Also look for loose connections. In place of a high pitched note, this trouble is sometimes noted as a knocking or tapping sound.

A scraping sound when the large dials are turned as a rule indicates dust between the condenser plates, which may be removed with a pipe cleaner.

Howling and shrieking is usually caused because the rheostats are turned too high, while scratchy, rasping noises indicate a run down B battery, accumulation of dirt or moisture upon the surface of the batteries, or loose connections.

The Reader's View

Truly It's a Nuisance

Can't you impress every week that this cheap broadcasting is not listened to? Also this cheap singing; this cheap hollering to one another; this cheap banjo playing. Just as soon as we get a few notes of it, we all tune out and get some real music elsewhere. Further, after a few times we all avoid that station. Some of it is dreadful. Truly it's a nuisance.—A. S. B. Huntington, W. Va.

Speaking of Single Circuits, Wow!

I am a regular reader of the Digest and would like to express myself as to present day reception of the fine programs broadcast by most of our generous broadcast stations. I have been a B. C. L. for eight years and few are the stations to whom I have not sent a few lines of appreciation.

However, I have often wondered if all this effort and expense was not mostly a waste of time and money on the part of both the broadcaster and the B. C. L., for this reason: We all know what a tremendous effort is made to transmit and also to receive distortionless music and speech. Why should all this be offset by the contemptible dim-wits who still persist in using, and continually twisting the dials of, the disgusting squealer set, or single-circuit, for the reason that he has not the brains to construct a present day receiver of the non-radiating type nor the ability (or is to lazy) to accumulate enough money to buy one? Why does not our government, that displays so much interest in Radio in some respects, also show a little reason on this point and banish, into the discard, this type of would-be receiver along with other undesirables? I have heard the old gag about the heroic (?) place this hook-up deserves because of its usefulness in the early days. How about the old-time outhouse?

I must add that I consider a person a degenerate that would perfer to listen to nothing but squeals and howls (only reproduced this side of H—— by the d—— single-circuit) than to the beautiful musical and vocal selections that are the result of such painstaking effort on the part of station operators and lost to the majority of B. C. L.s because of a moron or two in every locality.—R. McB. M., Mansfield, Ohio.

Form For Announcers

I want to add my voice to the protest against unsatisfactory announcing. May I suggest the following as a model form for announcers to use?

"Radiophone XYZ, Chicago. You Have Heard So & So Play 'Normandy.' (*) The Next Number Will Be 'Roses of Picardy' By Whosis. XYZ, Chicago."

Now I will explain why I think the above is the ideal. I have often noticed that in cutting from the performers "mike" to that of the announcers the first letter and sometimes the first two letters of the call are lost. Hence the suggestion that the announcement be started with "radiophone" or some other suitable word. The asterisk (*) indicates the place in the announcement where it would be convenient to acknowledge requests and communications, if customary at the station. I have placed the station call letters both at the beginning and at the close because, very often a station is tuned in during the announcement, and if the following number is not cared for, the station is tuned out without its identity being disclosed.—R. W. L., Atchison, Kan.

Pleases Only One

In your issue of December 26, you published a letter from one, "W. A.," Covington, La., in which letter W. A. deplores the fact that WSMB at New Orleans, was handed the razz by one of your critics. More power and long life to this critic.

The announcer at any Radio station who reads into the microphone telegrams received from various listeners in, deserves to be hung, shot, electrocuted, razzed, or what have you.

It is my opinion that the only person who gets any kick out of hearing a telegram read from a broadcasting station is the person who sends that telegram. When one stops to consider the fact that out of the large audience of most any broadcasting station, only one or two persons are entertained when the announcer broadcasts a telegram received by the station, it is quite evident that the broadcasting station is serving only a fraction of a per cent of its listeners.—J. B. S. Florence, Ala.

Interference Troubles and Mr. V-63

On recently returning home from a trip, I found several copies of Radio Digest, including one of November 21, 1925, on page 24, of which appears a letter from one V-63 (evidently a "Cadillac owner") of Pittsburgh, Pa., which interested me.

It appears that Mr. V. has a very poor receiving set or he would experience absolutely no trouble from the high power short wave telegraph stations along the coast. I am only 100 miles farther, by airline distance, from WIR and WIZ than he is, yet on any receiver in this vicinity which makes any pretense towards selectivity, no trouble is had at all from this source. On the other hand, many local users of the famous "Eastingbarn Audiola 553" get not only these two stations, but KDKA's 62.5-meter transmitter, all over their dials at times. The only remedy for this is to substitute properly designed radio frequency input apparatus for the criminally inefficient and broad tuning equipment usually supplied on low priced receivers. Methods of adding tuned or untuned primary coils to this type of single circuit receiver have been described from time to time in Radio Digest.

Mr. V-63 also mentions the interfering (?) stations "mixing up" with harmonics of broadcasting stations. Well, broadcasting stations have no business smearing harmonics all over the short wave bands. To show you how bad these are, the first time I ever heard WHGP of Detroit, was one day when I picked up his 4th harmonic, coming in very strong. KDKA and some other stations use some mysterious harmonic suppressor circuits which seem quite effective. A broadcasting station is licensed to transmit on, say, 300 meters, but this license does not authorize the radiation of signals at the same time on 150, 75, 37.5 and 18.75 meters. Yet many stations are doing just this thing right now. Such harmonics not only "bring in" interference, but they are also liable to cause much trouble in commercial Radiotelegraph and relay broadcasting. About a week ago I was listening to KDKA's 62.5-meter wave and some other station on the broadcast band was radiating on a harmonic just a few kilocycles off KDKA's frequency, causing a bad heterodyne squeal, made worse by the fact that the interfering station's wave was "wabbling" badly. One can easily understand the effect that this would have on any attempt at retransmission from KDKA's short wave signal.

No. Mr. V-63, the remedy lies not in suppressing everything but broadcasting, it lies in cutting out some of these broadcasting stations which radiate on all harmonics, and also the elimination of the single circuit tuner and the crude and sloppy variety of super-heterodyne.—H. G., Kitchener, Ont., Can.

Popular Music for Majority

A reader of your publication almost since the birth of Radio broadcasting, I am influenced to write a word of indorsement to what a communication signed L. F. W. had to say in regard to popular music from the broadcasting stations. Classical music, for those who can appreciate it and who know enough of music to understand it, is no doubt a great thing.

But Radio, like a newspaper, must serve the majority—the masses of its listeners. And the great majority of those possessing Radio sets do not have the gift of talent with which to truly appreciate classical music.

A popular tune is enjoyed by nearly everyone. By this I do not mean, necessarily, "popular" in the sense of jazzy orchestral music, but the popular lyrics of both our own day and that just passed.—J. H., Waco, Texas.

We Are Trying to Help

At the Radio convention, called by Mr. Hoover, it was affirmed by the Radio interests present, that in future all rules concerning broadcasting were to be made for the benefit of the listener.

This being true, is there any chance that the air is to be cleared up by taking some of the stations off the congested wave lengths?

Has it been suggested that if each broadcasting station were restricted as to the time it might be on the air, and each assigned such periods of time as would not conflict with others on the same wave length, the listener might profit?

Why, we wonder, don't station owners and advertisers realize that when the air is a mess of conflicting programs no program comes through clearly and all are lost? And that when one powerful station on any wave length broadcasts almost continually, others on that wave length are practically never heard by listeners in the range of the powerful station mentioned?

My set brings in stations of 500-watt power as far as 2,500 miles away; yet, because nearer ones are never at rest, I get only a very limited number of stations with my good set, and many who would profit by presenting their advertising programs to me are never heard, while I regret not hearing them.

Poor announcing is an aggravation; power noises are worse; howling sets in the hands of careless owners are anathema, but of all the patience destroying woes of the Radio receiving mortal, the overcrowded spots in the air are the limit. The worst of it is that apparently the trouble could be remedied for the benefit of all concerned, and without great effort. Can the Radio Digest go into the matter and explain why it is not done?—E. A. C., Spokane, Wash.

Corrosion in aerial and lead-in contacts is a common cause of poor reception.

Construction of B Current Power Supplies

Part II—Molliformer Chemical Type

By George Walters

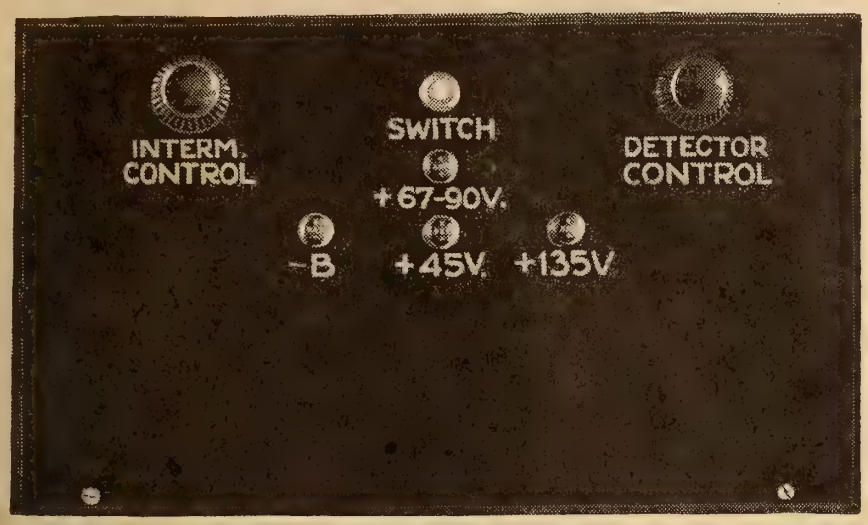

Figure 1. Front view of completed Molliformer B eliminator. The binding posts for the various voltages are indicated.

IN THE first article of this series, presented last week, the writer stated there were four types of rectifiers, and the construction of that using a no-filament tube was described. We will now consider that type which uses a chemical solution in jars to change alternating light current into direct current. This unit will supply current to the largest super-heterodyne as a four-jar model was used by the writer all last season on one of Jacques Fournier's four-filter supers, and the present model has eight jars. This second power supply is so arranged that three different B voltages are available, with the lower two variable. Thus if your super or tuned radio frequency must have 40 to 50 on the detector, 60 to 90 on the radio frequency amplifiers and 100 to 140 on the audio frequency stages you have these voltages.

Chemical Rectification

It has been found that if a jar is filled with a solution of water and any of several substances, one of which is borax, and in this jar we place a piece of aluminum and a piece of lead, current can pass through this solution in only one direction. If, therefore, alternating current is connected to such a jar and a device which requires direct current, every other alternation or one-half of each cycle will pass through, but the other half of each cycle will be cut off. This is called "half wave rectification" and there are several B power supplies available using this principle Some have a jar as described, some use a tube, but only half the cycle is made use of.

So that a large set of six to nine tubes can be supplied, it is, in the writer's opinion, essential that a B power supply be so constructed that both halves of the cycle are used and all the pieces of apparatus made large enough to pass 50 to 60 milliamperes of current. Accordingly, eight jars are used, with four on each side of the output leads of the transformer, and both halves of the cycle are put to work without overheating and with the ability to pass plenty of current. Each jar contains a solution made up from powder (supplied by the manufacturer of the Molliformer kit) which is dissolved in water, an aluminum rod and a rod made of either lead or graphite.

Filter

When the current leaves the jars it is direct current but pulsating to an extent that would produce a most undesirable hum in the loud speaker. To remove or smooth out this pulsating, or "ripple," as it is called, several pieces of apparatus are provided to form what is called a filter. A large coil on an iron core is provided with the kit which has a value of 125 henries, and three comparatively large fixed condensers are used with it. One is used before the choke coil, one immediately after it, and a third must be used across the detector supply output. Since the writer has added somewhat to the design intended by the maker of this outfit, we must have, also, a Tobe 2.0 mfd. condenser for use across the intermediate voltage output.

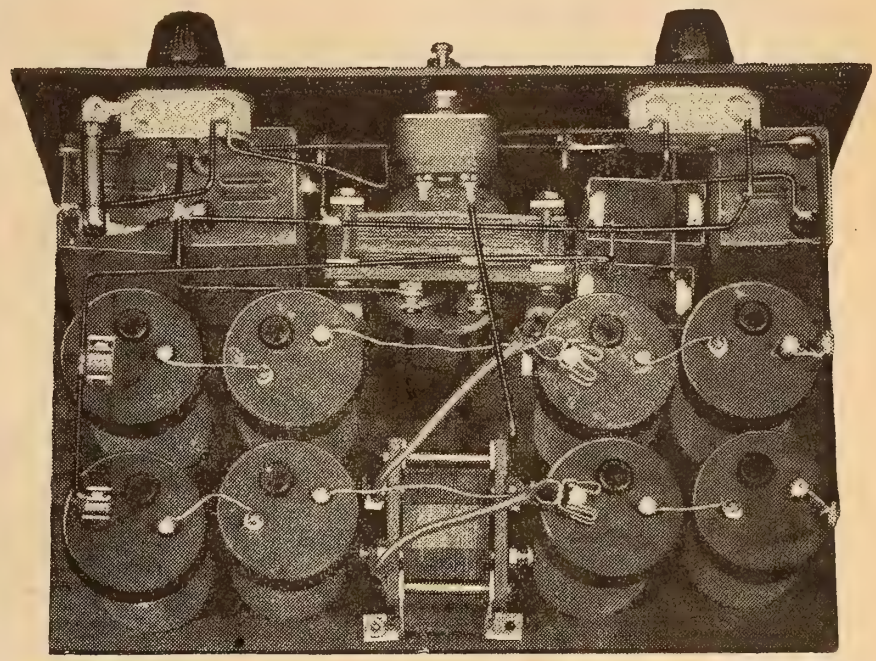

Figure 2. Rear of panel and baseboard view. The wiring and the arrangement of the various parts is clearly shown.

When assembling each jar it will be noted that each aluminum rod is provided with a rubber sleeve. This should be adjusted on the rod so that about 1 inch of the rod is exposed at the lower end and the upper end of the tube comes flush up against the underside of the rubber cap on each jar. The aluminum rod goes in the hole marked plus on each cap and the graphite or lead rod goes in the negative hole. In placing the jars as shown in the photograph, the last jar to the right in both the front and back rows is turned so that the aluminum rod is to the right. All jars are then placed this way so that the last jar to the left in each row has its lead plate to the left.

The transformer is set with primary terminals to the left and secondary to the right. The large choke coil is set

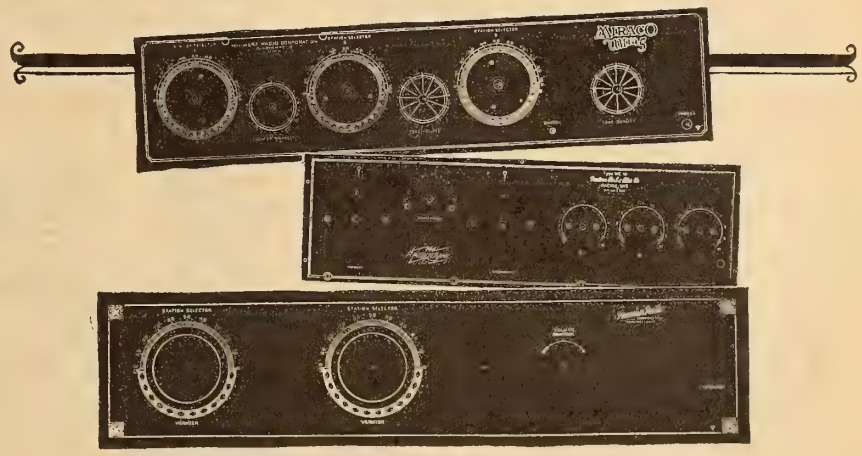
World Batteries for Radio



Now Formica Offers Complete Panel Service!

FORMICA has improved its service to American radio manufacturers by offering completely decorated and finished front panels. The decorations are done in gold, silver and other colors by the Veri Chrome process. They are by far the most handsome panels in use in radio today—and the panels with the most permanent finish and surface.

This service is now extended to those amateurs who wish to assemble certain well known kits.

Dealers and jobbers are stocking and supplying kit buyers with the following decorated Formica panels: Bremer-Tully No. 1; Bremer-Tully Counterphase; Bremer-Tully Nameless; two sizes of Best's Superheterodyne put out by Remler; the Four Tube Browning-Drake of the National Company, and Marco-Browning-Drake and General Radio Universal Receivers.

Formica panels in all the usual standard sizes are sold by most good dealers. Each panel is packed in a neat individual envelope.

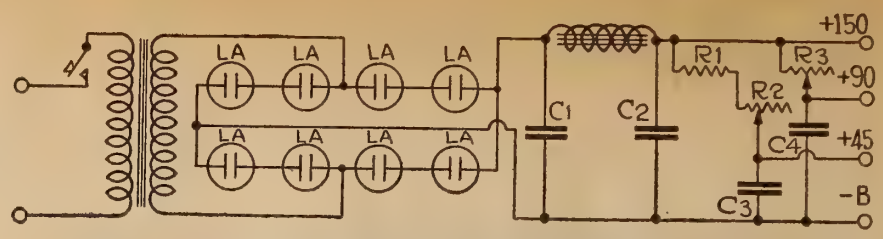

Figure 4. Circuit diagram for B eliminator.

CHEMICAL ELIMINATOR

(Continued from page 27)

with terminals to the rear and the Allen-Bradley resistors are turned so that terminals are upward. The number 10 Bradleyohm goes to the right. While the writer used two Tobe 1.0 mfd. condensers, only one condenser of 2.0 mfd. is preferable and specified; connections would be the same. Wiring is done with stiff bus bar at all points except between jars, which will support the upright fixed condensers and make a better looking job.

Wiring

The long wire which connects the lead rods at the left end of each row comes forward and then across the front terminals of all four of the condensers, can be put in first. Then the wire connecting the two aluminum rods at right end of each row is put in and bent to the left down to the rear terminal of the Tobe 2.0 mfd. condenser which is C1 in the diagram. An offshoot from this goes to the left terminal of the choke coil. A wire now connects the right terminal of choke coil to the rear terminal of the fixed condenser to right of choke which is C2.

This rear terminal of condenser C2 is a starting point for the three different voltages. From it we first run a wire across to left and up to left terminal of the special Bradleyohm in upper left corner of panel. An offshoot from this wire goes forward to the binding post at the right end of the row of three and this is the high voltage tap. From the right terminal of the special Bradleyohm, put

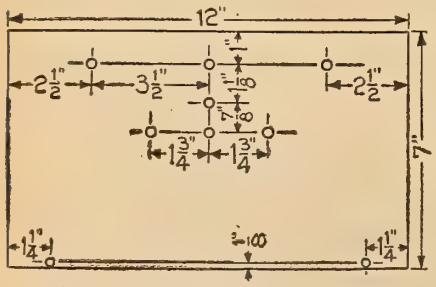

Figure 3. Panel drilling layout.

in one wire to rear terminal of fixed condenser at front left corner of baseboard, and from this same terminal of the Bradleyohm run a wire down to the single binding post just below the switch. This binding post will be the intermediate voltage tap if needed.

The fixed resistor which comes with the kit is supplied with two clips. Put a short 6-32 machine screw through the hole in each clip, slip on a long soldering lug and then a hex nut. Study of the photograph will show that the front clip is upside down with the soldering lug pointing to the left and secured under the right terminal of the number 10 Bradleyohm. The rear clip is right side up with its soldering lug also pointing to left and connected to the rear terminal of condenser C2. This leaves the left terminal of number 10 Bradleyohm open. Connect one wire from it, down to right to rear terminal of condenser in front right corner which is C3, and another wire from it to center binding post in row of three on panel. This gives us our detector voltage, around 45.

Mixing Solution

A wire about 1 inch long can now be inserted from the left binding post of the row of three up to the long wire connecting the front terminals of the four fixed condensers and this is negative B. At this point it would be a good idea to mix the solution and pour it into the jars. This should be done in a large, clean glass or earthenware bowl or dish and the solution should be stirred with a clean glass or rubber rod. Using one of the jars to measure with, put in 6½ full jars of cold distilled water. Then add the quantity of white powder furnished with the kit and stir well until all is dissolved. Each jar is to be filled three inches deep with solution.

Now place jars in position as shown and turn until rods are all in line, with lead to the left in each case. Then in each row connect aluminum of left jar to the lead of second from left jar and aluminum of second from right end jar to lead of right end jar. Now connect rear secondary terminal on transformer up to aluminum of second from left end jar in rear row and at same time bring over wire from lead rod in second from right end jar to this aluminum. Then the front secondary terminal is connected to the aluminum of second from left end jar in front row and wire from lead rod of second from right end jar in this row is brought over to that aluminum.

Connecting and Adjusting

The final connection is from the front primary terminal of transformer to left terminal of switch. If entire unit is to be placed in a cabinet, it should now be placed in cabinet and a hole drilled in rear of cabinet for the twin or twisted conductor from light socket. One of these two wires is connected to right terminal of switch and the other to rear primary terminal of transformer. The light socket plug is connected to the other ends of this twin cord and unit is ready for operation. Check over all connections once more and connect to your receiver. Then pull switch on front of B power panel and turn switch of receiver to on position. You will hear nothing for a few minutes, then a few snatches of music very ragged and "growly." This happens only on first installation as the rectifiers have to work up a gas film. Pretty soon, if you leave set tuned to a good program, the raggedness will disappear and then the hum. Remember, the Bradleyohm to left controls the intermediate voltage and that to the right, the detector voltage and these should now be adjusted for clearest reproduction. Slight change in the adjustment of the rheostats on your receiver may be necessary with this unit, from those settings to which you are accustomed when using B batteries.

At this point the writer wishes to give you an important fact in connection with all these B eliminators. The voltages from them cannot be measured with the ordinary B battery voltmeter. To get the exact voltage one should use a milliameter and known fixed resistances. By multiplying the reading of the milli-

(Continued on page 30)

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

U.S. PAT. MAY 27, 1924

Genuine Fansteel
Balkite "B" Eliminator
Sent for Only
$1.00 *Down*

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

$5.00 a Month, if satisfied after trial

Only $1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your $1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only $5.00 a month until you have paid the total price of only $35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. **Order by No. Y-8578A, $1.00 with coupon; $5.00 a month; total price $35.00.**

Unitrola: Single Dial Phonograph Receiver

Part IV—Adjusting and Tuning

By Carl Patterson

IN PART III, published last week, the Unitrola was taken through the wiring and final assembly and was ready for operation. We are now ready to slide it into the phonograph, connect it up and bring in stations. If you choose to rest this receiver on the bottom of the record compartment, nothing further is necessary, but if you prefer to have the batteries in with it a shelf will have to be figured out. The writer handled this situation by putting in ½-inch by ½-inch strips on each side of the compartment with the upper surface of each 8 inches from the top. A light wooden shelf was then made, just the width and depth of the compartment and the completed receiver was secured to it, so that the lower edge of the front panel was ½ inch in from the front edge. This ½ inch was allowed because the rheostat knobs protrude slighty and the doors on the front were to be closed when the set was not in use. A hole was then drilled through the shelf directly behind each of the battery binding posts so the wires could go down to their respective battery clips.

The Speaker Cord

This arrangement left room below the shelf for a Philco glass case storage battery, a Balkite trickle charger, a Benjamin series two-way plug with lamp, and two large Eveready B units. Since each machine is different in the dimensions of this compartment you will have to do a little figuring on this part yourself. The cord for the speaker unit to be used on the machine is the next point. Here the writer lifted out the top panel in the phonograph, complete with its mechanism, and drilled a hole through, back of the horn, into the record compartment. Then, replacing the mechanism panel, a hole was drilled, above the first, in this panel, for the cord. Thus the cord comes up through the thin board forming the top of the compartment and through the panel above the works to the unit. Neither hole has to be very large, 3/16 inch should be enough.

The speaker cord tips are connected with the tip which has the tracer thread going to the fourth binding post from the left and the unmarked tip to the third. Antenna and ground are brought in through two 3/16-inch holes drilled either in the bottom or the back, about two inches apart. Antenna goes to number 1 binding post and ground to number 2 post. All these accessory connections should be made with the panel slid half way out of the compartment with the front edge resting on a chair or other support. The storage battery, or one of the so-called eliminators on the market, is then connected with its plus terminal going to binding post number 6 and its negative post to number 5. If you are not familiar with these terms it may be explained that the plus post on your battery is usually marked with POS., a + sign, or with a touch of red paint. The negative is, of course, the other terminal, and is marked with a — sign or NEG.

The B battery units, whether dry or wet, each have a plus and negative terminal. The negative of one is now connected to the third binding post from the right end of the strip, the positive of the same unit goes to the second from the right and also by a short length of wire to the negative of the second B unit. The plus of this second unit goes to the last binding post to the right. The last step is the insertion of the tubes. These new UX bases may be a little confusing at first if one has been used to the old UV type. Once you get used to this new arrangement though, you find it much more convenient with no question of springs touching pins or bayonet pin sticking in the socket.

Considering the sockets in the order in which they were numbered for wiring, turn the tube to go in socket 1 so that the two large pins in the base are toward the inside of the set, with the smaller pins to the left. Tip the tube into a vertical position and push down firmly and the tube will click into security. With socket number 2 turn the large pins to the front, with socket number 3 the small pins are to the right or outside of the set. When putting the tubes in sockets 4 and 5, the large pins are, of course, to the rear. Now see that each Amperite is securely in its mounting and the 2-megohm grid leak is in the Daven mounting. In operation 35, the last of article III, the copy read that the lead common to the F terminals of the Bodine coils was to be connected to the plus terminal of the left C battery. This should have read to the negative 4½ of this C battery. This can be readily changed at this stage of the procedure.

Preliminary Adjustments

Now slide the set back into position with rear edge of shelf against rear wall of compartment. The Pilot switch to the right is then turned to the "on" position and red lamp will glow. Then turn Dialite to right so its rays can light up the dial. The rheostats at the bottom should be turned clear to right as far as they will go and then back about ¼ inch as a preliminary adjustment. Then turn left C-R-L unit to right to its limit and right C-R-L so that arrow is just to right of vertical. The small compensating knobs below and beside large dial are set so that each points outward. You are now ready to tune the set for initial tryout.

Turn the large dial, whether vernier or plain, through its complete scale and, if you are fairly near a large station operating at the time, it will be heard, though perhaps faintly at first. If nothing is heard, advance the right C-R-L and try it again. If still no results, advance both rheostats. The next suggestion, in case of no signals, is to set right compensator with arrow vertically and swing through scale. The next move would be to bring it back to horizontal, set left compensator at vertical and swing through range. One of these combinations will bring in signals if all work has been done correctly.

When program is heard, carefully set large dial for best results, then adjust each compensator, which will bring all three grid circuits into resonance. Then move the right rheostat back and forth until strongest and clearest reproduction is obtained but keep it no further to right than is necessary as this would burn up energy and shorten the life of the tube. The left rheostat can then come in for attention, after which adjust the left C-R-L. The left rheostat and left C-R-L may be adjusted together as they are interdependent on each other. For example, if the rheostat were turned back slightly and C-R-L adjusted to maximum, advancing rheostat would spill the tubes into oscillation, or tuning to a lower wave length would do the same. Find a position of the rheostat, probably just about ¼ inch back of the limit, at which oscillation could be effected at any setting of the large dial by means of the C-R-L.

With a program brought in to maximum efficiency by means of rheostat, compensator and left C-R-L adjustments, turn the right C-R-L to the right until program starts to blur or distort. If distortion creeps in before you reach satisfactory volume, try switching the tubes around in their sockets to get the two best suited for radio frequency amplification in sockets 1 and 2, the best detector in 3 and that best suited to handle a lot of energy in socket 4. There is not likely to be trouble with the tube in socket 5.

Trouble Shooting

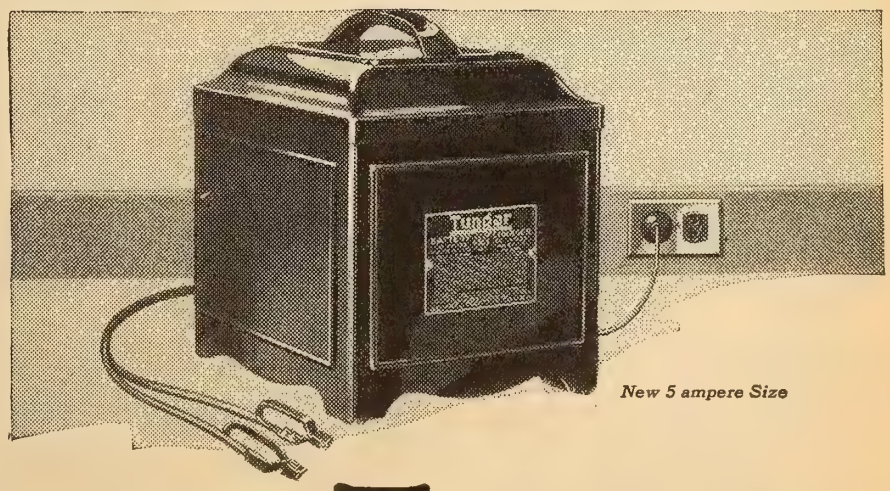
There are two possibilities in connection with the operation of the compensators. In some cases, a position of each will be found that holds good throughout the tuning range of the large dial, while, in others there will have to be a slightly different position of each for the upper and lower range of the dial. This will depend, in the case of the right compensator, upon the antenna used. If by any chance you cannot bring this first grid circuit into resonance with the other two at some portion of the tuning range, it will be necessary to insert a .00025 mfd. condenser (fixed) in the antenna lead-in wire, or possibly even a .0005 mfd., due to the great length and consequent influence of the antenna system.

The grid leak may possibly be changed for better results although due to detector having an individual rheostat and individual control this is not likely to be the case. If you happen to have several resistors between 1 megohm and 5 megohms you might try them. You will probably find, as has the writer, on tuned radio frequency sets, that lower values permit greater volume with clearness on local stations while higher values give slightly better results on DX work. Values of 2, 3 or 4 are usually good.

If you get into trouble think over the possibilities of where it might be, logically and carefully. Do not be afraid to try one or two things and remember that 80% of all Radio set troubles are in battery connections and oversights on the part of the user. Is the storage battery charged? Make sure. Do the B units test 38 to 45—with a good high resistance voltmeter? Borrow one and try it if you haven't one. Try your tubes in someone else's set to be sure you aren't trying to get 100% results on a poor tube or one that is worn out and cannot possibly deliver. Then check your wiring. Be sure that the connection passing through the hole at right lower end of condenser is not touching. Look out for that extra soldering lug on the rear end of condenser at left side, on the last stator. It fooled this writer and had us tearing the set apart, because it had gotten bent down against the end plate.

Did one of the wires in the coils come unsoldered from a terminal when you were putting on a connection? It might easily happen despite all care in manufacture. It may be, too, that one of the nuts on a transformer is a little loose. If you find this so, carefully loosen the lock (knurled) nut on top, remove solder-

(Continued on page 30)



New 5 ampere Size

Say Tungar

when you want the best battery charger

"Tungar" is fast becoming the word for battery charger. And no wonder!

Tungar is the trouble-proof, easy-to-use charger for *all* batteries. It's the original bulb charger. It's manufactured by General Electric. It makes no disturbing noise. It can't blow out Radiotrons and it cannot create radio interference.

The Tungar Is a G-E product, developed in the Research Laboratories of General Electric.

The new Tungar charges any make and size of storage battery: radio "A" and auto batteries, and "B" batteries as high as 96 volts in series.

East of Rockies

Two ampere size $18.00
Five ampere size $28.00

60 cycles . . 110 volts

Steinite Low Loss Interference Eliminator

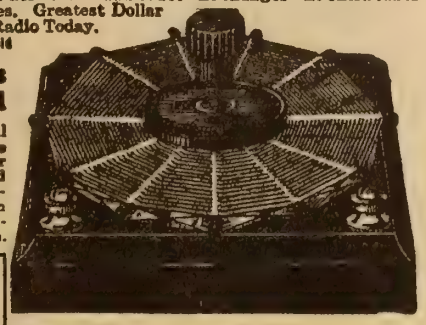
No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

Over 150,000 Sold

Improved Results with Tube or Crystal

Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. Money-Back Guarantee.



Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢ — Three for $1.

Steinite 5-Tube Set $29.75

FREE Descriptive Literature on request.

$1 Postpaid If you are not delighted with results you get your dollar back

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

SHORT WAVES

By Marcella

(Continued from page 11)

mits he is married and has a little boy 5 years old. Charlie is the fellow that barred sopranos from WBBM's microphones. As a result he is still receiving nasty letters from us ladies calling him on the carpet for his act. No, Mr. Garland is not the notorious Charles Garland of crime newspaper story fame. The latter is not even recognized as a relative.

* *

We, meaning Radio Digest, located Jack Little last week. He was down at WSAI, Cincinnati. Incidentally, here is the real, honest-to-goodness low-down on this famous character. His dad tipped me off, so here 'tis:

His real name is Jack Leonard. He is the son of Mr. and Mrs. James Leonard of Waterloo, Iowa. He is really quite small, measuring only five feet three inches in height. He is 25 years old.

* *

Those of you ladies who admire Henry Selinger, of the Drake concert ensemble heard over WGN, will be glad to know that he is handsome and unshackled. He started his career by reading a correspondence violin school ad, and graduated by going to the post office for his diploma. Since then he has become quite popular on the air, and he still uses the violin that came with his lessons.

* *

Wendell Hall's charming wife was in to tea with Marcella not so long ago. "Do you mind the ladies' love letters your husband receives?" I asked. "Not at all," she replied, "I answer all of them myself."

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

CHEMICAL ELIMINATOR

(Continued from page 28)

ameter with the value of the resistance one will get the exact value of the voltage. The ordinary B battery voltmeter will not show more than about 15 volts.

Final Suggestions

If the unit is used on a super-heterodyne, and two detectors are connected to the 45-volt binding post, it may be necessary to short circuit the fixed resistor in the clips identified as R1. As a rule there will be absolutely no hum with this unit. If there is, the trouble is usually that the B unit is placed too close to the receiver or the light line comes too close to it, and the receiver will pick up the hum from the light wires. Another cause of hum is too high a plate voltage on the radio frequency tubes. This can be cut down by the left Bradleyohm and the use of C battery in the grid return leads of the radio frequency tubes. If unit is put in a cabinet, it would be well to drill holes for ventilation. The writer drilled six 3/8-inch holes in each end near the bottom and seven 3/8-inch holes across the back about 1¼ inch from the top. This permits circulation of air around the jars and transformer which is desirable in summer time.

Should you have trouble getting any of the material locally, the address of C. E. Jacobs, maker of the Molliformer kit, is 2802 North Kedzie avenue, Chicago, while that of Tobe Deutschmann, maker of the extra condenser is Cornhill, Boston, Mass. Molliformer kits for 25, 40 and 50-cycle current are $19.00. The other concerns can be reached from addresses given in list of parts.

(A third type of B power supply which incorporates a heated filament tube, the UX-213, will be described by Mr. Walters in next week's installment. A new Thordarson transformer, type R-197, supplies the filament current and also the high voltage plate current.—Editor's Note).

MAKING THE UNITROLA

(Continued from page 29)

ing lug and, with one pair of pliers hold the screw itself firmly. Then with another pair of pliers tighten the hex nut. If you do not hold the screw tightly, you may turn it and break off the connection inside. Do all these things, check all these things, no matter how sure you are or how silly they may seem, before you write in to the technical staff. They have a lot to do, answering essential questions by the hundred, working out new devices for you and writing them up.

AVOID FALSE ECONOMY

(Continued from page 11)

woman telling you how you should economize. I can only suggest that you take stock of your economies, pigeon hole them where they belong, and if they do turn out to be extravagances, make them over or put them down as commendable luxuries rather than to fool yourself into thinking they are economies.

OPEN "BLOOPER" WAR

(Continued from page 3)

interference, receiving conditions will be remarkably improved for everyone in the country.

Legislation, with penalties attached, is not believed by Radio Digest to be the way to solve the problem. Enforcement of such laws would be costly and almost impossible. It is the aim of Radio Digest to secure the cooperation, without legislation, of every listener.

Fill in and mail the pledge appearing on page three, TODAY.

To help pledging fans to carry out their promise, Radio Digest will begin, with the February 13 issue, a series of non-technical articles aimed to show if possible how one can make his receiver non-radiating.

Hints and suggestions for the improvement of one's receiver, together with general, basic lessons in operating receivers properly, will be contained in this series of articles.

Simple rules in using a set, if followed, will stop a set from radiating. If the majority of listeners sign the pledge to do their best to prevent radiation, the problem will be more than half solved.

Join, and get your neighbor to join, the Radio Digest I WON'T BLOOP CLUB. Mail your pledge today.

ADDRESSES WANTED

THE Technical Editor wishes the present addresses of the following readers: Mr. Charles Ackerman of Philadelphia, Mr. Fred Bradley of Ann Arbor, Mich., Mr. Robert Harrington of Dayton, Ohio, and Mr. Jack Lenox, somewhere on the Orpheum circuit. If you know any of the above please call this to their attention, or write the Technical Editor giving the information.

To Broadcast Frequencies

WASHINGTON. — Announcement is made by the Radio laboratory of the bureau of standards that standard frequency signals will be transmitted by the bureau laboratory (WWV) and 6XBM, Stanford University, Calif., on the fifth and twentieth day of each month for the next three months, between 10 and 11-32 p. m., Eastern and Pacific times respectively. The frequency range to be covered will be between fifty and 2400 meters.

CKAC Starts Own Capitol Hour

MONTREAL.—Canadian Radio fans will have their own Capitol theater hour from now on through the cooperation of CKAC, La Presse station here, and that of Harry Dahn, manager of the million dollar playhouse located in the heart of the Canadian metropolis. This new departure, in Montreal, took place on a recent Sunday when a de luxe program was given by CKAC direct from the stage of the Capitol.

This broadcast from CKAC takes place every Sunday afternoon at 2:45 eastern time.

KMTR, Los Angeles, Calif. 238m-1260kc. 500 watts. K. M. Turner Radio Corp.

KNRC, Los Angeles, Calif. 208.2m-1441kc. 250 watts. Kieruff & Ravenscroft Co. Announcer, "Hastings." Daily ex Sun, 10 am. Mon, 1:30 pm. Tues, Wed, Thurs, Fri, 7-9 pm. Pacific.

(Note—The second part of the station data list will appear next week.)

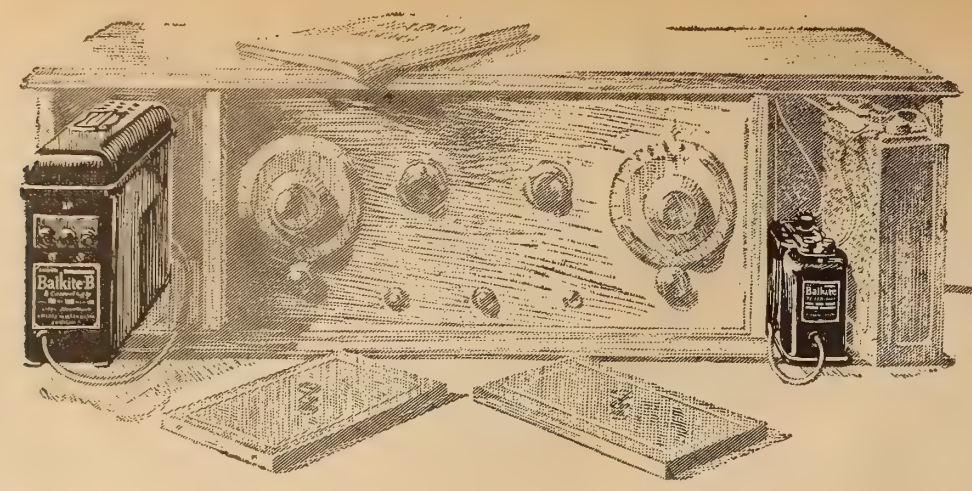
CHALLENGE!

ONE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are located. Station verifications must accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O K'd as correct and returned to the Digest. Nevertheless, sometimes the stations are careless and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The information contained in each station data listing is given in the following order: Call letters, city, state, wave length used, watts antenna input, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is denied.



Convert your receiver into A LIGHT SOCKET SET *with* Balkite Radio Power Units

Now you need wait no longer for a light socket set. Balkite Radio Power Units—the Balkite Trickle Charger and Balkite "B"—enable you to make a light socket set of your present receiver.

The Balkite Trickle Charger converts your "A" battery into an automatic "A" power unit that furnishes full "A" current from the light socket at all times. Balkite "B" replaces "B" batteries entirely and furnishes "B" current from the light socket. As an added convenience you may purchase from your dealer an automatic switch that cuts out the charger and turns on Balkite "B" during operation.

This popular light socket installation is the last word in radio convenience. It is extremely simple to install, economical both in initial cost and in operation, and is so compact it will fit in practically all present battery compartments. Revolutionary in the convenience it gives, yet it is composed entirely of units that have demonstrated their success over a period of time.

Noiseless—No bulbs—Permanent

All Balkite Radio Power Units are entirely noiseless, have no bulbs, no moving parts, nothing to break or get out of order. All are permanent pieces of equipment. Their current consumption is ridiculously low. All operate from 110-120 volt AC current, with models for 50, 60 and other cycles. *All are tested and listed as standard by the Underwriters' Laboratories.* If you already own a receiver, equip it with Balkite Radio Power Units now. If you buy a new receiver, buy it Balkite equipped from your dealer.

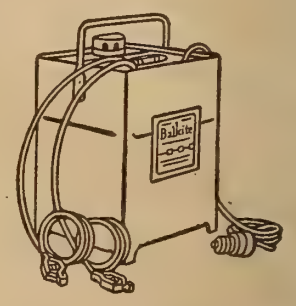
The Balkite Railway Signal Rectifier is now standard equipment on over 50 leading American and Canadian Railroads

FANSTEEL

Balkite *Radio Power Units*

Balkite *Trickle Charger*

Converts any 6-volt "A" battery of 30 ampere hours capacity or more into an automatic "A" power unit that furnishes "A" current from the light socket. With 4-volt and smaller 6-volt batteries may be used as an intermittent charger. Or as a trickle charger if a resistance is added to cut down the charging rate. $10. West of Rockies, $10.50. In Canada, $15.

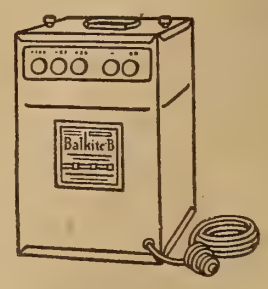


Balkite *Battery Charger*

The popular rapid charger for 6-volt "A" batteries. Noiseless. If your battery should be low you merely turn on the charger and operate the set. Special model for 25-40 cycles. $19.50. West of Rockies, $20. In Canada, $27.50.

Balkite "B"

Eliminates "B" batteries and supplies plate current from the light socket. Keeps the "B" cir cuit always at full power. For sets of 6 tubes and less. $35. In Canada, $49.50.



Balkite "B" II

Supplies plate current from the light socket. Will serve any standard set. Especially adapted to sets of 6 tubes or more. $55. In Canada, $75.

BEAUTY CONTEST IS FOR GRANDMOTHERS

STATION TO HOLD UNIQUE VALENTINE PARTY

Radio Voters Will Be Called Upon to Decide Between Old-Fashioned and Flapper Grandams

CINCINNATI.—Will the old-fashioned granny, of which the very mention conjures before our minds a picture of a lovable old lady seated low in a great rocking chair, be replaced by the modern flapper grandam? Will those strands of silver or snow-white hair, done up in a little knot, give way to a water-waved bob of henna hue? Will those wrinkled fingers that while away the eventide of life by knitting or stroking the curled-up family cat lose favor before manicured hands that strum a ukulele or pet a pekingese pup? Will the glowing fireplace that probably hold reflections of other years be replaced by a phonograph or Radio blaring forth the latest "hot-diggity" Charleston?

The answer to those questions will be decided by the Radio fans through the Crosley station WLW here on the eve of St. Valentine's Day, Saturday, February 13.

The third annual beauty contest to be conducted by Radio will be held on that date, but the contestants this year, however, will be grandmothers, instead of girls in their "teens." The contest will last two hours, from 8 to 10 p. m., Central time, and Radio voters will be asked to decide the winners. The event is unique in beauty contests because the voters will be called upon to not only judge beauty, but will also have an opportunity to voice their sentiments and decide an issue regarding the two types of grandmothers that will compete.

The contest has been open to all grandmothers sending their photographs or calling in person at the Crosley studio.

Prizes will be awarded to Radio listeners who send in their votes as well as to the winners of the contest. Complete rules of the contest and the manner in which it is to be conducted will be broadcast over the WLW microphone.

$25 GIVEN DAILY IN WGN CONTEST

Chicago Tribune Finding What Old-Time Melodies Linger After Being Laid on Shelf

CHICAGO.—Do you know the titles of old-time favorite musical compositions? Want to make money? WGN, Chicago Tribune station, here, is giving away $25 every day for just that information.

Of course, WGN knows what the names are, but it wants to learn if you likewise do. Three old-time songs are played each evening from WGN. Listeners are requested to name them and tell in a single sentence which one they liked best and why.

Send your letters to "Old-Time Favorites," care of the Chicago Tribune, Chicago.

Stations on Pacific Coast Unite by Wire

KFI and KPO Take First Step Toward Western Chain

LOS ANGELES.—KFI, Los Angeles, and KPO, San Francisco, are now linked by telephone wires, a program being broadcast simultaneously by the two stations each Monday night between the hours of 9 and 10 o'clock Pacific time.

Although there is little reason to believe it will come true, the lines may be extended to other Pacific coast and inland cities, expanding into a western network. The great distances separating western cities and conflicting policies of stations will materially interfere with the consummation of such a chain.

Station Changes

February brings back an old Radio favorite to the ether world. WCEE, of Elgin, Illinois, is now heard with the new call, WSWS, the S. W. Straus and company station. The old wave lengths, 275.8 meters, is used. This is a 1,000 watt transmitter.

WSSH, is the new call of the Tremont Temple Baptist church station in Boston, Mass. This plant originally had the call WDBR.

BET THAT YOU KNEW PATSY RUTH MILLER

IF YOU did not recognize the dark-eyed beauty on our cover at once it is quite obvious you have been neglecting your moving picture theater lately—perhaps too much interest in trying to snatch a song or a call from across the briny deep on your Radio.

Anyhow, the maiden is none other than the charming Miss Patsy Ruth Miller, star of the Warner Brothers moving picture productions. Miss Miller, besides performing for the screen, sometimes steps in and takes over the microphone of the KFWB broadcasting studio in Hollywood, Calif. She is a charming hostess as a screen announcer and the listeners are quick to recognize her voice as she comes on the air.

SAYS POMP NEEDED BY NATION'S HEADS

NEW YORK.—Speaking before the microphone at Station WJZ, Frank O. Salisbury, of the British Royal academy, recently made the statement that President Coolidge should be clothed in picturesque garments for the benefit of artists, and senators and judges should wear similar clothing. There is a spiritual value in pomp and pageants, which might be called the art of government, he continued.

Besides the robes of office, he suggested mace bearers and wands, so that "your artists could have a chance and inspiration for decorations for your public buildings." The display and pageantry of British state functions lend themselves to painting, he said.

Short Wave Experimenter Did Most to Advance Radio

NEW YORK.—The 1925 Morris Liebmann memorial prize, awarded annually by the American Institute of Radio Engineers for the most important contribution to Radio progress, has been presented to Frank Conrad, assistant chief engineer of the Westinghouse company in recognition of his work in short wave development. The prize, a check for $500, was presented to Mr. Conrad by Dr. J. H. Dellinger, president of the institute.

Will Continue Hearings on Charges of Radio Monopoly

WASHINGTON, D. C.—William C. Reeve, examiner of the federal trade commission, after having heard argument by attorneys for the Radio Corporation of America and others on a motion to dismiss the case, has overruled the motion and the case will proceed. Announcement has been made that the commission will continue the taking of testimony in this case in New York city, on February 15, this year.

Looking Ahead

Dad and Ma Salter, both over 86 years old and married sixty-four years, sit at the head of the Radio table every noon at WJAG, Norfolk, Nebr., and 20,000 listeners gather around as members of the "family." It is just one of several novel stunts to make this wide-awake, small-town station one of the best in the world. Pictures and details in the next Radio Digest.

Sam Pickard, chief of Radio service of the United States Department of Agriculture, is working out a system whereby the government can increase its efficiency in serving rural listeners. Pictures and a story of how the plans are to be put in operation will be told by S. R. Winters of Washington, in Radio Digest next week.

Did you ever, on a frosty night, bring the indicators slowly up to 400 meters and suddenly hear the "tick-tock, tick-tock" of a clock? Then, "This is the Cuban Telephone company Radio Station PWX, Havana, Cuba." An interesting story about this broadcaster in a forthcoming issue of Radio Digest.

During the popular revival of the old-time fiddlers one of the "gangs" receiving most comment has been the "Hill Billies" of WRC, Washington. These boys get the atmosphere by putting on the clothes to fit the part and include Charlie Bowman, who claims the much-disputed championship of Tennessee. Story and pictures coming.

The campaign against blooping and man-made interference will be continued next week and the technical staff will do its share by describing and explaining preventive measures on different types of receivers.

Mr. John G. Ryan, the builder of the new Two Tube, Short Wave, 15-130 meter receiver, will outline the drilling and assembly for this extraordinary set in the next issue of Radio Digest.

In the A B C Fundamentals for Everybody, Milo Gurney will next week outline types of audio frequency amplification added to the detector to serve loud speakers.

NEWS BRIEFS FROM THE BROADCASTERS

ALLEN McQUAHAE, TENOR, KPO SUNDAY FEATURE

WTIC Schedules Boy Scout Meet—"Around the World" with the Apollo Quartet at KYW

Allen McQuahae, who appeared recently over the WEAF chain, will give a program of Irish ballads Sunday, February 14, from KPO, San Francisco. Mr. McQuahae is often favorably compared with John McCormack, but is also considered one of the best of the oratorio singers.

* *

A program presented only by Boy Scouts, in recognition of the sixteenth anniversary of the foundation of the Boy Scout movement in the United States, will be broadcast from the studios of WTIC, Hartford, Saturday evening, February 13, at 8:30 p. m. Eastern time. The program will consist of selections by a bugle and drum corps of thirty members, several saxophone solos, and a talk, "Why I am a Boy Scout?"

* *

The Apollo quartet is taking fans "Around the World" musically through KYW, Chicago. Spain, Marseilles, Egypt, Turkey and Japan are a few of the ports included in the tour. These programs are given Sundays at 4 p. m. Central time.

* *

The Repertory Theater orchestra of Boston, under the direction of Daniel Kuntz will be heard at WBZ, Springfield, again Saturday, February 13, at 7:45 p. m. Eastern time. The programs presented over the Radio are arranged especially for broadcasting by Daniel Kuntz, and frequently include selections never heard on the air.

* *

"Olivette," a comic opera, specially revised for Radio by Charles Caldwell Dobie, is on the KGO program, Saturday night, February 20. The work will be presented by the Players Guild of San Francisco, under the direction of Reginald Travers and Harry Brown Wood.

* *

The Katinka Gypsy orchestra which has become a tri-weekly feature at WOR, Newark, is one of the most colorful organizations in New York. George Tcherban, director, is a well-known gypsy virtuoso. While playing in Constantinople he gathered together a group of musicians whose homes were in the Caucasus mountains. Their success in New York is due not only to their treatment of our dance music, but to their rendition of their own native Russian and Gypsy airs.

* *

George Olsen and his orchestra are to be featured regularly from Station WJZ, every Tuesday and Saturday night. The broadcasting is to be done from the grill of the Hotel Pennsylvania. Mr. Olsen has invented a novel introduction and signing off feature to supplant the "hello and goodbye" selections. His outfit imitates a railroad train. In opening, the train pulls into the station and stops. After the broadcast it roars off into the distance, the last sound being the blast of the whistle.

* *

Morton Bates and his Elks home orchestra will broadcast the 11 p. m. Eastern time program from WPG, Atlantic city, Saturday night. The merrymaking will jazz up even the most sedate of loud speakers.

* *

Incidental music by Grieg from the drama "Sigurd Jorsalfar" will be featured by the KGO Little symphony orchestra, Sunday afternoon, February 14, at 3:30 p. m. Pacific time. The program will be under the direction of Carl Rhodehamel.

* *

Admirers of Vice President Dawes had an opportunity last Saturday evening, to hear him via Radio from WIP. He was the guest of the Manufacturers' club of Philadelphia.

* *

Major Edward I. Bowie, senior forecaster of the United States weather bureau at San Francisco, will talk over KGO, Monday night, February 15, at 8:05 p. m. Pacific time. He will explain to listeners how the weather bureau conducts warfare upon frosts and the subject of his talk will be "Frost Fighting."

* *

Songs of the Sunny South which included real southern camp meeting songs and spirituals, were contributed by the Cotton Belt quartet to the Saturday program of WOR, Newark. Perry Bradford was the director.

* *

The Radio performance of "The Merchant of Venice," last Friday, marked the first presentation of the new weekly Shakespearian feature at WEAF. Well-known Shakespearian players appear before the microphone in this feature.

WELCOME STEP TO CLEAR ETHER

BUT LITTLE GAINED IN OVERSEAS TESTS

BLOOPERS AND WEATHER GREATEST OBSTACLES

Lax Cooperation of U. S. Stations Added to Poor Conditions Makes Reception Difficult

Bloopers, poor Radio weather made even worse by atmospheric conditions and the aurora borealis, steamship SOS calls and a few selfish American stations who persisted in going on the air during the silent hours, were responsible for the almost complete failure of the International Radio Week foreign reception tests. A final check-up by Radio Digest shows that probably 35,000 Radio listeners heard Europe or South America, but what they heard must have been very little and poor in quality in most cases.

No one will say that the 1926 international tests were an achievement worth boasting about. As one of the members of the International Radio week committee, Powell Crosley, Jr., put it:

"The committee arranged for the foreign transmissions and the silence periods in the United States, Canada and Mexico, but were unable to arrange the weather or insure climatic conditions."

Foreigners Have Poor Luck Too

Equal luck was shared by the English and Continental fans who attempted to hear the American, Canadian and Mexican stations. Cable messages from Radio Digest European staff correspondents were all the same. They reported, in brief:

"Almost total failure to receive American transmissions. This is attributed to the aurora borealis and damping by the full moon. Radiating sets also were annoying. At the best the reception could but be called moderately successful."

Lima, Peru, cabled that it was impossible to hear American or European stations on account of spark station interference. WAMD, Minneapolis, was logged.

American Broadcasters Disregard Tests

Reports from listeners from all sections of the country—only 16,794 letters and telegrams arrived at Radio Digest's offices—give a clear cross section of some of the difficulties. Chief among these were blooping or radiating receivers. Next in line were the stations who disregarded the test hours and broadcast to the great dismay of the trying listeners.

What hatred these stations brought upon themselves can only be shown by the letters from the fans. Transmitting during one or more silence periods was done by several stations. Among these were:

KTAB, Oakland, Calif., 240 meters; KFON, Long Beach, Calif., 233 meters; KPSN, Pasadena, Calif., 315.6 meters; WGHP, Clearwater, Fla., 266 meters; and KNX, Hollywood, Calif., 336 meters.

WEAF, New York, 491.5 meters, got in bad with its audience Wednesday night of the week, when "Roxy" and Graham McNamee were heard after the silence period had begun. The two famous personages did not help their popularity by continuing their broadcasting for fourteen and one-half minutes after they should have been off the air. Both the station and the impresario overestimated the degree of their popularity.

WNYC, another New York station, in fact, owned by the municipality of New York city, overstayed its welcome Thursday night, by remaining on seven minutes after the test silence period was supposed to have begun.

Conditions Bad; Best Foreign Stations

After all has been said and done, the European stations demonstrated their ability to get over, but conditions were bad. The foreign stations are better this year than ever before.

The official Radio Digest eastern listening post, located in the laboratory of E. K. "Jessie" James, Flushing, N. Y., reported best reception from OAX, Lima, Peru; 6BM, Bournemouth, England; 2LO, London, England; EAJ13, Barcelona, Spain; EAJ7, Madrid, Spain, and 5WA, Cardiff, Wales. Excellent quality and volume was reported by this post for 5XX, Daventry, which was received on a special long wave receiver.

Mistaken Fans Complain of WOC

On Friday, the various stations of the country were to transmit during four different fifteen-minute time periods according to the time band in which they are located Exceptions, however, were made to this rule. The tests committee, to put a few more stations in the Mountain time test period, asked all stations in Iowa, Nebraska, Kansas and the Dakotas to broadcast at the same time as KOA and the other Mountain time stations.

Fans hearing WOC, WOI and other stations from the five states listed as exceptions, sending when they thought they should not be, had their ire aroused on a false alarm. However, regardless of the fact that these broadcasters were in the right according to the wishes of the International Radio Week committee, thousands upon thousands of letters poured in to WOC and the other Central time stations, calling them all sorts of nasty names and threatening to tune them out forever and a day.

Bungles Didn't Help Tests

Little bungles such as these made the week trying not alone for the broadcasters and the listeners, but for the newspaper and magazine editors who were attempting to give the public the facts about the tests. Complete advance programs were not forthcoming from the committee. Those in charge did not get them in time.

When it was desired to know what stations would be on each night, no one knew for sure. The committee was beseeched for information. They knew very little, although they were supposed to have made all preliminary and final arrangements.

When it came to getting confirmation programs, even these were prepared in haphazard fashion. Radio Digest relied upon its foreign correspondents and the meager information available at Radio Week headquarters. Finally, the confirmation programs appearing on page eight, of this issue, were assembled after much effort.

It is to be hoped that the next foreign tests be arranged in a more business-like fashion.

The bloopers, aurora borealis, SOS signals, selfish-minded stations, etc., also are NOT invited to participate during silence periods next time.

STEPS ON IT AND WATCHES STEP

Miss Gladys Roy, Los Angeles daredevil aviatrix, provided the coast thrill lovers a treat recently when she Charlestoned on the wing of an airplane under flight. The noise of the machine made the use of ear phones necessary.

Winners of the Gold Award for Foreign Tests

WINNERS of the $100.00 in gold offered for best reports of foreign station reception during International Radio week tests, will be announced in the next issue of Radio Digest. Did you send in a program for verification? All reports were entered in the contest. You may have placed—you never can tell! Very few perfect reports were submitted. Watch for the winners in next week's issue.

STATIONS AND FANS JOIN IN BLOOPER WAR

Join I Won't Bloop Club

Response That Greets Campaign to Lessen Receiver Radiation Exceeds Expectations

Within one week after war was declared by the Radio Digest against the hundreds of thousands of bloopers who prevented reception of foreign programs during the international tests, the campaign is well under way. Thousands of Radio enthusiasts have pledged themselves to operate their sets so as to reduce radiation and limit interference and more than a score of broadcasting stations have offered their cooperation to help clear the air as individual chapters of the I WON'T BLOOP CLUB.

Situation Is Critical

The overseas tests plainly demonstrated that a situation exists that needs be corrected. Legislation cannot prevent blooping and a number of other forms of man-made static. It is the duty of each individual who considers the welfare of Radio to pledge himself to do what is within his power to keep his set from radiating; his share towards eliminating ether disturbances that could, with a little care, be prevented. With that end in view, the Radio Digest has inaugurated the I Won't Bloop club, believing the cooperation of listeners will accomplish more than legal commands with threatening penalties.

Stations Sending Aid

Radio fans throughout the United States and Canada have been asked to join the I Won't Bloop club, the pledge card of which appears on page 10 of this issue. The leading broadcasting stations have requested to become chapters of the club and will accept memberships from their listeners. Numerous newspapers have endorsed the move and united in the campaign, which will continue until an improvement is gained.

To those fans who sign the pledge of membership in the I Won't Bloop club, a certificate will be issued suitable for a billfold or framing. Fans wishing to enroll in the club may do so through the offices of the Radio Digest or through any of the stations which have secured chapters in the club. To enable the members to carry out their pledges, the Radio Digest will publish a series of articles of a non-technical nature for the purpose of enabling fans to operate their sets with the minimum of interference to neighboring receivers. The first of these articles appears on page 10. Others are being prepared, and if the information and suggestions given are followed, it is believed the greatest problem of Radio reception will be solved.

Need Individual Cooperation

The response to the I Won't Bloop club movement has far exceeded highest expectations. With the large numbers of fans, stations and newspapers joining the campaign with full enthusiasm, it is certain that the congestion of needless squeals, howls and whistles will be reduced considerably.

Have you filled out the pledge card? Are you willing to do your part? If you are a real Radio fan you will want to do what you can to clear the air for the enjoyment of all. Become a member of the I Won't Bloop club.

FILL OUT YOUR PLEDGE CARD TODAY.

At the time this issue goes to press, a large number of the broadcasting stations, both in the United States and Canada, have offered to lend their aid in the performance of this great service to listeners in.

The following stations have already been issued chapters and been placed on the honor roll: WLW, Cincinnati, Ohio; WSM, Nashville, Tenn.; WMC, Memphis, Tenn.; WBAP, Fort Worth, Texas; KFNF, Shenandoah, Iowa; WOAW, Omaha; CKNC, Toronto, Ont.; WAHG, Richmond Hill, N. Y.; KGW, Portland, Ore.; WJAG, Norfolk, Nebr.; WHO, Des Moines, Iowa; WFAA, Dallas, Texas; WHT, WJAZ, WGES and WBBM, Chicago.

Join the I Won't Bloop club. There are no dues, fees or restrictions—only a promise to help bring better enjoyment and greater happiness to the estimated 25,000,000 persons of the Radio audience.

KGO Leads with Radio Drama

WILDA WILSON CHURCH Relates Progress of Audio Play After Two Years Trial at San Francisco Studio. Predicts Future Greater Than the Stage. Requires Ability to Make Written Word Alive.

SCANNING the horizon of the future for Radio, the Radio Digest is alert to the signs and portents of forthcoming developements. Existing in wave impulses, the growth and magnitude of Radio seem to spread in the same element. Today there are restraints as there were in the early days of the moving pictures. Presently huge billows will swell through and overwhelm those restraints.

But aside from that there are forces gathering in certain salients which indicate specific trends. A short time ago there was printed in these columns an account of the impetus of the Radio drama. From the Pacific to the Atlantic various phases of the movement were described. Particularly was attention called to the work of Mrs. Wilda Wilson Church, director of the players at KGO, General Electric station, San Francisco.

In this issue we have an interview from a correspondent which gives a close-up view of Mrs. Church and her work.

* * *

"LET us consider Radio as a great, invisible channel into the homes of millions," said Mrs. Church, her head poised at a slight angle as she pointed with the tip of a pencil along a line that seemed entirely visible through her half-closed lids to her mind's eye.

"And through this channel," she continued, "flow the sounds that seem to emanate from actualities. That, in a few words, is the essence of Radio drama. Illusions, effects, situations must be fitted and floated through this stream of sound without visible substance. It is the work of the director to shape the material and guide it through this channel."

For a moment the deep, intelligent eyes of the silver-haired pioneer of this important phase of Radio burned with a fire that motivates those who have a mission, a big work ahead in life, a consuming ambition.

The interviewer beheld the embodiment of a living character in the very person of the one who imbues others with play characters. He asked concerning her own life. She smiled back at him indulgently, patiently, as though he had failed to grasp her vision.

"I always wanted to be an actress," said Mrs. Church. "And I had many offers to go on the stage. But I never did so because it took me away from a home and my two children. Now I have my opportunity, through the medium of sound, perhaps more comprehensive than the old theater ever could become."

* * *

"MY EXPERIENCE as a school teacher, head of my own private school, and as an instructor of the Williams Institute, in Berkeley, comes in good stead in my KGO Radio dramatic work.

"I will say without blushing that we owe our growth of Radio drama technique almost altogether to the help we have had from listeners. Thousands of letters have been sent to us. From this great pile of writing we have learned about our short-comings and have found the way to go for future development of the Radio drama.

"I know there are many people, particularly those who have had rich experiences on the stage, who believe the Radio drama to have serious limitations. But I believe, when better Radio ears are developed and possessed by the mass of our listeners, that the audio drama over Radio will surpass any other form.

"In the theater, or even the home, the spoken drama loses much of the word value of its line because of the necessity of projecting voice tones into the farthest corners. Fine inflections are not possible under the stress of such projection. But in Radio drama, we speak right into the ears of our listeners. The other day I read an article stating that Radio drama technique differed from stage technique in that words must be separated from each other by slight pauses to give the listener a chance. This is not true within a reasonable distance from a big broadcaster. Naturalness and spontaneity are the key words of our player's technique.

* * *

"YES, we have lots of fun giving our plays before the microphone. Not all the laughs are for our listeners. My whole company always feels a little nervous, and I do myself, when a new player comes with us. Among other things, we dread the terror of twisted phrases, or mispronounced words, which will distort their meaning.

"Not long ago, one of the men in my company, testifying in a murder case in the play, 'The Thirteenth Chair,' said: 'This girl was known to have taken tea with the man just half an hour after he was shot!' Many letters came in about it, and our Radio actor would not believe until the end of the play, that he had said it. The substitution of the word 'after' for 'before' did the trick.

"One of the women in the cast of another play, describing the simplicity and purity of an English home, said: 'There are pictures on the wall which no one could look at without blushing.' Poor girl, she was a little nervous, it being her first time before the microphone, and she slipped in the word 'no.'

"One of our pretty ingenues, just before the Eastertide, won the prize, however, for twisted phrases. She said: 'Immaculate conception' when it should have been 'Immaculate condition.'"

"NO ONE can doubt the way our audience listens in to our plays, after reading a few hundred letters, which we receive. Not long ago I read one from a family who had listened. Bert Horton, our leading man, said: 'Call the ambulance!' Just at that moment an

(*Continued on page 26*)

Wilda Wilson Church (upper left) as she appeared to an interviewer at the KGO Radio studio in San Francisco. Mrs. Church reads a script, then writes in the necessary alterations to make it most adaptable to the listening audience in the homes beyond the vision of the players. In the circle Mrs. Church is seen as she gives instructions to the players on the interpretation of their spoken lines. At the left, she is shown as she sits outside the studio following the script and listening to the rehearsal under the same conditions as the voices are transmitted to Radio listeners. She gives her instructions through the telephone.

Old Style Dances Win Favor

GRANDAD FIDDLERS
All the Rage As Colleges Join Movement to Displace Jazz. "Everybody's Doing It."

Henry Ford's Old Style Dance Orchestra playing over the WEAF chain at New York, seems to have stolen a march on jazz. (Left to right) W. Hallup, cymbalonist; C. A. Perry; Maurice Castle and Edwin Baxter, dulcimer.

HAS HENRY FORD reversed the dance pendulum?

Is the Charleston the last convulsion of the wild and furious jazz?

Are our feet already turning backward toward the old barn dance, the waltz, the square, polka, minuet—the gyrations of our fathers, grandfathers and still further back?

Whatever may come of it, Radio is bound to be the medium to wield the most potent influence. Which means, of course, that you have been reading about or tuning in on the old-style dance orchestra which Mr. Ford assembled and put on the air over the WEAF chain.

In a million or more homes this series of old-fashioned dance programs was heard—and, according to the applause letters, the old tunes must have held the dials very consistently throughout the series.

* *

"OH BUD! Listen! Don't turn it off—ain't it funny!" giggled the young flapper as the steady, vibrant fiddle song came galloping out of the loud speaker in strident measures.

Grandad, sitting in the big Turkish chair looked up from his reading, beamed a juvenile smirk, placed his paper on the bookstand at his elbow and got to his feet with a jig pose.

"Gee! That makes me feel young," he chortled, rubbing his palms together and working himself into a shuffle. Grandmom, who was embroidering a doily for Sue's hope chest, peered over her glasses with a slight shock of surprise. Grandad sidled over and pulled her out of her chair.

"Don't be silly," she said, but she smiled as she said it and joined with him.

"Swing your partners to the right," came the voice from the loud speaker.

And, ding bust it—away they went, granddad and grandmom!

"Come on, Bud," commanded Sue. "We don't know what it is but we'll soon find out." Bud surrendered just as Dad and Momsey entered the room.

"Look at the kids!"

"Which ones?" asked Mom.

"All four of 'em," said Dad.

And before Graham McNamee at WEAF had time to shift microphones there were six "kids" doing the barn dance on the parlor floor. Typical—it really happened just about like that in many homes!

* *

IF IT didn't happen during the Henry Ford recitals it may have been during one of the many other similar programs that have been growing in vogue over the Radio from one end of the country to the other for the past two years.

"Why don't you put on those old-time fiddlers for a novelty," suggested a friend to Dick Haller, director at the KGW station, Portland, Ore., along at the beginning. Nobody knew off hand just where to find them, for they had been disbanded for about five years—the particular ones to whom the speaker had referred. But at last the old chaps were brought together. They dusted off their old fiddles and felt a trifle nervous at the moment of their first appearance before the microphone.

But once they were tuned up and the announcer began calling the dances they felt as young and eager as ever. Listeners were enthusiastic and demanded more concert. Vaudeville managers sent for them. They were booked for a tour down through California. Business became so brisk for these old-time fiddlers that they opened an office in Portland and now have more bookings than they can fill.

The popularity of their style of music spread eastward. Old-time fiddlers were jerked out of the privacy of their rural communities and stood before the microphones of scores of stations. They fiddled many golden hours off the programs with the saxophones and jazz bands.

Go around the dial any Saturday night and you will find an old-time fiddler's contest at one studio or quite probably a barn dance at another. Big cities are following suit just as ardently as the country stations.

George Hay, when he was at WLS, Chicago, inaugurated the barn dance at that station. It became a rage with the WLS listeners. They still have it. When the Solemn Old Judge switched microphones from WLS and went to WSM, Nashville, he discovered Uncle Jimmy Thompson, 82 years old, who never yet has been defeated in more than one hundred fiddling contests and he has been fiddling for more than sixty years.

Then (*Continued on page 24*)

Uncle Jimmy Thompson (center) and George Hay at WSM microphone, Nashville. Contestants at old fiddler's contest University of Arkansas (left). Colleges are backing old style dance fad.

Boy's Voice First Across Atlantic?

Harold Robinson, New Jersey Boy Scout, Maintains He Was First to Be Heard in Europe by 'Phone Transmission and Submits Letter to Prove He Was Tricked Out of Credit

By ARMSTRONG PERRY

DID Paul Godley and Edwin H. Armstrong STEAL the credit for the first amateur transmission and reception across the Atlantic ocean? Harold Robinson, an American Boy Scout, first claimed the record with what we believe are authenticated proofs. His 'phone transmitter was heard in Aberdeen, Scotland, according to George W. G. Benzie, who listened in. This occurred on October 6, 1920. Armstrong, aided by others, discredited Robinson. Read the story as written by a man who has followed the case for years.

WITH the sixteenth anniversary of the Boy Scouts of America due early in February, it is a fitting time to clear the name of the Boy Scout, who, according to the evidence, was the first Radio amateur to make his voice and music heard across the Atlantic.

Harold Robinson, a scout living in Keyport, New Jersey, and his father, Hugh Robinson, superintendent of an airplane company, announced in November, 1920, that they had received a report from Aberdeen, Scotland, stating that George W. G. Benzie, also an amateur, had heard their music, voices and call letters on October 6, 1920. The first report was followed by others from Benzie and another amateur, James Miller. I was employed at the national headquarters of the Boy Scouts of America and was especially interested in the Radio activities of the scouts, so I visited the Robinsons at their station, 2QR. I discovered no reason for doubting their statements.

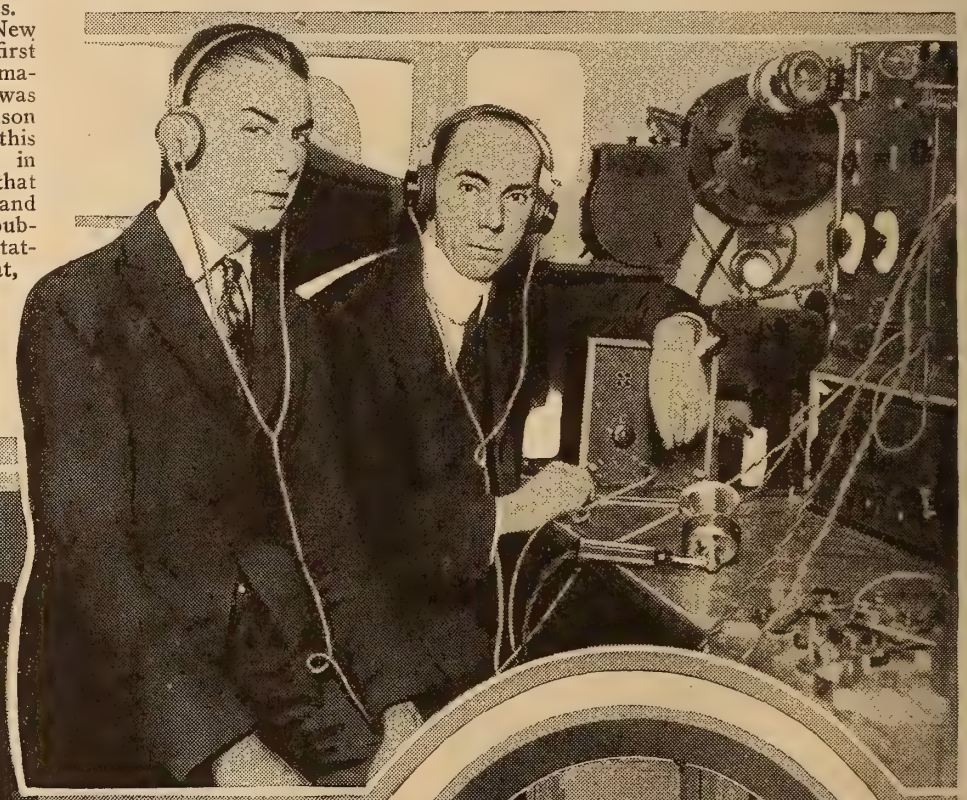
The Radio Club of America (New York) had offered a prize for the first transatlantic transmission by an amateur. An investigating committee was appointed to consider the Robinson record. After a year had passed, this committee presented its report, in which it was stated: "We find that Station 2QR was not heard in Scotland as reported." With the report was published a letter from the Robinsons stating that they were convinced that, **according to the evidence secured by the committee,** the Scotchmen were in error in believing that they had heard the station. It was apparent that if the Robinsons made their report knowing that their station was not transmitting when it was reported to have been heard, Harold had violated the first Scout law: "A Scout is trustworthy."

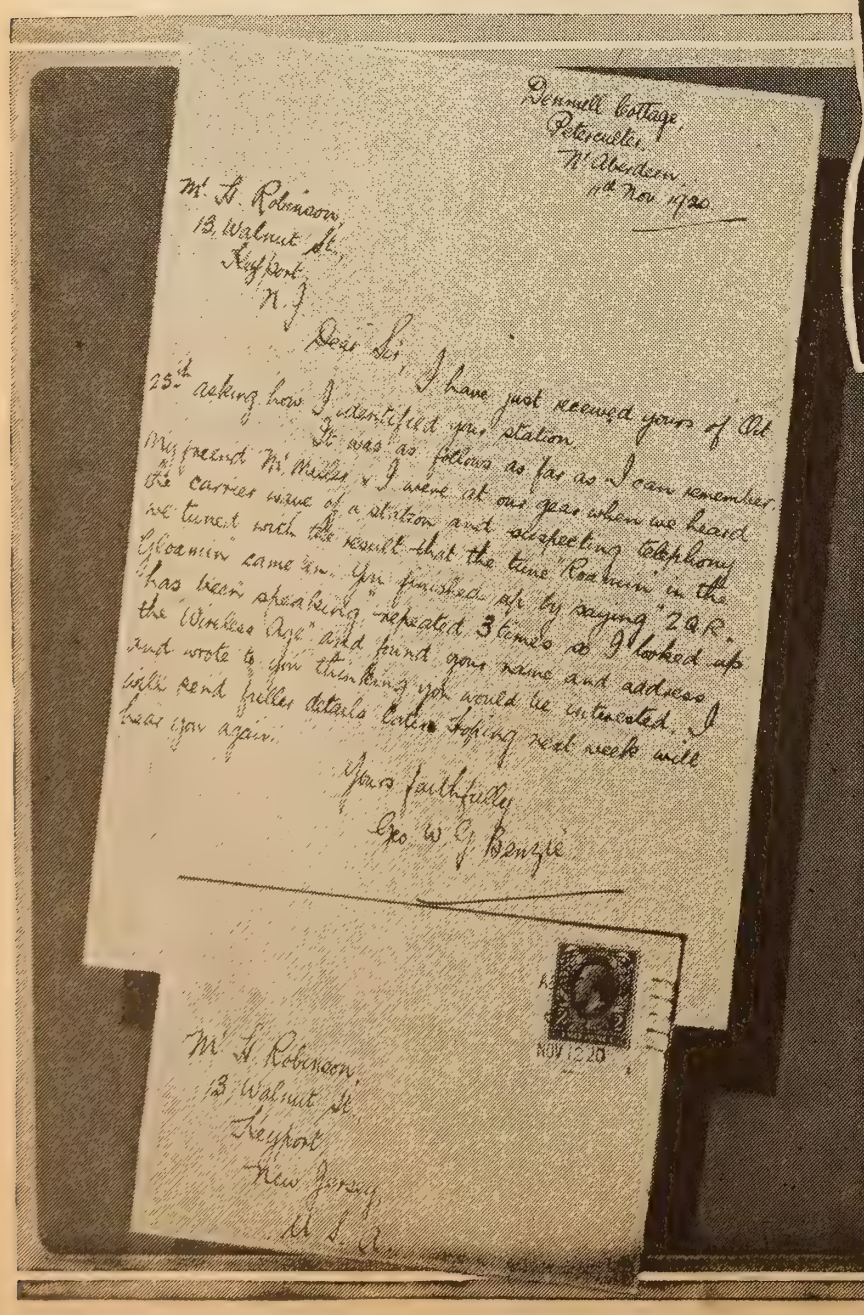
Wondering what evidence could be submitted to disprove their record, I asked a lawyer about it. He said the testimony of persons who were not at either station at the time of transmission would not have much weight, and that in a court action the testimony of the men who were at the stations, together with testimony concerning their character, reputation and probable motives would, no doubt, govern the verdict thus reached.

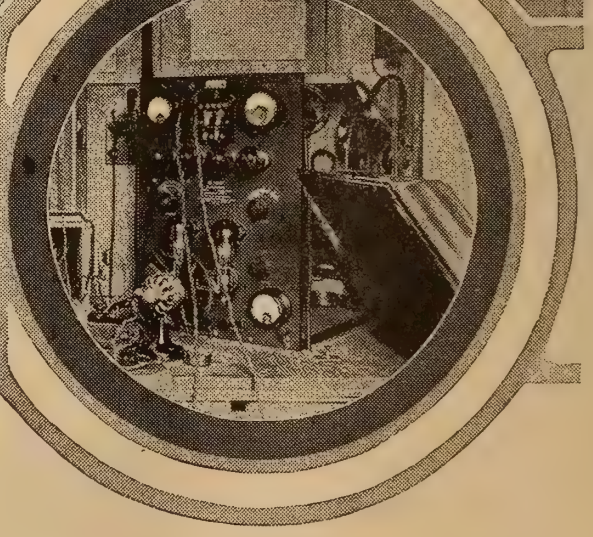
I asked the Robinsons what had changed their minds concerning the reports from Scotland. They said they had not changed their minds, but that they had been tricked into giving the letter to the committee. E. H. Armstrong and other members of the committee, they said, called on them the night before the American Radio Relay league transatlantic tests started, in 1921, and told them the committee had evidence, which **would be shown to them later,** disproving the record. They asked the Robinsons, in the interest of the amateur game, to give them a letter that would show that the opportunity was still open for some amateur to be the first to make his station heard across the Atlantic. Believing Mr. Armstrong and the others to be honest, they gave them the letter. They say they never saw the evidence Mr. Armstrong promised to show them.

The next day Mr. Armstrong and some colleagues entered the A. R. R. L. tests with a station erected especially for the purpose. There is evidence that a wave length was used that was extraordinary and illegal under the terms of their license and improper under the rules of the contest. I am told they were threatened with legal action because of their violation of regulations. Nevertheless, they were credited with being the first amateurs to make their signals heard across the Atlantic.

At the receiving station, in Scotland, was Paul Godley, representing the American Radio Relay league. To him went the credit of being the first amateur to receive amateur signals across the Atlantic. He stated in his report, published in QST, an amateur magazine and mouthpiece of the A. R. R. L., that he doubted whether he ever had his antenna properly adjusted for any wave length other than that of the Armstrong (*Continued on page 24*)







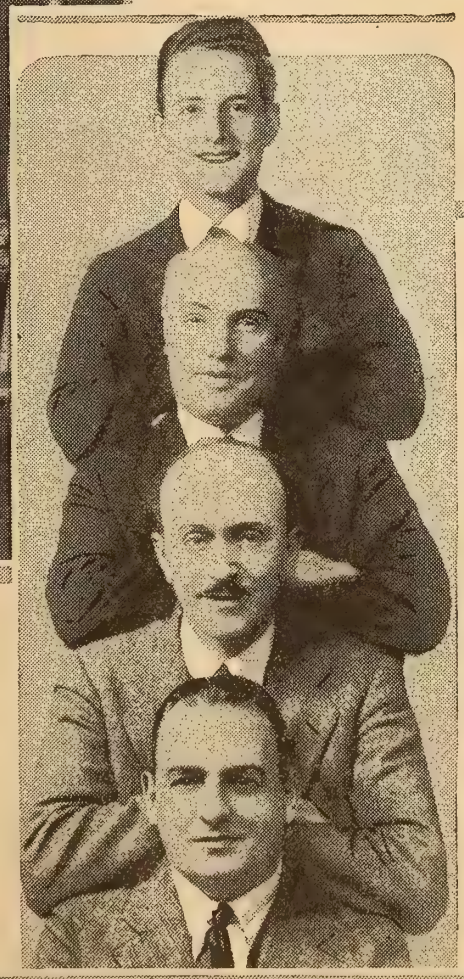
Above are shown Hugh Robinson and his son, Harold, the Boy Scout whose voice was heard in Aberdeenshire, Scotland, singing "Roamin' Thro the Gloamin'" in the fall of 1920. Photograph of letter (left) from Scotland which seems to uphold young Robinson's claim. At right is the transmitting set "guaranteed for 25 miles" which the Keyport youth developed to transmit 3,500 miles.

Organ Is Favorite at WEAR

VINCENT H. PERCY Takes Radio Listeners on World Tours via Music, Then Starts Second Jaunt into Realms of History. Cleveland Station Presents Programs of Interest to All Classes.

By MARSHAL TAYLOR

Vincent H. Percy (below) is the WEAR organist.



While one of the principal features of the WEAR station at Cleveland is its pipe organ concerts, there are plenty of other features to give the station general interest. Madam Suzanne Dreger (above) is one of them. She plays classical piano solos and sometimes accompanies the singers.

ORGAN recitals are becoming more popular over the Radio as receiving sets and loud speakers are improved. In trying out a new loud speaker in his home a few evenings ago the writer was overwhelmed with the faithfulness of the reproduction. Low notes that had hitherto been lost in the abysmal depths came floating into the room with gentle sweetness, exquisite in clarity and beauty.

In fact, the pipe organ had never before under any circumstances seemed so delightful, even in the studios and big auditoriums and we have heard some of the best of them from Salt Lake to New York. It was better than in the actual presence of the organ itself. We do not pretend to be an expert on acoustics, but it may have been that these particularly pleasing results were obtained not only because of the wider range in the timbre of the loudspeaker, but because in the studio the sounds coming from different points were blended together in the microphone and poured out at the terminal from one, small orifice that made each note equi-distant from the ear.

* * *

THIS, by way of organ prelude, brings us to Vincent H. Percy, organist at WEAR, Cleveland. Mr. Percy and his organ have made WEAR famous just as Al Carney at WHT, Chicago, also has made his station famous for its organ.

Mr. Percy started on his aerial road to fame last summer through a series of recitals he called a "Trip Around the World."

Listeners who tuned in at the beginning of the series were wafted on the mellow notes of the organ to foreign shores by a variety of folk songs and national classics. As the numbers were introduced, Mr. Percy, acting as the guide and conductor, interpolated short verbal sidelights which created the atmosphere of the country to which the listener was to be transported. Ireland with its music, Scotland and its characteristic music, England—merry old England; France, Germany, Russia, Spain, Italy, Turkey, Greece, China, Japan—all distinctive in musical characteristics, were visited through the talented fingers and the keys of the famous Metcalf Memorial organ, at which Mr. Percy presided.

Of course, Mr. Percy is proud of his "vehicle" and attributes much of his success to its unusual power and scope. The organ is located in the Euclid Avenue Congregational church and was dedicated in May, 1920, to members of the congregation who were in the military service during the World War. It was named for Leslie I. Metcalf, whose personal gift and effort made it possible. It is comprised of six complete organs in one, including the great, swell, choir, solo, echo and pedal organs.

Wingfoot male quartet (left) top, down; Fred True, Albert Downing, Floyd Campbell and Chas. Pottier. Goodyear concert orchestra (below), Ivan Francisci, director.

* * *

IN the construction of the Metcalf Memorial organ there are 100 miles of wire, 20,854 electrical connections and 3,505 pipes. Wind for the organ is supplied by the operation of a ten-horsepower electric motor.

These incidental details and many more are included in a pamphlet prepared by Mr. Percy for the listeners of WEAR, who frequently request information about the wonderful organ they hear from this station.

One thing about these organ tours, distance and time do not count. Mr. Percy would just as soon

(*Continued on page 24*)

OFFICIAL AND FINAL CONFIRMATION PROGRAMS

Sunday Evening, January 24

OAX, Lima, Peru, 380 meters, special international broadcast; band greetings to United States listeners; national music of the United States; orchestra; address; dance music.

LOW, Buenos Aires, Argentine, 300 meters, native music; announcements in Spanish, English and French.

LOX, Buenos Aires, Argentine, 375 meters, special program.

HA, "Norag," Hamburg, Germany, 292.5 meters, classical musical program.

2LO, London, England, 362 meters, Radio quartet; Charles Leggett, cornet solo; Clay Thomas, baritone.

6BM, Bournemouth, England, 385 meters, Wireless orchestra; Gerald Kaye, tenor; Philip Taylor, baritone; Winifred Scott, soprano.

EAJ13, Barcelona, Spain, 460 meters, program in Spanish music; "Las Corsarias," two-step; "Valencianas;" "The Night of Love;" "La Verbenade la Paloma;" "Servillanas;" "La Dolores."

5XX, Daventry, England, 1601 meters, same program this night as 2LO.

Monday Evening, January 25

HFF, "Vox Haus," Berlin, Germany, 505 meters, special program of German airs.

"Radio Wien," Vienna, Austria, 530 meters, recital of chamber of music by Sedlak Winkler; string quartet by Municipal Opera company, playing compositions of Haydn and Mozart.

EAJ7, Madrid, Spain, Radio Union, 373 meters, featuring Zacarias Arcas, tenor; sextet, "Goyescas" by Grandos; tenor, "Le Partida" by Alzarez; "Jota Del Trus De Los Tenorios" by Serrano; sextet, "Dona Fraisquitta"; "Grandinas" by Berrera; closing sextet, "Seville" by Alberrez.

EAJ13, Barcelona, Spain, 460 meters, program from famous operas; "Tosca;" "Sampson and Deliah;" "Faust;" "Carmen."

——, **Prague, Czechoslovakia, 368** meters, "My Homeland," by Frederic Smetana.

HA, Hamburg, Germany, 292.5 meters, concert program, selections by Weber; Kreisler; Strauss; Schumann, Brahms.

——, **Stuttgart, Germany, 450** meters, Wir Gehen In's theater, "from operetta Paganini;" "Glocken der Liebe;" "Boston Valse," by Lehar; "Ich Habe Nein Herz in Heidelberg Verloren," by Burke; "Der Schonnenschein," by Carl Struve; "Wenn der Liebe Nicht War," fox-trot, by King; "Teresina, Teresina," from the operetta by Strauss; "Die Kleine Pagode," by Benatzky; "Shanghai," by Nichols; "Hier Schlager War Dort," one and two ette-orchestra; "Im Prater Bluhn Wieder die Baume;" "Das Wiener Faikerlied," by Stolz; "Besuch mich mal in Korsica," from operetta "Teresina," by Strauss; "So'ne Landpartie," shimmy dance, by King.

MS, Muenster, Germany, 410 meters, Wagner Tannhauser overture; Lizst preludes; Beethoven Romance in G for violin solo and orchestra; Grieg Nordische Weisen, One, Im Volkston, Two; Kuhreigen and Bauertanz for string orchestra; Strauss Rosevkavalier waltz.

——, **Munich, Germany, 485** meters, concert, Anny Rosenbergers' Chamber music, quartet; "Eriksgang and Kormungmarsch," from Die "Folkunger," by Kretschmer; "Grosse Fantaisie" on Melodies," by Wagner; "Intermezzo" and "Barcarolle," from Tales of Hoffmann, by Offenbach; "Hungarian Dance" and songs.

OAX, Lima, Peru, 380 meters, "International Law and Radio," talk in English, by Dr. Oscar Miro Quezada; "My Old Love," Mexican song, Esparza Otero, soprano; Serenade, Widor, piano, harmonium, flute, violin, violincello; "Dance of the Witches," McDowell, piano; "E Ben do andro Lontano," Srta. Consuelo Paernio; Impressions of the Evening, violin; "Piropos Limenos," poems; "Ollanta," Peruvian opera, Maestro Vallerriestra, soprano, contralto; "El Llanto del Inca," characteristic native waltz, orchestra OAX; "Ritorna Vincitor," Verdi, soprano; waltz, Moskowsky, piano; Lima Girls, flirtation, orchestra OAX.

LOX, Buenos Aires, Argentine, Radio Yaitura, 375 meters, program of national Spanish music; announcements in Spanish, English and French.

LOW, Buenos Aires, Argentine, 300 meters, special musical program.

SBR, Brussels, Belgium, 263 meters, program unconfirmed.

——, **Breslau, Germany, 416** meters, program unconfirmed.

Tuesday Evening, January 26

5XX, Daventry, England, 1,601 meters, station trio; Paul Specht's Canadian band; Cavalliria Rusticana; Frederick Hall, harpist; Walter Glenn, tenor.

5WA, Cardiff, Wales, 351.6 meters, same program as 5XX, Daventry, England, given above.

2BD, Aberdeen, Scotland, 497.1 meters, wireless orchestra; Dorothy Froest, mezzo-soprano; Robert Anderson, baritone.

LOW, Buenos Aires, Argentine, 300 meters, special musical program.

LOX, Buenos Aires, Argentine, 375 meters, special musical program.

EAJ13, Catalana, Barcelona, 460 meters, program from opera "la Geisha" by Jones; three numbers by Lehar, Count of Luxumberg; La Viuda Agegre by Eva.

2LO, London, England, 365 meters, Paul Specht's Canadian dance orchestra, from the "Kit Kit Club," rendering "If You Care," "Arraby," "Brown Eyes," "Pretending," "Yes, Sir, That's My Baby;" "Oh! Boy What a Girl;" "Melody in F," by Rubenstein, and "Indian Dawn."

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

Genuine Fansteel
Balkite "B" Eliminator
Sent for Only
$1.00 Down

U.S.PAT. MAY 27, 1924

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

$5.00 a Month, if satisfied after trial

Only $1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your $1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only $5.00 a month until you have paid the total price of only $35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. **Order by No. Y-8578A, $1.00 with coupon; $5.00 a month; total price $35.00.**

WAHG Great Organists Series Continues

ONE OF the outstanding contributions to the popularity of the broadcasting art has been the "Grebe Great Organists" series, given through Station WAHG, the A. H. Grebe Co., at Richmond Hill, N. Y. This excellent series has introduced the Radio audience to the most able and talented organists of the nation. The photographs herewith are of the famous artists who will give organ recitals on the next six Friday evenings, from 8 to 9 p. m. Eastern time, beginning February 19.

Above, Dr. Palmer Christian, organist of University of Michigan, and noted composer, appears March 26. In small circle is Hugh Porter, Chautauqua Institution organist, and director of organ department of Mannes School of Music, who appears March 12. Harold Gleason (right), organist of the Eastman School of Music, broadcasts March 19.

Harry Rogers Pratt, (below), organist of the University of Virginia, broadcasts his recital Feb. 26.

In large circle in exact center of layout is shown John Priest, organist of the Colony theater, New York city. He was formerly organist at Oxford university, England. His date of appearance at WAHG is February 19. Louis Potter (above), organist of Baptist Temple, Charleston, W. Va., broadcasts March 5.

FINAL CONFIRMATIONS

(Continued from page 8)

chestra OAX; "Voices of Spring," by Strauss, sung by Elvira Sanchez, twelve-year-old soprano; "Sorrow," Indian song on primitive instrument; "Yaravi," "Zana," and "Marinera y Tondero," native airs, voice, guitar, piano, bandurria and cajon; "When the Soul Is Lulled to Sleep," tenor solo; "The Little Black Girl and the Shoe Polish," native popular song, orchestra; contemporary Peruvian poetry, recitation; "Little Princess," Spanish song, soprano; "The Little Peruvian Girl," two-step, orchestra OAX.

——, **Munich, Germany, 485** meters, Professor Georg Baumgartner rendering "Schuberg One Las Wandern," "Wichin," "Halt," "Danksagung an den Bach," "Am Feierabend, der Neugierige," "Morgengruss," "Des Muellers Blumen," "Tranenregen," "Der Mueller Und Der Bach," piano accompaniment; "Description of My Life as a Ship's Operator," talk.

Thursday Evening, January 28

HA, "Norag," Hamburg, Germany, 292.5 meters, Wagner concert, soloists, Ferdinand Schneider, Bernhard Jakschtat; Norag orchestra under direction of Adolph Secker.

HFF, Vox Haus, Berlin, Germany, 505 meters, overture, Mozart number; overture by orchestra; song, Wagner's "Lohengrin"; Straus "Danube Waltz" by Frinkstude orchestra.

LOX, Buenos Aires, Argentine, 375 meters, musical program and entertainment.

LOW, Buenos Aires, Argentine, 300 meters, special musical program.

"Radio Wien," Vienna, Austria, 530 meters, Silving band playing six numbers; Gold and Silver waltz by Lehar; "Fledermauss" overture by Strauss; Narcissus by Nevin; Liebestod and Liebesfreud by Kreisler; second Hungarian rhapsody by Liszt; Night in Vienna by Komsak.

——, **Stuttgart, Germany, 446** meters, selections from Wagner's "Meistersinger"; overture to "Leonoren"; Aria No. 3 by Beethoven; selections from Mozart's "The Magic Flute"; "Melody" by Gluck; song, "Land so Wunderbar" from Meyerbeer's "Die Afrikanerin"; overture and aira from Mozart's "Figaro"; overture from Weber's "Freischuetz"; song from Flotow's "Martha"; "Invitation to the Dance" by Weber; aria from Nicholai's "The Merry Wives of Windsor"; "Rosenkavalier" waltz by Strauss.

——, **Breslau, Germany, 416** meters, Allego Molto of Mendelsshon's violin concerto in E minor; caprico for flute and piano by Lothar Kemptner; tarentello for cello by David Opper; duet for flute and violin with piano accompaniment by Caesar Qui.

——, **Prague, Czechoslovakia, 368** meters, "Slavische Tanza," by Dvorak.

EAJ7, Madrid, Spain, 373 meters, concert artists Nino De Los Lobitos and Domino Marin, with station sextet and barrel organ; "Sextet Susprios de Espana," by Alvarez; "Am Alborada Gallega," by Veiga; "Lobitos Song," by Soleares, entitled "Granadinas," guitar accompaniment by Domino Marin; organ recital, "Pasodoble," Lobitos song by Dulerias and Caracoles, accompaniment by Domingo Marin, guitar; barrel organ schottische; Lobitos song by Guajiras and Fandanguillos, accompanied by Domingo Marin on guitar; sextet tango and Zapatiadode, entitled "Ensefianza Libre," by Gimenez, and "La Dolores Jota," by Breton.

MS, Muenster, Germany, 410 meters, "Hoch Heidecksburg March," by Herzer Rosen; "Aus Dem Suden Waltz," by Strauss, "Jones," from the operetta "Die Geisha," "O Tanz Du Kleine Geisha," "Goldschlied"; soloist, Lisa Hillow; "Waldteufel Ganz Allerliebst," "A Merry Medly Willy Wittig," "Fall Dollarprinzessin;" Casa songs, sung by Anton Himkamp, "Lacrima Christo," by Bohn; "In Der Waldschenke," by Simon; "Der Schimme Zecher," by Reissiger; Strauss Radetsky march.

OAX, Lima, Peru, 380 meters, "The Problem of Tacna and Arica After the Decision of President Coolidge," address; "Take the Ring I Gave You," soprano-tenor duet; "El Condor Pasa," prelude, Orchestra OAX; "Eight Variations on an Inca Theme," Rev. Father Paulo C. Aguilar; Sacred music by mixed chorus of three voices; Nocturne No. 3, Chopin, piano; "Lorelei," Orchestra OAX; "Prelude and Allegro," Pugnani-Kreisler, violin; "Sad Little Sister," tenor solo; "The Lima Today Which Likes Radio," talk; "She Is My Love," fox-trot, and hymns of Peru and the United States, Orchestra OAX.

——, **Munich, Germany, 485** meters, orchestral concert, overture to "Die Beiden Nusaren," by Doppler, and "Der Schonen Blauen Danau Waltz," Strauss; intermezzo from "One Thousand and One Nights," by Strauss; Kunstler-Leben Waltz," by Strauss; overture from "Die Schone Galathee," by Von Suppe; "Die Schoubrunner Waltz;" "Lanner Germania March," by Kral.

Germany Is 'Pipe' If You Know How

In Which Mr. Canaday Puts One Over on Mr. McCulloch, His Rival DX Friend

By S. J. Doss

FORT WAYNE, Ind.—There may be two more "bitter" Radio rivals in Fort Wayne than O. P. Canaday, of the Canaday Manufacturing company, and Robert McCulloch, assistant postmaster, but if there are they haven't come forward to be recognized.

Both are extremely proud of their respective sets and rivalry in tuning in on difficult stations to get is at a high pitch. Just now, Mr. Canaday is enjoying a good laugh at his friend's expense and "here's the how."

European test week naturally provided both fruitful ground. On one of the nights Mr. McCulloch received an invitation from his rival to "come over and hear Germany." "I've been getting it over my Radio." Mr. McCullouch was skeptical but willing to be convinced. Accordingly, he was on hand at the appointed hour. Mr. Canaday "tuned in on Stuttgart, Germany."

Music unmistakably Teutonic came clearly through the loud speaker and a moment later, Mr. McCulloch and other hearers present were informed in German as to the station and the next selection.

"Wonderful, not a bit of static," grudgingly admitted Mr. McCulloch, reaching for his hat and coat with the words and almost dashing out of the Canaday home in his anxiety to tune in on Stuttgart with his own set.

He didn't get it, however. The answer was:

In order to hoax his friend and rival, Mr. Canaday had arranged a small talking machine in the basement of his home and had attached his loud speaker to it by means of a rubber hose running through a cold air duct near the receiver. Three wax records in German comprised the "foreign station's program" and Dr Walter Kruse, local German-speaking physician and accomplice in the hoax, played the part of the "German announcer."

A new insignia for United States naval Radio electricians, until recently classified as gunners Radio, in the form of "a jagged spark," has been adopted for uniform wear.

STOP Bloops and Human Static!

ARE You a Blooper and if so, Why? The Foreign Tests Showed the Evil of Blooping. You Can Prevent It Easily and Simply. This Article Tells How.

By the TECHNICAL STAFF

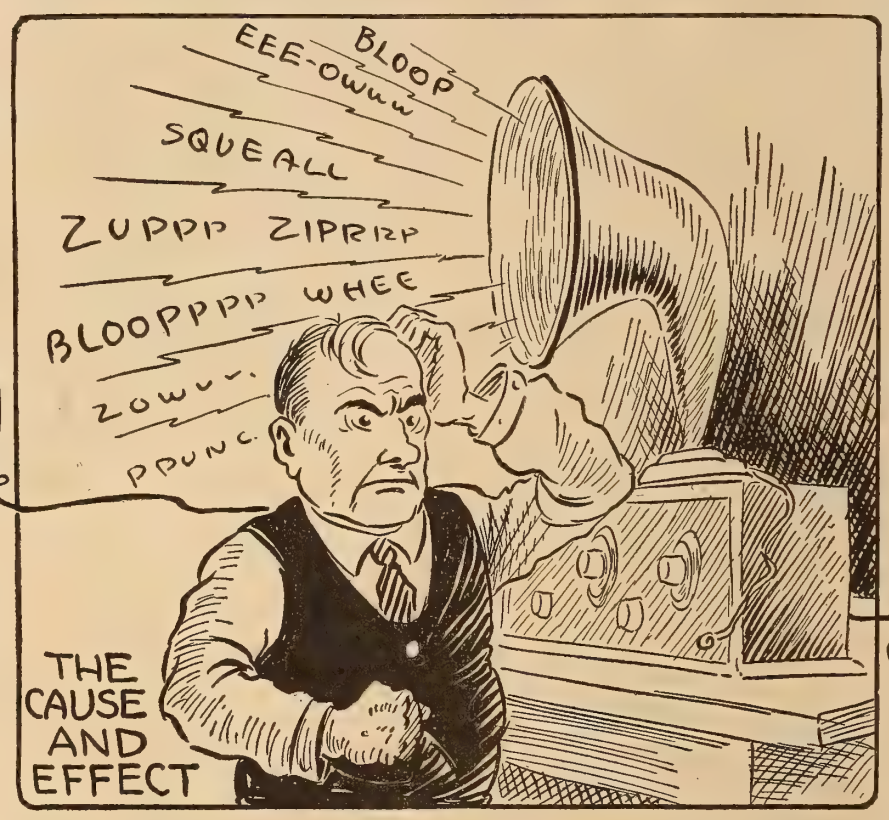
THE hour was that which occurs in every 24 known as 10 to 11 p. m. Central time. The day was the 26th of January—this year. Somewhere out in the darkness to the Eastward a score of European stations were shattering distance and atomic quiet with all the power available from great dynamos and acres of storage batteries, in the hope that some small part of their great power might reach American shores in the form of enjoyable entertainment. The tubes of three carefully adjusted super-heterodynes glowed dimly in the quiet of the laboratory. Each was attached to an antenna and the dials went relentlessly back and forth in patient search of fragments of the music and speech speeding Westward.

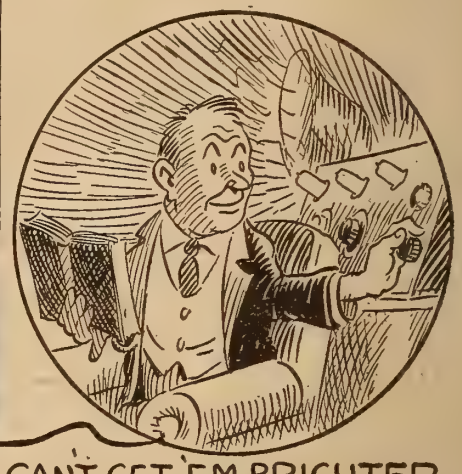
"Bloop, bloop, whur-r-r click, click, bloop," said the big special with the neutralized, honeycomb intermediates.

"Whistle, whistle, crash, bloop, bang and a coupla bongs," answered the shorter but fatter special with the resistance coupled intermediates.

The third, not to be outdone, retaliated with a siren whistle that started high, went down to a grumble and again soared to a piercing screech. Suddenly the big special landed on an orchestra. For a moment the melody poured forth, clear and pure with but a slight background of the ever present static. Then it died, with the grumble of a nearby blooper as its swan song. The search went on. At 200 meters, at 350, at 425, at 500, always the chorus of whistles, bloops, grumbles and clicks. Occasionally, the hum of vibrator or violet ray machine varied the monotony. One more snatch of music, one announcement was all the reward for the hours of building, the hours of search. Reports that trickled in during the rest of the week indicated that such was the result of the International tests for about 2,000,000 other set owners.

THE RACING DIALS





CAN'T GET 'EM BRIGHTER

Who Is to Blame?

Many were the invectives used to comment on the condition of the atmosphere. New words were coined to properly express disappointment and chagrin. The older words were run to death. All of which has lead to much speculation and argument on one technical staff as to who is to blame. Let's first take the stations. Surely, no one can logically lay the finger of blame on them; the Americans were quiet at the times requested, the Europeans and South Americans were on their waves and not heterodyning. Second, there are the makers of sets. You cannot blame them. The Radio public wants range, coast to coast reception and dance volume on everything from KFI to WEAF. To even approach such needs, regeneration must be possible on from one to three tubes. You people wanted it, you got it.

A recent survey made by the Department of Marine and Fisheries of Canada relative to Radio broadcast conditions in the more populated centers in the Dominion indicates that approximately fifty per cent of the "preventable interference" which prevails is caused through the incorrect operation of regenerative receiving sets by the broadcast listeners themselves. An article prepared by Mr. Andrew J. Allen, secretary of the National Broadcast Listeners' league, states that the most difficult sources of interference to overcome, and which create as much annoying and widespread interference to Radio reception in all cities at this time as any other cause, are the squeals, whines, whistles, squawks and howls of the radiating receivers.

"If the broadcast listeners would take effective steps to put a stop to the squealing of regenerative sets, probably 25 per cent of Radio interference would be removed in many localities," says the Interference Co-ordination committee's report of the National Electric Light association. On this subject, Radio Guide states, "Apparently every one cooperates except the Radio listeners themselves, just the people one would think would try the hardest to behave. Regenerative sets still hold all records for interference and practically every magazine and newspaper in the country has run articles warning about such outfits. Radio etiquette among broadcast listeners calls for the elimination of such interference. If each listener would remember that every time his set whistles coincidental with his tuning of it, he is sending out that same whistle to annoy all other listeners for a considerable area, it is believed that much of the trouble would soon be eliminated."

So there you are; no matter what agency investigates the complaints of the Radio public as to squeals and howls during International Test week, or any other time, the blame comes right back to the aforementioned Radio public's own door. Part of this interference is due to ignorance; much of it is wilful and in disregard of the rights of others. Do YOU know what causes squeals? Do YOU know what oscillation is? Do YOU know what regeneration is? If you do not, and you'd like to, so you can do your bit toward making the world safe for a self-respecting Radio set to operate in, then read on.

Principle of Regeneration

The principle of regeneration, as used in Radio receiving sets, is that part of the output of the detector, or a radio frequency amplifier, tube which feeds back into its own input and thus greatly increases the volume of the signal. The electric waves reaching the receiving set from the transmitting (broadcasting) station travel down the aerial and its lead-in, through the first coil in the set and so to earth through the ground wire. The energy set up in this first coil is transferred, either directly or by induction, into the grid of the first tube and influences it in such a way as to set it functioning.

The resulting output from the plate circuit of this tube is fed back in such a manner as to set up a "field" or influence, in the part of the circuit connected, as mentioned above, to the input or grid of the tube. This "field" induces in the input circuit a current of electricity of the same frequency as that of the received electric waves. The energy, therefore, which comes down the antenna wire is automatically strengthened by impulses from the output of the tube.

Unless properly controlled, this action will continue to build up until the saturation point or climax is reached, the tube being then said to be in a state of oscillation. When a receiving set is in oscillation, it causes howling and squealing in your own and your neighbor's receiving sets. Regeneration should therefore never be allowed to proceed to this point as it then constitutes a public nuisance.

Your Set Can Oscillate

You may be one of hundreds of thousands who can say, "But, my set is not a single circuit regenerative receiver. Mine is a five tube, so made that it cannot oscillate." That may be perfectly true, but if your set has tubes, anywhere from one to ten, it can cause interference. That may upset all your ideas on the subject; it may not agree with statements you've seen elsewhere, but it CAN cause interference. This brings us to the point that whether your set is to be classed as a "blooper" depends upon the amount of the interference. So far in this article one would gather that interference is caused only when the set breaks into oscillation, to be recognized by the yowl in one's own set. That is the extreme; any tube set radiates, causing interference, when the regeneration is advanced to the point where distortion creeps in.

Some sets are supposedly "balanced" or neutralized so that high amplification can be had in the radio frequency amplifier tubes without the possibility of oscillation. Such construction is designed to set up a reverse feeding back around the radio frequency stages so that any regenerative feeding back will be offset and cannot build up into the condition known as oscillation. That is all very well at the particular wavelength at which the neutralizing was carried out but the further away in the broadcasting wavelength band that one gets, the greater the regeneration, and in most cases this closely approaches actual oscillation. These sets certainly can and do radiate.

Can "Bloop" 1,000 Miles

You and many others may question the extent to which such radiation interferes with others. It is this which determines whether one is a blooper or not. A lighthouse keeper in New York harbor, who is located several miles from shore, finds that his only form of interference is caused by whistling receivers whose interference must travel at least five miles to enable him to hear it. In another case an amateur is reported to have experimented with such a device and was actually able to exchange signals with another station over a distance of five miles with only a WD-11 tube used as a detector. An oscillatory circuit can be built around a 199-tube, with only 140 volts B battery, and transmission accomplished, at times, over 1,000 miles.

In Cleveland two tests were conducted under joint auspices of the Cleveland Plain-Dealer and the Cleveland Radio association, to determine the extent of the area affected by oscillating Radio receivers. In one of these tests the oscillating set was heard clearly within a radius of 50 miles. An interesting incident is contained in Mr. A. J. Allen's article, mentioned before. "I was trying to locate a neighborhood blooper which was a source

PLEDGE CARD

Radio Digest PROGRAMS Illustrated

Reg. U. S. Pat. Off. & Dom. of Canada

I WON'T BLOOP CLUB

I pledge myself to operate my Radio set to reduce radiation or blooping. If I am unable to make my present set operate properly, I further pledge myself to replace it with a receiver that will create less interference.

Make of my set:

Number of tubes is:

Signature .....

Address .....

City and State.....

I am cooperating in this campaign with Station.....

Upon mailing this pledge to Radio Digest, "I Won't Bloop Club" membership card suitable for wallet or framing will be issued.

OYSTER DISHES ARE STRICTLY AMERICAN

BETTY CROCKER PRESENTS WAYS OF PREPARING

Food Expert Says We Should Perfect National Cookery Like People of Other Lands

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

WE IN the United States are constantly talking about the famous old German dishes, the roast beef of old England, Italian spaghetti, and the wonderful French sauces and pastry. I wonder how many of you realize that we have some very fine culinary productions that are distinctly American. If we would be 100 per cent American we should at least know the dishes for which our land is famous, and furthermore, we should endeavor to perfect our national cookery so that we can point to it with pride, as do the people of these other lands.

Oysters are distinctly American, largely due no doubt to the fact that we have such an enormous production in this country. Oyster stew, oyster cocktail, and oysters on the half shell, are no doubt the most popular oyster dishes.

Various Kinds of Oysters

This is the season when oysters are best, and so we should use them often. Any seasonable food is not only cheaper when in season, but is also much better in flavor than at any other time. For that reason it is always wise to use such food in its natural season as much as possible.

I wonder if you know that oysters come in different sizes. At large markets you may find as many as five sizes, and they usually vary in price, according to size. In smaller towns the dealers may carry only one size or grade. Local dealers sometimes use different terms to specify these different grades, but they are commonly called "standard," "extra standard" and "select." The small oysters are more tender and have a better flavor than the large ones, and are also more convenient to eat raw. The large oysters are good for frying. If you have any choice it will pay you to buy the size that is best for the particular use you wish to make of it.

Famous Oyster Stew

Oyster stew is especially good because it is so hot and stimulating. The combination of the oysters with milk and butter gives us a very wholesome and appetizing dish. There is nothing more welcome than a piping hot oyster stew after a sleigh ride, skating party, or a long automobile ride.

There is oyster stew, and then again

"MISS KITTY" GIVES RECIPES FROM WMC

"Miss Kitty," otherwise Katherine Nelson, of WMC, Memphis, is making a furor in the Southlands with her Monday and Thursday morning home economics discussions. Eighteen years of experience are behind this pretty domestic science specialist, although she doesn't look that old, and her rapidly growing audience which tunes in her 9:50 a. m. talk twice each week speaks well for her knowledge.

Daily Women's Program Popular KFNF Feature

Afternoon Talks and Golden Rule Circle Winning Friends

SHENANDOAH, Iowa.—Although the Henry Field Seed company station, KFNF, here is regarded as the most popular farmers' station of America, its feminine friends are legion and the number is rapidly increasing. Every afternoon from 3 to 4 p. m., Central time, the program is known as the ladies' hour and features songs and talks of interest to housewives, with the musical numbers being mostly in answer to requests.

Every Wednesday afternoon a special talk on flowers is given by Mrs. Helen Fisher, sister of Mr. Field. Mrs. Fisher is a garden specialist and is capable of giving explanations and hints regarding the care of flowers.

Another feature of the station which the women have been especially interested in, is the Golden Rule Radio circle, which is an informal union of people who write in to the station that they are trying to live according to the Golden Rule. A certificate of membership is issued as an incentive to live such a life.

Woman Champ Set Builder

KANSAS CITY, Mo.—Mrs. J. R. Garrison, 1002 East Thirty-third street, here, has become a strong contender for honors among amateur set makers. She has just recently won second prize in a receiver building contest in the five and six-tube class. Mrs. Garrison's entry in the contest was a six-tube Bremer-Tully counterphase, and last year she constructed a five-tube set.

SHORT WAVES

By Marcella

Now, what ever prompted you, Ellen, to believe that "Tom Thumb" and Peter MacArthur, both of WOC, Davenport, are one and the same? Yes, the voices are very, very similar. But then, Mr. Twamley, the studio director of the Palmer station, asked me not to divulge "Tom Thumb's" identity—it's a mystery, you see. So a mystery it must remain.

* *

"Bill" W. G. Hay, ex-KFKX and ex-WOK, is now doing a full turn on WGN and WLIB. The Tribune tells me he is so popular they had to put special heavy railings in the studio to keep the ladies away. But why run after him? He's not a ladies' man. He's a Scoo-ootchman and his beloved is his bonnie wife (whose lemon fluff pies I reported on previously). But you can't help liking him, can you?

* *

Graham McNamee doesn't sing over the Radio to my knowledge, but I have written him just to be sure. Will let you know soon.

* *

E. L. Tyson is all wrought up over what I said about him recently. He says his wife will call me to account to explain why I said he was probably single. Well, the charming WWJ announcer didn't tell me whether he was matrimonially zero or not, and he didn't have that worried look, so I just thought he must be single—just like I am. But now the truth comes out.

* *

Speaking of benedicts, girl friends, here's another one to cross off the mash note list. To wit, one CBL, or C. B. Locke, announcer for WBAP, the Hired Hand-Star Telegram station at Fort Worth, Texas. Why he's so married, he has a brand new C. B. Jr., and the younger chip off the old block is broadcasting all night, thus getting in training to take over his daddy's job later on.

* *

Continuing along the popular WBAP strain, for the boy chums this time, let me tell you sheiks about a dandy, fine girl you must tune in. She's known at Fort Worth as the "Sunflower Girl from Kansas" and her home is Kansas City, Mo. Real name? It's Bessie Coldiron, but don't shy away from her harsh par-

SHORT WAVES

By Marcella

(Continued from page 11)

ental name. She's a beauty—20 years old, bright red hair, all that a bachelor could desire. The Hired Hand heard her sing last fall and gave her a special course in microphone singing. She had never seen a mike before this winter at WBAP. Now her popularity is overwhelming—has been from the start—and her mail averages somewhere between 150 and 350 cards and letters a day. The postman bewilders her for she hasn't yet quite conceived that she is gaining fame continent-wide. The H. H. informs your special gossip pervader that she no doubt will return to Kansas City "when the robins bloom" as she is visiting Fort Worth for the mild winter climate (adv.) and to get away from the harsh winters up north (not adv.). Any Saturday night from 9:30 to 11 p. m., Central time, will bring her in on 475.9 meters.

* *

The Hired Hand told me about Bessie, the Sunflower Girl, in a letter explaining about his married life. He is married, it seems, and his wife "raises h——" (the H. H.'s own words) most of the time because he refers to his home as his boarding house. Hard lines, aren't they girls. Better write to him and sympathize.

* *

This is not a WBAP column, but I must add one more thought. That delightful orchestral marvel who leads the band at the Texas hotel, heard from Fort Worth, is not an Indian just because his name is Chief Gonzales. He's of Spanish decent, and dark—and HANDSOME.

* *

The "Oh Henry" Boy, Walter Preston, known to thousands of WIBO listeners, is married, Sarah. Sorry, my dear, but he's very happy. No chance at all. He directs WIBO now, having been recently promoted, and has a beautiful tenor voice, as you know. Besides being married, he proves himself a model husband by liking to play bridge and winning a prize now and then. Very good looking, slender, "built for speed," weighs about 140 pounds, is about five feet eight inches tall, and Charleston's modestly but admirably.

* *

You home-seeking fair ones, you experimental cooks, listen with Georgia to the facts regarding Wayne Meyers, the new announcer at WIBO. Wayne is single. I place that first because that is the first question Georgia asks. He is also one of the most even-tempered men I have had the good fortune to meet. His hobbies are his mother and music. He supports his mother for his dad is dead. Went overseas for the big fight and there got acquainted with another now popular announcer, Pat Barnes of WHT. Wayne Meyers is now 27 years old, stretches up five feet five inches, weighs 135 pounds, has hair "betwixt and between" and looks at you through gray eyes. He is persistent and careful, nice and pleasing. He sings if urged, and as an excellent matrimonial quality, I must add, he does not play golf.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

OYSTER AMERICAN DISH

(Continued from page 11)

there is oyster stew. It is all according to the way you make it. A certain chef in New York city is quite famous for his oyster stew. His secret is in the way he prepares the oysters. He cooks them in butter quite slowly for several minutes before adding to the milk. It is quite surprising what a difference that one thing makes in the flavor of the stew.

This is the way we prepare it in our model kitchen:

Model Kitchen: One pint of oysters, ¼ cup butter, 1 teaspoonful salt, 1 pint of milk, ½ cup of cream.

Method: Pick over the oysters, removing any pieces of shell. Melt butter in a sauce pan. Add the oysters and cook gently until the edges curl. Scald the milk and cream. Add to the oysters. Season with salt and pepper. Let stand hot several minutes, then serve. This stew may be made with all milk, or with a larger proportion of cream, according to how rich you wish it.

Scalloped Oysters

In preparing scalloped oysters, use equal parts of bread crumbs and cracker crumbs. If you use all bread crumbs the mixture will be too wet, and all cracker crumbs are objectionable because they soak up too much of the oyster liquor. Here is our recipe for scalloped oysters that has been very popular among our friends all over the country:

One pint oysters, 1½ cups crumbs, 1 teaspoonful salt, ¼ teaspoonful pepper, 1/3 cup butter, 4 teaspoonsful cream, 4 teaspoonsful oyster liquor.

Method: Be sure to use half bread crumbs and half cracker crumbs in this recipe. Place a layer of the mixed crumbs in a buttered baking dish. Add a layer of oysters. Season with salt and pepper and dot with butter. Add another layer of crumbs, then more oysters, and season as before. Pour over the cream and liquor. Cover with another layer of crumbs. Bake in a moderate oven thirty minutes (350° Fahrenheit).

Fried Oysters

I have discovered that many people think of fried oysters as a restaurant dish, and seldom, if ever, attempt to prepare them at home. Fried oysters are very easily prepared, and there is no reason why you cannot have a fried oyster supper at home whenever you wish. Drain off any liquor. Roll each oyster in flour so that it is entirely covered with a coating of flour; then dip in egg, roll in sifted bread crumbs and fry in deep fat.

The reason for rolling the oysters in flour first is that you must have a dry surface or else the egg will not stick. To prepare the egg, beat the whole egg slightly and add one tablespoon water or milk for each egg. Dry crumbs are better than the soft ones for crumbing, and they should be sifted. The coarse crumbs will not stick as well as the fine sifted crumbs.

The oysters may be fried in a kettle of deep fat or in fat at least an inch deep in the frying pan. As soon as they are a golden brown remove from the fat, and place on a brown paper in order to drain off any excess fat. For a fried oyster supper serve the oysters with catsup or chili sauce, pickles or olives, sandwiches or rolls, a hot beverage, and fruit salad for dessert.

ADVANCE PROGRAMS FOR THE WEEK

Saturday, February 13

Headliners Today

Eastern	Central	Mountain	Pacific
8 p. m.	7 p. m.	6 p. m.	5 p. m.

WFI (394.5m-760kc) Boosters' club.
WGR (319m-940kc) Allen's saxophone band.

High Lights of the Week

"SUNSET LIMITED OF 1926" takes to the ether from KPRC, Houston, Saturday night. This is one of the latest vehicles of the year to carry light opera music. The crew is the Southern Pacific glee club. Another event of the evening is the intercollegiate glee club concert at WNAC, Boston. Colleges competing are Boston university, Clark, Holy Cross, Wesleyan, Williams, Boston college, Brown, Bowdoin, Middlebury and Trinity. Boy Scouts are meeting this same evening at WTIC to celebrate their sixteenth anniversary.

Hired hand, branchman, Klondyke miner, engine wiper, vaudeville and cabaret singer are a few of the past professions of Allen McQuhae, tenor, who sings from KPO, San Francisco, Sunday. Mr. McQuhae is now famous for his Irish songs. The twilight program of WBAL, composed entirely of Grieg music given by the WBAL concert orchestra, will also tempt fans to dial 246 meters. John Wilbourn is the tenor soloist.

The Cincinnati community committee will play a pretty compliment to the governor of Ohio Monday evening when all his favorite musical compositions are given by the community quartet. Slavonic music by the Zahpad trio is the Monday feature at KFI, Los Angeles.

CNRV of Vancouver will enter the dramatic world Tuesday when the three-act play, "Peg o' My Heart," is produced. This promises to be the Radio theatrical event of the CNR stations. An interesting series of lectures on points of peril in contemporary diplomacy is scheduled for Tuesday evenings at KFMX, Northfield. Prof. Keith Clark's talk this week will be on Mosul as a strategic point of the Near East. This city is located in Syria.

Historical glimpses of the West during the heroic struggle of Colorado trail blazers in 1858 and 1859 will be given Wednesday from KOA, Denver. "There Were Giants in Those Days" is the subject of the talk by Joseph Emerson Smith.

Madame Olga Samaroff, pianist, who was heard recently over the WEAF chain, will talk at 5 p. m., Eastern time, from WTIC Thursday. An airplane trip to the Big Ten universities will be taken by the Columbus men's quartet from WEAO this same evening. Snappy news items from each campus and university songs will entertain the listener.

Paul Ash and his merry-mad gang will invade the studio of KYW, Chicago, Friday evening for a frolic which will begin at 11 p. m., Central time. Paul Ash is as informal with his Radio audience as he is with his stage spectators. A merry time is always had by all.

WRC, Washington, D. C. (468.5m-640kc), 12 m., organ recital; 1 p. m., Hamilton hotel orchestra, Daniel Chwalow, director; 6, Lee House trio, Sam Udrin, director; 7, Irving Boernstein's Hotel Washington orchestra; 8:30, students' concert; 10:30, "Crandall's Saturday Nighters."
WREO, Lansing, Mich. (285.5m-1050kc), 6-7 p. m., dinner concert, Speed Wagon serenaders; Gold Standard ensemble; 10-12, Speed Wagon serenaders, Carl Hall Hewey, director.
WTAG, Worcester, Mass. (268m-1120kc), 12:05-2 p. m., WTAG orchestra; 3-5, WTAG orchestra.
WTAM, Cleveland, Ohio (389.4m-760kc), 12:30-1:30 p. m., Austin Wylie's Vocalion Recording orchestra; 6-7, Carl Rupp and his Hotel Hollenden orchestra; 8-9, Hollenden hour; 9-12, Ev Jones and his gang.
WTIC, Hartford, Conn. (475.9m-630kc), 6:30 p. m., children's period, "Skinny and his Gang"; 6:50, dinner music, Hotel Bond trio; 8, Sunday school period; 8:30, Boy Scouts; 10, dance music, Le Bal Tabarin orchestra.
WWJ, Detroit, Mich. (352.7m-850kc), 9:30 a. m., "Tonight's Dinner;" 12:05 p. m., Jules Klein's Hotel Statler orchestra; 3, Detroit News orchestra.

Central Time Stations

CKY, Winnipeg, Can. (384.4m-780kc), 9 p. m., concert, J. A. Banfield, Limited, Royal Alexandria hotel.

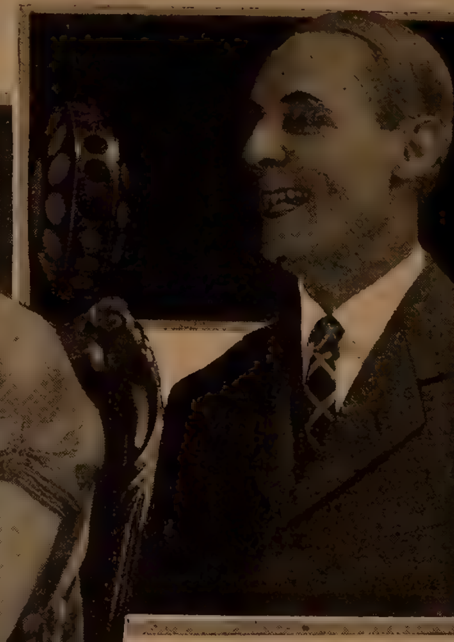
Here is Dr. Thatcher Clark, right, giving his regular Tuesday evening French class at WEAF, New York. The lady seated below is Mrs. Kenneth Rose, pianist. Her classical interpretations are well liked by fans listening to WSM.



Esther Cutchin, above, is a widely known concert-pianist at WRC. Billy Spears, upper left, is the famous traveler at WBBM, Chicago.

"Around the World with the Apollo Quartet" is the monthly feature at KYW, Chicago. The four gentlemen above are visiting with the listeners many distant places in the world.

Taps of Gong Are from Spanish Bell

Station WJZ, Mexico City, Sounds Relic of Seventeenth Century Design

THREE taps of the gong and talks in a foreign language have set Radio fans in the United States to wondering whether they were hearing the Far East or Europe. The old gong whose mellow tones have entered so many homes through loud speakers is an ancient Spanish bell of the seventeenth century imported by earlier colonizers in Mexico and now has its resting place in the studio of the 500-watt Westinghouse equipped station CZE at Mexico City, where it begins and ends each program.

What will probably interest the fans more than anything else is that this powerful station which has been heard in more than one distant part of the United States is a government station, owned and operated for but one reason—education.

The possibilities of Radio are regarded in this neighboring republic not chiefly for amusement but for the serious purpose of extending education. Dr. Jose Manuel Puig Casauranc, secretary of education, includes in his progressive program the installation of Radio receivers in every public school in the Mexican republic so that eventually broadcasting will play an important part in every classroom, no matter how remote.

The talks which fans have been hearing on a 350-meter wave length are educational lectures given in Spanish.

Christian Science Radio Service Cures Headache

Although Not Believing in Faith Lady Receives Relief

AUSTIN, Minn.—One of the strangest happenings accredited to Radio was experienced here recently when a case of cure was reported to a local paper.

A well-known lady of the city was suffering from a severe headache, which was most inconvenient, as she was entertaining guests. None of the simpler methods brought relief, but during the evening the Radio was tuned in to the Christian Science service being broadcast from the Gold Medal Station, WCCO, Minneapolis-St. Paul. Before the end of the service, her headache had entirely disappeared. The lady is not a Christian Scientist, but the relief of her headache being coincident with the service made a deep impression on her mind and was reported.

TO BASE ARTISTS' PAY ON REQUESTS

Popularity of Radio Stars Will Determine Entertainers' Remuneration at Station WSBC

CHICAGO.—Paying the artist in a record of his popularity, by means of a bulletin board of requests, is the novel idea of "Dynamo" Dave Edelson, director-announcer of the World Battery station here, WSBC, located in the New Southern hotel.

Mr. Edelson has been a favorer of the artist himself, throughout his Radio career, from his pioneer days in Radio advertising to his present position as director of his own station. He feels the inadequacy, in most cases the absence, of remuneration to the entertainers that give the station its name, and seeks to pay them in some equitable way.

A record of popularity is the only way to show the appreciation felt by the invisible audience.

Licence New Cuban Station But State No Wave Length

WASHINGTON.—A new Cuban station, 7SR, at Elia, is now broadcasting every Tuesday and Thursday night at 8:30 p. m., according to a report to the department of commerce. The station is licensed in the name of Salvador C. Rionda and uses 500 watts power. No definite wave length has been assigned, but the station has the authority to use any wave length between 200 and 360 meters.

Listeners are requested to suggest a wave length that will not interfere with their local stations. Those hearing the station may cooperate by writing direct to Mr. Rionda.

Join the "I Won't Bloop Club"

LAST week marked the beginning by Radio Digest of a country-wide organization that will mean much to the future of Radio broadcast reception. It has been named the "I Won't Bloop Club" and its purpose is just what its name implies. There are no fees—it is absolutely free.

Have you joined? Do it today, and get your neighbor to do it likewise. Sign his name on the dotted line of the pledge card—either one clipped from page three of Radio Digest or obtained direct from your favorite broadcasting station.

Broadcasting stations are helping the club's campaign along by telling their respective audiences of the club and asking for memberships. Sign a pledge card, send it to Radio Digest, and receive a membership card. Simple as this arrangement may seem, many people may doubt the ability of this campaign to clarify the air of a few hundred thousand radiating receivers that are unnecessarily punctuating perfectly good broadcast programs with bothersome bloops and squeals.

But it will be effective, however, simple it seems. All we ask is that every listener sign the pledge and abide by the rules. After that the air will be better for broadcasting. You can depend on a man's word, and we are willing to wager that many an "I Won't Bloop Club" member will take steps to stop his radiation. He will either learn how to make his present set non-radiating or will buy a non-radiating receiver.

SIGN THAT PLEDGE NOW!

World Court Debate Makes Epoch

THE Chicago Tribune deserves credit for its enterprise in bringing the World Court controversy directly before the people through Radio. A debate on the question was staged in Washington by the leaders of the opposing factions before a microphone not far from the capitol itself.

People were enabled to hear both sides of the controversy by their respective strongest adherents. Afterward they were assisted in making a decision of their own by writing their vote on blanks printed in the Tribune.

It was a distinct step in advance both for newspaper enterprise and Radio service. It opens a new field of endeavor on the part of all newspapers. It was the logical sequence of Radio reports of the football games and other sports.

Why shouldn't the more momentous games that concern our national life be presented as directly and vividly?

It brought our statesmen who are on the firing line of our national front clearly and distinctly before their constituents. They became real. Their voices were physical and not third person reports in cold type. There was no opportunity of intentional or unintentional reportorial bias. They presented their own minds with their own voices directly into the ears of the voters.

This fine stroke on the part of the Tribune was a good thing for Radio. It cultivated a new class of listeners. Business leaders, too busy to take time to listen to the average Radio musical program, take keenly to this sort of service.

Internal problems such as the farmers' financial crisis could be placed vividly and directly before the people by the keenest thinkers and speakers. This, of course, has been done and is becoming more and more common but usually as an incidental talk to some public gathering infinitesimally small compared with the Radio audience.

The Tribune has seized the Radio possibilities with both hands—and strong hands they are. Col. R. R. McCormick, associate publisher, himself assisted in making this Washington enterprise a success. He even visited the president in the White House and the success of his mission there was manifest by the ensuing results.

This event of a direct personal debate between the strongest men in the United States senate specifically (not incidentally) into a microphone for the benefit of hundreds of thousands of listeners, might truthfully be said to mark an epoch—a new troth between the Radio broadcast and the daily press.

RADIO INDI-GEST

Consternations

Last week when all the nations
Were exchanging oscillations,
I sat beside this superset of mine.
All I got was radiations
Instead of foreign stations,
While the bloopers played the opera "Heterodyne."

There have often been occasions
When our European relations
Were muddled up and in a manner strained.
But ethereal gyrations,
Caused by DX animations,
Made the greatest foreign rumpus ever gained.

THE NIGHT HERD

Get Out the Gold Award

Dear Indy: A dear friend o' mine said you was checking up on them there International Radio tests. I got a one and ½ tube (the ½ is a Radiotron) receiver what can't be beat, and the tests proved I was right. Please confirm the following what I tuned in:

A—10:00 to 10:25 p. m. Central time, Sunday. Nothing. I didn't have the set turned on. Please confirm.

B—10:25 to 10:26 p. m. Still nothing. Aerial disconnected. Please confirm.

E—10:26 to 10:30 p. m. Whizzz—wheee, s-s-cr-eeetch. Wave length variable. Believed to be Canary Islands. Please confirm.

G—10:30 to 10:45 p. m. More howls, shrieks, bloops, blams, zowies, bings, biffs and crashes. Believed to be static. Didn't have to tune set. Any wave worked. Please confirm.

O—10:45 to 10:50 p. m. 233 meters. Sermon, faint, but if you talked to yourself fast enough you could convince yourself it was loud. Finally worked up courage to tell wife. Please confirm.

R—10:50 to 10:55 p. m. Went to tell wife and get her back to the phones so she could hear Europe "over the loud speaker." Please confirm.

X—10:55 to denouement. Wife shrieks with laughter; "Hah, hah, you poor sap," says she, "This is KFON, the First Church of Christ, Scientist, at Long Beach, California. They haven't learned yet that the tests are on, acct. of being kinda slow out there." Please confirm.

GUM SHOE

Such an easy way to make money! If you don't get the Gold Award we'll sign a bill of complaint. We've been asked to confirm so many things we are beginning to feel like a bishop. Anyway, here's what you got: A-sia; B-muddled; E-gypt; G-whizz; O-he-ll; R-menia; X-cited.

Lost, Strayed or Stolen

Oh, Indi, I'm unhappy,
My eyes with tears are wet—
Tell me what has happened to
That Red-Head Gal, Bobette.

SHOBIE

Well, Shobie, we're sorry but just last week a letter mailed through Indi-Gest to Bobette was returned. Hope she comes back some day.

Or Put House on a Turn-Table

I have changed the direction of my aerial and now cannot tune in several of my old stations, although I have received many new ones. As I cannot change back to the old direction on account of lack of space, what would you suggest as a remedy? D. X. HUNTER

As the technical department couldn't solve that one, it was turned over to us. Our correspondence course, that made us wealthy, didn't think that an important question, but you might try to have the stations moved.

(In next week's issue, Indi will describe and explain his first hook-up since becoming a member of the technical staff. It will show how to connect a player piano to a set with more or less tubes.—Editor's Note.)

There Is Blood in the Moon

It looks too bad for pesty announcers. Last week Blooper got three lines of a poem and couldn't get the last one, so asked Indi to get the gang to help him. Here are the first three lines:

I Know of An Announcer
Who's a Pest Upon the Air—
If I Can Get a Bouncer

.....

And here are some of the suggestions that have come into the office. Have you any? You know the prize is an autographed heterodyne squeal.

"I think murder would be fair."

J. A. C.

* * *

"He'll want to say a prayer."

PETE

* * *

"He'll be minus hide and hair."

HANK

Be a Cake-Eater

Dear Indi: Please send some Radio Digests to me. My wife has been trying out recipes until, I'm sorry to confess, I have the Radio Indigest. So hurry please before I die from eating her pesky old Radio pie.

A. MICHIGANDER

Englishman Loses Control?!

Hump: "Jones carries his loyalty a bit too far."
Bump: "How's that?"
Hump: "He smashed his new five-valve set by jumping to his feet when, at the end of the program, the band played 'God Save the King.'" LONDON BOBBY

Two Kinds of Radio Bills

Condensed

BY DIELECTRIC

Radio dramas may still require touching up, or toning down, here and there to meet the requirements of unseen action, yet there have been examples of such entertainment quite complete. The latest of these came through Station WJZ, New York, with the "screenless Radio drama" called "Just Suppose." It was not difficult to follow the action of the plot as seasoned artists spoke their parts with good diction and histrionic ability; however, this could have been done more easily had the male voices sounded less alike. Listeners were confused at times to know if Prince Ruppert or Tony spoke.

In some of the correspondence addressed to the editor of Radio Digest, there have been decided preferences for jazz and dance music generally. It doesn't seem to me that programs are overbalanced with classical music, although the trend is toward more of the classics. Most stations devote a part of each evening to dance music alone. Improvement in broadcasting ballroom music is noticeable in that less time is consumed than formerly with announcements between numbers. Many stations have received comment to that effect in these columns and I wish to add another: WHT, Chicago, which seldom interjects more than the station call and possibly title of the succeeding selection.

Station WSM, Nashville, Tenn., conducted a special test night with evident success. Smith's dance orchestra furnished the main attraction with a full portfolio of popular hits rendered in an approved fashion. Such announcements as were made were given with pep, terse and interesting. It should be remarked, in fairness to both listener and broadcaster, that the call letters of this station should receive less speedy dispatch in order that one may be sure of the station to which he is tuned. This is an easy matter to correct and ranks as one of the most important items to receive attention.

Splendid organ recitals are heard now and then from the high school auditorium in Atlantic City, N. J., broadcast through Station WPG. A number of complaints have reached me from devotees of this instrument who were tuned to the World's Playground during a recent recital, stating their exasperation over a thirty-minute broadcast with no reference to the station's location. This is not habitual, I wish to say, and probably will not occur again. In the course of groups of musical numbers, it sometimes happens that no announcement is heard between selections in a group, but only at the beginning and end. In classical programs, the continuity of a symphony may be seriously interrupted by applause between movements; call letters can hardly be classed with that, and they should be announced slowly and often.

If you were tuned to Station KSD, St. Louis, while the Bankers Choral club was broadcasting, no need of my mentioning how profitable was the time spent listening to their harmonies. Choral singing should entertain as many people as any other feature broadcast and no one can truthfully deny the presence of exceptionally well trained choruses in the country. More of them should be on the air than are now heard.

These community concerts grow on one and cause wonder that we had to wait so long for them to join Radio entertainment. Another such program through Station WSAI, Cincinnati, gave opportunity for music lovers to rejoice in the artistic work of Miss Vreeland, Mr. Beddoe and the Cincinnati symphony orchestra.

ABC Radio Fundamentals for Everybody

Chapter VI—How Grid Functions

By Milo Gurney

BEFORE explaining the action of the third or grid element of a vacuum tube, and its associated essentials, the grid leak, grid condenser and C battery, it appears important that both the mechanical construction and electrical details of the Radio head phone or loud speaker be first explained. This is to enable one to more fully realize the commanding part which the grid element assumes within the vacuum tube.

Without attempting to picture a particular make of apparatus, figure 17 is shown as typical of the interior and exterior mechanism of a head telephone. It is of interest to know that in general the head phones used in Radio resemble in every detail (but one), the receiver common to those used in wire telephony as a part of the universally used telephone. Electrically, Radio phones use much smaller magnets, while the turns of wire upon the pole pieces of the magnets are vastly greater in number.

Construction of Ear Phones

A-A in figure 18 is a bi-polar magnet, having both a positive and a negative pole. These poles represent the terminals of the magnet and are designated as B-B in the drawing. C-C pictures insulated spools which are slipped over the pole pieces B-B and upon which the wire used within the head phone is wound. D-D usually comprises a stamped, non-magnetic, metal cup which serves as a mounting support for the magnets A-A and their associated parts. E-E is a soft iron metal disk or diaphragm which is supported around its outer edge by the metal cup D-D, with its center directly above, but not in contact with the pole pieces B-B. Entrance openings are pierced through the metal cup D-D, to admit passage of the battery wires from the B battery to the coil windings upon the spools at B-B.

As the head phones are a part of the circuit through which battery current passes over the space charge, or electron flow within the tube. It is then obvious that as it flows through the wires upon the magnet spools, it will energize the magnets and direct a steady magnetic pull upon the receiver diaphragm. Unless the value of this current flow can be automatically varied vibration of the diaphragm cannot occur and sound cannot be produced.

Importance of Grid

By this slow process of reasoning, we arrive at the importance of the grid, whose function is to vary the value of the current flow, through automatically varying the volume of the electron flow from the filament to the plate.

This valve-like action of the grid is little understood, and only about five per cent of those constructing Radio re-

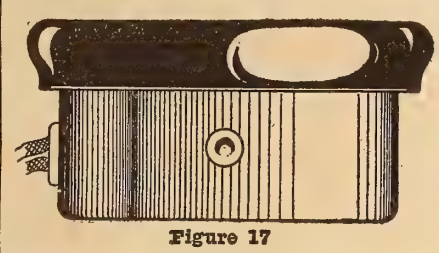

Figure 17

ceivers, outside of the engineering fraternity, have the slightest conception of what it is all about. Surely Radio suffers through having too many cooks to spoil the broth. Radio reception suffers, while the B battery manufacturers are doing quite well thank you, because of the heavy drain upon B batteries, although they are spending a lot of money trying to get designers to cut this uncalled for drain down, through the insertion of C batteries.

Getting back to our subject, you will recall, earlier in the articles, that the current which reaches the tube is alternating, or two-way in character, and is guided on one side to the grid terminal of the tube socket, and on the other to the filament terminal. In action, it is then evident that in each cycle or period the grid is alternately charged negative and positive. Thus, as the grid receives its negative charge, the flow of electrons which would normally be attracted to the plate are in part arrested, or interrupted in this travel and attach themselves to the grid. This effect reduces the plate space charge, and offers a resistance to the normal flow of current, or in effect, varies its value. This varying value, in turn, creates a varying pull upon the phone diaphragm, and it is this varying pull which causes the sound to be reproduced in unison with the modulated received signal.

The Grid Leak

The electrons thus stored upon the grid are, in part, neutralized when the current swings to positive, while the surplus are returned home to the filament through passing over the grid leak. The grid leak is, as the name implies, but a resistance of a sufficient value to admit a predetermined volume of negative electrons to pass through it to filament. Were it not of a correct value, the grid would not retain the electrons, but would permit them to flow uninterruptedly to the filament and thus destroy the automatic grid control or valve action so important for successful operation.

It is apparent that the grid valve action is created through the alternate positive and negative value of the current reaching it. However, these alternate charges are not sufficient to furnish the nicety of control which is desired. Therefore, a negative booster, or C battery is placed in series with the grid circuit, and just ahead of the grid leak. This is usually of a 4-volt value, with the negative pole of the battery connecting to the grid leak. The purpose of this applied voltage is to counteract the effect of the positive alternating signal voltage, in order that the grid may be maintained at a predetermined negative bias, consistent with securing the best operating point on the curve of the tube. As a discussion of this point involves much that is foreign to an article of this type, it will not be gone into for fear of adding complications.

A Simpler Explanation

The above then is how the grid functions, and I quite realize that it is as meaningless to you as it was to me when first explained in a similar manner—so I won't let it go at that. I will give you, in a very few words, my boy Jack's explanation, as all fathers of boys have "very bright" boys. One evening, after drawing numerous diagrams picturing grid action, and exhausting every known means for the conveyance of intelligence to him, with side remarks which included "dumb," "no brains" etc., etc., he piped up with "Oh, yes, I've got it, and under-

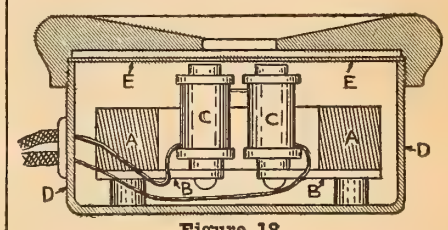

Figure 18

stand it better than you do. Now, listen, here is the way a grid works. The little electrons which leave the filament can't jump as far as the big ones, so they make just half a jump and land on the grid. Then old man positive sees a bunch of them on there, and cracking his whip says: 'Get outta here,' and they being scared almost stiff, take another jump to the plate. So you see, daddy, part of the time the little and the big ones are jumping and part of the time they ain't, and that's why the current varies." Which explanation after all is pretty close to the truth and surely utterly devoid of technical verbage. So I take it back—Jack's explanation is the one to believe.

Without doubt, any attempt to explain the action of the grid must of necessity

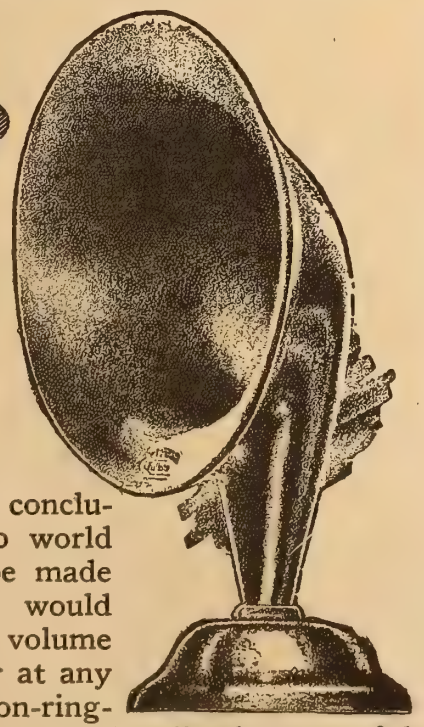
(Continued on page 24)

BIG PRICE REDUCTION

Fultone

Trade Mark

THE FORD of LOUD SPEAKERS



$6.50

Fultone Loud Speaker has conclusively proven to the radio world that a reproducer could be made and sold at $6.50 which would handle music or speech in volume as perfectly as any speaker at any price. The horn is solid, non-ringing and wide-throated enough to handle the powerful reproduction from super-heterodyne or reflex. The adjustable diaphragm permits matching Fultone to any receiver and "B" battery voltage.

The Fultone speaker will be shipped on a satisfaction or money back basis on receipt of price in money order or currency. The coupon is provided for your convenience in ordering if your dealer cannot supply you.

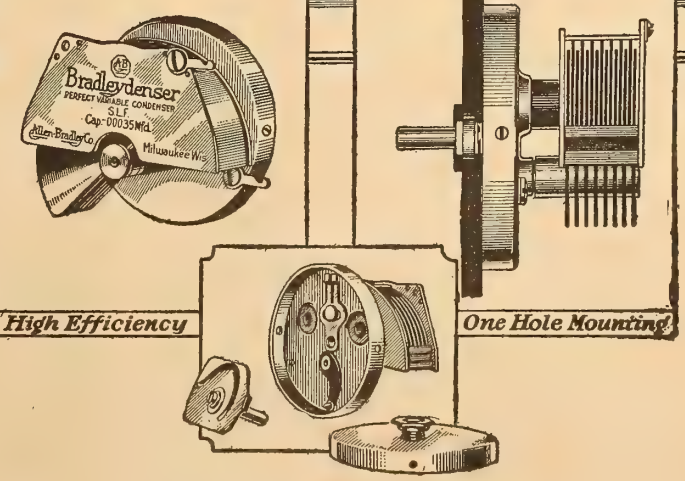
The New **S.L.F. Bradleydenser**



A Compact Straight-Line-Frequency Condenser

THE new S. L. F. Bradleydenser is the outcome of long, careful research in condenser design. It provides straight-line-frequency tuning over the entire circumference of a 360-degree dial. Stations are widely and evenly spaced over twice the dial-spacing of ordinary condensers. This unique control is obtained by using a special cam on the condenser shaft which provides the straight-line-frequency tuning now demanded by all set builders.

ANOTHER feature of the new S. L. F. Bradleydenser is the compact design which eliminates the long eccentric rotor plates. The Bradleydenser can be substituted for any condenser on a set without interfering with other parts on the panel. The one-hole mounting also simplifies installation. Be sure to bring your set up-to-date by getting a set of S. L. F. Bradleydensers from your nearest dealer.

WAS BOY SCOUT FIRST?

(Continued from page 6)

station. After letting Armstrong in for the record, he acknowledged receiving signals from others.

Mr. Godley reported that he had interviewed Benzie and Miller about their record and that they had taken the matter in a sportsmanlike manner, but I have been unable to find that either he or they ever stated that they contradicted the reports sent to the Robinsons.

I have investigated the Robinsons and the Scotchmen. They all have excellent reputations for truthfulness and honesty, as I can prove by letters from unprejudiced persons. Benzie's father states that the Robinson station was heard as reported. I have investigated Armstrong and Godley. They are, and were at the time of the 1921 A. R. R. L. tests, professional Radio men. They made good use of the publicity gained by their "record," for their own benefit.

Armstrong was engaged in litigation against Dr. Lee DeForest, who manufactured the transmitter used by the Robinsons. Armstrong won, and some years later, after it was reported that he had received a million dollars for his regenerative circuit patent, another court decided in favor of Dr. DeForest. I wrote to Armstrong, telling him what the Robinsons said about the way in which he obtained the letter from them. I received no reply.

I have asked all the members of the investigating committee that discredited the Robinson record, including Mr. Armstrong, A. A. Hebert and L. G. Pacent, where the evidence might be seen on which their decision was based. I also asked President Burghardt (presiding at that time) of the Radio Club of America.

The evidence has not been made available. President Maxim of the American Radio Relay league says he never saw it. Mr. Armstrong said that Benzie and Miller made a mistake in reporting the time the Robinson station was heard.

The evidence in my possession has been submitted to the editor of Radio Digest and he states that it appears to be conclusive in establishing the Robinson record. Their station succeeded in getting across again in later A. R. R. L. tests. Benzie, now in India, where he became an engineer on a tea plantation, has verified the reception of broadcasts from the British Isles, and his reception has been confirmed.

Did Armstrong and Godley steal the Robinson record?

Has the Radio Club of America the evidence that Armstrong promised to show the Robinsons? Is it conclusive? Will it be made public?

If not? You say it!

"BLOOPER" WAR OPENS

(Continued from page 10)

of terrific annoyance and interference to myself and many other listeners. I tuned my set to the station the other fellow was trying to receive that night, and then I shut off my set and went calling. At a neighbor's house a square away, I found him sitting there toying with the dials while his highly oscillating set with brightly lighted tubes, was squealing all over 'Kingdom Come.' He was trying to get the station for which I had left my set tuned, and I said to him: 'Let your dials remain as they are, don't turn off your set, and come up to my house.' My friend did as I suggested and when I turned on my set in his presence, in came his squealing interference. Then I said: 'Now call your wife on the telephone and tell her to move the dials back and forth, and let's see what happens.' Every time she turned the dials past the point of resonance for the station we both had tuned in, you can imagine the terrific howls, yelps, whistles, squawks and squeals that surged in through my loud-speaker, since my set has enough volume to fill an auditorium.

"My friend was convinced that he was a 'Radio disturber,' and promised to get a non-radiating receiver, but he still uses that interfering 'blooper' although the occurrence happened some time ago, and he goes on disturbing other listeners within a radius of many miles. He is not a member of the Broadcast Listeners association of our city, but should be for his own good as well as that of other listeners whose enjoyment he spoils."

Such situations as this are retarding the use of Radio. The sooner a compulsory remedy is found to prevent "radiated regenerative interferences" of this character from interfering with broadcast reception, the sooner will the art of Radio come into general favor for all around usefulness as an indispensable scientific utility for social and economic advancement, in furtherance of private and public education, entertainment and human progress.

(Having shown where the blame lies for this unfortunate condition of the atmosphere and the extent to which a few can spoil the pleasure of hundreds of others, this discussion will be continued next week and for several issues to come and will take in preventive measures on various types of receivers.—Editor's Note).

ORGAN WEAR FAVORITE

(Continued from page 7)

take you back to the trumpets of King Tut and can do it just as easily as he can to the Oriental fantasias of modern Arabia. At present he is on the air with a tour into the historical past. He has organized an historical society for those who accompany him—membership cards are issued to those who write for them. They travel each Thursday evening back to music of past generations.

* * *

AT WEAR it seems that sincere effort has been made to plan programs which will, in their general course, please all classes of listeners. The regular weekly features include classical, semi-classical, jazz and talks by prominent speakers. New York relays, including the Atwater Kent hour on Sunday evenings, also are broadcast from WEAR.

The Goodyear concert orchestra entertains during Sunday afternoons, under the direction of Ivan Francisci.

Sunday evenings from 7:50 to 8:30, the WEAR quartet, which is composed of Leona Brown Woodcock, soprano and accompanist; Edith McArt, contralto; Albert Downing, tenor and director, and Gay Donaldson, baritone, offer songs and song cycles particularly suited to this Fireside hour.

The dinner concerts from 7 to 8 every evening are furnished by the well-known orchestras from the Hotel Cleveland and Hotel Statler, under the direction of Friederick Jansen and Maurice Spitalny, respectively.

The jazz music of the station is furnished by Warmack's singing syncopators. This orchestra offers a program late each Tuesday and Friday, along with a half hour dinner concert from 7:00 to 7:30, on this latter evening. They also offer a program on the first and third Saturdays of the month from midnight to 1:30 a. m.

The WEAR studio instrumental ensemble, which just recently made its debut before the Radio audience, is composed of Leona Brown Woodcock, staff pianist and director; Howard DeGant, violin; F. E. Sommer, cello; Bruce McAdoo, viola, and Herman Walter, flute. This ensemble is to be one of the regular features on the WEAR programs.

A B C'S OF RADIO SETS

(Continued from page 23)

be clouded as it involves so much of the technical in order to treat the subject fairly. I trust that those of you who are sufficiently interested seek out the public library. A most fruitful evening can be spent in learning more about this wonder of Radio.

(In the article on A B C fundamentals next week Mr. Gurney will explain the different types of audio frequency amplification, which when added to the detector serve the loud speaker.—Editor's Note.)

OLD DANCES WIN FAVOR

(Continued from page 5)

Henry Ford produced Mellie Dunham of Maine, and Mellie, at the foot of the flivver king's throne in Detroit, challenged the world to take away his claim as the grand champion fiddler. Uncle Jimmy heard about it and was shocked.

"You tell that up-Maine feller," said Uncle Jimmy to Hizzoner the S. O. J. "that any time he wants to meet a real fiddlin' champeen I'll be listenin' to proposals. But it ain't fair for a youngster like him to hope for to beat a real ol' timer like me whose been fiddlin' at the dances since he was a baby on his mother's knee. Why he's only seventy-two. I was plowin' a field 'fore he was born."

Latest advices from the front fail to state whether Mellie and Uncle Jimmy have signed up for a match with Mike as the referee.

* * *

WHEN the honors have been decided between Mellie and Uncle Jimmy the winner will doubtless be confronted by a score of new challengers. For instance there will be Mr. John Baltzell who, according to a letter signed by Wm. L. Baltzell, 502 E. Ohio avenue, Mt. Vernon, O., is the "champion old-time fiddler of Ohio, Indiana and Kentucky; also Edison and Okeh artist and very well-known as a Radio entertainer. He plays every Friday, 1 p. m., at WEAO, Ohio State University, Columbus, and has played at WBAM, WLW, WTAM and WHR."

It is probable the winner will have to settle with the champion of Connecticut, declared at the finals of a state contest for old-timers, over fifty years old, at Hartford, January 28, sponsored by the Hartford Courant and the Capitol theater.

And Michigan will have to be reckoned with, according to a letter from the Michigan State college at East Lansing. It says:

"One hundred letters in one day as the result of a single program is the record made at WKAR, the college Radio station. An old-time dance program played by an

(Continued on page 26)

The Eveready Hour

LIKE the fabled ship in which Jason brought home the enchanted fleece of gold, the Eveready Hour brings a rich treasure of entertainment to charm the harbor-homes of its hearers.

Inaugurated two years ago, the Eveready Hour was an adventure in broadcasting—an hour of connected entertainment, uninterrupted by the frequent injection of the name of the broadcaster.

Many of these programs have become famous. Thousands of letters voice the appreciation of our audience and ask for repetition of favorites. We make no requests for these letters, but they mean much to our artists and to us, and are of great value in helping us in our efforts to arrange programs of a distinctive nature and pleasing to the vast audience.

Radio has already become a highly specialized art worthy of the most scrupulous code of ethics, and the Eveready Hour represents a sincere effort to pioneer in providing the most acceptable form of radio entertainment.

Eveready programs cover a wide range of entertainment and human interest, transporting us to periods of wholesome simplicity; to barren islands where marooned sailors meet adventure, starvation and death; to battle-scarred France with singing doughboys; to emotional heights by telling with music the stories of the seasons; and to memories of yesteryear aroused by old ballad and musical comedy favorites.

Eveready Hour begins at 9 p. m. each Tuesday night, Eastern Standard Time.

OPERATING AND TROUBLE SHOOTING

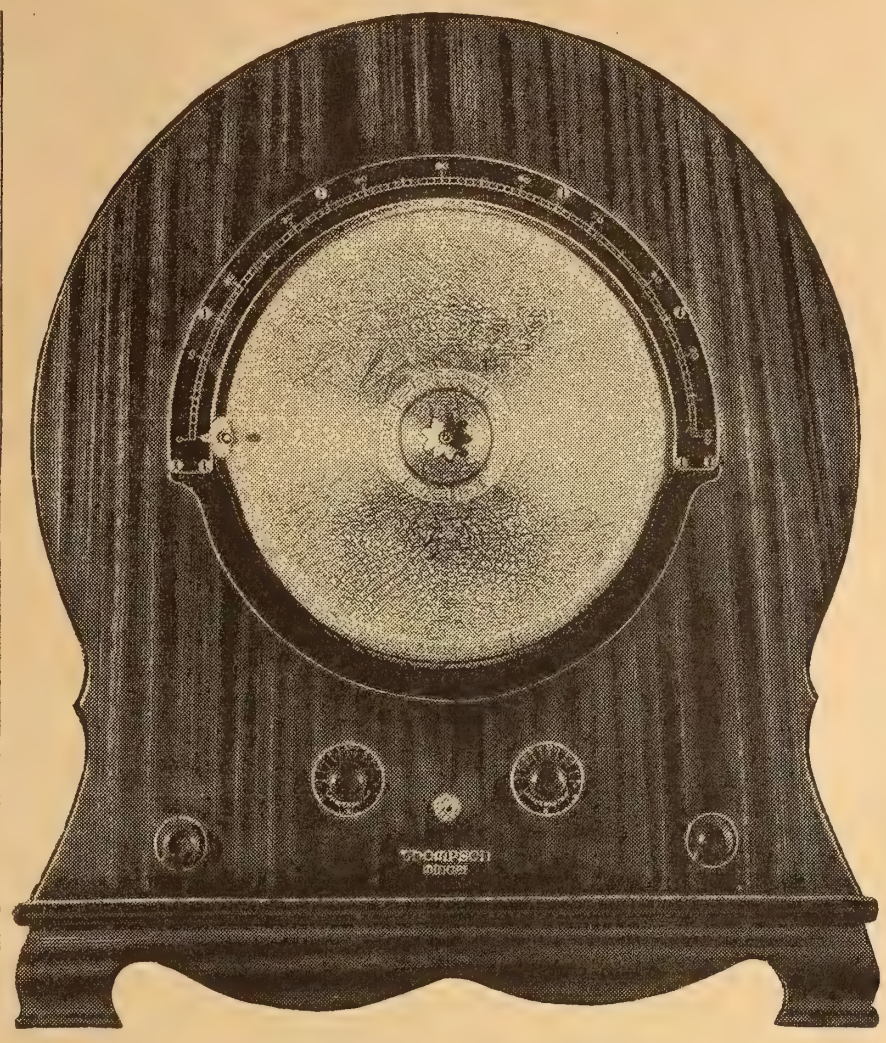
OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of a Thompson Minuet Receiver

THIS is a five tube tuned radio frequency receiver of unique design both as to external appearance and internal mechanical assembly. It employs a straight circuit (non-reflex) which includes two tubes operated as radio frequency amplifiers, a detector and two stages of audio frequency amplification. In appearance, the Minuet is distinctly unlike any other receiver and its compact construction and simple operation represent a most successful combination of two goals long sought for by engineers. A cone type speaker is built into the front of the cabinet and internal compartments are provided for the necessary batteries. The tuning arrangement is about as close to single control as one can get at this stage of Radio's development and the major tuning is accomplished with the Station Selector Pointer which travels around the upper edge of the speaker diaphragm.

Uses New Power Tubes

This is one of the first sets on the market to use tubes of the UX type and the new power tubes. The user has two choices as to tubes and batteries although in either case dry cells furnish the filament power. When this receiver is operated at what the manufacturers choose to call "Regular Volume," five UX-199 tubes are to be used and this combination will provide ample volume for all practical purposes. To meet special conditions, a combination of tubes is possible which gives "Extra Volume" and here the user inserts four UX-199s and one UX-120. As we tried out the set in the laboratory, the "Extra Volume" combination was used which makes necessary the following batteries: 6 Columbia Ignitor dry cells, 3 Eveready No. 772 B battery units and 1



Eveready No. 766 B battery used as a C battery.

To connect the Eveready Ignitor dry cells use the short wires provided with the set. The center terminal of one is connected to the edge terminal of a second and the center terminal of this second one is connected to the edge terminal of a third. This makes up one series group. The other three cells are connected this way to form another series group. Place the two rows of three close together so that the open edge terminals of each group are at the same end and the open center terminals at the other. Now connect the center terminal of one group to the center terminal of the other and likewise the edge terminals. With a heavy cord or tape tie the six cells together and place them in the bottom compartment at the right side (looking at the set from the rear).

Connecting Batteries

Wires are provided coming down from the set into the battery compartment and the wire with black and yellow covering is to be connected to one of the edge terminals at the ends of your two series groups. The solid yellow covered wire connects to one of the center terminals at the other end of the series. The three number 772 B units are placed flat one on top of the other at the left side of the compartment with negative terminals to the left and plus terminals to the right. The bright red wire from the set goes to the bottom plus post, a short connector goes from the bottom negative post to the center battery's plus post and to this same plus post connect the maroon and red lead. The center negative post must be connected with a short connector to the top plus and to this top plus post we also connect the maroon lead. This leaves only the minus of the top battery open and the lead which is black and red connects to that.

The C battery, which in this case is an Eveready B unit, is placed on the shelf in the very top of the set with minus to the left. Three leads come up through from the set to this shelf and the solid black one goes to the negative battery terminal. The black and green goes to the plus 18 post and the pure green lead is connected to the plus 22½ post of the battery.

Rigging the Aerial

Binding posts for the connection of aerial and ground are directly behind the set proper. The ground connection is made as usual, to a water pipe and with a ground clamp. About two inches of the pipe are to be scraped shiny and the ground clamp secured at this point with a wire from the set, run to it as directly as possible, fastened to the clamp. The antenna can be erected either indoors or outdoors but the latter is preferable. The total length of the ground wire, the lead-in and the antenna proper should not exceed 125 feet. A single wire stretched between two chimneys, two trees or the house and the garage, and insulated from the supports at each end by a small Pyrex or porcelain insulator will give the best results. If, for example, the ground wire is 10 feet long and the lead-in from aerial to set will be 35 feet long, the wire between insulators should be about 65 feet long. Should the supports be further apart than this, the remainder of the distance can be filled in with rope or wire between the insulator and the further support.

Steinite Low Loss

Interference Eliminator

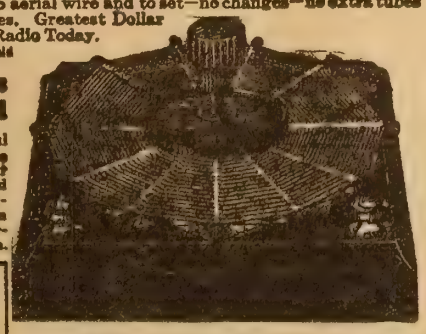
No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

Over 150,000 Sold

Improved Results with Tube or Crystal

Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. Money-Back Guarantee.



Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $3; Steinite Crystal 50¢ — Three for $1.

Steinite 5-Tube Set $29.75

FREE Descriptive Literature on request.

$1 Postpaid If you are not delighted with results you get your dollar back

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

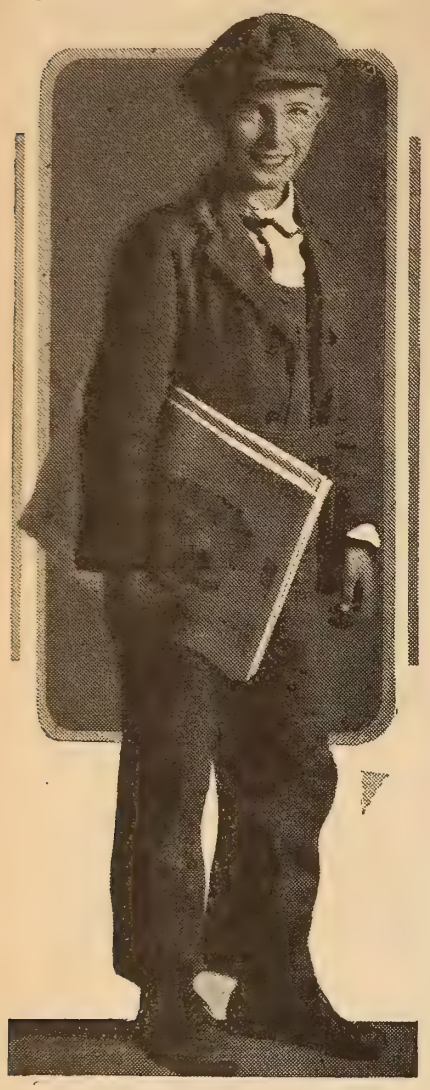
REAL NEWSBOY ADDS REALISM TO DRAMAS



Mrs. Wilda Wilson Church wanted a real newsboy to take the part of "Puffy" in "Just Boys," which was broadcast over Radio Station KGO, San Francisco, so she picked Reginald Wood (above), who was selling papers on the corner near the studio. All Reggie had to do before the microphone was be himself and act natural.

KGO AND RADIO DRAMA

(Continued from page 4)

ambulance whizzed past the house where the family was gathered. The mother ran to the door crying—'My! That ambulance certainly got here quick!'

"The KGO players have given a drama each week for almost two years. Our repertoire has included almost all kinds of plays, but mostly those written for the stage—farce, comedy, melodrama, and the more serious heavy dramas.

"Every time we broadcast we are sure to get letters from entirely opposite reactions. Some will say, 'This is the best play you have put on yet!' Others will say, 'It was all bunk!' Between these two extremes range the variety of opinions and appreciations of this multiple-minded ear, into which we pour our audio dramas every Thursday night. Letters have come from hospitals, shut-ins, ninety-year-olders, from San Quentin penitentiary, from men working on the roads in the mountains of the west, and from children just learning to write.

* * *

"IN time, I believe, dramas will be written just for the Radio. In fact, it is being done to a certain extent today; although no one, to my knowledge, has been able to establish a veritable Radio technique.

"The person who cannot enunciate clearly, phrase correctly, make the printed word come ALIVE—who cannot make stories LIVE by the spoken word—will soon have no public voice. I believe the Radio audience wants sincerity and naturalness. In other words, the Radio drama must seem like life itself, coming out of ear-phones and loud-speakers. For all the listeners know, it may be real life itself, instead of a spoken play in a studio before a microphone."

A newsboy on the streets of San Francisco, yelling out his wares, was recently selected by Mrs. Church to take the star part in the Radio drama. The boy made good, created a sensation among listeners for his newsboy talk and realism, and is now one of the regular members of the cast of KGO players.

The boy's name is Reginald Wood, and he took the part of "Puffy" in the drama, "The Delinquents," written by Catherine Browning Miller, was produced on the New York stage under the name "Just Boys." In the stage production of the play the part of "Puffy" was taken by Ernest Truex.

According to Mrs. Church, listeners are becoming more and more insistent on realism in the play over the air. Her experience with Reginald Wood has convinced her that the way to get realism is to go out and select people in real life to take the parts in plays produced before the microphone.

OPERATING THE MINUET

(Continued from page 25)

One can now install the tubes and care should be taken to see that the UX-120 is placed in the proper socket. Being in a hurry, the writer did not watch this point carefully and looked for the resulting distortion for half an hour before finding that the UX-120 was in a radio frequency socket. Looking at the set from the rear and reading from left to right, the first three tubes are UX-199, the fourth is the UX-120 and the last is another UX-199. It will be found that two of the holes in the sockets are larger than the other two and that two of the pins in the bottoms of the tubes are somewhat larger. Turn the tube until the proper pins are just above the proper holes and then a firm, steady push downward will set the tube firmly.

Behind the fifth socket mentioned above, there is a coil with three binding posts marked 1, 2 and 3 with a flexible lead coming up to them which may be secured to any one. If your antenna and ground system is close to 125 feet overall, slip this lead on post number 1; if the length is about 75 to 90 feet use post number 2 and, if an indoor aerial or very short outdoor aerial is employed, use post 3. The back can now be replaced on the cabinet and we are ready to put the set into operation.

Operating the Minuet

Below the speaker on the front of the set are four small knobs; the two in the center are called "Compensators," while that at the extreme left is a volume control and that at the right is the filament control. Turn the two end knobs toward the right so the small pointers are about horizontal and to the right. Set the Compensator knobs at 0 position. Insert the small key provided in the battery switch (between the Compensator knobs) and push it inward until it stops, then lock in position with a slight turn either left or right. This operation lights the filaments of the tubes and must be done each time the set is put into operation.

Slowly move the Station Selector Pointer over the tuning scale from 0 to 100 and back, until a broadcast station is heard. Adjust position of this pointer as closely as possible for maximum volume. The small Compensator knobs are then adjusted separately for maximum strength—and that's all there is to tuning in a station. On this first trial, however, it will be necessary to adjust the Volume and Filament Controls for best results. If these knobs are turned unnecessarily far to the right, the life of both the batteries and tubes will be considerably shortened. With a distant station tuned in with Station Selector and Compensators, turn the Volume and Flament knobs back to the left until a diminution of volume is noticed, then back to the right just a bit. At this adjustment the tubes are giving maximum possible results and increase in filament brilliancy resulting from turning the knobs to right would do no good.

To Shift Antenna Lead

While presumably the Compensator knobs would have to be readjusted slightly for each station we did not find this the case. With the left Compensator at 0 and that at the right at 2 to the left, all stations were brought in at maximum and no adjusting of the Compensators from these positions did any good. If excessive interference is encountered from powerful locals and no amount of fine tuning will completely separate them, open the back of the set and shift the antenna lead, on the coil, from post 3 to post 2 or from post 2 to 1 as the case may be. More range and volume may be secured on 3 but the selectivity will be increased, making reception more pleasant and tuning easier with this wire on post 1. The set is turned off by turning key to point where it springs out and it can either be left partly out or entirely withdrawn as you prefer.

OLD DANCES WIN FAVOR

(Continued from page 24)

orchestra composed of employes at the college brought forth this deluge.

"With the beginning of Henry Ford's old-time dance music fad, the "Power House Gang" at the college decided to form an orchestra. Fred Sherman, sixty-eight years old, claims the local championship, which he has held for the past forty years. He has been challenged by Jep Bisbee. Ten states were represented in the letters received."

Station KFMQ of the University of Arkansas considers its program incomplete without an occasional contest between old-time fiddlers.

So it seems that Mr. Ford is in a fair way to claim immortal fame for reasons

WORLD'S GREATEST SPEAKER VALUES

Construction of B Current Power Supplies

Part III—Thordarson UX-213 Tube Type

By George Walters

IN PRESENTING this series of B power supply units the writer presented the most popular but the largest in size first, then the next most widely used type constructed along more compact lines, and we have saved for the last a type of which very few have as yet been made, but having the advantage of extremely small size and absolutely no hum. This combination about to be described measures but 6 inches from the tip of its UX-213 tube to underside of baseboard, 8 inches in depth and 10¼ inches in width. Not much bigger than a large capacity B battery. Tested on the Unitrola receiver, recently described in Radio Digest, not a trace of hum could be found, even with the head receivers connected after the second stage.

Price Correction

IN THE list of parts presented in the last issue with the Molliformer B Power Unit, the price of the kit from C. E. Jacobs was given as $17. This is the price of FW4 kit, a four jar assembly, while the kit used was the FW8, containing eight jars and listing at $22.50. The total cost of parts is therefore $27.70.

The Special Transformer

This type has not been widely constructed chiefly because few transformer makers have brought out suitable transformers for use with this new RCA tube. There are plenty of transformers for the Raytheon tube, but this one was ignored. Requests began to come in to Thordarson, however, so the transformer and chokes used in this third unit were designed and are now available. The transformer is known as type R197 and comes complete with twisted cord and light plug as input and six binding posts for output. There are two secondaries needed, one to light the filament and one to supply the high voltage. The filament secondary develops 5 volts between the outer terminals and has a center tap which is the positive output point. The large secondary develops 200 volts between each outer terminal and the center point, this last point being the negative output connection.

The chokes are both compact and neat in appearance with an inductance value each of 30 Henries. They are known as type R196 and two are necessary. The filter used in this layout is the same as that provided for the Raytheon-Acme combination, which was the first type described. Again we use some of the most excellent high voltage condensers marketed by Tobe Deutschmann, neatly encased, easily mounted and available in the desired sizes. Allen-Bradley's line is called upon for a number 10 Bradleyohm and a 10,000 ohm Bradleyunit. Daven at Newark supplies the mounting, available everywhere now, for mounting the Bradleyunit. The socket is Benjamin's justly well-known spring-cushioned Clera-tone, while the binding posts can be either Walnart or Eby Ensign.

The front panel size will depend largely upon whether you intend placing this equipment in a cabinet. If you are going to, use a 7x12x3/16 piece of Formica, but if it will be left in the open you can do as the writer did and use a 6x7 scrap. It should be remembered that this tube is going to get pretty warm in operation, so, if the unit is enclosed, provide plenty of holes around top and bottom for circulation of air.

Getting down to actual construction, the layout of the apparatus can be seen clearly from study of the top view photograph. No matter what size front panel is used, the hole for the Bradleyohm is 4½ inches from the bottom and centered, while the binding posts are 3¼ inches from the bottom and 1½ inches apart. The writer's baseboard is 5/8 inch thick, so the holes for the three screws holding panel to baseboard are 5/16 inch from bottom. It is advisable to carefully place all parts on baseboard, mark where each wood screw is going, then drill a fine hole at each point but do not screw down each part as yet. For the transformer, the left rear and front right mounting holes are used, for the first choke to right, the rear right and front left holes are used and for second choke the rear left and front right holes take screws.

For the rear 4 mfd. condenser use the rear right and front left lugs and for the front 4 mfd. condenser use the rear left and front right lugs. The reason for all this will be seen when you get to grounding cases. The wiring of the transformer and the four .1 mfd. condensers is handled before securing transformer. Place two .1 units face down and side by side on transformer, then two more face down squarely on top of them. For the time being hold them in place with a large rubber band or string. Two soldering lugs are placed on each of the six transformer posts. In the rear row of three posts turn one lug on each toward the rear, which will bring the lug on each outer post against the outer lug on each of the lower condensers; solder to these. A short piece of wire can connect the inner lug on each lower .1 condenser and this wire will touch the soldering lug on center rear row post of transformer.

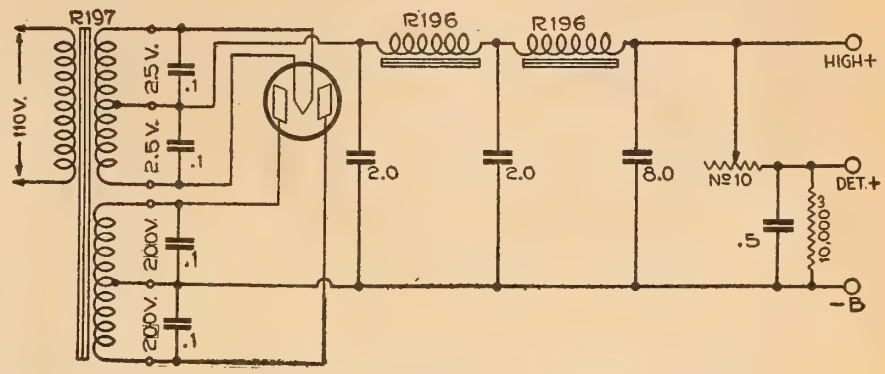

Figure 3. Wiring diagram of Thordarson UX-213 B unit.

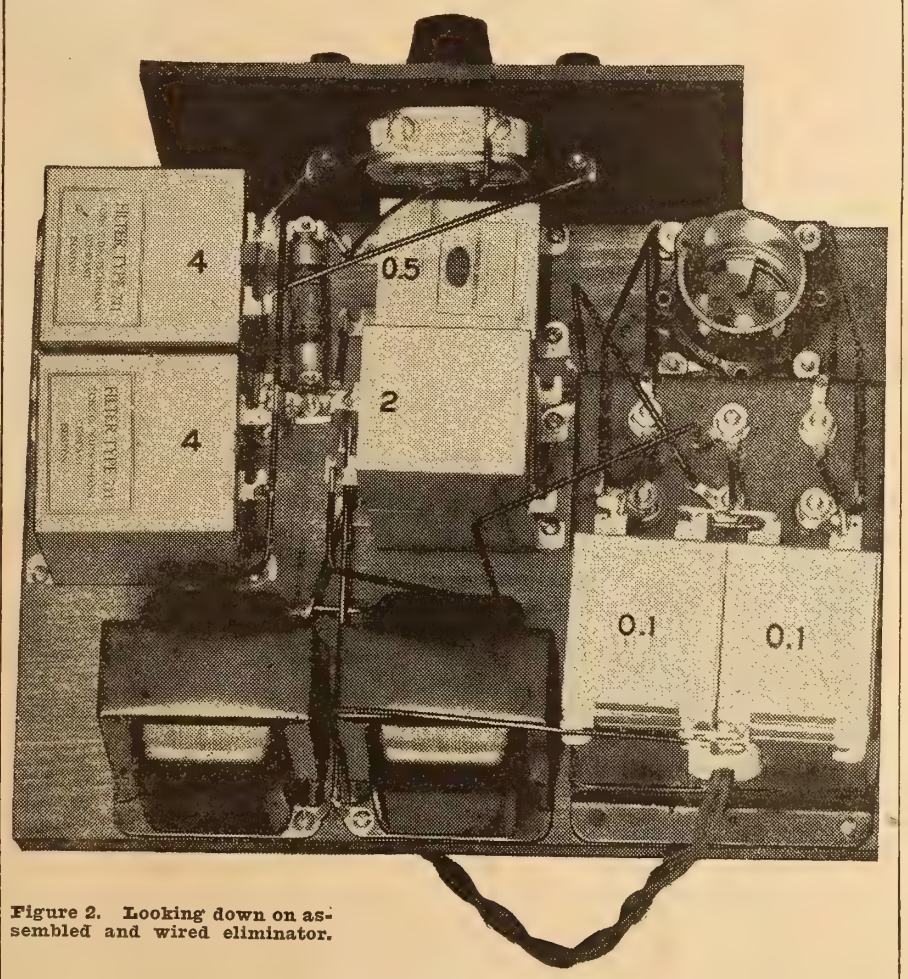

Figure 2. Looking down on assembled and wired eliminator.

The same connection scheme is followed between the upper pair of condensers and the front three binding posts, except that short leads will be necessary to reach from lugs on posts to lugs on condensers. Transformer can now be screwed down and the band or string removed. A soldering lug should be slipped on the screw holding front right corner of transformer. Now screw down the choke coils placing a soldering lug on rear right screw of the first, and rear left screw of second, adjusted so they touch.

The socket is screwed down with P and G terminals to the front. The extra soldering lug on each outer front transformer binding post is now turned to front and nut tightened. Connect front row outer left post to rear left post of socket and front row outer right post to rear right post on socket. The second soldering lug on each outer rear transformer binding post is now turned outward and nut tightened. A wire is put in from rear outer left post to front left post on socket and another from rear outer right post on transformer to front right post on socket.

The soldering lug on left terminal of first choke is to point upward and is connected, by wire going up and over, to front center post on transformer. The lower 2 mfd. condenser is now screwed down in center of board with terminals to right. A soldering lug is placed on the front mounting lug pointing toward transformer. Put in a wire from the rear connecting lug to the left post on second choke. The second 2 mfd. condenser is then placed on the first and a wire is put in from front lug of one down to front connecting lug of the other. The rear connecting lug of the upper one is then conected back to the left terminal of first choke. Connect the right terminal of first choke to left terminal of second. Now put in a wire, passing between the chokes, from the mounting screw soldering lugs at rear of chokes to the front terminal of the lower 2 mfd. condenser.

Then place the two 4 mfd. condensers in position with a soldering lug on the front left screw of the rear one and the rear left screw of the front one. These should touch. Run a wire up from right terminal of second choke to rear connection lug of rear condenser, then up and forward to front connection lug on front 4 mfd. condenser. The Daven mounting goes in next with two soldering lugs on the rear terminal. One should point to right and touch the two on the mounting screws of the 4 mfd. condensers while the other points to left to make contact with the front terminal on the lower 2 mfd. condenser. The .5 mfd. condenser is then set in place with terminals to the right and a soldering lug on the rear mounting screw pointing toward transformer. The mounting

Total cost		$45.95

THORDARSON B POWER

(Continued from page 27)

screw soldering lug on the lower 2 mfd. condenser, on the .5 mfd. condenser and on the transformer can now all three be connected together.

A short wire is then put in connecting the rear connection lug on the .5 mfd. condenser with the rear terminal of the Daven mounting and the front terminal of the 2 mfd. condensers. Another wire connects from front terminal of the lower 2 mfd. condenser, across to left to the three soldering lugs on the case of the 2 mfd., the case of the .5 mfd. and the case of the transformer. From these three grouped soldering lugs run a wire straight up, and then back, to the center rear terminal of the transformer.

Connect the rear connection lug of front 4 mfd. condenser with the front connection lug of the rear 4 mfd. condenser and connect this last named point to the front lug on the upper 2 mfd. condenser. We now go to the back of the four .1 mfd. condensers on the transformer. The inner mounting lugs on the two upper condensers are connected together with a short piece of wire. Now put in a long piece from the grouped soldering lugs on the adjacent mounting screws of the chokes, up to, and soldered to, the inner mounting lugs on the two lower .1 mfd. condensers. A very short piece can now connect these two inner lugs of the lower two with the connected inner lugs of the upper two.

Connections to Panel

A wire is now bent to touch, at its lower end, the front connection lug on the .5 mfd. condenser and the front terminal on the Daven mounting touch the center panel binding post soldering lug, then around to upper side of the Bradleyohm to the left terminal. Now bend a wire so it will connect from the right terminal of the Bradleyohm down to the soldering lug on the right panel binding post, then across to the front connection lug on the front 4 mfd. condenser. The last wire to be put in goes from the rear connection lug of the front 4 mfd. condenser over to the left binding post in the row of three on panel.

If the above connections have been carefully followed the posts are negative B, plus detector and plus amplifiers, reading from left to right. The Bradleyohm adjusts the detector voltage smoothly and evenly over a wide range.

OLD DANCES WIN FAVOR

(Continued from page 26)

other than the manufacture of a universal gadster. With the collegians themselves joining in the movement, "back to normalcy with the dance," jazz seems to have received a severe kick in the corns.

Perhaps the next step will be a national contest for an Old-Time Fiddler's championship. Would the readers of Radio Digest like to see such a contest organized between leading broadcast stations? Let's have a vote on it.

Photogravures of Your Favorite Artists

GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

Total cost		$51.15

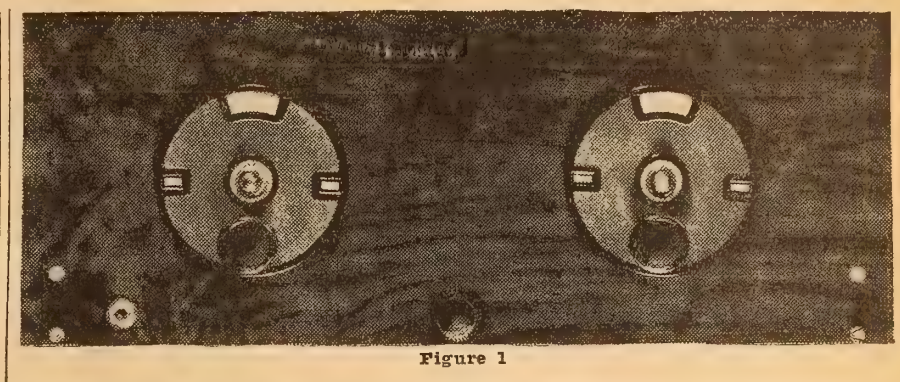

Figure 1

TO THE average broadcast listener, the voices of the air are confined to that territory bounded, at one end, by 200 meters, and at the other, by 550 meters. There we find the efforts at entertainment of over 600 broadcasters, some of them clear and sharp, others blurred and fuzzy with the overlap in carrier wave from other stations. Did it ever occur to you that in other wave length ranges below or above this band there might be other voices spreading out without interference and with far better carrying power than those you hear?

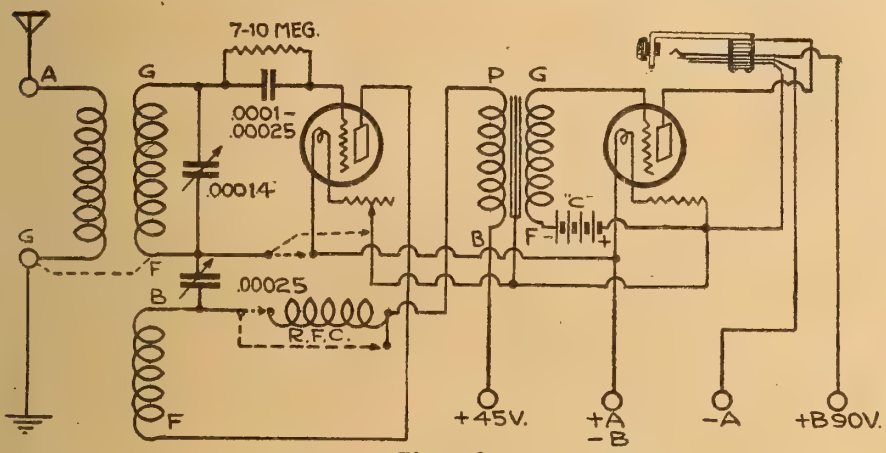

Figure 2

Below 200 meters there is an interesting land well worth exploring, full of voices in several languages including French, Spanish, code and "ham amateur." The harmonics of scores of broadcasters wander in this short wave territory, frequently coming through in much better shape than the fundamental it is intended one should receive. The mighty KDKA that one usually finds on 309.1 meters has an equally mighty twin brother on 64 meters that spreads out over the country in great shape. The well-known WGY that talks on 379.5 meters for your broadcast receiver has a whole family of brothers that are found on half a dozen waves between 15 meters and 105 meters. There is 2YT at Poldhu, Ireland, G2NM at London and LPZ at Buenos Aires.

Receiving these short wave stations is not quite the simple act that one might first think of, namely, putting different coils in your present set or different condensers. Smaller coils must be used, of course, and smaller capacity condensers, but, in addition, there must be a different circuit and a different arrangement of parts. The Radio amateurs, who are really responsible for most of Radio's progress, and who have been confined to these shorter waves for years, long since found that a regenerative circuit devised by Roy Weagant, now engineer for De Forest, best fitted their needs. The "hams," to use their own name for themselves, developed coils of their own, using all the forms of winding known such as Lorenze, spiderweb, honeycomb, diamond-weave, banked turns and spaced turns.

For those who do not care to wind their own, or do not know how, it was necessary for some manufacturer to develop an efficient inductance that could be made commercially, yet be sold at a reasonable price. Mr. F. J. Marco has developed for Aero Products a most excellent set of coils for use in the Weagant hook-up that are now available in all territories. This is really an interchangeable coil system which, with a variable condenser of .00014 mfd. capacity, will cover the range between 15 and 130 meters. A small base is provided on one end of which there is an adjustable primary. Into this base, by means of a clever plug-in arrangement, three different sets of secondaries and feedback coils are plugged.

Three Channels Bunched

It would be possible to design and construct a single coil that could be used with a variable condenser of correct size, which would operate over the range mentioned above but the tuning would be so critical and the three most popular channels would be so bunched together that the result would be very disappointing. It was decided to use plug-in coils so designed that there would be slight overlap in the ranges each would cover. As the set of coils is now made, there are 19 turns on the largest grid coil and, with the Karas .00014 mfd. condenser, it covers 57 to 133 meters. On the intermediate coil there are 8 turns to cover 31.5 to 68 meters and, on the smallest coil, there are 3 turns covering 15 to 33.5 meters. The plate coils have 6, 4 and 2 turns, respectively.

In order that the tuning sensitivity would be equally critical from end to end of the dial, no matter which coil was used, a straight line frequency condenser is to be used with this system and, naturally, it must be of rugged mechanical strength, with electrical losses as low as possible. The Karas construction meets all these requirements perfectly and the .00014 mfd. size is made especially for this work. In addition, there is required one of Karas standard .00025 mfd. condensers. The writer advises the use of

(Continued on page 30)

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marvelled":

"Grand Haven, Mich.
January 25, 1926.

Kane Antennae Co.,
Gentlemen:

Received the Kane Antennae Saturday and by Sunday noon had it installed. Was pleasantly surprised at results obtained. Much more volume and selectivity. During European tests, the night of January 24, I had 3 foreign stations. When I omitted the Kane Aerial, I could not get a sound.

P. M. Boeck"

KANE ANTENNAE

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 Brings BLUE PRINT Complete Working Drawings and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

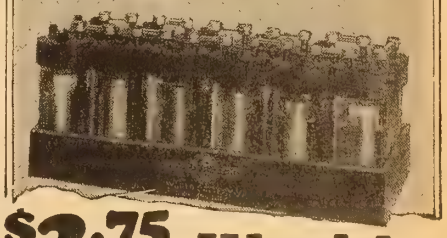
42 fine set builders use THORDARSON Super TRANSFORMERS

Follow the lead of the Leaders

Because leading set builders require the finest tone quality and absolute uniformity in transformers, they use more Thordarsons than all competitive makes combined. Follow their lead—build or replace with Thordarsons. Unconditionally guaranteed. Recommended by best dealers. Audio frequency: 2-1, $5; 3½-1, $4; 6-1, $4.50. Power Amplifying pair, $13. Interstage Power Amp. $8. Autoformers, $5.

THORDARSON ELECTRIC MFG. CO., CHICAGO

for clear, quiet 'B' power



$2.75 C.O.D. World Storage "B" Battery

12 Cells, 24 Volt units. Equipped with Solid Rubber Case, an insurance against acid and leakage. Extra heavy glass jars. Heavy rugged plates. Built with the same care and precision as the famous World Radio "A" Batteries.

Lasts Indefinitely—Pays for Itself

Economy and performance unheard of before! Recharged at a negligible cost. Delivers unfailing power that is clear, pure and quiet. Tube plate (B) voltage is best served by storage battery power. It is, above all, constant, unvarying, dependable and efficient. Radio tubes are far too critical to subject them to power less efficient than that coming from a good storage "B" battery. Your set demands the best!

Tested and Approved by Leading Authorities

The following qualified institutions of merit have tested and approved World Storage "B" Batteries: Radio News Laboratories, Popular Science Institute of Standards, Popular Radio Laboratories, Radio Broadcast Laboratories, Radio Age Laboratories, Lefax, Inc., and others equally important. You can depend on a tried and proven article when you decide on a World Storage "B" Battery. Thousands in use. Order yours today!

SEND NO MONEY

Just state number of batteries wanted and we will ship day order is received. Extra Offer: 4 batteries in series (96 volts), $10.50. Pay expressman after examining batteries. 5 percent discount for cash with order. Save 50 percent—get a tried and proven battery of merit, by mailing your order in NOW!

WORLD BATTERY COMPANY
1219 So. Wabash Ave., Dept. 76 Chicago, Ill.
Makers of the Famous World Radio "A" Storage Battery
Prices: 6-volt, 100 Amp. $11.25; 120 Amp. $13.25; 140 Amp. $14.00. All equipped with Solid Rubber Case.

World STORAGE BATTERIES

Set your Radio Dials at 210 meters for the new 1000 watt World Storage Battery Station, WSBC, Chicago. Watch for announcements.

NO ANSWER TO YOUR LETTER? READ WHY

OVER sixteen thousand readers of Radio Digest responded to our request to send in evidence of international Radio reception. To be exact, during the course of the week we received 15,332 letters and 1,462 telegrams asking verification of reception. All telegrams were promptly answered and we endeavored to reply to letters as quickly as possible. In many instances, however, readers did not give us sufficient information to enable our International Test department to determine definitely the stations received.

All communications are being acknowledged, and a staff of experts have been at work during the past ten days verifying reports of reception and preparing official verifications of international reception.

If your communication was not handled as promptly as you might expect, please be lenient with us and bear in mind that nearly seventeen thousand other readers responded to our request. If your evidence of reception justifies, an Official Certificate of International Reception will be mailed in due course.

SHORT WAVE RECEIVER

(Continued from page 29)

these, even though you may have others on hand, since the kit was designed by Marco especially for them and those you have may not meet the minimum and maximum capacity requirements. The audio transformer is a Karas also; it was one of the very first to come out with large primary and large iron core giving the improved, and now accepted standard, reproduction.

Spring Type Sockets

The sockets chosen are the new spring type made by H. H. Eby company and they are picked for three very good reasons. First, they have a three point wiping contact that gives a positive contact regardless of the prong diameter or amount of solder on the prong. Second, the tube floats, reducing microphonic noises in much the same way as the Benjamin socket. Third, you have a choice of three types of tubes possible since the UV-201A, the UX-201A or the UX-199 can be used in this socket. The UV-199 cannot be employed in these sockets. The binding posts also are Eby's, and a Minus A, Plus 45 and Plus 90 are used. The fourth is lettered Plus A and Minus B.

Detector filament voltage is regulated by a Bradleystat on the front panel, while the single stage amplifier voltage is governed by an Amperite. If your dealer has no Amperites, see if he hasn't Daven ballast resistors, which are similar. The grid leak and condenser specified are the Daven Leakandenser, the condenser being .00025 mfd. and the resistor part, 7 megohms. On this set the matter of grid leak and condenser values is very critical. To quote Marco, "The smallest capacity possible on the highest resistance leak should be used, providing howling can be avoided. The writer has used 20 micro-microfarads and 12 megohms to good advantage with an ordinary 201A tube, but such values usually cause the tube to snap into oscillation with a long drawn howl. . . . . You will usually end up with a positive grid return, about .0001 to .0002 mfd. grid condenser and a 7 to 10 megohm leak."

Try Different Resistances

The Daven Leakandensers come in several sizes, with 7 megohms as the likely size. If you wish to experiment further on this, however, connect a .0001 or .00015 mfd. fixed condenser across the clips under sub base and try different cartridges of straight resistance in the clips.

The choke coil may or may not prove necessary. The receiver pictured here works very well without a choke as the impedance of the primary of the Karas transformer seems sufficient to force the radio frequency current into the feedback coil, rather than permit it to pass through the transformer. If you find that such a choke is desirable it can be readily made. A wooden rod or cardboard tube from ¾ inch to 1 inch in diameter is wound with 200 turns of fine wire, preferably double silk covered of any size such as numbers 36, 38 or 40. On this model the choke was number 38.

(In this article, Mr. Ryan has covered the circuit and his choice of parts. Next week, the assembly and drilling will be covered as is usual with the Digest system of presentation.—Editor's Note.)

ADDRESSES WANTED

THE Technical Editor wishes the present addresses of the following readers: Mr. Charles Ackerman of Philadelphia, Mr. Fred Bradley of Ann Arbor, Mich., Mr. Robert Harrington of Dayton, Ohio, and Mr. Jack Lenox, somewhere on the Orpheum circuit. If you know any of the above please call this to their attention, or write the Technical Editor giving the information.

Hundreds of Recipes Mailed Each Week by Station WLW

CINCINNATI.—Mrs. Judith Anderson, expert dietician and culinary teacher, provides the Crosley WLW Radio listeners with excellent recipes every Wednesday at 3:30 p. m., Central time. Copies of her recipes are mailed to hundreds of women who send letters to her every week.

English Journalists Fight News Broadcasting System

LONDON, Eng.—The Institute of Journalists here has decided to make representation to the government committee inquiring into broadcasting that no further material extension of the system of broadcasting news should be sanctioned.

The institute has decided the essential supply of news to the public is adequately covered by the newspapers, and that the continuance and efficiency of the newspaper industry would be seriously affected by a general broadcast distribution of news.

Spliced wires should be soldered to insure a permanently good electrical contact.

Big Money in Radio

Demand for high pay radio men is so great that a big Kansas City wholesale concern is now fitting men free to get into the radio business for themselves and make $60 to $200 a week without any capital invested. Select territory open. Send today for free catalog and amazing offer. Write direct to Mr. H. J. Saizow, Standard Radio Co., 1440 Walnut St., Kansas City, Mo.

Radiophone Broadcasting Stations

Corrected Every Week—Part II

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

(Note—The second part of the schedule list appears below. The first appeared last week.)

(The third part of the directory of station schedules will appear next week.)

New and better

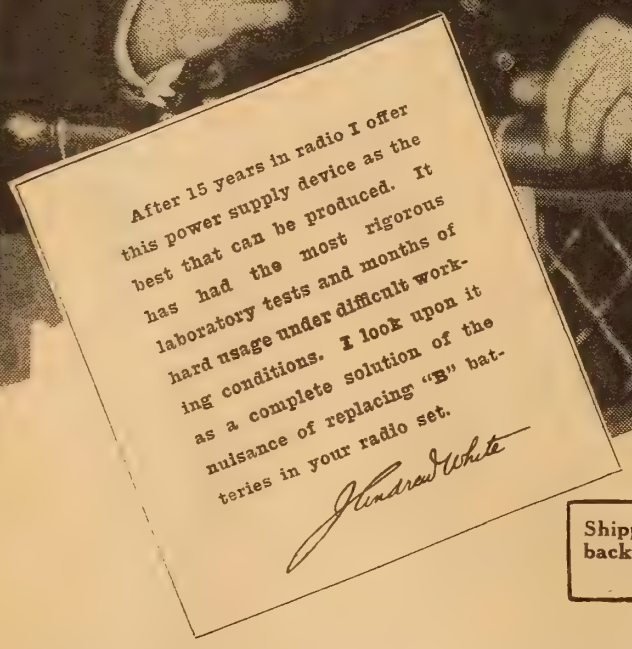
Uses No tube

Ends "B" battery troubles

Andrew White "B" Radio Power Supply

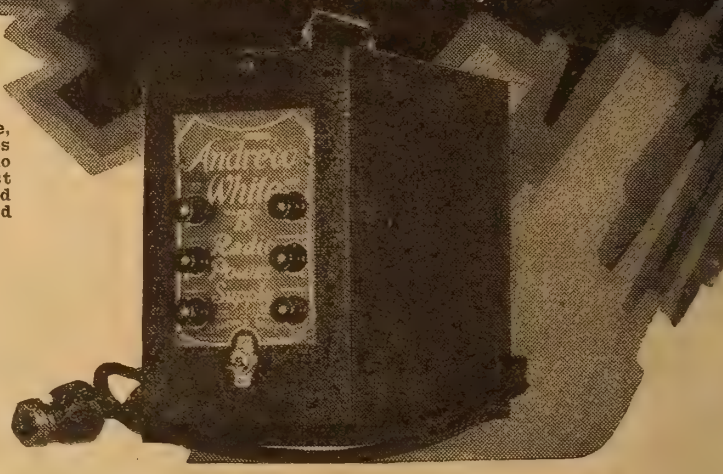
for Alternating Current only

110 Volts 60 Cycle



Major J. Andrew White, America's famous sports broadcaster, pioneer radio editor, the country's first broadcast director and veteran radio dealer and manufacturer.

Shipped on a satisfaction or money-back basis on receipt of price in money order or currency.



Ready for use at all times, 135 volts of "B" battery current, all you need, now or in the future. It delivers steady supply, operating perfectly at all times all sets using up to 9 tubes. The new tubes and modern sets require 135 volts—don't buy less!

No Hum There is no hum. No noise at all. The current is delivered from EIGHT electrolytic cells. NO TUBES TO FLUCTUATE OR TO REPLACE.

Economical Takes so little current you will notice no difference on your electric light bill.

Durable Will deliver the full voltages you require for detector, radio frequency and amplifier tubes, strong and steady year after year, just as if you had brand new batteries all the time.

Convenient Plugs into electric light socket—nothing to get out of order at any time.

Improves Broadcast Reception

Large size condensers and steady current supply improve the performance of your radio set. You will have better quality of speech and music and greater volume.

No Parts Requiring Replacement or Renewal

A few territories now open for established dealers.

J. ANDREW WHITE, 37 West 43rd Street, New York

135 Volts!! Only $38

There is a great demand

Your dealer may not be able to supply you

MAIL THIS COUPON TODAY

J. Andrew White, 37 West 43rd Street, New York.

Enclosed is $38, for which ship me your new and better "B" Radio Power Supply at once, my money to be refunded if I am not satisfied and return the unit in 10 days.

"The Voice of Porto Rico" Tells a Story; WJAG Birthday Party; Women's Programs; Uncle Sam Aids Rural Radio; Announce Foreign Test Winners; How to Stop Blooping

DEMANDS STATIONS LABEL ADVERTISING

WOULD AVOID FOISTING OF PUBLICITY ON PUBLIC

Rep. Emmanuel Celler Asks for Same Regulations of Ether as Those Governing Newspapers

WASHINGTON.—"This is BLAA, broadcasting station of the Giant Peanut company, Newark, N. J. You will now have the pleasure of listening to the Walk-Up-One-Flight Clothing company's orchestra. Their first number will be, 'You Don't Wear Them Out If You Don't Sit Down.' Should any of our Radio fans desire to communicate with the Walk-Up-One-Flight Clothing company's orchestra they can do so by communicating with Station BLAA.

"This is SPOOF station, Chicago, Ill. You have just listened to Mr. B. Fuddled, of the Lone Star Ham company, in his interesting talk on 'Tid-bits and Why Delicious Lone Star Ham Should Be on Every Table.'

"Those of you who relish a good cigar will be delighted to hear that our next number will be a song, 'Rings of Smoke,' to be rendered by Mr. Jack A. Napes, general sales manager of the Amalgamated Cigar Stores company. We ask our Radio fans to remember the Amalgamated Cigar Stores company because it will have one of its employes perform for us every Monday night.'

Congressman Indicts Advertising

"You have just heard Mr. Jack A. Napes. SPOOF now signs off for the night after announcing that at 3:45 tomorrow afternoon every housewife will welcome Mrs. Laura New of the Durable Pancake company, who will give helpful lessons on 'How to Make Flapdoodles Out of Sawdust.'"

The above is merely a reproduction of what Representative Emmanuel Celler of New York has caused recently to be published in the Congressional Record. Representative Celler's tirade is most interesting. He does not believe in advertising broadcasts as they are done today, and he frankly says so.

Newspapers Must Label Ads

"It is illegal for newspapers or magazines to publish advertising without letting their readers know that the matter is paid for and is advertising. The reason for this was to avoid the foisting of disguised advertising matter 'as reading notices' or news. The law was adopted to avoid this public imposition and deception.

"Broadcasting of paid-for or indirect advertising without a statement that the matter has been paid for, is no less deceptive and an imposition. Those of you who are familiar with Radio activties or are listeners often have recognized this scheme of deceptive advertising.

"The Radio bill introduced by Mr. White, the gentleman from Maine, and which is now being considered by the committee on the merchant marine and fisheries, in section 5 very rightfully provides as follows:

White Bill Protects Listeners

"'All matters broadcast by any Radio station for which service, money or any other valuable consideration is directly or indirectly paid or promised to or charged or accepted by, the station so broadcasting shall be announced as 'advertising' at the time the same is so broadcast: Provided, that when the advertisement or publicity sought consists solely of the announcement of the name, business, and address of the person, firm, company, or corporation paying for the feature broadcast, it shall be sufficient to announce that such feature broadcast is "paid for or furnished by" such person, firm, company or corporation.'"

Station Changes

Here is Florida with another broadcaster, the new municipal station of Pensacola, WCOA. On a wave length of 222 meters, the first program from this studio went out over the ether for the first time Wednesday evening, February 3. The announcer is John E. Frenkel.

The thud of boxing gloves, the scraping of skates on the ice during hockey matches and other familiar sounds from Madison Square Garden preceded by the call WMSG, will be heard the first part of this week. A low wave length of 212.6 meters prevents any interference with New York stations already on the air.

The following stations were deleted last month: WGBK, Johnstown, Pa.; WDCH, Hanover, N. H.; KFGH, Stanford University, Calif.; KFOJ, Moberly, Mo.; WTAC, Johnstown, Pa.; WJBN, Sycamore, Ill.; WIBC, St. Petersburg, Fla.

WILSON WETHERBEE IS VETERAN OF KYW

CHICAGO.—Saturday, February 20, marks the completion of four years of Radio service of Wilson Wetherbee, director of Westinghouse Station KYW. Having come to the station when KYW was barely four months old, he has witnessed its growth practically from its cradle days.

Wilson Wetherbee

Born in Elkhart, Ind., in 1900, educated in its schools and later taking studies pursuant to a literary career, Mr. Wetherbee soon after found himself on the staff of the Elkhart Daily Review.

The world was treating "Scoop" Wetherbee fairly well. The South Bend Tribune felt the need of the services of an enterprising young man, so to South Bend he went. From the South Bend Tribune "Scoop" went to the South Bend Times, shortly after which he went back to school to study at the University of Chicago. However, campus rules did not agree entirely and the call of the press brought him to the editorial staff of the Chicago Daily News. He remained there just about a year when the wild idea of "Radio" brought him to KYW to take the position of assistant director. On May 1, 1922, "Scoop" was appointed director of the station which position he still holds.

Imagine Chicago's pioneer station four years ago. A personnel of only three or four members; one studio; the technique of Radio fairly unknown and little thought of. If artists did not appear, they just pushed a convenient phonograph up to the "mike." Those were only a few of the griefs of Radio life four years ago. The director had to not only conduct the activities of the station, but he had to seek talent, answer kicks, do the announcing, look happy and when no one was looking, sweep the floor.

WAMPAS BEAUTY IS GIRL ON OUR COVER

FAY WRAY—sounds almost like "Fairy," doesn't it?

That's the name of the exquisite maiden on the Radio Digest cover this week. And, of course, she just naturally lives in Hollywood, Calif., with the rest of the 1926 crop of WAMPAS beauties who made their grand debut at the frolic in the new Al Malikah shrine temple in Los Angeles on February 4.

There were thirteen of these little "Wampsies" and from a picture in our last week's issue it seems Miss Fay is the only one who didn't have the heart to snip the wandering tendrils from her crown of glory.

All the Wampas stars were presented to Radio listeners over KNX, during a special Radio reception.

Looking Ahead

Mystery, Murder, Undying Love—the special Radio mystery story by a world-famous author, Robert J. Casey, begins with the next issue. $500 awaits the winning solutions. Don't miss the important announcements and the beginning chapter of this thriller.

February Twentieth Is a Big Day in the Regions of the Arctic Circle. Old Sol peeps over the horizon for the first time after an absence of 135 days. The Canadian "Mounties" and other human beings celebrate. Superpower stations of the United States broadcast special programs. Story and pictures here next week.

Dizzy Izzy, Musing Over a Bowl of Loco Weed Soup and a dish of purple berries from the wild asparagus, decided that the one thing Station WOAW, Omaha, needed was a "Blah Club." Whereupon he called together certain members of the staff and a directorate was selected. You should hear Izzy tell about it in the next issue.

The Campaign Against Blooping, having fixed the blame, rubbed it in and shown how nearly all sets bloop, will next week tell of better operation of sets for more DX and less squealing. Come on, do more thinking about your own blooping and less tirading about the other fellow's!

Those Interested in Short Waves, and who are building the two tube 15-130 meter set, will find its construction carried into the wiring next week.

Operation of the King 5-Tube Tuned R.F. Set is now being studied by the technical staff and an article on it will appear next in the Operating and Trouble Shooting series.

NEWS BRIEFS FROM THE BROADCASTERS

PARTY NIGHT ONCE EACH MONTH FOR WRVA FANS

Famous Violinist at KGO—Learn Charleston at WMBB—Canadian Broadcasters Meet at Toronto

The first Thursday of each month will be party night at WRVA, Richmond. For three hours this southern broadcaster will give a program of dance music, so that fans can plan parties ahead of time for this night. The music will be furnished by the Richmond Hotel Winter Garden orchestra, under the direction of Billy Boyle, and will begin at 9:30 p. m., Eastern time.

* *

One of the greatest violinists, Mishel Piastro, concertmaster of the San Francisco Symphony orchestra, will give a recital over KGO, Oakland, Tuesday night, February 23. Altogether he will play ten numbers. His accompanist will be Lev Shorr, brilliant Russian pianist.

* *

Instructions in the "Charleston" by Prof. Thomas Sheehy are going out over the ether every Wednesday evening from WMBB, Chicago.

* *

The first meeting of the Canadian Association of Broadcasters was held last month in Toronto. Jacques N. Cartier, director of CKAC, La Presse, Montreal, was elected president of the organization.

* *

A new series of classical concerts will be given weekly at KYW called the Federal Master artists program. These programs will be broadcast from the Commonwealth-Edison studio every Friday night at 9 p. m. Central time. Margery Maxwell, soprano member of the Chicago Civic Opera company, was one of the artists participating in the first musicale.

* *

Children's stories, told with an orchestral accompaniment, have been introduced to the Radio audience of the Capital by Daniel Chwalow, conductor of the Hotel Hamilton orchestra, through Station WRC, of Washington. The stories are told by Madge Tucker and are given suitable musical background by orchestral arrangement of folk songs.

* *

O. H. Becker, the senior announcer at WGR, Buffalo, has resigned and Kenneth Fickett, who has become well known during the last two years to WGR fans, is now senior announcer. George C. Hardy is now associated with Mr. Fickett as assistant announcer.

* *

Bulwer Lytton's powerful drama, "Richelieu," will be broadcast by the KGO players Thursday night, February 25. Wilda Wilson Church will direct sixteen players in the technique of the audio drama defore the microphones.

* *

Thousands of old-time songs have been received from all parts of the country by the Crosley Burnt Corkers, an organization of minstrels which broadcasts Tuesday evenings through the WLW station. Many of these songs are used in the hour program.

* *

A junior Radio club is the latest feature at WBAL, Baltimore. Hazel Knox, who has charge of the children's programs broadcast every Monday and Thursday, will direct the activities.

* *

Rev. John Edwin Price of the First Universalist church will give a series of ethical studies of the modern drama every Thursday afternoon at 2 p. m. Central time, through WLW, Cincinnati.

* *

Captain Daddy Long Legs will be in command Friday of the WGP Ship o' Dreams with a wealth of instructive songs and stories for the kiddies. The children of the American Revolution will be passengers to help celebrate Washington's Birthday. At 8 p. m. Eastern time, the Hon. William H. Smathers of Atlantic City will give a patriotic address.

* *

A departure from the usual dinner concert program introduced by Daniel Chwalow, conductor of the Hotel Hamilton orchestra, is the presentation of movements of the world's greatest symphonies during the dinner hour. The playing recently of Haydn's "Surprise Symphony" as a part of a dinner program brought a greater number of applause cards and letters than any dinner concert program ever broadcast from the capital.

* *

Parents and teachers will be interested in the lecture, "Poetry in Relation to Childhood," to be given Friday by Mrs. Austin S. Basten, publicity chairman of the Connecticut Congress of Parents and Teachers. This talk is one of a series of educational lectures.

$500 FOR FANS SOLVING MYSTERY

I WON'T BLOOP CLUB MAKING BIG STRIDES

CAMPAIGN TO CLEAR ETHER IS PROVING POPULAR

Listeners, Stations, Clubs and Newspapers Joining Radio Digest to Lessen Radio Interference

"I Won't Bloop" will be the motto of a nation of Radio listeners in short order if the popularity of the I Won't Bloop club continues to grow in the next six weeks as it has in the past three. Broadcasting stations, newspapers, and Radio clubs are taking up the cudgel to exterminate the Viper Bloop.

The idea of the club, as stated previously, is simply to obtain members, the sole requirement for membership being the taking of a pledge to refrain from blooping one's set, or so equip or renew it so as to prevent its blooping. That the idea is a righteous one, is evident from the furor the club is creating.

Thousands upon thousands of pledges already have been made. An accurate count is impossible as yet. The membership roll is, however, several times ten thousand. These members each possess a membership card. Ask your friend to show his card. Get his pledge if he hasn't one.

Opinion Favors Club Idea

That the press and broadcasters have joined hands with Radio Digest in its campaign to eliminate or at least reduce the bothersome blooping evil, speaks well for the timeliness of the great movement.

The broadcasting station chapter roll of the I Won't Bloop club, now includes:

CKNC, Canadian National Carbon Co., Toronto, Ont.; WDAF, Kansas City Star, Kansas City, Mo.; KSL, Radio Service Corp. of Utah, Salt Lake City, Utah; WHO, Bankers Life Co., Des Moines, Ia.; WHA, University of Wisconsin, Madison, Wis.; WLW, Crosley Radio Corp., Cincinnati, Ohio; WJAZ, Zenith Radio Corp., Chicago; WOC, Palmer School of Chiropractic, Davenport, Ia.; KTHS, New Arlington hotel, Hot Springs National Park, Ark.; WBAP, Fort Worth Star-Telegram, Fort Worth, Texas; WMBB, Trianon Ballroom, Chicago; WJJD, Loyal Order of Moose, Mooseheart, Ill.; KQV, Doubleday-Hill Elec. Co., Pittsburgh, Pa.; WAMD, Hotel Radisson, Minneapolis, Minn.; WRK, Doron Bros. Elec. Co., Hamilton, Ohio; WSKC, World's Star Knitting Co., Bay City, Mich.; KFYR, Hoskins-Meyer, Bismarck, N. D.; WJAG, Norfolk Daily News, Norfolk, Nebr.; KFWC, L. E. Wall, San Bernardino, Calif.; KFKZ, F. M. Henry, Kirksville, Mo.; WBBY, Washington Light Infantry, Charleston, S. C.; WFDF, F. D. Fallain, Flint, Mich.

Cities Organize Local Clubs

Broadcasting stations who are aiding the campaign, or who wish to become chapters of the I Won't Bloop club, are requested to communicate with Radio Digest. The club wishes to enlist every station in the country in its warfare against blooping receivers.

Word has been received from E. M. Rait telling of the formation of a local chapter of the I Won't Bloop club at Rochester, Minn. One hundred members were enrolled at the first meeting. Other localities are likewise organizing.

The Broadcast Listeners association of Chicago, has promised full cooperation. This organization has already been pioneering in a movement against bloopers.

The various local chapters are, for the most part, discussing ways and means of preventing blooping. Excellent articles are available. At this time the technical staff of Radio Digest is publishing a series of articles dealing with this subject. The location and suppression by "force or kindness" of vicious bloopers who will not cooperate otherwise is the avowed purpose of one local chapter.

Remember—in all this campaign—that so-called "regenerative" sets are not more to blame than other receivers. So far as can be determined, ALL sets regenerate, and regeneration is more the act of God than a patent.

Have you joined yet? SIGN AND MAIL THE PLEDGE TODAY.

LADY STAR OF CHANTICLEER COURT

Jean Grissom is a member of the Chanticleer Players of Kansas City whose series of comedies and specialties from WDAF, the Kansas City Star, is a rather new feature for the station's listeners. The players have grown from a group of persons interested in theatricals largely for their personal diversion. They now present and broadcast regular monthly programs in a rustic frame building they call "theater," and is really a transformed garage. Their material usually consists of one-act comedies, satires and dramas with musical numbers occasonally interspersed.

SPECIAL RADIO SERIAL NEEDS RIGHT ENDING

R. J. Casey Writes Story

First Chapter Next Issue—Important Announcement—Contest to Develop Radio Play

Solve the mystery, if you can, and win part of the $500.00 in gold, Radio Digest will pay for the best solution!

Beginning next issue, there will appear the first installment of a great, thrilling, inspiring story of love and mystery, written by Robert J. Casey, the world-famous author. He has prepared a story especially for Radio. It is so written that it will go down in history as a pioneering effort of the first order.

Readers of the story will come in for their share by unraveling the tangled plot and pointing out how the story must end. The guilty party or parties should be indicted. All clews should be as correctly followed as possible.

The correctness of the solutions submitted will form the basis for the decision of the judges. Writing ability will not be the main consideration.

Story Begins Next Issue

The first chapter of this supreme work by Robert J. Casey will appear in the February 27 issue of Radio Digest. Other important announcements are also to be made next week.

The full details of the competition, the rules, names of judges, the closing date by which the solutions must be received—all will be told in the next issue of this publication.

Watch for it. Thousands of people are expected to participate in this first All-Radio mystery story competition, and may the best man, or woman, win. Read the first chapter. Don't miss it!

On page eight, this week, the preliminary announcement appears. Emphasis cannot be placed too heavily upon further announcements to be made next issue.

Seventeen Prizes in All

Seventeen prizes await their winners. The first will be $250 in gold. Second will with $100 in gold. Fifteen bags of gold containing ten dollars each, will be presented to the persons submitting the next fifteen best solutions to the mystery.

Robert J. Casey, novelist and short story writer of repute, has contracted to write the manuscript. He was directed to prepare a mystery story, replete with thrilling suspense, which was Radio in character. He was told that one of the principal objects of the story was to have it so arranged that it could be dramatized for Radio presentation. The story must have the necessary requisites of a Radario or drama of the air.

Contests Will Develop Radio Play

To foster the development of Stories which can be broadcast in Radario form, Radio Digest has launched this new enterprise. It is believed that among the contestants who submit their solutions to the mystery will be found people who have the talents to qualify for further writing of stories designed especially for broadcast presentation.

Mr. Casey's story will show these people how it is done. He not only knows the ordinary school of the novel and stage drama, but is experienced in the limitations of Radio and knows what the broadcast drama needs as a means of expression.

Just as the legitimate stage and motion pictures use thousands of stories each year, the majority of which are especially prepared either for the stage or the screen, broadcasting stations are now looking for available manuscripts for Radario presentations. The number of writers supplying this market is small. The field for Radarios, too, is still small but is potentially great.

It is the hope of this publication to enlarge both the field for, and the number of writers of Radarios.

New Studio for Boston

BOSTON.—Houghton & Dutton, one of the largest department stores in New England, have announced that they are to open a broadcasting studio the latter part of February in their store, co-operating with WEEI, the Edison station here.

Uncle Sam Aids Rural Radio

"Fifty Farm Flashes" to Be Subject of Weekly Broadcast Under Auspices of Department of Agriculture

By S. R. WINTERS

***PICKARD** Will Operate Through Washington Bureau to Answer Important Inquires from Farmers over the Representative Stations in Scattered Districts. Will Cooperate with State Colleges.*

FARMER JONES upon observing that his flock of chickens has symptoms of roup addresses a letter to the United States Department of Agriculture in search of a treatment! Farmer Brown inquires of Uncle Sam as to what months should cows freshen in order to insure a maximum production of milk! Farmer Smith upon detecting that his soil is sour, wants to know if a portable lime crusher is practical!

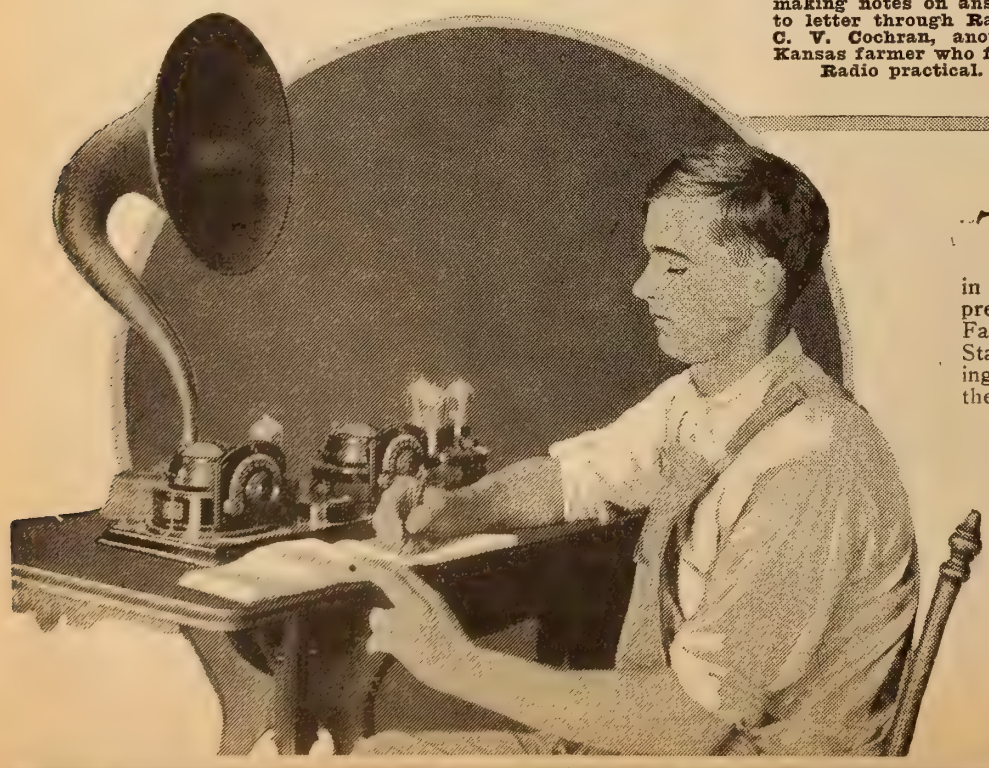
These inquiries, when received by the United States Department of Agriculture, are answered by letter mail in which a farmer's bulletin discussing the particular farm problem is enclosed. Now, farmers will not have to depend upon a tardy R. F. D. service for such general and insistent information where timeliness is an important factor. Instead, Radio, traveling with the speed of light or at a rate of 186,300 miles per second, will act as a hurry-up messenger between farmers and Uncle Sam's national farming bureau.

Sam Pickard, newly appointed Chief of Radio Service of the United States Department of Agriculture, has labelled this novel and informative service with the alliterative and pleasing designation, "Fifty Farm Flashes." As implied by this descriptive phrase, brevity and speed of delivery will characterize this service and if a sufficient number of broadcasting stations are enlisted in diffusing this timely and useful knowledge it will be blanketed over the agricultural areas of the nation. Each "Farm Flash" will be limited to fifty words and the broadcasting of the complete weekly service should not exceed twenty minutes.

* * *

THE Department of Agriculture in Washington, receives approximately 4,000 letters daily, a major portion of which concerns farm problems or direct questions seeking solutions to the difficult things confronting the farmers. From this "question box" will be selected each week about twenty-five of the more general and pressing subjects or problems as a basis for the "Farm Flashes"—or, to employ the term of Mr. Pickard, Uncle Sam's mail will serve as a sort of barometer in the preparation of this national Radio service. The other twenty-five topics included in the "Fifty Farm Flashes" will be of a local nature—that is, solutions to problems peculiar to a particular farming community, which is served by a certain broadcasting station. Thus, Uncle Sam's farm Radio service will not be a rubber-stamp or mimeographed affair but an exclusive feature to the respective broadcasting stations cooperating in this significant and far-reaching step in annihilatng distance between the rural areas and the fountain sources of scientific agricultural information.

Tentative plans of Mr. Pickard call for a division of agricultural America roughly into zones with respect to the major crops grown in the different farming regions. These classifications will include such dominant crops as cotton, corn and meat, hay and pasture, and such types of farming as dry land, range, and irrigation. Thus, for instance, a farmer making inquiry about methods of producing corn would receive a reply in the form of a "Farm Flash"—say, through a Chicago broadcasting station—that would be applicable throughout the Corn Belt. Similarly, a cotton grower of Texas, seeking information as to an effective method for combatting the boll weevil would elicit a reply—broadcast through a Texas station—of value to the cotton producers of the South and Southwest. Or, to continue this trend of thought, wheat growers in Kansas could, through the magic of the invisible Radio waves, learn of the most effective method for arresting the fecundity of grasshoppers.



Sam Pickard (top) with one day's letters from farmers to U. S. Department of Agriculture. Tom Peterson, Kansas farmer, making notes on answer to letter through Radio. C. V. Cochran, another Kansas farmer who finds Radio practical.

* * *

THIS Radio service to farmers will be a radical departure from the present practice of preparing lectures and having them read into the microphone," declared Mr. Pickard, in an exclusive interview given this writer, in which he stressed the twofold factor of brevity and popular appeal in the presentation of "Fifty Farm Flashes." Moreover, the Chief of Uncle Sam's Farm Radio Service desires to avoid the erroneous impression that the United States Department of Agriculture will dominate this instantaneous and sweeping means of disseminating information relating to better farm practices. To the contrary, the agricultural colleges and other agencies cooperating will be tapped as sources for much of the material that is to be broadcast, the Department of Agriculture at Washington, serving as a clearing house or central agency for supplying any needed information which may not be accessible to state and local agencies. Then, too, Uncle Sam has his own representatives afield and their services will be constantly in demand in making effectual this far-reaching program of speeding up the process whereby the searchers of information and the source may be brought together within the twinkling of an eye.

"Fifty Farm Flashes," an alluring phrase that will live because it is dedicated to service, will be inaugurated as a weekly program from hundreds of broadcasting stations—if the latter are quick to appraise its popularity and value. The air mail and other prompt postal facilities will speed the delivery of these "Farm Flashes" to the respective broadcasting stations, scattered as they are in widely separated sections of the country, assuring prompt answers to inquiries. Let's Go! WJAG Throws a Party!

ALL Listeners Are Invited to Attend Big Celebration Around "Family" Table in Norfolk, Nebraska. "Printer's Devil" to Be There.

"MR AND MRS. G. R. SALTER cordially invite you to be present at the Fourth Anniversary of the Norfolk, Nebraska, WJAG Family Lunch Club during the Noon Hour of February Twentieth, Nineteen Hundred and Twenty-six, at your own Receiving Set."

* * *

Of course you will have a lovely time at Mr. and Mrs. Salter's party. They are counting on a very unusual number of guests from all parts of the country. It will be one of the big events of their lives and that covers a very considerable period. Both are over 86 years old. They have been married sixty-four years. Since the Norfolk Daily News installed its Radio broadcasting station and Announcer Karl Stefan organized the Family Lunch club Mr. and Mrs. Salter have been sitting at the "head of the table" as the grand patriarchs of the family, which consists of 20,000 persons.

Forecasts of proposed offerings are "flashed" to members of the family for approval. The mail man and the messenger boys and the telephone bring to the studio the answer as to what shall be used and what not used. Now Grandfather Salter believes he knows just what his family wants for this big birthday dinner of February 20.

* * *

NEBRASKA stands out among the pioneer states in the Radio world. Several broadcasting stations became famous within its borders while Radio was still quite young as a general amusement. Gene Huse, editor and publisher of the Norfolk Daily News, was among the first to put in his order for a station and then discovered that he didn't have, and there was small chance of getting, an operator.

Determined to have his station even if he had to become an expert himself, he began a study of Radio transmission. He learned the codes, both Morse and Continental. He mastered a thorough knowledge of the technical theory and finally came to Chicago for his examination. He successfully passed the test submitted by Inspector Beane and was granted an operator's license. He is one of the few owner-operators of a broadcasting station in the United States.

Mr. Stefan was on the staff of the News when WJAG went on the air. He had been around the world, could speak several languages, understood telegraphy and Radio technique. It was logical that he should become the chief announcer and this position he has held since the beginning.

Station WJAG was launched as an avenue of service by the Daily News which has for its slogan, "World's Greatest Country Daily Newspaper." Old people, invalids and other shut-ins soon discovered that "service" was more than a catch-word. They were the first to feel the results, which came shortly after the end of the World's Series baseball games.

* * *

THERE was a particularly keen interest in the series that year and Announcer Stefan moved the microphone from the "Printer's Devil's Den" (as the studio is called) to the telegraph desk where the clicks of the telegraph instrument were instantly translated by Mr. Stefan into word pictures of the game. An appeal was then sent out to members of the Radio family for nickels and pennies with which to buy receiving sets for the shut-ins who never could participate or even see athletic games of any sort.

Contributions rolled in to such an extent that there was soon enough money to buy a dozen good sets for those who could not afford them and were confined to the dull monotony of the four walls of their rooms. The first one went to a little crippled girl for whom the initial appeal was made, little expecting there would be enough returns for a dozen sets.

As the family grew from a score to 20,000 other appeals have been sent out at intervals until now there are 100 sets bringing cheer and happiness. Sometimes the sets change hands where the original beneficiary has recovered and is no longer an invalid. Six sets have been returned from those who have passed beyond the pale of early joys.

Then the service of WJAG was (*Continued on page 24*)

Karl Stefan (top) chief announcer at WJAG who started the big "family" that gathers around Radio lunch table each noon. Frances Colton Warner (left), pianist and entertainer.

Old-fashioned melodies are the favorite songs of Miss Marjorie Beeler (left), lyric soprano at WJAG. Below may be seen the Printer's Devil and his Imps. They ring the dinner bell that calls everybody around the big family Radio lunch table presided over by the patriarchs, Mr. and Mrs. G. B. Salter, both 86 years old. At lower left is staff of the Norfolk Daily News translating the telegraph code of a world's series game into a word picture for WJAG listeners.

KMA Is Heard Across Pacific

"KEEPS Millions Advised" Is Slogan Selected from 4,000 Suggested for Shenandoah, Ia., Station. Listeners Write from Yokohama, Australia and Alaska.

By H. P. BROWN

At left is Miss Ormah Carmean, soloist and associate program director, KMA. Below are Mrs. E. E. May (left) and Mrs. Henry Read, duet singers. George Van Houtte (lower circle), 79, traveler and lecturer. Beside him, Lina Ferguson, "May Flower Lady," who chats of gardens.

Above is Mr. Earl E. May, himself, owner of the KMA broadcasting station at Shenandoah, Ia., who usually mans the microphone to introduce the artists. His "contagious laugh" ripples through the ether making thousands smile.

LOOK at the Radio map of the United States and you will find the state of Iowa thickly dotted with little red stars where broadcasting stations are located.

In the galleries of the air, Iowa's calls may be heard at almost any hour of the day or night. The entire populace seems to be swept off its feet with Radio enthusiasm. No farm is complete without its receiving set. In some places the loud speakers are installed in the barns where the "cornhuskers" can hear while milking the cows and there is a theory that the music smooths the cows into yielding, not only more, but better milk.

Shenandoah, close to the Missouri border, was comparatively little known a few years ago. Two of the main industries of the town are seed and nursery companies. Both of them installed Radio broadcasting stations and the Shenandoah post office had to put on a night shift to handle the extra mail that resulted.

Earl E. May, president of the May Seed and Nursery company, at Shenandoah, is the rotund, good natured papa of KMA. When one talks to him a little while it is hard to tell which he loves the most, the seed business or Radio.

* * *

PART of the time he is all tomatoes and radishes and the rest of the time he is all studio and listeners. So much enthusiasm backed by a vigorous constitution and an artistic appreciation has produced the inevitable success it deserves with both enterprises.

"Why," said Mr. May in the course of a recent interview, "we have the most wonderful talks on horticulture, agriculture and gardening and when we put o na contest for a slogan a short time ago, we received 4,000 letters offering suggestions. We picked fourteen quarts of the most luscious—I mean we picked a slogan that I think fits our station to a T."

"K-M-A—it couldn't have been 'Kiss Me Again?'"

"Don't be absurd. This is really serious."

"Well, what could it be? Knights of Modern Agriculture?"

"More foolishness. Here it is—"KEEPS MILLIONS ADVISED."

"That's not so bad only—"

"Only what?"

"Well, 'millions' might seem a little exaggerated."

"Exaggerated nothing! Wait 'till I show you a letter, here."

Mr. May fished a letter out of his pocket. At the top was the business head, "N. D. Sheppard, General Merchandise and Raw Furs, Andreafsky, Alaska, Oct. 31, 1925." The letter read in part as follows:

* * *

"I WISH to report that we heard your station the night of October 30, you signing off 10:12 p. m. our time, which was 3:12 a. m. October 31, your time. The program came in fine just as clear as a bell in spite of the fact that one of the tubes was broken so the built-in loud speaker would not work and we had to attach the ear phones to the talking machine. We all enjoyed the program which was plenty loud in a room seventeen by twenty-seven feet.

"At 11 p. m., our time, we picked you up again and heard the Midnight waltz and Three O'Clock in the Morning, on the Steinway. This program we enjoyed until 2:15 a. m. our time, when it faded away so we do not know just what time you signed off.

"We are two weeks from a cable office by dog team or we would have sent a cable. We are 163 degrees west and 62 degrees north on the Yukon river."

The letter was signed by N. D. Sheppard.

"Don't worry about the 'millions' part of it," added Mr. May, as he folded the letter back in its envelope. "KMA is not only heard all over the United States with its many millions of Radio listeners, but we have letters from Australia, Yokohama, Japan; the Hawaiian Islands and other places to the north and south. Don't ever think that 'millions' is exaggerated."

It was stated that the KMA station prepared its programs with enough diversity to please all classes of listeners. Reports on the weather and markets are given three times (*Continued on page 24*)

These four (left) should be called the "Apple-o-Quartet." They are Jonathan and Ben Davis, Auntie Blossom (Mrs. Fort, who conducts the Slumber Boat) and Miss Lavone Hamilton, pianist, the Pippin.

WKAQ—"Voice of Porto Rico"

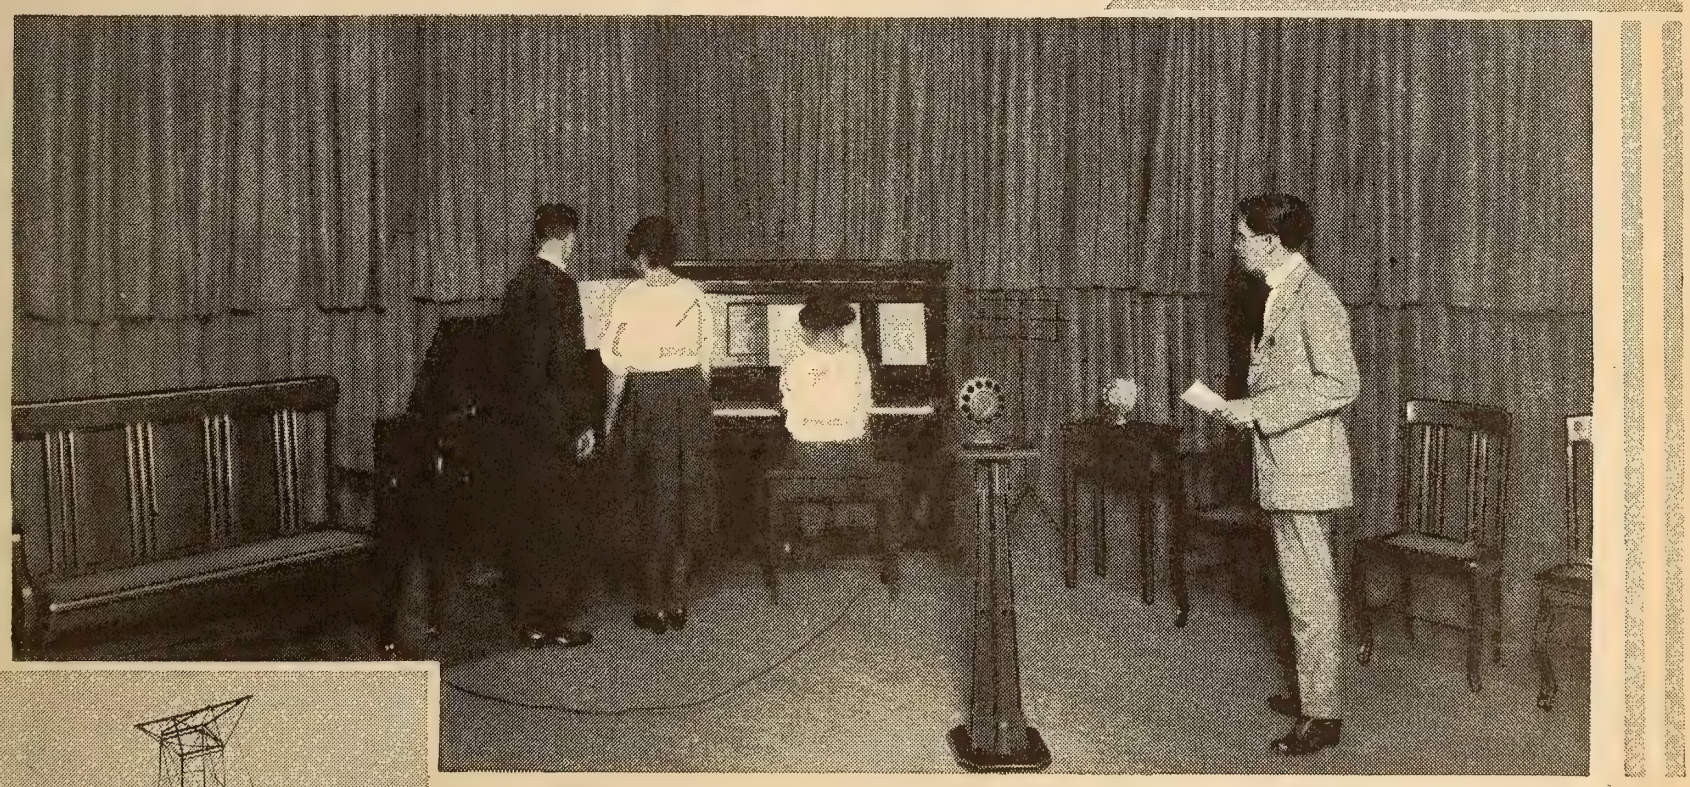
ISLAND Territory in Antilles Entertains Listeners on Both Sides of Atlantic. Announcer Is Spokesman for the Isle.

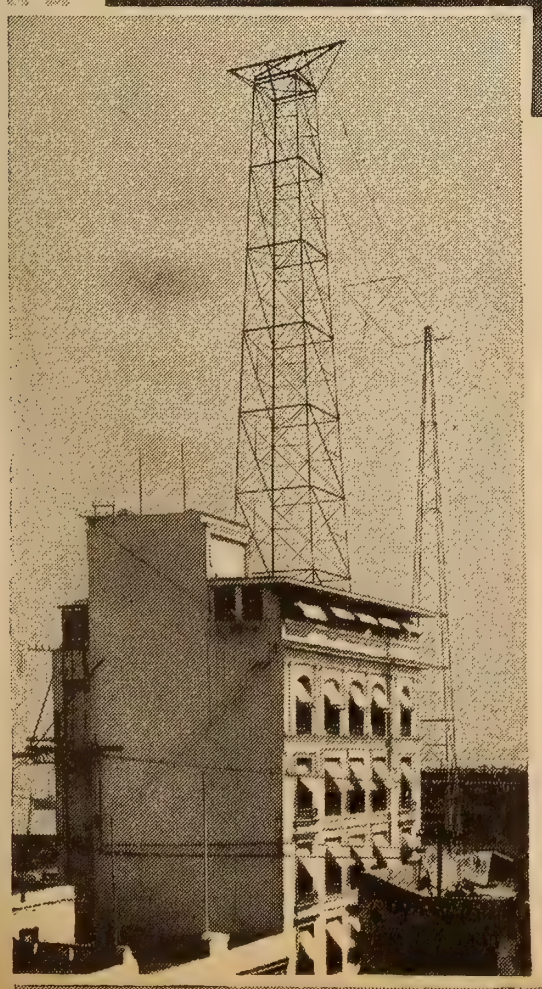
AS THE Florida stampede grows and it begins to look as though the swarms of tropical tourists are going to be crowded off the edges of the peninsula into the ocean, it is possible part of the traffic stream may detour to Porto Rico—"The Island of Enchantment."

Here the snow dodgers should find complete happiness for it NEVER, NEVER snows in Porto Rico. The average daily temperature is 80 degrees. The island is 100 miles long and 36 miles wide and was ceded to the United States by Spain after the Spanish-American war. There are over a million inhabitants on the island and all loyal Americans, adopted by act of congress in 1917. Each year has found a new increase of visitors and permanent inhabitants from the States. The country is verdant and hilly; the highest peak is over 3,600 feet.

Along the coast are crystal clear lagoons. Coral reefs bend into the sea and there are plentiful sandy beaches. San Juan, the capital and metropolis, is quite modern—a fact acknowledged by Radio listeners on both sides of the Atlantic for programs broadcast from WKAQ have been heard in Spain as well as on both American continents.

"Whose is the voice with the Spanish accent?" has been a frequent query of American fans after listening to WKAQ, an American call signal. The voice is the author of the following story, Joaquin Agusty.





At the top is Joaquin Agusty, announcer at WKAQ, San Juan, Porto Rico, the "announcer with the Spanish accent." Mr. Agusty is a young Radio enthusiast and takes his responsibilities in the Radio world with proper seriousness. He writes that he feels his voice is the voice of Porto Rico itself and he tries to make it the most friendly voice of all. Above is a scene in the WKAQ studio during an evening's program. Below is the antenna of the WKAQ station.

By JOAQUIN AGUSTY

SINCE December, 1922, the voice of WKAQ has been heard through the crowded ether by the Radio fans of the world.

It is a powerful voice, quite different from the more delicate tones that come from those familiar friends, KDKA, WGY, WGN, KGO and their sister stations in the United States. But of all the voices speaking it tries to be the friendliest and most cordial because it is the voice of Porto Rico, itself, "The Island of Enchantment," speaking for a people, a country surrounded by a boundless ocean.

And not only is WKAQ speaking to its own island but it is sending the voice of Porto Rico to make friends in hundreds of cities and lonely farm houses in America, Cuba, England and Spain.

It is as though our beautiful island were suddenly made personal and articulate and endowed with a voice capable of disregarding the handicap of distances of oceans.

What do you know about Porto Rico and its broadcasting station? It will be of particular interest to the real Radio enthusiast to describe somewhat in detail this WKAQ which, in a sense, belongs to us all. Especially is it of interest to citizens of the United States for over our microphone floats the Stars and Stripes at its most eastern outpost.

WKAQ is the Radiophone station of the Radio Corporation of Porto Rico, affiliated with the International Telephone and Telegraph corporation of 41 Broad Street, New York. It is installed in the top floor of the Telephone building, in the center of the city of San Juan, and its geographical position is Lat. North 18°, 25′, 4″, Long. West 66°, 6′, 57″. The station occupies four rooms. The transmitter is the standard Western Electric 500-watt output.

Actual radiation on 834 kilocycles is 6¾ amperes. The antenna is 3 wires 90′ long with 4′ separation between them. Two Milliken steel towers, one 167′ high and the other 87′ on top of the Telephone building, support the antenna, the direction of which is north-south.

The studio walls are covered with a layer of blanket material under curtains to deaden echo, and the floor is heavily carpeted. After some experiments it was found that the ceiling did not require covering. The studio is furnished in contrasting tints of blue.

The reception room is right under the steel tower on top of the building. Artists wait here for their turns at the microphone.

The Radio room is the place for the operator, Mr. E. Camunas and contains all the apparatus except the motor generator and batteries. The power room is in one corner of the building and well separated from the studio. This permits good working conditions without noises.

Bags of Gold!

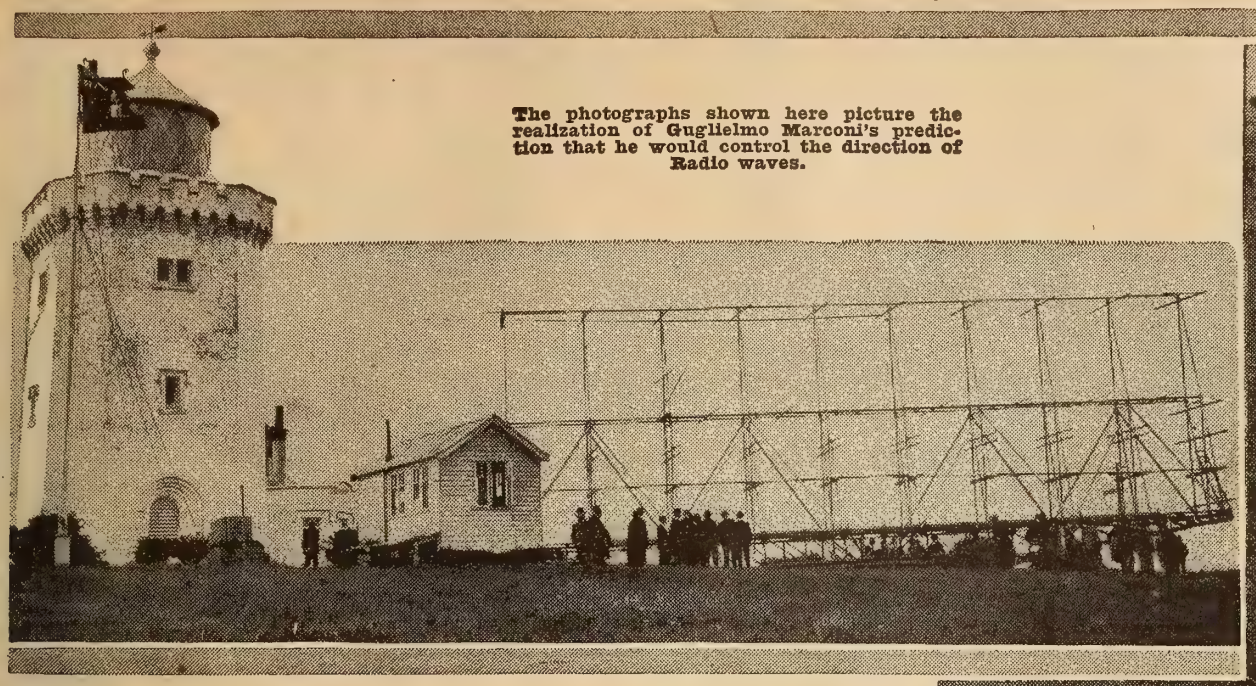
Robert J. Casey

THE Story is by Robert J. Casey, world famed author of "Brothers of the Gun," "Long Arm of Andy Irons," "Vest Pocket Anthology," and over two hundred creepy, mystery stories. He is easily the peer of climax builders; the master mind of imaginative intrigue; the apex of creators of thrilling episodes and unforgetable complexities.

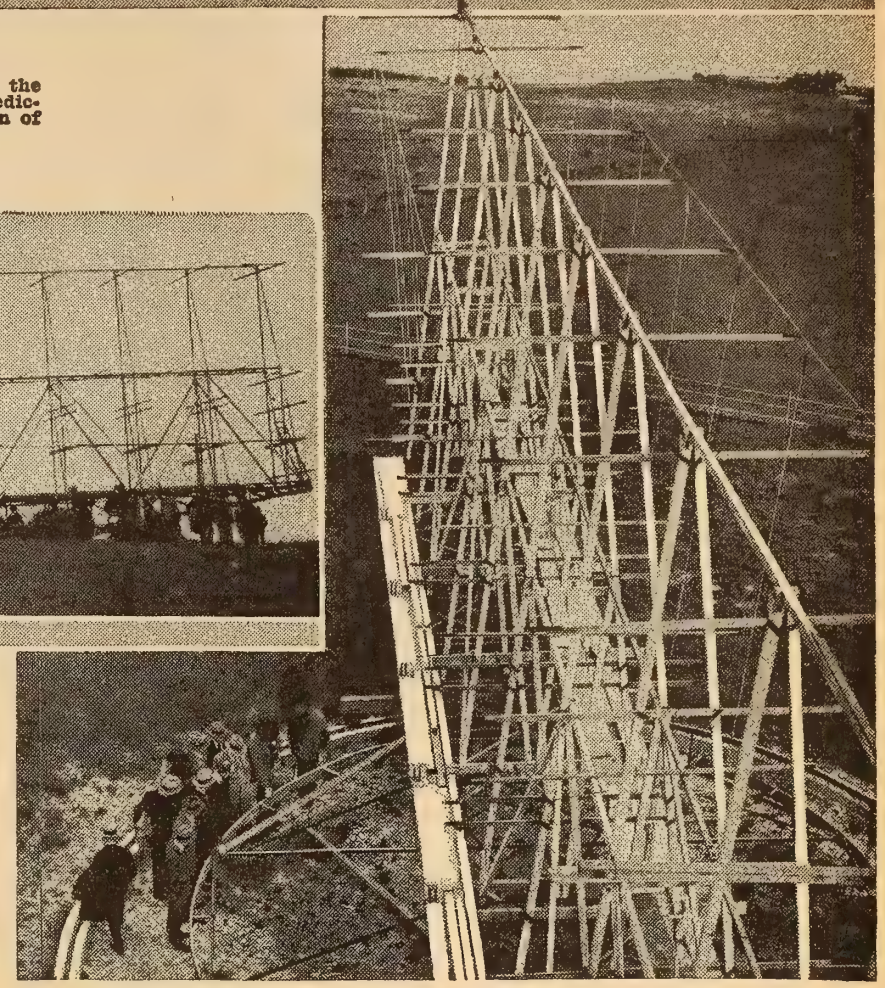
In this story, written especially for Radio Digest, Mr. Casey has risen to new heights in creative fiction. The lust of Gold—unwavering Love—and the mimicry of make-believe, are each pictured in a dialogue and action that will hold you spellbound to the end.

Complete Details of this Amazing Contest Will Appear Next Week

MARCONI ERECTS BIG BEAM STATION



The photographs shown here picture the realization of Guglielmo Marconi's prediction that he would control the direction of Radio waves.



SEARCHLIGHT BEAM Radio transmission was announced several years ago by Marconi to the surprise of everyone interested in Radio and its future. Before that time it was thought that Radio waves would never be controlled. Guglielmo Marconi, who first made wireless telegraph possible, after years of further research told the public that he could direct Radio waves in whatever direction he wished, and that listeners living in other directions would be unable to receive his waves.

Here is his answer to the practicability of his "searchlight beam" Radio invention. In England at the South Foreland lighthouse, he has erected and installed a high-powered beam transmitter and rotating uni-directional antenna.

Besides adding to the secrecy of Radio messages, Mr. Marconi's invention is said to permit a saving of power and dissipated energy. Using much less power than is ordinarily used by transatlantic stations, his beam transmitter at South Foreland has been heard in Australia, equally as strong as the high-power stations.

SIX WIN PRIZES FOR FOREIGN DX REPORT

RADIO DIGEST ANNOUNCES TEST WEEK WINNERS

Iowa Physician Takes $50 First Award for Twenty Overseas Broadcasters —New Yorker Second

Winners of the six prizes, totaling one hundred dollars, offered by Radio Digest for proofs of best reception of foreign stations during the International Radio Week tests are:

First, $50, Dr. J. D. Hullinger, 108 The Weston, Clinton, Iowa. Dr. Hullinger received twenty foreign stations during the first five nights of the tests, exclusive of Mexico. Of the twenty, fourteen were different. His receiver was a nine tube super-heterodyne, home built, coupled to an outside aerial.

Second, $25, Harry Leadbetter, 208 West 103rd street, New York city. Mr. Leadbetter received fourteen different foreign stations, eight of which were different. Mexico was not included. His receiver was a five tube manufactured radio frequency set.

Third, $10, H. Livingston, West Plains, Mo. Although some of the other prize winners received more stations than Mr. Livingston, his distance west of Europe was considered as a handicap. He picked up, exclusive of Mexico, eight foreign stations during four out of the first five nights. Five of these were different. His set was an eight tube super-heterodyne of the four filter type, similar to one described a year ago in these columns.

Fourth, $5, James L. Snyder, Patton, Cambria County, Pa. Mr. Snyder received nine different foreign stations, one of which was only partly verified. Six different foreign stations were among the nine. His set was a manufactured five tube radio frequency receiver.

Fifth, $5, Paul H. Davis, of Chicago, whose receiving post was located at the hunting lodge of Joseph Crum, on the broadwaters near Oyster, Va. In but two nights, Mr. Davis succeeded in bringing in seven different foreign broadcasters. Fourteen stations in all were heard, but confirmable proof was submitted for but seven. His receiver was a manufactured six tube portable radio frequency set.

Sixth, $5, Master Sergeant Louis Hahn, of the 212th coast artillery, 120 West Sixty-second street, New York city. Sergeant Hahn, who submitted his report with unusual military neatness, did not do so well as many other contenders who were less careful, but his record was above the ordinary. He received five foreign stations, four of which were different.

According to the many letters from listeners who entered the International reception contest, over 200 clergymen, many lawyers, doctors and teachers, and a great many women attempted to win the prizes offered. The women's reports were invariably complete with detail. They did not overlook description of what they heard.

However, men still seem to rank as best dial manipulators, so far as DX is concerned. A growing interest on the part of the weaker sex is noted, regardless of its absence of the prize winning list.

Every state in the Union was heard from, but the western states, on the whole, received but few of the European or South American broadcasters. Mexico, most provinces in Canada, and the Bermudas also entered the tilt.

Why Many Contestants Failed

Many excellent reports of reception were passed aside by the judges because some requirement was not met. Some omitted to describe the equipment used. Others were illegible. Still other reports were miserably organized and difficult to check.

It is surprising to note the illegibility of many adults. All of the many thousands of reports of reception were replied to by the International Tests department of Radio Digest, and Confirmation Certificates—if earned—were mailed to fortunate fans, except in cases where legibility was so poor as to prevent proper addressing.

Some listeners evidently received extraordinary well, but did not give sufficient key information to allow checking for confirmation.

Dr. Horace B. Fenton, of Portland, Ore., deserves at least honorable mention. It is therefore awarded to this Westerner for his fourteen-page report, and his constructive criticisms so carefully made. Several hundreds of others contestants, too many by far to list here, are also deserving of honorable mention, but space forbids.

One error in the confirmation programs, published last issue in Radio Digest, must be noted. The wave length of HA, Hamburg was listed as 292.5 meters. The figure should have been 392.5.

260 DIFFERENT KINDS OF SETS HEAR KFNF

SHENANDOAH, Iowa.—Are you planning to buy a new receiving set? Then you'll be interested to learn that KFNF, Henry Field station here, has 260 different makes of sets represented in its audience.

Buy your pick after looking over the few.

The figure was obtained recently when an old-time fiddling contest was broadcast. Thirteen aged fiddlers participated. The listeners were to pick the best of the thirteen, the only condition being that in mailing one's vote the listener must mention the manufacture of his or her receiver.

The total number of votes cast was 23,343, and among the number a variety of 260 different makes of sets picked up the program.

Legion Notes

The Iowa department of the American Legion will broadcast its official program Tuesday evening, February 23, 7:30 to 9:00 p. m. Central time, over Station WHO (526m-570kc). Addresses will be made by National Commander John R. McQuigg; Hanford MacNider, assistant secretary of war and past commander of the Legion; National Adjutant James F. Barton and Governor John Hammill.

A musical program and addresses by the department officers will be broadcast by the Wyoming department of the American Legion over Station KFBU, Laramie, Wyo., (270m-1110kc), Friday, February 26, 9:00 to 11:00 p. m. Mountain time.

The Wisconsin department of the American Legion will broadcast its 1926 barrage, February 22, from Station WKAF, Kesselman-O'Driscoll, Hotel Antlers, Milwaukee, Wis. The program will run from 8:00 p. m. until 2 a. m. Central time, with the exception of an hour between 11 and 12 o'clock.

Station Gives Program for Staunch Listener in Alaska

BUFFALO, N. Y.—WMAK, with studio here, has been heard repeatedly during the last few months by a man who signs himself S. Sheldon, at Haines, Alaska. Buffalo is his native city and he has been so enthusiastic about the WMAK programs that "Al" Erisman, manager of WMAK, put on a complimentary program for S. Sheldon after midnight recently. Among the great variety of musical and other numbers was one in which Walter T. Sheldon, a brother, participated. A telegram of greeting from the father of the brothers who lives in Ohio, was also read for it was the father's birthday.

ZENITH CASE SHOWS NEED OF RADIO LAW

PRESENT SYSTEM UNABLE TO REGULATE ETHER

Acting Secretary Davis Visits Chicago to Discuss Controversy with Radio Supervisor

WASHINGTON.—The urgent need for legislation which would give the secretary of commerce authority to regulate Radio has been stressed by the failure of the district attorney at Chicago to take immediate action against E. F .McDonald, Jr., president of the Zenith Radio Corp., owners of WJAZ. This is the opinion of Senator C. C. Dill and Representative Wallace White, Jr., authors of Radio bills in their respective branches of congress.

In the absence of definite action on the part of the Chicago district attorney against Mr. McDonald for broadcasting on a wave length which he was not authorized to use, officials of the department of commerce refuse to comment on the case.

Davis Visits Chicago

Acting Secretary of Commerce Stephen Davis recently kept a speaking engagement in the Middle West. While there Judge Davis stopped off in Chicago to confer with the district attorney and the local Radio supervisor regarding the case.

Judge Davis refused to disclose his plans before leaving, but it is believed he intends to point out that in his opinion the present law provides sufficient authority for legal action against Mr. McDonald.

Progress of Legislation

There has been no definite action in congress on Radio legislation since the public hearings in the house merchant marine and fisheries committee were concluded. An executive meeting was held in the house regarding the final form the bill should take. Mr. White expects the bill will be reported to the house substantially as drafted before this issue reaches its subscribers.

Indications are that further hearings in the senate on Radio legislation may be deferred until the White bill passes the house.

Receiving sets are to be distributed by a British missionary to natives in the South Sea Islands. Cocoanut palms, 80 to 90 feet high, are to be used for aerial masts.

New and better

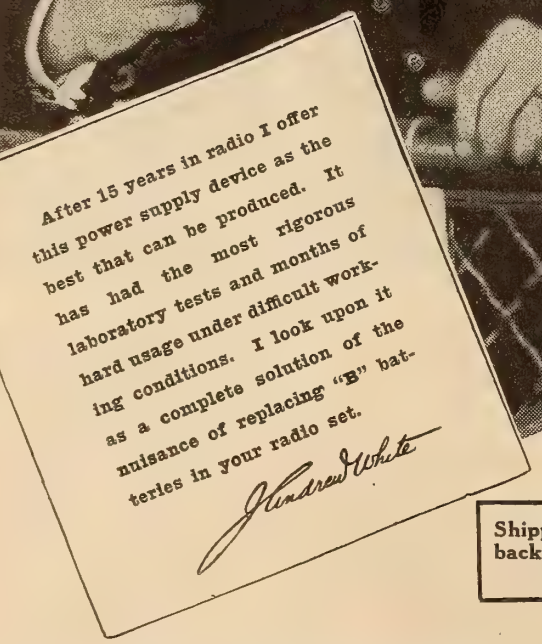
Uses No tube

Ends "B" battery troubles

Andrew White "B" Radio Power Supply

for Alternating Current only

110 Volts 60 Cycle



Major J. Andrew White, America's famous sports broadcaster, pioneer radio editor, the country's first broadcast director and veteran radio dealer and manufacturer.

Shipped on a satisfaction or money-back basis on receipt of price in money order or currency.

Ready for use at all times, 135 volts of "B" battery current, all you need, now or in the future. It delivers steady supply, operating perfectly at all times all sets using up to 9 tubes. The new tubes and modern sets require 135 volts—don't buy less!

No Hum There is no hum. No noise at all. The current is delivered from EIGHT electrolytic cells. NO TUBES TO FLUCTUATE OR TO REPLACE.

Economical Takes so little current you will notice no difference on your electric light bill.

Durable Will deliver the full voltages you require for detector, radio frequency and amplifier tubes, strong and steady year after year, just as if you had brand new batteries all the time.

Convenient Plugs into electric light socket—nothing to get out of order at any time.

Improves Broadcast Reception

Large size condensers and steady current supply improve the performance of your radio set. You will have better quality of speech and music and greater volume.

No Parts Requiring Replacement or Renewal

A few territories now open for established dealers.

J. ANDREW WHITE, 37 West 43rd Street, New York

135 Volts!! Only $38

There is a great demand

Your dealer may not be able to supply you

MAIL THIS COUPON TODAY

J. Andrew White, 37 West 43rd Street, New York.

Enclosed is $38, for which ship me your new and better "B" Radio Power Supply at once, my money to be refunded if I am not satisfied and return the unit in 10 days.

HOW TO COOK MEAT TO GET FULL VALUE

BETTY CROCKER PREPARES POT ROAST RECIPE

Food Expert Tells Importance of Selecting Right Cuts for Satisfaction and Economy

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker.

MEAT is one of the most important items on our food bill, so every woman should know how to select the best cut for any particular use, and also how to prepare and serve it so as to give the greatest satisfaction to the family, as well as to secure the most for her money. In order to do this, every housewife should make a careful study of the different cuts of meats and their uses.

It is always easy to remember that meat, that is, lean meat, is muscle. The muscles which the animal uses most are more developed. Consequently, the meat from those cuts are much tougher than from the other parts of the animal not used so much. That is why a shank or a shoulder cut is much tougher than a loin or a rib cut.

To understand the cookery of meat, you should know the structure of it. Lean meat is made up of bundles of tiny fibers. These fibers are so small that they cannot be seen without the aid of the microscope. Each little fiber is a tube filled with the juices of the meat, and the fibers are held together by what we call connective tissue.

The difference between tough and tender cuts of meat is that the tough cuts have long coarse fibers and more connective tissue and the tender cuts have shorter fibers and every little tissue.

(Continued on page 12)

TWO LEADERS IN RADIO FIELDS

Three months ago, Ruth Warren, (below) knew nothing of Radio. Today she is head of the Radio department of a large store in Asheville, N. C., and is regarded as an expert in building receivers.

Mrs. Helen Fisher, (above), conducts "Mothers' Hour" every Monday afternoon and a flower talk every Wednesday afternoon as special features of KFNF, the Henry Field station at Shenandoah, Iowa. Mrs. Fisher receives thousands of letters each week attesting the popularity of her broadcasts. She is considered a flower and garden authority.

SHORT WAVES

By Marcella

Why S. V. L., don't you know that the "Red-Headed Music Maker" you recently heard at WSAI, Cincinnati, is none other than Wendell Hall? Paging Lou Ferris and Herb Beerman. I am not sure just where these gentlemen are, but I'll find out for you. Anybody knowing them real intimately are welcome to write.

* *

Ford and Glen, and Ralph Emerson, al of WLS, come in for many inquiries. Here's to dispel all doubts regarding Ford and Glen for Anna, who is "just a middle-aged" fan and probably won't worry over their matrimonial inabilities. I say the latter, for, first of all, both boys are married. Each has a boy. The boys are about eight years old each. Both Ford and Glen drive cars. In fact motoring is the hobby of the team, individually and collectively.

How did they meet? Through Radio and Edgar Bill, director of WLS. He heard Glen playing an organ in Chicago. He knew of Ford's ability. He matched the two together. When they met, it turned out to be a reunion, much to the surprise of Mr. Bill. Ford and Glen knew one another some years ago in St. Louis.

Ford (Rush) was born in New Orleans, which is properly pronounced "N'Awlins." Age about thirty-two, weight about 175 pounds, height six feet. Glen (Rowell) was born in Pontiac, Ill., where they feed 'em corn, hence his 218 pounds. Has lived about twenty-eight years, likes pie and cake, stands five feet eight inches tall. Next?

* *

Oh yes, while speaking of Ford and Glen, one cannot forget Ralph Emerson, also of WLS. None of my inquirers do, either. They always ask about the three. Well, Ralph is a hard-working organist without a wife. His age is about thirty, weight about 185, height five feet ten. No, he doesn't drive a car. Too busy. His eyes are blue and his hair is inclined to be blonde. No mustache, sorry. What

(Continued on page 12)

WOMEN'S PROGRAMS INDEX

Saturday, February 20

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

HOW TO PREPARE MEAT

(Continued from page 11)

When we cut a piece of meat we cut across the fiber, leaving the ends open so that the juice can run out. That is why we sear the meat the first thing when cooking.

Save Valuable Meat Juices.

By searing we mean cooking over the outside of the meat very quickly so that the cut ends of the little fibers are sealed tight, preventing the loss of any more of the juices.

It is because the flavor of the meat is found in these juices that we are so careful to retain them. The meat juices stimulate the production of the digestive juices in the stomach and thus stimulate the appetite. That is why clear soup is served at the first course for dinner and is also why beef broth is given to invalids and convalescents.

Meat is largely protein and protein must be cooked at a low temperature. If it is cooked quickly or at a high temperature, it becomes tough and leathery. For that reason the directions for cooking meat always read "sear it very quickly at first and then cook it slowly for as long as is necessary to complete the cooking."

Cooking Tougher Meats; Pot Roast.

Tender cuts of meat, such as roast and steak, may be baked or broiled, but the tougher cuts should be cooked for a long time, very slowly, and in moist heat, that is, with some water. It would never do to cook a pot roast or a stew in a dry oven as we do a roast, or on a broiler as we do a steak.

Moisture and the long slow cooking are absolutely necessary to make the meat tender and palatable. For a pot roast we use a tougher cut of meat than that selected for the oven roast. Sometimes the bottom of the round is used or the chuck or the neck. Here is the kitchen tested recipe for pot roast:

Four pounds of chuck, 2 tablespoons of flour, 4 tablespoons of dripping, 3 teaspoons of salt, and 1 quart of cold water.

Method: Wipe the meat with a cloth wrung out of cold water. Rub over the surface with flour. Sear on all sides in the hot drippings until brown. Season with salt. Add water and cook SLOWLY until tender. (About 2½ hours).

Never wash meat in water, as that will dissolve out some of the precious juices. The searing of the meat in the hot fat not only helps to keep in the juices, but also carmelizes the surface of the meat, giving us a good brown color and a rich flavor. For searing, heat the fat in an iron pot or in a kettle in which the roast is to be cooked. Otherwise much of the good flavor will be lost.

Helpful Hints for Pot Roast.

Any kind of meat drippings may be used, suet or bacon fat or fat from the meat itself. Be sure to sear it well on all sides. You will notice that the salt is not added until after the meat is seared. That is also to help retain the juices. If it is necessary to add more water during cooking, add boiling water, as cold water would retard the cooking. Let me add once more—cook the pot roast SLOWLY. A good sauce may be made by pouring a can of tomatoes over the roast for the last hour of cooking.

After the pot roast is done, remove it from the pan and add more water to the liquid in the pan. Then make a thin paste of flour and cold water, using the proportion of 2 tablespoons of flour to each cup of liquid, and equal proportions of flour and fat. Pour the paste into the hot liquid and stir constantly. Add salt to taste, and cook slowly 10 minutes. In many cases gravy is not cooked long enough to cook the starch in the flour, the result being a raw, starchy taste.

For serving, the pot roast may be garnished with vegetables. For example, arrange carrots cut lengthwise to make a border around the platter, or place the pot roast in the center of the platter with the potatoes at one end and some other vegetable opposite.

SHORT WAVES

By Marcella

(Continued from page 11)

does he do when he isn't playing the organ? Well, then he teaches organ playing for the Barton organ school.

* *

"Old Timer" is Sen Kaney, "Mike," Gladyce and Ina. He's married to a very jealous wife. Watch out. He's about thirty-two years old. Bobby Brown, another KYW favorite, whose Overseas Uke is legend, is married. His age, twenty-eight. Lee Sims, who tickles the Steinway at KYW's Congress hotel studio, is likewise a benedict and about thirty-four years young. Evidently this trio's "Gloom Chasing Hour" is drawing the ladies to the receivers. Sure, they're on every Tuesday, Thursday and Saturday afternoon.

* *

"Helen" thinks she has one on me. Read what she says—all of it:

"Noted in your paragraph about E. L. Tyson of the Detroit News that you did not say YOU danced WITH him at the cabaret. I'll fager five cents worth of applesauce you carry a MISTER before your name. Be careful or I'll be asking for YOUR photo, autographed! Incidentally, what can you tell me about Maurie Blumenthal of WGN Drake hotel orchestra fame? I have a case and want to be cured. Five children and a wife might help, or even his picture.—Helen."

Another insult! Why you girls get the idea that I am a mere man, I can't fathom. But I won't send you my picture! Now about Maurie. He is NOT married. Went to University of Illinois. Is only twenty-three years old but he plays piano, arranges and sings as if he had years of experience. Since Maurie is matrimonially on the market, I will add that he drives a fast, rakish coupe and keeps the windshield and windows dusty so the public can't see him and his. Hair, black and straight; weight, about 165 pounds.

* *

Harry Snodgrass, the "King of the Ivories?" I don't know where he is. Last I heard of him, which was, by the way, several months ago, he was doing a number of stations throughout the South. He and Witten are probably back in vaudeville, with an anti-Radio clause in their contract. These no-Radio-appearance contracts hurt an artist's popularity, don't you think?

* *

The Gold Dust Twins prefer to remain a mystery. They are however, experienced artists (white) with enviable reputations behind the footlights. Olive says their southern melodies are best. Everyone agreed?

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

ADVANCE PROGRAMS FOR THE WEEK

Saturday, February 20

Headliners Today

Eastern	Central	Mountain	Pacific
7 p. m.	6 p. m.	5 p. m.	4 p. m.

WJZ (454.3m-660kc), WRC (468.5m-640kc), U. S. Navy band concert.

8:15 7:15 6:15 5:15
WGY (379.5m-790kc), Fourth anniversary program.

Saturday, silent night for: CFAC, CFCA, CNRA, CNRC, CNRE, CNRM, CNRR, CNRT, CNRV, CNRW, KFDM, KFKX, KFKU, KFMX, KFRU, KFUO, KFXF, KLX, KMA, KOAC, KOB, KQP, KSAC, KSO, KTAB, KWSC, WABQ, WCX, WDOD, WEAO, WEBJ, WEBW, WEEI, WGCP, WGST, WHAD, WHAZ, WGR, WHN, WHO, WIP, WJAR, WJAZ, WKAQ, WKAR, WLIT, WLWL, WMAZ, WOAI, WOS, WRVA, WTAG, WTIC, WWJ.

Eastern Time Stations

CHIC, Toronto, Can. (356.9m-840kc), 10:30 p. m., dance program, Al Linton's orchestra.

CKNC, Toronto, Can. (356.9m-840kc), 4 p. m., chamber orchestra, Charles E. Bodley, director; Arthur VanderVoort, bass; Hazel Hall-VanderVoort, soprano; 8-10, Charles E. Bodley and his dance orchestra; Elgar male quartet.

CNRO, Ottawa, Can. (434.5m-690kc), 7:30 p. m., Cosy Corner for girls and boys, Uncle Dick; 8, Chateau Laurier concert orchestra; 8:45, Alice Valiquet, soprano; Nico Poppeldoff, violinist; Chateau Laurier dance orchestra.

KDKA, Pittsburgh, Pa. (309.1m-970kc), 7:15, 8 a. m., exercises, O. Shannon, conductor; 5:45, Daddy Winkum; 6:30, dinner concert, T. J. Vastine, conductor; 8:30, concert, Mrs. Edna Reed, contralto.

PWX, Havana, Cuba (400m-750kc), 8:30-9:15 p. m., dance music; 9:25-10:10, concert.

WAFD, Port Huron, Mich. (275m-1090kc), 10-12 p. m., Harrington hotel dance music; 12, Ether Buster club. p. m., Austin Wylie's Vocalion Recording orchestra;

WAHG, Richmond Hill, N. Y. (315.6m-950kc), 12:03 p. m., Joe Zimmerman, pianist; 12 midnight, Weinzoff's concert orchestra.

WBBR, New York, N. Y. (273m-1100kc), 8 p. m., Carl Park, violinist; 8:10, L. Marion Brown, soprano; 8:30, Carl Park, violinist; 8:40, "Comfort for the People," Bible discussion; 8:50, L. Marion Brown, soprano.

WBZ, Springfield, Mass. (333.1m-900kc), 6:30 p. m., Little symphony orchestra, KDKA; 6:45, Hotel Lenox ensemble; 7:45, Daniel Kuntz and his Repertory theater concert orchestra; 8:15, musical program, Hotel Brunswick studio; 9:15, violin recital, Evelyn LaFrance Daly; Mrs. Eleanor Turner LaZazzerr, accompanist, 9:30, program, Louise Boyce, soprano; Thelma Bugbee pianist and accompanist; 9:45, Lee Reiman's Hotel Brunswick orchestra.

WCAE, Pittsburgh, Pa. (461.3m-650kc), 3 p. m., music, Nixon Cafe; 6:30, dinner concert, William Penn hotel; 7:30, Sunshine girl; 8:15, Youngstown artists.

WCX, Detroit, Mich. (516.9m-580kc), 6-7 p. m., dinner program, Goldkette ensemble.

WEAF, New York, N. Y. (491.5m-610kc), 6:45, 7, 7:20 a. m., "Tower Health Exercises," to WEAF, WEEI, WCAP; 7:45-8, "Morning Prayer Service," under the auspices of the Greater New York Federation of Churches; 4 p. m., Louis Fisher's dance orchestra; 5, Vincent Lopez and his orchestra from Ritz Carlton hotel; 6, dinner music, Hotel Waldorf-Astoria; 7, Josephine Evans quartet; 7:15, Long Island Grotto B. U. G. club; 7:30, Josephine Evans quartet; 7:40, Long Island Grotto B. U. G. club; 7:55, "Character Sketches," Eugene Lincoln; 8:10, Einar Hansen, violinist; 8:30, Minnie Weil, pianist; 8:45, Irvine Players—one-act Radio plays; 9:15, musical selections, string trio; 9:30, WEAF musical comedy troupe; 10, Ross Gorman and his orchestra from Monte Carlo; 11-12 Vincent Lopez and his orchestra from Casa Lopez.

WEAO, Columbus, Ohio (293.9m-1020kc), 8 p. m., Michigan-Ohio State basketball game, A. Lee Henderson, announcer.

WEAR, Cleveland, Ohio (389.4m-770kc), 7 p. m., Hotel Statler concert orchestra, Maurice Spitalny, director; 12 midnight, Wormack's singing syncopators.

WEEI, Boston, Mass. (348.6m-860kc), 6:45 a. m., Tower health exercises; 8 p. m., Boston symphony orchestra, Serge Koussevitsky, conductor; 10, Lucerne Girls' quintet.

WFI, Philadelphia, Pa. (394.5m-760kc), 10 a. m., meeting, American Academy of Political and Social Science, conference on Modern Crime, the Prevention and Detection—speakers, Hon. Ellen C. Potter; Fred L. Hoffman, William McAdoo, Chief Magistrate of New York; Joseph K. Willing; **1 p. m.,** tea room ensemble; 3, Peter Muhlenburg Chapter, Daughters of American Revolution; Puccini string trio; Helen Rowley, violinist, Jean Modave, cellist, Kathryn O'Boyle, pianist; Virginia Snyder, accompanist; soprano solos, Laura E. Manwaring, Fanny Shirver, accompanist; 6:30, Bellevue-Stratford concert orchestra; 7, Bellevue-Stratford dance orchestra; 8, musical program; 8:15, American Academy of Political and Social Science, speakers, Lynn G. Adams, Superintendent Penn. State Police; Mabel Willebrandt, Asst. Attorney General of U. S.; Edwin M. Abbott, Phila. Dept. of Public Safety; 9:15, studio program; 11, Bellevue-Stratford dance orchestra.

WGBS, New York, N. Y. (315.6m-950kc), 1:30 p. m., Katherine Conolly, songs; 2, Joe Kahn, tenor; 3, Orpheus ensemble; 6, Uncle Geebee; 6:30, Jacksonville Five; 7, Joseph Halligan, tenor; 8:30, Clifford W. Cheasley, philosopher; 8:40, Domingo Diego, Spanish tenor; 9:20, Joseph Parisi, trumpeter; 9:30, Rita Redhord, soprano; 10, Fauna Gressier and Albert Cartier, duets; 10:30, Arrowhead Inn dance orchestra.

WGCP, New York, N. Y. (252m-1190kc), 3 p. m., Miami Ramblers; 3:30, Andy Razof; 3:45-4, program; 4:15, Joe Turkel, tenor; 4:30, Ramopo Ramblers; 5, William Goble, tenor; 8:30, Strickland's orchestra; 9, ukulele; 9:20, J. Lee, songs; 9:40, Jama Yama Boys; 10, Della Riordan, female baritone; 10:15, program; 10:30, Strickland's orchestra.

WGHB, Clearwater, Fla. (266m-1130kc), 6:30-7:30 p. m., dinner music; 8:30-9:30, David Gootenberg, violinist, Marion Hoffman, pianist; 11:45-1 a. m., Radio Ramblers midnight frolic.

WGY, Schenectady, N. Y. (379.5m-790kc), 6:30 p. m., dinner program; 8:15, program, celebrating Fourth Anniversary of WGY.

WHAR, Atlanitc City, N. J. (275m-1090kc), 2 p. m., Seaside hotel trio; 7:30, lecture period; 8, Seaside hotel trio.

Tune in at 4:30 p. m. Central time Sunday afternoon for WBBM. Fawn Gray, a well-known dancer and entertainer, is the charming personality above, who makes this particular hour of the week attractive to listeners.

High Lights of the Week

NEVER to be seen is the fate of the "Ghosts of the Air" called the Phantoms at KPRC. But these disembodied spirits can play real jazz and may be heard Saturday evening as the clock nears twelve. Promptly at midnight a big Pow-Wow takes place at KOIL with Sitting on the Bull, conducting.

The two Kent artists this Sunday, are Lea Luboschutz, violinist, and Benno Moiseiwitsch, Russian pianist. Two Baltimore artists of note will entertain at WBAL this same evening, Pasquale Tallerico, pianist, and Margaret Rabold, former Metropolitan opera soprano.

Monday is Washington's Birthday. A special patriotic Radio pageant has been arranged by the Fort Crailo Post of the American Legion at WHAZ. The community program at WSAI, Cincinnati, has as the guest artist this week, Jeanette Vreeland, who sang recently over the WEAF chain.

The famous violinist and concert-master of the Chicago symphony orchestra, Jacques Gordon, will play his famous "Clara Schumann Strad" over Station WGN, Tuesday. Another kind of fiddling may be heard at the fiddlers' contest this same evening at WGY. Old-time fiddling has become popular again and almost every section has its old-time fiddlin' champion. Tuesday is also an auspicious day for KFNF. This station is now two years old and plans to run a twenty-six hour program.

A birthday party is a real birthday party when gifts are exchanged. CNRO will celebrate its anniversary Wednesday, with a special program and gifts to fans tuning in. WGR refuses to sign off until morning. This special frolic will last from 1 to 4:30 a. m.

Bulwer Lytton's powerful drama, "Richelieu," will be broadcast by the KGO players, Thursday night. Sixteen players will face the microphone. The American Croation glee club and the Tamburitza orchestra are the interesting Thursday features at KDKA.

An oriental program will please the ladies Friday afternoon at WFI. Fairy tales of old Japan, and Chinese and Japanese music will make this program appealing. In the evening the opera "Faust" may be enjoyed at WEAR or the collegiate program by the Vanderbilt university at WSM.

LUBOSHUTZ, MOISEIWITSCH AT WEAF

Two internationally known artists will entertain during the Atwater Kent hour, Sunday, at 8:15 p. m. Eastern time on the WEAF chain. Lea Luboshutz, left, is a violinist of note. Benno Moiseiwitsch, above, is a young Russian pianist, who shows unusual skill.

Saturday, February 20

WDAF, Kansas City, Mo. (365.6m-820kc), 6-7 p. m., Pantages theater organ; the Trianon ensemble; 11:15-1 a. m., Ted Weem's Victor Recording orchestra; Billy Adair's Kansas City club orchestra; Eddie Kuhn's Kansas City athletic club orchestra.

Mrs. Eva Thompson Jones, above, is the attractive contralto who sings regularly at WSM, Nashville. In the center are two young artists caught in the act of broadcasting from KMA, Shenandoah. The violinist is Louise Moyle and the pianist, Leona Geget.

The famous Trianon orchestra which broadcasts every evening and Sunday afternoon from WMBB, Chicago, is directed by Dell Lampe, above. Mr. Lampe played for sometime with Vincent Lopez. He has made his orchestra one of the most widely known and popular organizations on the air.

Elect Radio Congressmen

WE WERE glancing over a copy of "Rhodes' Colossus" the other day. It is only a little house organ—a means of conveying the ideas and opinions of a business organization—but it is one of the best edited in America. In the issue there appeared an article relating to the great Imperial Valley of Southern California. The editor in his article recounted an interesting story which has its Radio application.

The great Imperial Valley was threatened some years ago when the Colorado overflowed its banks and ran wild for almost a year, causing great destruction of property. The government could not stop the overflow. Finally President Roosevelt called Harriman, the railroad king, since deceased, and requested, "Use the full facilities of the Southern Pacific to stop the gap—I will see you are paid."

For months the railroad dumped 100 cars of rock a day into this gap and finally the Imperial Valley was saved.

Did congress pay the railroad? Not a red cent. Yet, we criticize the railroads! If you want to see samples of the rankest injustice, try to get a bill through congress in which the members cannot see votes, or an issue for their political selves. Roosevelt tried his best to make good, but the boys on the other end of Pennsylvania avenue needed all the cash for their constituents.

The narrative concluded is just a typical demonstration of congress.

What connection does it have with Radio, you ask. As a matter of fact the story has several direct applications to congress and Radio affairs now before our august body of lawmakers.

The senate is now engaged, or it was as we went to press, in a terrific ordeal. All the senators are trying to find out how they should vote on the World Court. The lavishly expensive Bok lobbies and enticing social affairs of the foreign embassies, coupled with some of the votes of their constituents, are allied for the court. The interests in favor of pursuing the famous Monroe Doctrine, backed by other constituents, are allied against the court. It is terrible to be a senator and not know how to vote so as to please friends as well as the voters and insure one's reelection.

The house is busy with the tax bill. The congressmen must "ride the fence" until they learn how many votes "so-and-so" controls and what is desired by him.

And so Radio broadcasting, in which we must admit not everyone is interested, must be shoved aside by our congress to give right-of-way to the more general and vote-deciding questions.

We hate to be pessimistic, but we wonder if congress will ever pass a new Radio law? We wonder if congress and the budget bureau will ever give the Radio development branch (bureau of standards) and the Radio administrative branch (inspection force etc.) enough money to make broadcast transmission and reception what it SHOULD be?

You, John Smith, and you, Mary Brown—do you ever get your representative in the corner and ask him just what he is going to do for Radio? Do YOU bind him to that promise with your vote?

If you can't do anything with the men who are now sitting there on the hill in Washington, your representatives, get busy and put in new men whom you can TRUST to carry out your orders.

WIR Investigates Trouble

INTERFERENCE from WIR, Radio Corporation of America short-wave telegraph station at New Brunswick, N. J., may cease. The company says it is making changes to stop this interference. We will be glad to compliment this organization for its cooperation—once the interference has ceased.

In this connection, allow us to remark, that at KDKA, the Westinghouse station at East Pittsburgh, 20,000 watts of power are sent by a similar short-wave telegraph transmitter. This outfit causes no speakable interference. No complaints have been received, even from Pittsburgh.

Perhaps the Westinghouse engineers could show WIR how to do it?

RADIO INDI-GEST

Yes Sir, She's My Baby

The idea has occured to me
That without undue activity
On the part of my anatomy
That's commonly known as brain.
I could possibly write a verse or so
Concerning the songs on my Radio—
There won't be any sense to it though,
So it won't be much of a strain.

THAT CERTAIN PARTY, OH BOY, WHAT A GIRL
Once told me, "I'M ALL FOR YOU?
THEN I'LL BE HAPPY." I said, "SUGAR PLUM
But BROWN EYES, WHY ARE YOU BLUE?
I'M SITTING ON TOP OF THE WORLD, right now,
Together through life we'll roam."
"SWEET MAN, I'm AFRAID, I'm TOO TIRED," she said,
"SHOW ME THE WAY TO GO HOME."

Now PADDELIN' MADELINE HOME, ALL ALONE,
BY THE LIGHT OF THE STARS isn't fun,
'Cause she lives 'way DOWN BY THE WINIGAR WOIKS.
But when she said, "WONDERFUL ONE,
I'm THE BOOTLEGGER'S DAUGHTER, come on in the house,"
I felt FUNNY all over, I vow,
For I thought all along she was ANGRY, you see—
I tell you, YOU GOT TO KNOW HOW.

MARSHALL HYDE

Lese Majesty!

Dear Indi: Won't you tell me who the Night Herd is? I like his poetry as it is a lot like Edgar Allen Poe's. Both of them have so much illiteration.

MARJORIE

Marjorie, we ask you, "Is that nice?" Now that you have had time to think it over, aren't you a little sorry? They both seem like such nice boys. We hope this is a typical graphic error.

Can't Confirm

The other night while tuning in,
I heard the loudest thund'ring din.
The loop got hot, the tubes most choked,
The dials got red, the speaker smoked.
Just where it was, I cannot tell—
But I think it was Aich E Ell Ell.

RAY D'O

Hey Keeper! Check Up the Inmates

Dear Indi: Please confirm this foreign reception. Sunday night: Heard someone saying, "Duck your head, too low." This must have been 2-LO. Noticed room getting dark and found fog coming from loud speaker. Sure it was London and the whistles and squeals were fog horns. Monday night, about 10:15 p. m.: Noticed very peculiar odor. Thought I must have short circuit so I opened cabinet and low and behold!, in place of the third tube I found a big schooner of lager beer with foam and everything. Found limberger sandwich stuck in speaker and I think I had Hamburg.

C. A. SHOOP

We think you had 2-DT's. But, anyway, there may be something to it. Just one question: What kind of a set did you use Monday night?

Those Foreign Stations

Sets are squealing—and I'm feeling—
Like I'd wish to kick them out.
Tubes are howling—sounds like prowling
Tomcats in the dead of night.
Silence falling—no voice calling—
Expectations fill the air.
I am wishing—and I'm fishing—
For those foreign stations there.

Time is drifting—shadows shifting—
And our patience's drifting too.
Dials adjusting—and you're fussing—
Start to feel a little blue.
Silence shattered—voices clattered!—
"Whoops!—I've got a foreign nation."
Like to trounce him—for announcin'—
Just a Sacramento station.

ANNIE LOU

The Rum Fleet Sails On It

Proof of Corkscrew Wave Is Offered

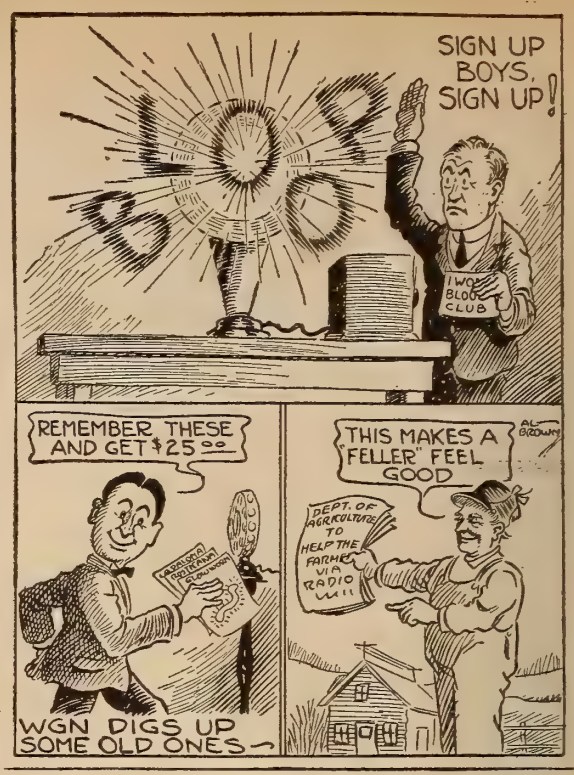
We Were Lead Into This—He Dared Us

Policeman sings over Radio, making big hit.—News note.

The "copper" who protects us from those who "steal" and who has "iron" nerves and wears "brass" buttons on his uniform, sang with a voice of "gold," and even though there were "silver" threads in his hair, he proved to be of good "mettle" and was worth many "nickels" to hear.

News of the Week



Condensed

BY DIELECTRIC

Wouldn't it have been more interesting if, during International Test week, some American stations had remained on the air to make the feat of receiving Europe a little harder? We had such ease in picking up Brussels, Aberdeen, London, Paris, Berlin and Barcelona that a mere South American station barely interested! What great good fortune every Radio fan experienced this year with the total absence of "squeelers," so annoying heretofore. Personally, there will be no thrill in another such program for these reasons: the millenium is not so near but that the millions of "squeelers" would repeat their orgy; commercial code operators will still have their messages for lady friends on ship and shore, with no time like a silent period to get it across; Old Man Static is no respector of seasons; American jazz sounds as well here as abroad.

In November, 1924, I made mention in these columns of a feature broadcast from Station WJZ, in which Lieutenant Smythe of Toronto, Can., reviewed his experiences in a canoe traveling from Nova Scotia to New York. The other night we heard the rest of his story from Station WAHG, the Grebe station at Richmond Hill, N. Y. Such a tale of adventure must appeal to many listeners, particularly when depicting serious handicaps to canoeing across the English channel, and further, in his journey to Rome. These personal contacts with men and women of varied interests add greatly to the lure of listening in. It might be extended.

If reports of reception in Moscow of American music be true, then it is possible that a concert by the United States Marine band orchestra was heard by some of our distant fans. I wish it could be arranged to have this organization appear on the air at a time when most of the world could listen to them. Every American takes just pride in their work and would like other nationals to know their excellence.

From the broadcasting station of the Lutheran Theological seminary in St. Louis, Station KFUO, listeners had the opportunity of hearing addresses on an identic theme rendered in several languages. The novelty of that experience may not have been so great, but in any case, the import was of far greater significance. For Christian nations not only, but non-Christian (where they were in tune with this station), heard a great and vital subject presented so millions could understand. It was the real awe-inspiring moment of the entire week's broadcasting.

Maybe some of you have been checking up on me as to the number of references made here to the Formica orchestra, if so, add another. The program being mentioned conformed neither to strictly classical nor popular music. Instead it trod a middle-of-the-road course choosing the lighter numbers from the former and eschewing the vulgar in the latter.

When the midnight hour arrives it seems to be a signal for revelry, sponsored by studio directors and shared by Radio audiences. To what extent listeners indulge in a frolic while tuned to these programs only they can tell. Certainly everyone in the studio of WMC, Memphis, at the time of a recent midnight frolic was having a glorious good time singing lively songs and entering into the spirit of an orchestra swinging through one dance number after another. It was noticed that several of the singers had pleasing voices.

ABC Radio Fundamentals for Everybody

Chapter VII—Radio Frequency Amplification

By Milo Gurney

FOLLOWING last week's article, in which the operation or functioning of the grid element of the vacuum tube was explained, it should be borne in mind that, under fair conditions, which would include a reasonable proximity to a broadcasting station, additional tubes are not required, nor additions to the circuit shown needed, in order to receive very satisfactory reception through head telephones. If, however, one is interested in having reproduction from a loud speaker, it is then necessary that some form of audio frequency amplifying equipment be added to the receiver. Such an addition is to function only to increase the volume of the rectified current as delivered from the detector. In addition to the above, if one is desirous of extending the distance from which signals are desired, it is then obvious that a means must be employed which will boost the intensity of the signal as received by the antenna to a value of sufficient magnitude to actuate the detector, and such boosting must precede, rather than follow, the detector. In effect, then, we have only to decide whether it is the radio frequency or audio frequency values, or both, which we desire to amplify in order to increase either or both of the desired values.

Three Popular Methods

It will be assumed in this article that the readers are most interested, not only in the functioning of audio frequency additions to the detector circuit, but also as to the relative merits of the several systems now offered to the purchaser, who is becoming more critical, as well as better informed.

Two methods of audio frequency amplification appear dominant this season in the appeals for popularity, one known as transformer coupling, the other as resistance coupling, while a third, which is termed impedance or choke coil coupling, is also making good progress in its struggle for recognition.

Of the three systems, transformer coupled amplification is the more generally used at present, it having gotten off to a generous start, before the other methods, and securing the greatest amount of attention from manufacturers. The circuit used for two stages of such amplification is shown in figure 19 as coupled to the output of a detector. The transformers used comprise two windings, each insulated from the other, of very fine copper wire. One of these windings, as shown at P-1 and P-2 in figure 19 is termed the primary, and is connected with P-1 to the plate output of the detector tube, while the P-2 terminal of this winding is connected to the positive terminal of a B battery supply. The associated, or second winding of the transformer, as shown in figure 19 as G and minus F, is connected with the G terminal to the grid terminal of the next tube in line, while the minus F terminal is connected to the minus F terminal of this tube's socket. To this is also connected the minus terminal of the A or storage battery used to heat the filament. In actual practice, the primary winding is placed within the central opening of the secondary winding, and well insulated from it. The two windings are then placed upon one leg of a laminated metal core, which not only acts as a support for the coils but also functions toward increasing the transfer energy value of the transformer. The total transformer thus assembled is housed in a suitable case to protect the windings from injury, and to make it presentable for sale.

Function of Transformer

Without entering into a discussion, which would be uninteresting, regarding the electrical factors involved, the function of such a transformer is to accept the audio frequencies as passed to it by the detector tube, and transfer these frequencies, without change, to the secondary winding, which passes them on to the next tube in line for further amplification. In doing so, as there is no physical connection between the primary and secondary, the transfer is made inductively. The inductive transfer of energy follows a well-known law in electricity. If two windings or coils are placed in close proximity to each other, and certain electrical conditions maintained, which permit of the current flow being transferred in the right direction, then as one coil is traversed by a current passing through it, there will be induced in the coil associated with it a current identical with that passing through the first coil. Of further interest is the statement that the two coils are designed to step up the voltage or pressure with as high as a six, and sometimes ten, to one ratio.

The current is then passed into the next tube where, in place of acting as a detector, the tube is caused to act as an amplifier and raises the detected energy.

Two such stages are usually capable of delivering all the power which a standard loud speaker can handle, while it is also true that frequently two such stages bring to the last or output tube relatively more than the capacity of the tube. Transformer amplification has much to commend it, its chief asset being that but two additional tubes are required, most other systems requiring three in order to secure an equal volume. Opposed to its use is the fact that at the present state of the art, it has not been possible to so design these transformers that they will amplify with equal clarity and volume the total voice band which is broadcast. This results in a muffling or, at times, the total elimination of either the extreme low notes or the equally extreme high notes received in music. Intensive engineering research has, however, made a considerable advance in this respect, so that the market affords several transformers which are very acceptable.

Amplification Advancing

Resistance interstage coupling for the securing of audio frequency amplification has, during the past year, forged steadily ahead until it now easily holds second place with the Radio fraternity, as

(Continued on page 24)

Radiotone Loud Speaker

Now *Only* $19.95
Was $25.00

The BEST Radio Affords
$1.00 down!

Yes, Genuine Radiotone loud speaker—the same loud speaker that is selling everywhere for $25.00—now at a sweeping cut price, only $19.95 and on easy monthly payments, besides! Only $1.00 with the coupon below brings the Radiotone to your home on approval for 30 days! No radio is complete without a loud speaker—a *good* loud speaker. The whole family may "listen in" at the same time, leisurely—instead of taking turns at the headphones. Or if you have a loud speaker now that isn't satisfactory, that doesn't bring in stations loud and clear, this is your opportunity to get a first class loud speaker—yes, the best and we'll *prove* it on this offer—at an astounding rock-bottom reduced price, direct—and on easy, monthly payments besides!

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crouching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black fiorduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-9912 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker, I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total reduced price, $19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8728A—$19.95

(Continued from page 23)

much of the objections created through misunderstanding of its operative characteristics have been removed.

Resistance coupled audio amplification possesses as its dominant feature the ability to reproduce without distortion the voice or music as broadcast, which is, of itself, a result which all desire. The objection to its use has been that its amplification per stage is only that of the tube, and without any step-up ratio.

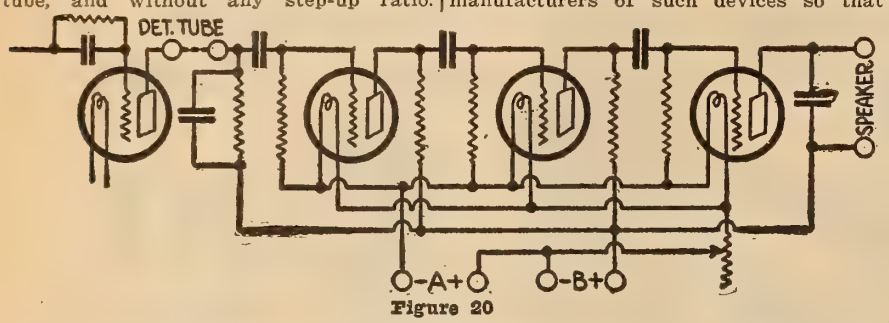

Figure 20

Therefore, in order to secure a volume equal to that of transformer coupling, it is necessary that three stages be used as against two in transformer work, or the use of an additional tube. As tubes are reaching lower price levels, the interest in this form of amplification has increased to the point where it is securing much deserved attention. Another objection which manufacturers of resistance coupling had to live down was the mistaken idea, of the Radio fan, that the B battery drain was excessive. It is true that it requires a higher B battery voltage in order to force the current through the resistances to the plates of the tubes, but that which was not understood, was that the current consumed per stage was less than in other forms.

In actual practice a resistance coupled amplifier consists of but fixed condensers as a means of transferring the fluctuating current from tube to tube, with a resistance of a predetermined value in both the plate to filament and grid to filament circuits, which act as controls to regulate the varying grid action. These values are somewhat critical for very best results but these have been worked out to practical form by the manufacturers of such devices so that success is assured the amateur constructor.

Of late, those manufacturers interested in furthering this type of amplification have sensed the need of supplying tubes whose value as amplifiers of audio frequency current is greater than that found in the ordinary tubes, with the result that one maker has gone so far as not only to market high amplification tubes for the first two resistance coupled stages but has also placed a power tube on the market for the third stage.

(The different types of batteries used in Radio work and how to care for them will be next week's topic.—Editor's Note.)

"VOICE OF PORTO RICO"

(Continued from page 7)

In general WKAQ is broadcasting at present, Tuesday, 9 to 10:30 p. m. from the studio; Wednesday, 8 to 9:30 p. m. band concerts from the Plaza Baldorioty de Castro, and Tuesday, 8:30 to 10 p. m. from Cafe "La Cafetera" (The Coffee Pot). All this schedule is Porto Rico time, which is one hour later than E. S. T.

Even in summer, WKAQ is carrying so far that test concerts in September, 1924, were heard in Spain three consecutive nights.

Porto Rico "The Island of Enchantment in the Caribbean Sea" is now an established part of the Radio world. It had already joined the mainland by amateur Radio through the remarkably efficient efforts of the local division of the ARRL and stations like 4OI, 4SA and 4JE.

And now, just as our sister island Cuba, has carried the music and the spoken word of Cuba into our world wide common property, the ether, so WKAQ "introduced" Porto Rico to the broadcast listeners of both hemispheres.

KMA ADVISES MILLIONS

(Continued from page 6)

daily with an earnest endeavor to "Keep Millions Advised."

Among those to be heard regularly are the following:

The How-do-you-do Singers, Grady Fort and Doc Bellamy, known as the "Applesauce Twins—Brother Jonathan and Ben Davis;" Auntie Blossom (Mrs. Fort) and Miss Lavone Hamilton who appear Mondays and Fridays.

The Mandolin Orchestra, one of the first of its kind on the air.

Franham Trio, classical music.

Nixon's Dance Orchestra — music for home or party dancing.

June Case and Le Ona Teget—domestic science talks.

George Van Houtte, lecturer on world travels and horticulture.

Bob and Babe Riddle, junior entertainers who sing and clog dance.

Mary Stuart Nichols, "Miss Polyanna" —Children's hour.

William Howie, 15-year-old boy organist of First Presbyterian church.

Mayflower Trio, popular music interspersed with talks on flower gardening.

These are the regular entertainers and of course there are many others who are called for features, extras and specials.

"While we do reach out to the millions," said Mr. May, "our special aim is to provide first for the needs of our nearest neighbors in Iowa and surrounding states. We are glad if our service can be made available beyond the ocean and the national borders. We want everyone to keep posted on ideas that are new along the lines in which our people are especially interested. We want to live up to that slogan and "Keep Millions Advised."

Mr. May has an infectious way of bringing out good humor in those with whom he comes in contact in a personal way and also by his voice over the air. He is ably assisted by his wife, who is a graduate of the University of Nebraska and of the National Park Seminary of Maryland. She has specialized as a vocalist and sings for the KMA audiences, often in duet with Mrs. Henry Read. Mrs. May also helps to answer the many thousands of letters that come from Radio fans.

KMA broadcasts on a 252-meter wave length and is on the air daily except Sunday from 11:30 a. m. to 12:30 p. m.; 6 to 7 p. m. and 9 to 11 p. m.

WJAG BIRTHDAY PARTY

(Continued from page 5)

extended into other fields. Out in the sand hills the little farm house, cut off from contact with the world by far reaching roads, had its aerial and "home-made" receiving set. To the dwellers of this home, WJAG carried news of the produce markets, road conditions, affairs of the state and nation. It eliminated distance and brought scattered householders into a neighborly community.

Mr. Stefan inaugurated a telegraph school for amateur senders. Classes were organized in three states through the Norfolk station. By going down to the lower wave length, below the broadcast band, students were taught the codes. Many of these students have "graduated" and now have transmission sets of their own. Others have developed into licensed operators employed at stations scattered over the country.

Many listeners identify WJAG by the "Printer's Devil," a character introduced during the broadcast of a World's Series. Membership cards to the WJAG family bear a red imprint of his Majesty.

When you tune in on Mr. and Mrs. Salter's party you will know more about this mysterious personage. And you will find the family assembled on the 270 meter wave length, 12:15 p. m., February 20. Other characters to be met will be Old King Corn, Fricasee Chicken, Jack Spratt and wife and the "official constable."

Light to see— power to hear

When you buy a Prest-O-Lite Storage "A" or "B" Battery for your set, you are not only saving money because they cost less, but you are buying radio batteries that are made by a company with over twenty years of manufacturing experience.

Prest-O-Lite Batteries were especially designed for radio in the world's largest electro-chemical laboratories. They deliver their rated Ampere hour capacities at full power, thus lengthening the time between recharging and assuring good reception.

Ask for Prest-O-Lite Radio Batteries. They may be purchased from $4.75 up. It is no longer necessary to take a chance with batteries of unknown make. You will find Prest-O-Lite dealers within earshot of your own loud speaker.

STORAGE BATTERIES FOR MOTOR-CARS AND RADIO

How to Stop Blooping and Man-Made Static

Part II—How and Why Circuits Bloop

By the Technical Staff

THE PROBLEM of eliminating the squealing blooper set that interferes so much with other listeners for many miles around, took on a national aspect at the November Radio conference in Washington. Representation at the conference was composed of all prominent groups identified with the Radio industry, including manufacturers, broadcasters and listeners as well as engineers and mechanicians, which gives the weight of national authority and desire to the resolution unanimously adopted at the conference to the effect that "the manufacture and sale of all radiating receivers for broadcast reception should be discontinued at some definite and reasonable future date . . . . in view of the fact that radiating receivers are potential sources of interference. If the manufacture and sale of such receivers be not discontinued within a reasonable period . . . . legislation to that end shall be sought . . . . because of the benefits which will accrue to the Radio public from the suppression of radiating receivers."

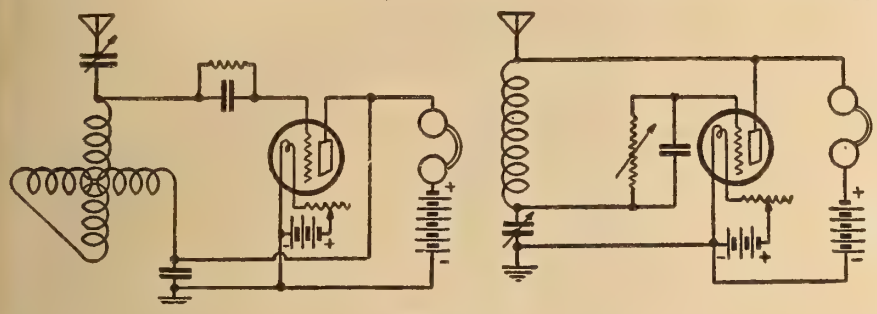

Figure 1

A bill "for the regulation of Radio communications and for other purposes" (H. R. 5589), is now pending in congress, the passage of which will have an effect on the future manufacture, sale and operation of radiating receivers. The bill, which was introduced in the national house of representatives on December 15, 1925, by Representative Wallace White of Maine, chairman of marine and fisheries, provides that: "There is hereby established a national Radio commission consisting of nine members who shall be appointed by the president (of the United States)" and that, "no person, firm, company or corporation shall use or operate any apparatus for the **transmission of Radio energy** or Radio communication or signals . . . . within any state when the effects of such use extend beyond the borders of said state, or **when interference is caused** by such use or operation, with the transmission of such energy, communications or signals **from within the state to any place beyond its borders** or from any place beyond its borders **to any place within the state** or with the transmission **or reception** of such energy, communications or signals **from or to** places beyond the borders of said state."

A fine of "not more than $500 for each and every such offense" is provided for violation of certain sections of the bill, and additional provision is made for "a fine of not more than $5,000 and imprisonment for a term of not more than five years for each and every offense," in cases of more flagrant violations of various provisions of the bill not covered in the previously mentioned penalties.

While radiated interference from blooper sets is serious and widespread, it is beyond the ability of the "interference committee" of any local broadcast listeners' association to remedy or minimize it without the hearty cooperation of all broadcast listeners in the city who own and operate these devices. All that the officers, committees and members of such associations can do in such cases is to try to cooperate in all ways with the owners of radiating receivers, in their improvement and operation, so as to lessen and eliminate this troublesome and unpleasant form of interference. Associations of broadcast listeners have no quarrel with the operator of the radiating set, but desire his membership so that he can profit to the benefit of other listeners, through friendly instruction and cooperation in learning how to properly operate and improve both his receiver and his reception.

Any progress in this direction will, however, depend upon the mental attitude of the listener himself, pending the eventual adoption of federal regulations or enactments that will compel the inconsiderate operator of a squealing blooper to give heed to the rights and pleasures of other listeners over a wide area. Mr. Herbert Hoover's fourth annual Radio conference, held in Washington on November 9, last year, adopted reports and resolutions in this language: "A large portion of all the interference reported in the various Radio districts has been due to radiating receivers, in the past," and further that "it is believed the dissemination of information upon this matter is of the greatest public importance, and that the attention of the press and of the periodicals of the country relating to Radio, should be especially called to it. One of the most effective means of eliminating such interference is to give publicity to methods of operating receivers in such a manner that they will not radiate." This last line might better have been altered to read "that radiation will be reduced to so small a value that interference can be caused only within a hundred feet or so of the receiver." It would be hard to imagine, at this stage of the art, a tube receiver that would not cause at least a little interaction with another in the same city block.

Let's Study Circuits

This being the case, and Mr. Hoover's committee of the opinion that the Radio press might help, let's see what we can do. First of all, consider the pledge card which appears each week in Radio Digest. This week the blank appears on page 3. Fill it out, realizing just what it means, and send it in. True, there is no penalty if you do not live up to the pledge, but at least you have given your word to this publication and the rest of the Radio listeners, that you will try to decrease or eliminate your own blooping. That being settled, we can go into a brief study of circuits as to why and how they bloop—merrily and devilishly.

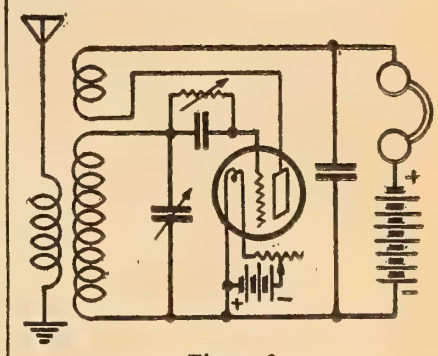

Figure 2

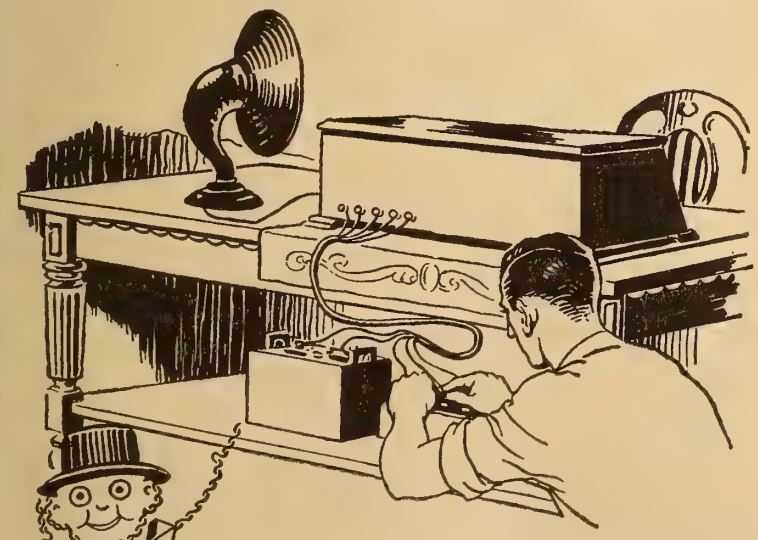
In figure 1 we have the two worst offenders, the two most popular single circuit regenerative receivers. In both cases, there is an antenna circuit to be tuned to the wave length of the station, and an oscillatory circuit also tunable to the station. No more perfect transmitters could hardly be devised. The coupling of the oscillating circuits is as tight to the antenna circuit as it could be. The

(Continued on page 26)



Easy to trace circuits with a Belden Battery Cord

A BELDEN Radio Battery Cord has five flexible rubber-covered cotton-insulated conductors, each identified by a separate color marking. There is no danger of short-circuits between A and B-batteries that are so costly in tubes.

Another thing! The Belden Radio Battery Cord takes the place of the messy tangle of wires usually found between a radio set and the batteries. It makes a neat, compact installation that greatly improves the appearance of any set.

One burned out tube will pay for many Belden Radio Battery Cords. Why not get your cord, now?

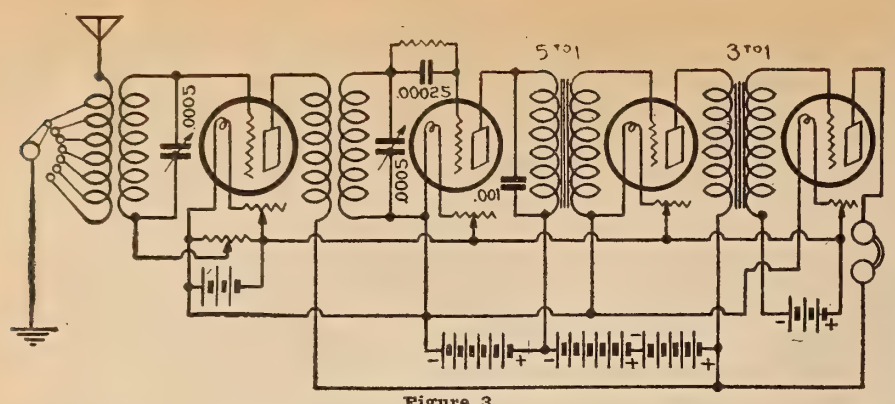

Figure 3

HELP STOP BLOOPING

(Continued from page 25)

antenna circuit gets every atom of energy possible when the tube approaches or goes into oscillation. Worst of all, the control of regeneration is poor, and practically every time tuning is tried, the built up regeneration spills over into a state of out and out oscillation. When the last of these sets has gone to the "land of demolished receivers" a tremendous lot of blooping will be noticeably missing. Don't try to operate this type; you cannot get selectivity yourself and you make reception miserable for hundreds of others.

Correcting the Single Circuit

Now comes the correction for these types. If your means are limited, at least revamp your apparatus into the circuit of figure 2, which is still a potential blooper, but far less so than the first two shown. There are any number of good three circuit tuners on the market. Davenport Laboratories at Davenport, Iowa, make a good one. The Ambassador Sales company of New York have compact low loss types. The Uncle Sam baby tuner will go into just about the space your coil must have occupied in the other type. Your .0005 mfd. 23-plate condensers go into such a circuit perfectly.

If you are a little better fixed financially, it would be even better to add a stage of balanced radio frequency ahead of your present equipment. This will not only decrease or eliminate your radiating offenses but will materially increase your reception range. Complete instructions for building such a stage will be presented later in this series, in fact two or three types will be described. You can purchase one all made up under the name of Penetrola. On the other hand, if you have a set with the circuit of figure 2, and wish to both cut your blooping and increase your range, you can build one of these non-radiation stages to be described, or purchase one built along the lines of that mentioned. You would have a corking good receiver if a stage of balanced tuned radio frequency were added to the circuit of figure 2. It would be just about the equivalent of a Browning-Drake, Samson, Roberts, or Skeeters.

In figure 3 is shown a stage of unneutralized radio frequency which, for purposes of discussion, may be considered as any of the five tube outfits on the market in which oscillation is controlled by varying the R.F. filament brilliancy, varying the grid bias (as shown) or varying the plate potential with a 200,000-ohm resistor. All three of these factors enter into a condition of oscillation. Let us say you have the single stage of R.F. adjusted to maximum regeneration, just below oscillation, or two stages for that matter. If the grid is made slightly more negative with the potentiometer, if the rheostat is turned to increase filament brilliancy, or, if the plate potential (voltage) is raised by cutting out a little resistance, the tube "spills over." Now we're all human; if we have a distant station very faintly, we want to try to get "just a little more" out of the set. And "bang" the old DX-getter spills over, and several hundred others, set to enjoy that program, hear an awful howl. A properly neutralized "neut," a well-built "RFL" set, or any of the correctly de-

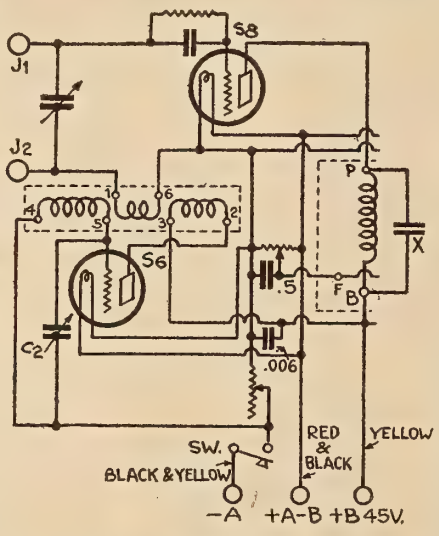

Figure 4

signed "bridges" such as Isofarad, will not quite go over, but few have such outfits.

The Tuned R.F. Remedy

Something has to be done to make it impossible to try to get "just that little bit more" and yet have efficiency. Now presumably you have from $100 to $250 tied up in that set of yours and you're not going to sell it at a loss just because you send out "a little squeal now and then." It will make another dial but you really should, in fairness to all concerned, put one of these "radiation preventers" in front of your set. Then if you want to

Photogravures of Your Favorite Artists

GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS **Only 10c Each -- 3 for 25c** To cover cost of mailing and postage

Two-Tube Short Wave 15-130 Meter Receiver

Part II—Drilling and Assembly

By John G. Ryan

WHILE THE following point to be discussed will not present you with any problem, the writer is quite sure that most of the readers of this series will be interested in some of the factors that led to the placing of the parts as they have been finally arranged. When the set designer goes below the 200-meter point on the wave length range he runs into what might be called absorption. Parts must be so placed that there is the minimum possible metal of any nature in the fields of the coils and near the variable condensers. This practice is also true in designing broadcast receivers but in this latter work it is to prevent broadening of the tuning while in connection with short wave sets it is to avoid dead spots. If an error is made it will be noticed in tuning that there will be several places in the possible range where regeneration and oscillation cannot be secured.

For example, you might be using the intermediate coil and the grid variable condenser approaches 40 on the dial. The

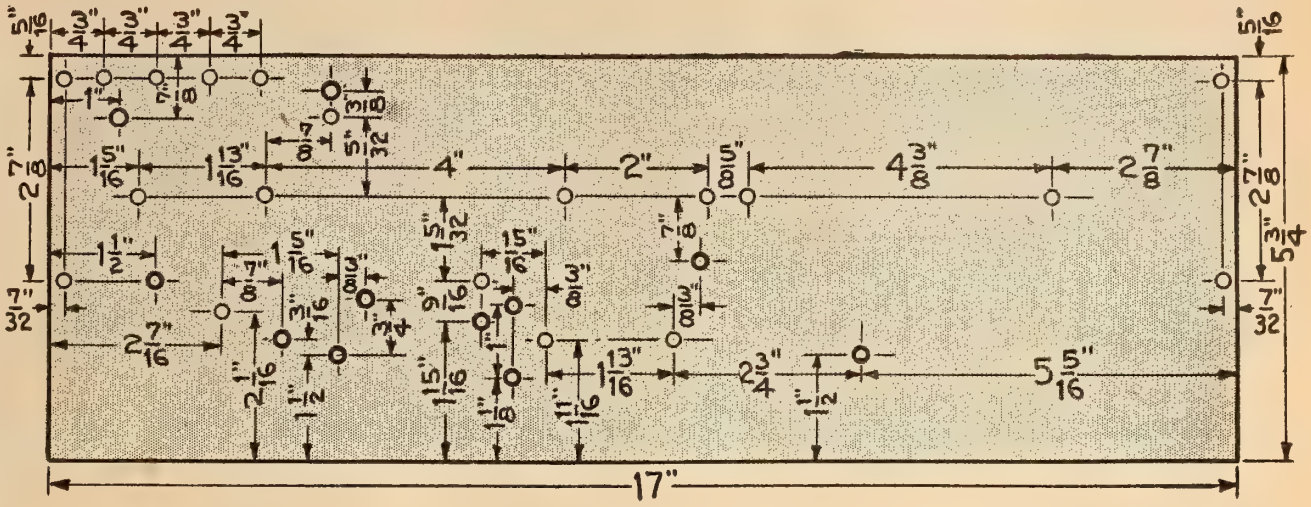

Figure 4

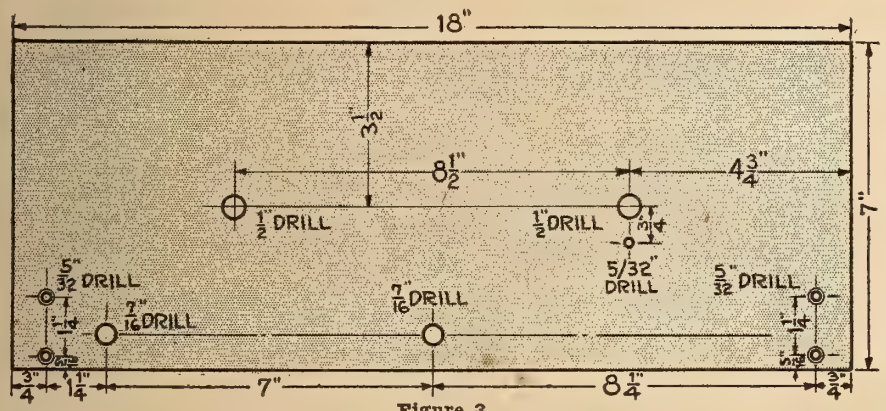

Figure 3

plate variable condenser is being kept in synchronism for maximum regeneration. Suddenly you find that no amount of adjusting will give sensitivity. As you continue up the scale, you find that at

Considering now figure 6, which is the photograph of the top view, you will note that we have been very careful to keep the inductances well back from the variable condenser and the audio transformer,

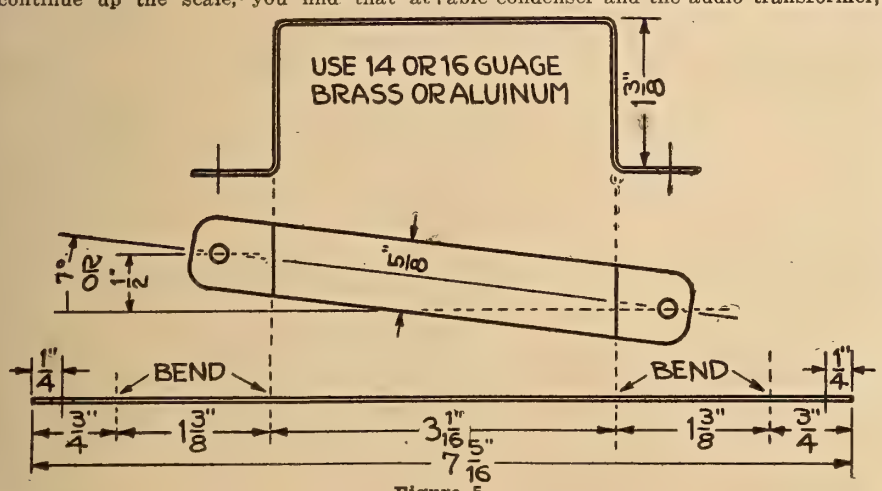

Figure 5

55 and on up to 100, perfect control is possible. Those wave lengths falling between 40 and 55 could not be received over any great distance. There may be as many as three or four such dead bands if care is not used.

with its large masses of iron, well to the left. It might possibly be another inch back from the left variable condenser but as this is the feedback condenser and not the grid circuit capacity, no difficulty has been noticed. No metal other than that in the unit itself is near the right-hand condenser (.00014 mfd. maximum) and none is near the coils. The primary has all the needed room to permit swinging it clear out at right angles. Such loosening of the coupling is necessary in many cases to clear up dead spots due to peculiarities of the antenna installation. With close coupling, the antenna and ground circuit may absorb negative resistance as fed back from the plate circuit preventing regeneration and long range at certain points on the condenser scale.

With these points in mind, we come to the actual assembly of the various parts. Figure 3, presented with this article, shows the drilling of the front panel, while figure 4 shows the drilling of the sub base. In connection with figure 4 it should be called to your attention that holes outlined with a light circle are apparatus mounting holes to be drilled 9/64" or 5/32" while those holes outlined with a heavy circle are to pass the wiring and may be drilled much smaller or to just pass bus bar. At this point I note an omission in connection with the list of parts which should have included a Carter number 103 jack with a list price of 90 cents. This is my error, though I checked that list several times.

The two large holes midway the height of the panel and 8½ inches apart are for the Karas condensers using the single hole mounting feature. As these condensers are now shipped they include a small special wrench for tightening the nut on this mounting which makes this very easy. The condensers are turned so that the short side of the end plates is horizontal with the longer side slanting up to the left. Bradleystat goes in the lower hole in the center and is mounted horizontally, the terminals being up. While drilling the holes in this front panel put a 5/32" hole just ¾" below the left condenser shaft hole. Each Mar-co

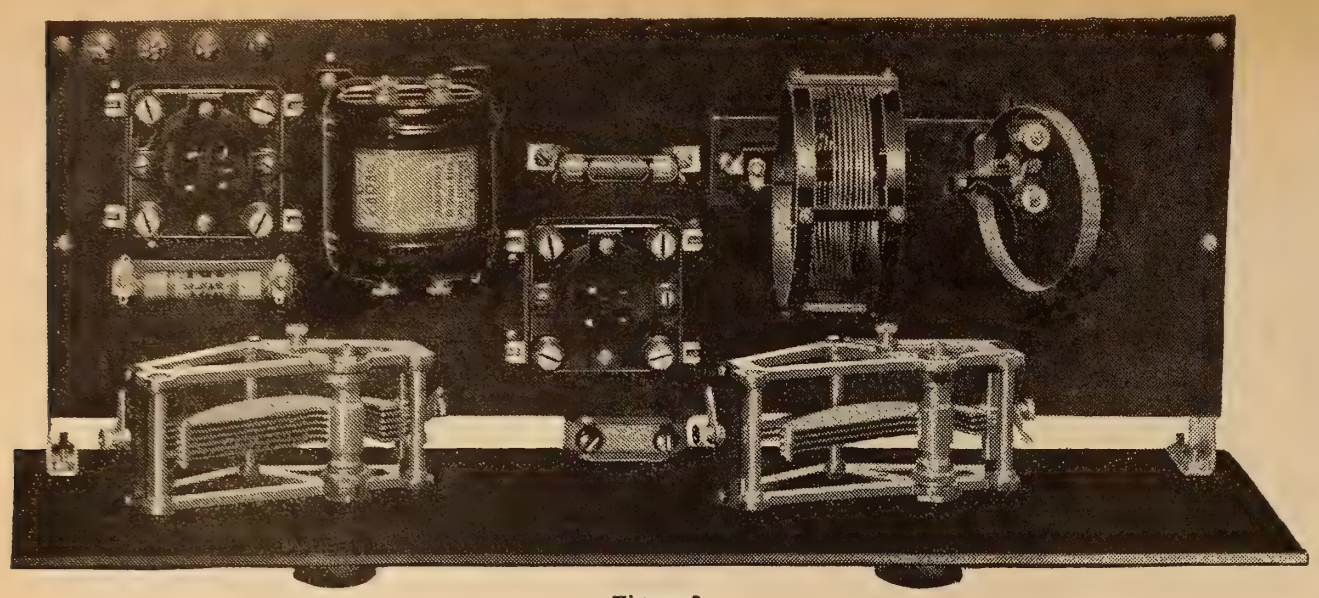

Figure 6

SHORT WAVE RECEIVER

(Continued from page 27)

dial requires an anchor hole. Use care in countersinking the holes for the bracket screws for, if they are overdone, there will be an undesirable little ring showing around the screw head.

Sub Base Layout

Going now to figure 4 on the sub base, the two holes at the left edge are for the Benjamin brackets. At the rear edge, the next four holes are for the Eby binding posts. Going forward a little there is a line of holes clear across sub base. The two at the left, 1 13/16 inch apart are for the Eby socket used as the audio amplifier. We are speaking now only of apparatus mounting holes. The two 4 inches over and 2 inches apart are for the clips of the Daven Leakandenser. The last two to right and 4⅜ inches apart take the Aero coil mounting. At the extreme right edge are two, placed fore and aft for the second bracket.

Down in front and centered are two holes 1 11/16 inches from front and 1 13/16 inches apart for the Eby socket taking the tube used as detector. With these holes all located, no trouble should be had in spotting the three remaining, two of which are for the Karas transformer and one for the Amperite mounting. In connection with the transformer, if P and G are placed to the right, the rear left and front right mounting holes are utilized. When securing the sockets in place, put the P and G terminals to the right in both cases.

Part of the detector grid circuit can be completed when assembling the coil mounting and the Leakandenser. It will be noted that the G terminal of the coil mount is right next to the left end mounting screw. The writer loosened the G plug-in receptacle so that the soldering lug beneath it could be turned to go under the screw holding the left end of the mount to the sub base. On the underside of sub base, a long soldering lug is fastened under the nut holding right end of Leakandenser and turned so its free end goes under the nut on the left end mounting screw of coil mounting. Thus the circuit is completed from the G terminal of coil mount, through the mounting screw, across to right end of Leakandenser, through it to left end. Later it will only be necessary to connect left end of this unit to the G terminal of detector socket.

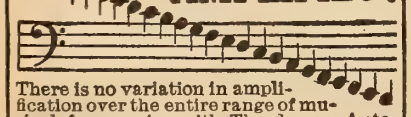
The use of the brass strip shown as figure 5 may not be clear at this stage of the assembly. After the wiring is put in with exception of C battery, an Eveready C battery of the 4½-volt type is secured to the underside of two of the mounting screws which hold apparatus. The strip shown will, if bent correctly, hold the C battery in correct position and underneath the sub base out of the way.

Why Input Is at Right

This short wave set has been designed with the input to the right and output to the left for two reasons. The broadcast listener will use it in conjunction with his 200 to 550-meter set in which the input is at the left and output at the right. The short wave set can be placed to the left and the antenna and ground leads can be brought to a switch-over arrangement placed between the two sets.

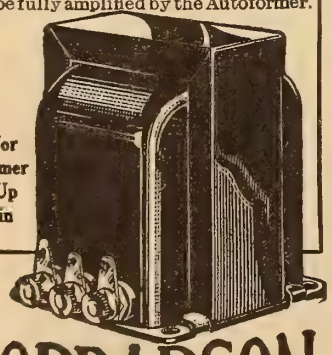
(Continued on page 29)

BASE NOTES FULLY AMPLIFIED!



There is no variation in amplification over the entire range of musical frequencies with Thordarson Autoformers. No note is too low—no note is too high to be fully amplified by the Autoformer.

Write for Autoformer Hook-Up Bulletin



THORDARSON Autoformer

Trade-Mark Registered

All Frequency Amplifier

An Entirely New Instrument—Not "just another transformer"

As the world's oldest and largest exclusive makers of transformers, we have led for years in broadening their amplifying range. In the Autoformer we have finally developed an all-frequency amplifier—a *new* instrument capable of *fully* amplifying *all* notes audible to the human ear. Thus the deepest notes of the grand organ, bass viol, tuba, English horn, etc., at last are brought out as *clearly* as the highest treble. Improved long distance reception and better volume control are further advantages.

Write for Autoformer Bulletin

Autoformer amplification is for those who seek the finest reproduction of programs to be had. May be used with any set in place of regular audio transformer hook-up. Full directions, with diagrams, supplied with each instrument. Autoformers are $5 each.

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

FREE With One Year's Subscription to Radio Digest

THE greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. "How to Operate" gives detailed information on the operation of all the well-known sets. The section of general information contains a complete Radio map and schedule and a section of workshop kinks which save time and money. Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

Read what one of our readers has to say.

"This is also to say that I received your treatise on radio (Radio Receivers) and I consider it one of the most remarkable and most valuable books on radio that I have ever seen. You are to be congratulated on this work."

CITY..... STATE.....

The Reader's View

You Are Right

I have been interested to read of the federal suit against WJAZ for pirating wave lengths. Believe me, they are not the only ones by any means. WSMB does this regularly to get away from KOA, and I can't say I blame them. KSL, Salt Lake City, (299) has been working about one degree above WLIB (302) for some time. Evidently they couldn't get in between KPRC (296) and WLIB. Quite evidently it is impossible for powerful stations to operate independently on a three meter split or less.

Why do you not come out and admit this editorially. Theoretically, it may sound all right, but actually, I guess no one is better aware of the fallacy than yourself.—R. K. Valley Ranch, N. M.

Disagrees with L. F. W.

I note in your issue of January 2, where L. F. W. of Conway Springs, Kans., is thoroughly "fed up" on the average broadcast program. I wish to make a few comments.

If the type of music he wants was broadcast exclusively, about 75 per cent of the receivers would be abandoned. Furthermore, if he has a receiver that is at all worth while, he can get enough jazz and junk to suit him, without being compelled to listen to programs that are not intended for him at all. There are plenty of stations that feature old-time and popular music.

His last paragraph explains his complete knowledge of music. Eliminating songs with titles in foreign languages would bar most of the worth-while music. He probably has just found out that the majority of favorite operas are in some language not his.—C. R. W., Crenshaw, Miss.

No Innocent Broadcaster

Do you know the color of persuasion that might be used to get some innocent broadcaster to send us a number of something not played by a band or an orchestra?—E. E., Mount Sterling, Ky.

Well, C. E. J., What Kind Is It?

In your column headed "The Reader's View" I noticed that C. E. J. of Boston, Mass., picks up 10-watt stations over a distance of 1,300 miles. I would like to know the type of receiver C. E. J. uses, as I have a very sensative set that does not give such reception. I would like to improve my reception by a tip from C. E. J.— J. M. H., Lake Charles, La.

Moon Should Be Considered

With the international tests completed, may I offer a suggestion in the hope for better results next year? I was successful in hearing only 6KW, Cuba; PWX, Cuba, and CZE, Mexico, the latter being the only station I had not logged before. All these stations came in with clear and distinct volume.

I lay my failure to get more stations to the fact that it was full moon, and herein lies the hint of my suggestion. Why not consider the phase of the moon when fixing the time for the tests? The first two weeks of January were better by far than the last two weeks for distance reception—G. E. M., Pittsburgh, Pa.

Should Answer Letters

As the fans always notice, an announcer will ask listeners to send cards or letters thanking the artists. Now don't you think that after you take your good time to write and thank them for the program or to verify some program, that the least they could do would be to acknowledge

(Continued on page 30)

TOMSK, SIBERIA, FAN WANTS YOUR LETTER

FROM Tomsk, Siberia, to the offices of Radio Digest is quite a span of miles, but Radio has made this distance shorter for at least one Russian there. Alexander Kalachnikoff reads Radio Digest and listens to American stations, both amateur and broadcasting. But he wants to get better acquainted with Americans. Then, too, he has a sister, Vera, eighteen years of ago, who would like to write to American sisters.

Coming as it did from this far-off country, Siberia, where the resources have but been scratched, where a great civilized nation of thousands of millions of people may sometime exist, "Al's" letter quite naturally aroused much interest.

You may read it too. The letter has been but slightly corrected. Note how well he writes English.

"English Speaking Radio Amateurs"

"I am a Russian amateur, who wants to have a friendly correspondence with you. I will be glad if you will send me American literature, books as well as magazines, for which I with pleasure will send you, if you want, Russian postage stamps and paper money issued during the Russian revolution, and also Russian magazines, views etc.

"As to me it is very difficult to pay postage, I beg you to enclose in letters some International postage reply coupons.

"Don't delay to write me! I am waiting! My name and address:

Al. Kalachnikoff,
Tomsk, Siberia, Russia,
Soldatska Street, 66.

"P. S. I have a sister Vera, eighteen years old, who will be glad to correspond with American girls. If you have a sister, let her write a letter to my sister."

He's Just a Lonely Radio Fan

So ends the letter from "Al." He's just a Russian Radio fan, thousands of miles away, and living in a lonely country. He gives no hint of his age, except of course, we may hazard a guess that he is a few years older than his sister, Vera.

The editor says he is going to write to Al, and hopes other people will also correspond. One thing not to forget, however, in mailing a letter to Russia is that the postage required is five cents. International reply coupons may be secured at the post office.

Fans, Here's Something to Puzzle Over—Your Guess Is as Good as Ours

Radio Digest:

Solve this if you can. The man that operates a grain elevator in Meckling, S. Dak., a town nine miles west of here, has a Radio which he uses to get the stock returns and market reports. Another man, Lee Steele, who owns a ranch three miles this side of Meckling, has a large gasoline engine which he uses to shell corn for his cattle.

When Lee Steele, the rancher, has his engine running, the elevator owner can tune in on his Radio and hear the engine and Lee Steele's voice, or any other person's voice who happens to be close to the engine. I did not hear it but other people have when listening in at the elevator. I suggest that Steele be given some call letters.—Maurice Kirby, Vermillion, S. Dak.

AID FARMERS BY RADIO

(Continued from page 4)

If this "National Agricultural College of the Air," assuming the term is permissible, rides upon the crest of popularity (literal and figurative) in keeping with its high purpose and mission of service, it may eventually become a daily instead of a weekly feature. Then a farmer in the vicinity of Waupaca could send a telegram to Washington, telling about symptoms of cholera among his hogs or tuberculosis among his herd of dairy cows and receive helpful information by Radio the following day. This and thousands of other similar illustrations suggest the necessity and the opportunity of Radio in affording timely information to the tillers of the soil.

As an outgrowth of the germ "Fifty Farm Flashes," there will be many offshoots to this big idea of linking the laboratories of the great United States Department of Agriculture to the firesides of farm homes. The fertile brain of the Chief of Radio Service is ebullient with ideas that will both speed up and popularize the unlimited agricultural information on tap in Washington. Already, Mr. Pickard has created the character of "Uncle Bert, the Garden Expert," who like Uncle Josh and similar personages that savor of the soil, is destined to national fame. Uncle Bert would serve as the foster father of thousands of boys and girls who would enlist under the banner "Radio Order of Junior Gardeners." And this, too, is a far-reaching implication because either unintentionally or through neglect the juniors or boys and girls in their teens are not now recognized in the programs of broadcasting stations.

The kiddies, of course, are served their bedtime stories, but the boy who is just putting on his first galluses is not the beneficiary of a special Radio program. Mr. Pickard, with a keen insight into human nature and the quickness to recognize an opportunity, is to supply that deficit or missing link in the field of broadcasting.

The fertile ideas of Mr. Pickard, although his plans are now of a tentative nature, are not those of a theorist. From a wealth of practical experience, as director of KSAC, broadcasting station of the Kansas State Agricultural college, he was drafted by Secretary of Agriculture William A. Jardine, where (in Washington) his intensive and sound ideas will have room for expansion beyond a state boundary to that of a national scope. In other words, a state "College of the Air," with 5,000 farmers as regular students, becomes a "National Agricultural College of the Air," with unnumbered millions of farmers as potential students. Such is the important role to be played by Sam Pickard, and with keen enthusiasm, ripe experience and special training, he will fully measure up to the large duties thus imposed.

SHORT WAVE RECEIVER

(Continued from page 28)

The battery leads can also be brought to this switching arrangement if desired. In the case of the transmitting amateur, he usually has his transmitter, either phone or CW, to the right with the switch-over and key in the center and receiver at the left. Thus this set will fit into his arrangements with short antenna and ground leads.

(The wiring of short wave receiver will be taken up in the third installment to be presented next week.—Editor's Note.)

The vacuum-type lightning arrestor is generally considered the best. Before installing the arrestor the underwriters' rules for the locality in question should be consulted.

FREE!

To Each Purchaser of a WORLD 6V. Auto or Radio BATTERY

12-Cell—24-Volt Storage 'B' Battery

Positively given free with each purchase of a WORLD "A" Storage Battery. You must send this ad with your order. WORLD Batteries are famous for their guaranteed quality and service. Backed by years of successful manufacture and thousands of satisfied users.

Equipped with *Solid Rubber Case*, an insurance against acid and leakage. You save 50 per cent and get a

2-Year Guarantee Bond in Writing WORLD Battery owners "tell their friends." That's our best proof of performance. Send your order in today.

The Reader's View

(Continued from page 29)

your message, even if it be only a card?

And now, the widely discussed "Who shall pay for broadcasting?" I think that it ought be put up to each city council and at election time have the city vote upon it that the city or county assess all owner of Radios and compel them to pay even one-half mill (.05c) on each hundred dollars tied up in Radio in their home.

Regarding popular and classical music, I, myself, would rather hear a good orchestra play a few jazz numbers than to hear an "old hen" soprano sing "Love's Dawning."—C. A., Columbus, Ohio.

HELP STOP BLOOPING

(Continued from page 26)

bring up the regeneration on DX, and frequently spill over, you can do so without upsetting the whole community. You have the three dials on the set logged for about everything within range anyway, so they can all be found readily on the new dial. Remember, if you do it, and you "sell" two or three other men at the office on the idea, and each of them gets his neighbors to do it, pretty soon your community will be "one sweet place" for Radio reception.

In figure 4 we have a typical input circut for a super-heterodyne. This is not the worst offender, but it causes plenty of trouble. In this case we use an untapped loop with one side going to the grid of the mixer tube (first detector) and the other to its filament. The pick-up coil from the oscillator is connected in that lead going to the filament and therein lies the trouble. The loop will radiate merrily, causing trouble throughout a whole city block. If, instead of a loop, you use an antenna coupler, with tight coupling between antenna circuit and secondary, said secondary being connected to J1 and J2, the grief you cause over a wide area is terrific. One remedy is to cut down the voltage applied to the oscillator so that the oscillations are of low amplitude or strength; very little is required to mix properly and most supers would "perk" a lot better for their owners if only 22 to 30 volts were on that oscillator plate.

Super-Het Suggestions

Another suggestion is the use of one of the radiation preventing stages of balanced tuned R.F. but it will have to be slightly altered from the usual arrangement for use on a super-het. As sold, Penetrola and the rest of them have an output arrangement to be coupled onto a tuner but the super has only a variable condenser and the tuner part must be incorporated into the output of the added stage. The supers mentioned in the first few paragraphs of last week's article each had one, and such a stage will be described later. It will help a great deal to shield your super well—all over—and while you're doing it shield the oscillator from the rest of the set for your own good. The oscillator coils can radiate very well themselves, in all directions, which not only bothers others but gets into parts of your set where you do not want it. The overall shielding will prevent radiation from your intermediate stages when you bring them up to oscillation. True they are long wave oscillations but what a lot of lower wave harmonics they have—anywhere from two to ten and from 100 meters up.

The worst super from the standpoint of radiation is the type with the center tapped loop and the midget condenser going to the plate of the mixer tube. How they can go! The loop circuit is brought up to maximum sensitivity and then the operator (?) starts to bring up the intermediates with the potentiometer. Closer and closer, more and more distortion, then over it goes—taking the mixer or first detector with it. Mixer oscillating, oscillator oscillating, intermediates going full blast, possibly also the second detector. Feature the ethereal racket if that combination is on an aerial instead of a loop. Lots of them are. The secondary of the antenna coupler is center tapped, just as though it were a loop, with a primary of from 6 to 12 turns. If by chance the antenna circuit is tuned with a honeycomb load coil and variable condenser the very maximum in blooping is achieved.

If you must couple to an antenna, first of all take off the center-tap feature, for the sake of humanity; second, move the antenna coil at least an inch from the secondary, and third, take off some turns of the primary coil. This last move will make the step-down ratio greater for oscillations going out and cut down their radiating ability. You'll still have one mighty good super, it will be a lot sharper and, frankly, you'll get a lot purer reproduction. Incidentally, while doing this, completely shield the antenna coupler and its secondary tuning condenser and see how much less local interference you have—also less harmonics from anything within a hundred miles.

(Next week we'll get into the operation of present-day sets for better results with less blooping. Charting dials, and the relationship between regeneration controls and tuning dials, will be among the points considered. Stick with this series as later we'll get into other forms of interference that may bother you—Editor's Note.)

TELEGRAPHY

Telegraphy—Both Morse and Wireless taught thoroughly. Big salaries. Wonderful opportunities. Expenses low; chance to earn part. School established fifty years. Catalog free. Dodge's Institute, Sixth St., Valparaiso, Ind.

Radiophone Broadcasting Stations

Corrected Every Week—Part III

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

NOTE.—The third part of the schedule list appears below. The fourth part which consists of the remainder of the list will appear next week.

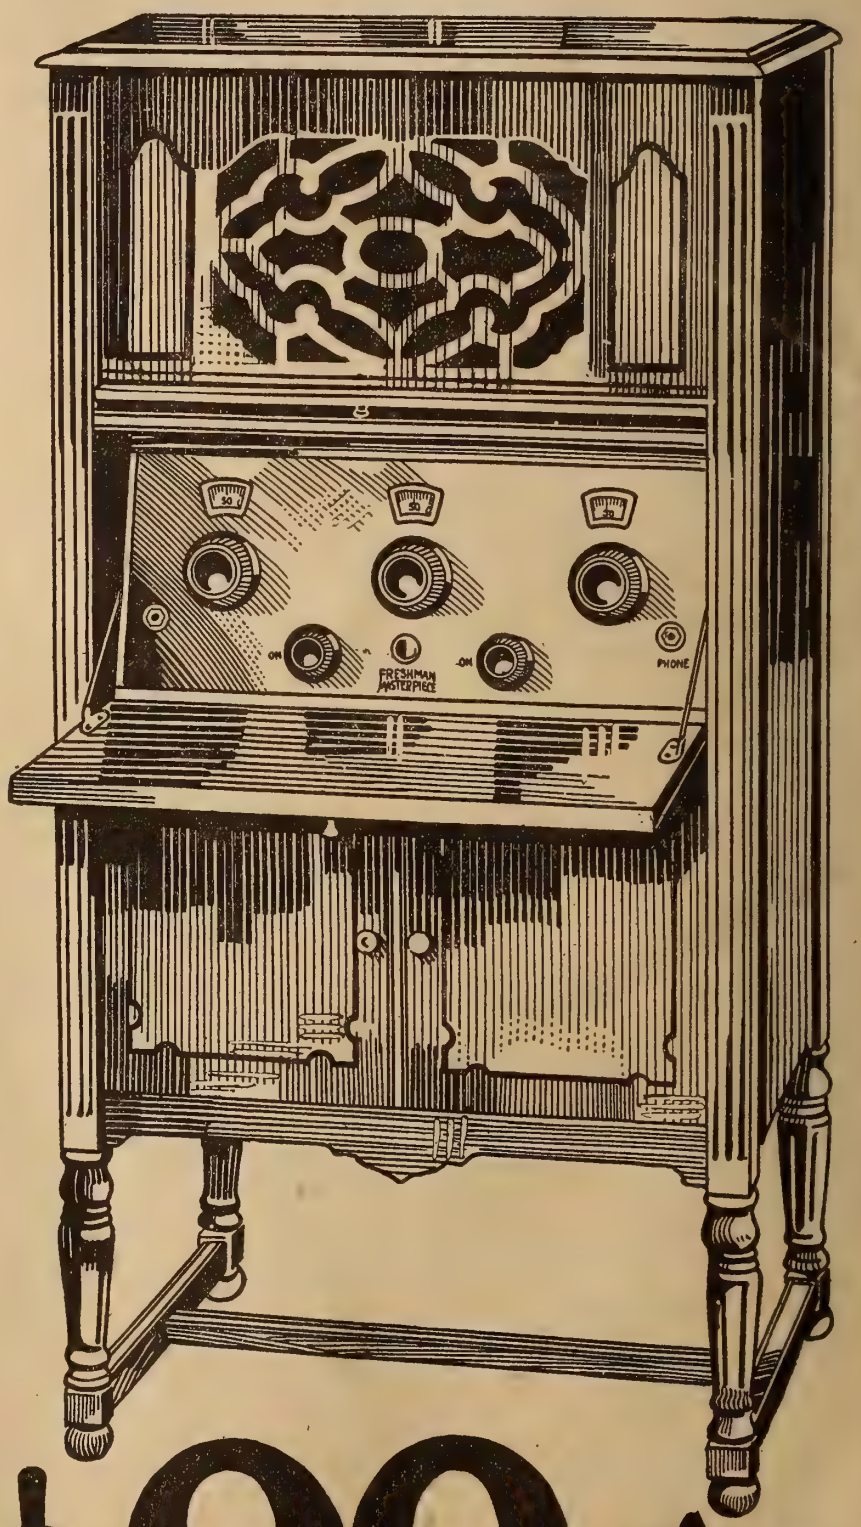
(Note—The fourth part of the directory will appear next week.)

FRESHMAN *Announces* Another Sensation!

MODEL 6-F-1

New and Improved FRESHMAN MASTERPIECE

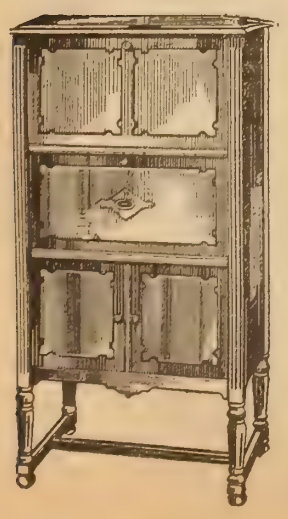


The World's Greatest Radio Receiving Set

Freshman's latest sensation, illustrated here, has a real appeal to the women of the home. It is built of five-ply genuine mahogany; a handsome piece of furniture that fits in any corner of any sized room. It is compact and comparatively small, giving it preference over clumsy consoles. Contains an especially large tone chamber,

With Built-in Loud Speaker of Great Volume and Superb Tone

When not used as a radio, this console can be entirely closed. The top is stationary and provides an attractive resting place for vases and other ornaments. Spacious compartments afford ample room for all batteries, etc.—not a single wire being visible.



The Radio Receiver Women Have Been Waiting For

Here you see Model 6-F-1 entirely closed—real furniture for which no home is too pretentious and none too modest to afford.

Write for free illustrated booklet, describing this handsome console in detail.

LOPEZ GIVES MEDAL TO PROMOTE PEACE

ANNUAL AWARD FOR BEST GOOD-WILL BROADCAST

Famous Musical Artist Believes Radio Greatest Medium to Break International Hatreds

The employment of the Radio as an effective channel for the advancement and maintenance of world peace was given fresh impetus recently when Vincent Lopez announced the establishment of the "Vincent Lopez Medal."

The well-known Radio artist stated that he would give annually an award to the individual who, in the opinion of a chosen committee, contributed the broadcast designed to bring about the greatest measure of international good will.

Shortly after Mr. Lopez returned with his musical artists from a recent European trip, he expressed the belief that the most effective means of breaking down international prejudices was through the medium of the Radio.

By International Committee

Mr. Lopez intends to award the medal with the assistance of a committee including representatives of each country in which Radio is extensively employed. In addition to these representatives he will ask prominent editors in the large American, European and South American cities to serve. This body will be known as the committee of recommendations, and the actual award will be decided upon by a further body composed of prominent American citizens and members of the various diplomatic corps in Washington.

The "Vincent Lopez Medal" will be designed by a prominent artist and will be cast of precious metal in combination with metal obtained from scrapped military and naval armament.

Pioneer Station to Return to Air Soon

WARC, Formerly WGI, Is Ready to Resume Broadcasting Under Powel Crosley's Direction

BOSTON, Mass.—When WARC here goes on the air shortly with their former wave length of 261 meters, fans will find that the interference that characterized the old station has been eliminated. The steel masts of the old "Amrad"—WGI station which radiated and caused considerable trouble, will not be used by the new station. All the equipment is new and just as soon as a suitable location for a Boston studio has been found, WARC again will be on the air.

WGI was formerly the station of the American Radio and Research corporation, the pioneer broadcaster of the country, although KDKA was the first to obtain a broadcast license and, thus, according to governmental records, the first broadcaster.

But WGI began sending June 5, 1915, and was on the air for six months before people in and around Boston could be convinced that with a crystal set they would be able to pick music out of the air.

The station is now controlled by a new corporation headed by Powel Crosley, Jr., who owns controlling stock, and Harold Power, founder of the old Amrad concern and president of the new company.

Chez Pierre Studio Offers WJAZ Variety in Programs

CHICAGO.—The recent opening of the new Chez Pierre studio of WJAZ, Zenith station here affords a diversified program, partly dance music and partly semi-classical and popular music, which will be broadcast each Tuesday and Friday evening from 9:00 p. m. to 1:00 a. m., Central time.

At the Chez Pierre, Mr. Pierre Nuyttens has his beautiful studio work shop, and it is this studio which is being used for a broadcasting room by WJAZ on these nights. Artists are surrounded here by thousands of dollars worth of original paintings and etchings. The atmosphere is conducive to inspire the artists' very best musical efforts.

KJBS Broadcasts Program as Fire Threatens Building

SAN FRANCISCO.—Despite a fire raging beneath its studio and operating room, and only eight minutes after the fire department had been called, KJBS, this city's "baby broadcaster," was on the air with a musical program. During the fire, which for a time threatened the building housing the station, the studio was so filled with smoke artists could hardly sing for choking. Edward Ludes, chief announcer, was hero of the day.

SOVIET WORKERS ARE INSTRUCTED BY RADIO

Red Government Uses Air to Spread Propaganda of Union

WASHINGTON, D. C.—Over a million Radio fans in the Soviet Union listen in on the programs of the government stations every day, according to a report of the Soviet Radio industry received by the Russian information bureau here. The number is increasing by scores of thousands each week.

Village libraries in 400 villages in Moscow and Leningrad provinces have been equipped with powerful receiving sets and loud speakers, and 300 workers' clubs in the two cities have been similarly fitted out.

The big transmitting stations at Moscow and Leningrad are wired to all the principal theaters, concert halls, public meetings places and lecture halls.

Beg Pardon!

KTAB, Tenth Avenue Baptist church, Oakland, Calif., was reported erroneously in Radio Digest as one of the broadcasting stations which disregarded one or more or the International Radio week silence periods.

This mistake, which occurred in the February 13 issue, is sincerely regretted inasmuch as KTAB has shown that it did not violate any of the silence periods. Although many listeners heard the call letters KTAB, some amateur is believed to have perpetrated the trick.

RUTH ALLANSON, HIT AT KYW, IS ON COVER

WITH the increasing popularity of the semi-classical program, grows the admiration for the girl whose face adorns the cover this week. She is Miss Ruth Allanson, staff artist at the Congress hotel of KYW, Chicago. She signed a contract the first of the year to sing exclusively from this station. She has a modulated soprano voice which she has cultivated especially for Radio broadcasting under the direction of Brunetti Walter. Miss Allanson was born in Anita, Iowa, and finished her high school education there. Later she finished at Iowa State and Kansas state universities. Her father, Edward G. Allanson, is a well-known pianist and composer of Des Moines, Iowa. Miss Allanson is on the Thursday evening program at KYW.

Station Changes

Three stations—WEW, St. Louis; WHK, Cleveland, and KMMJ, Clay Center, Nebr.—are now operating on 1,000 watts. Another St. Louis station, KMOX, has been authorized to increase to 1,500 watts.

WCEE, the old Elgin station, has been leased by the S. W. Straus company and will be heard under the call WSWS.

The Long Beach, Calif., broadcaster, KFON, is now owned by the Nichols and Warriner company.

Looking Ahead

Next Week's Installment of Robert J. Casey's Thrilling Radio Mystery, "A Step On the Stairs," will carry readers into new complications. You will have to read the story, which appears exclusively in Radio Digest, to follow understandingly the dramatization as it is being broadcast from leading studios from coast to coast.

Those Fascinating Hill Billies Heard from WRC, Washington, D. C., will be seen face to face in the next issue of this periodical. They're the real thing and that accounts for the convincing way they do their stuff over the air. They are doing their share to bring the world to the remote hamlets in the mountains of Virginia, Tennessee and the Carolinas.

There is a Lingering Romance and Glamor in the Island of Cuba with its old Spanish plantations, its quaint and picturesque social customs. These thoughts, perhaps, are in mind when we tune in PWX of Havana. The next issue of Radio Digest will print pictures and story of this interesting station.

Part IV on the Short Wave Receiver will next week describe trouble shooting and methods of adjusting this set. Connections of the batteries, etc. will be included for those building this outfit who are not sufficiently expert to understand how to do this themselves.

The Anti-Blooping Campaign should naturally include the construction of devices for prevention of radiation, (it is not re-radiation) so in the next issue the technical staff will describe how to build the Penetrola, a single stage of non-oscillating radio frequency amplification.

Milo Gurney Gets into Circuits with his next A B C article and, as his collection of hook-ups is most complete and varied, this chapter unfolding some of the mysteries of Radio should be unusually interesting.

NEWS BRIEFS FROM THE BROADCASTERS

WELL-KNOWN CARTOONIST INSTRUCTS OVER WTIC

Concert Master at WGN—WBAL Features Continuity Programs—John Drew on WEAF Chain

Become a cartoonist this spring by tuning in for the series of lectures by Bud Kingston at WTIC, Hartford. A Radio course in art is a novel thing but Mr. Kingston does not stop there. He asks all his listeners to follow him by sketching as he talks and to send in their sketches for his approval. He will make corrections and suggestions and return the sketches. These talks are scheduled for March 5 and 19, April 2, 9, 16 and 23, and May 7 and 14.

* *

Jacques Gordon, internationally famous violinist and concert master of the Chicago symphony orchestra, is offering a series of four concerts from WGN, Chicago. Mr. Gordon may be heard this week during the Tuesday program of this station. He will play his famous Stradivarius called the "Clara Schumann Strad" because it once belonged to the wife of the famous musician.

* *

Musical continuity programs especially written for WBAL by Broughton Tall, one of Baltimore's musical writers and dramatists, will be the new feature of this station. "The Evolution of American Popular Songs" was the title of the first presentation of this type. The narrator, Harry Welker, took the audience from the vivid colorful colonial period to Irving Berlin's "Alexander's Ragtime Band."

* *

John Drew, one of the most popular actors of the American stage appeared recently at WEAF during the Eveready hour. He dramatized some of the scenes of "Rose Mary."

* *

Comedy will rule the air from KGO, Tuesday evening, March 2, when James (Jim) Madison, famous maker of the Madison Budget of jokes, familiar to stage people, will appear before a KGO microphone reading some of his latest. He will also present a comic musical skit, "Musical Memories," assisted by the Sierra male quartet, which will show the evolution of the American popular song.

* *

WJZ is now featuring operatic stars during the Sunday evening concerts. The second concert of the series was given by Madame Julia Claussens, mezzo-soprano and Paul Althouse, tenor, artist members of the Metropolitan Opera company.

* *

"What the Army Does Besides Fight," will be the subject of the address given by Lieut. Col. H. Edmund Bullis of the war department general staff at KGW, Portland, February 27. He will give an interesting treatise on the peacetime purpose of the United States standing army.

* *

One of the most popular features of the San Antonio station, WOAI, is the Mexican music given every Tuesday evening by the Gebhardt Mexican players. Jose Conrade Tovar, distinguished Mexican composer-pianist is the director.

* *

Station WJZ will broadcast, as in past years the noonday Lenten services of the old historic Trinity church, every weekday except Friday and Saturday during the forty days of Lent.

* *

Henry Field's station, KFNF, of Shenandoah, Iowa, gave a twenty-six hour birthday program recently. This not only celebrated the second anniversary of this station but also introduced its new Western Electric 1,000-watt equipment.

* *

The rural comedy, "Interurban," written for the stage by W. T. Marrs, will be presented by the KGO players Thursday night, March 4.

* *

A George Washington university program will be featured by WRC, Washington, D. C., February 27th, when prominent members of the faculty of the institution, together with the musical clubs and the debating society of the school will be presented to the Radio audience. The principal talk of the evening will be given by Dr. Wm. Mather Lewis, head of George Washington university.

* *

Louis John Johnen, program director of WLW, Cincinnati, will sing five songs by John Masefield, set to music by Easthope Martin, on Sunday evening, February 28. Thomie Prewitt Williams will be the accompanist.

* *

The United States Coast Guard band from the Coast Guard academy returns to WTIC, Hartford, for a series of five concerts. The first program will be given Friday, March 5.

CAN YOU SOLVE RADIO MYSTERY?

I WON'T BLOOP CLUB GROWING BY BOUNDS

IDEA GROWS OVERNIGHT TO NATION-WIDE CAMPAIGN

Move to Lessen Interference Makes Popular Appeal to Fans, Clubs Stations and Newspapers

Almost overnight, the I WON'T BLOOP CLUB has grown from an idea to a national organization. A plea for individual cooperation by broadcast listeners in an attempt to limit needless interference has suddenly developed into a mobilization of a vast army of Radio fans, a long string of broadcasting stations, many listeners organizations and numerous newspapers, whose avowed purpose is to improve Radio reception. With the fulfillment of the pledges received by the Radio Digest, a large percentage of blooping will be prevented and all sections of the United States and Canada will benefit by the movement.

The purpose of the campaign and the simplicity of the requirements has struck a popular appeal. The applicants for membership need only to pledge that they will operate their sets to reduce radiation or blooping, to equip them with anti-blooping devices in cases where it is thought needed, and lastly, if all other methods fail, to renew them with sets designed to limit howling and squealing.

Pledges Pouring In

It is quite impossible for the staff assigned to this work to keep abreast of the exhilerated movement, so popular has been the I WON'T BLOOP CLUB, and a count of the pledges being received daily cannot be given. Thousands of membership cards have been sent to the different organizations that have been granted charters in the club and are securing memberships. Upon receipt of pledges, the Radio Digest issues membership cards. A membership card in the I WON'T BLOOP CLUB signifies that you are doing what you can to help Radio.

Clubs Join Movement

A number of listeners clubs throughout the country have joined the Radio Digest in the campaign to eliminate interference and have joined the I WON'T BLOOP CLUB as organizations, being granted separate chapters. In several instances the membership pledge of the Radio Digest has been adopted by the organizations as a purpose. Among the Radio clubs who have applied for chapters are the Butte (Mont) Radio club, Broadcaster Listeners' association of Terre Haute, Indiana; Newton (Kansas) Radio club and the Columbus (Ohio) Radio league.

In line with the campaign being fostered by the Radio Digest, Chicago listeners have organized the Anti-Blooping association, with the signified purpose of educating the public to courtesy in the use of the air.

Another great force that is aiding to clear the air of preventable interference is the Prowler's club of the Chicago Evening Post Radio magazine. This was one of the first organizations formed with the expressed purpose of combining the efforts of Radio fans to improve reception.

The value of listeners' organizations cannot be over-estimated. In Great Britain, blooping has become so bad that the English are calling it a "plague of oscillation which is marring reception." Each week brings a record-breaking number of complaints to the British Broadcasting company.

New Station Chapters

Added to the list of more than a score of stations printed last week who have secured chapters in the I WON'T BLOOP CLUB, and are cooperating with the Radio Digest in clearing the air are KFAB, Nebraska Buick Auto company, Lincoln, Nebr.; WEAR, Goodyear Rubber company, Cleveland, Ohio; WHBP, Johnstown, Automobile Co., Johnstown, Pa., and CKY, Manitoba Telephone system, Winnipeg, Manitoba.

Station KNX, Los Angeles Evening Express, and WDAF, The Kansas City Star, besides offering the influence of their broadcasting stations have also lent their columns to advancing the I WON'T BLOOP CLUB. The Wilmington (Del.) Evening Journal, The New Orleans (La.) Item-Tribune and The Hartford (Conn.) Times have also offered to support the Radio Digest in the campaign.

The Radio Digest is at the present time printing a series of articles for the instruction of fans on how to prevent blooping and other forms of man-made static. Different types of receivers will be reviewed and the proper method of operation will be given. As yet, a set that will not regenerate has not been devised. but with care and knowledge, blooping can be abolished and interference limited.

Do your share. Sign the pledge card of the I WON'T BLOOP CLUB today and mail it to Radio Digest and you will receive a membership card in the club. It will be your credentials that you are earnestly endeavoring to help Radio reception.

HUNDREDS WAITING FOR AIR LICENSES

WASHINGTON, D. C.—The Radio section of the department of commerce now has on hand between 250 and 300 applications for new Radio broadcasting licenses, with no wave lengths available and this in spite of the fact that officials of the department have repeatedly stated that there is no chance for the issuance of any more licenses at this time. All applicants are simply being notified that no licenses will be issued.

"ALONE IN A CLASS"—DIELECTRIC

The golden voice of Mary Garden, "Our Own Mary," has added the invisible audience to its list of conquests. The famous opera star, who recently returned from Europe, is probably the most fervent Radio enthusiast among opera singers. Her program over WJZ, where she is here shown, is reviewed this week by Dielectric in "Condensed."

PLEDGE CARD — Radio Digest PROGRAMS Illustrated — I WON'T BLOOP CLUB

Reg. U. S. Pat. Off. & Dom. of Canada

I pledge myself to operate my Radio set to reduce radiation or blooping. If I am unable to make my present set operate properly, I further pledge myself to replace it with a receiver that will create less interference.

Make of my set:

Number of tubes is:

Signature .....

Address .....

City and State.....

I am cooperating in this campaign with Station.....

Upon mailing this pledge to Radio Digest, "I Won't Bloop Club" membership card suitable for wallet or framing will be issued.

$500.00 TO GO TO WRITERS WHO BEST UNTANGLE STORY

"A Step On the Stairs," New Phase in Literature, Will Be Put in Radario Form and Broadcast from Group of Leading Stations

Readers of Radio Digest are afforded an opportunity in this issue to step off on a new and important phase of Radio entertainment.

Those who have been watching the rapid strides of Radio growth day by day, month by month and year by year, will behold in the presentation in this magazine, this issue, the first installment of Robert J. Casey's "A Step on the Stairs," the fruition of a new and significant phase of Radio literature.

It is a story written by a recognized author, technically familiar with Radio broadcasting, to bring out the latent effects concealed in the mystery of the average receiving set. He is opening a box of tricks new to readers and the listening world. He knows the art of weaving adroit situations that make the reader shiver with ghostly apprehensions, cry with tragic climaxes and laugh at comical incidents.

Author Well Fitted to Task

It would be hard to find anywhere in America a writer better able to do this particular piece of literature, for Mr. Casey has not only established his position as a fiction writer but he has written many technical articles on Radio. He knows the possibilities from the transmission end through his staff connection with the Chicago Daily News broadcasting station, WMAQ. In his own home he has a specially equipped laboratory for building and experimenting in Radio reception.

To the average listener there is a magic about the cabinet and the speaker that brings voices out of the silent air from all parts of the world. It is enveloped in a mystery that seems almost supernatural. It is capable of emitting sounds and noises created by the ephemeral atmosphere itself. What are these voices of the unseen world? We read about radiation and static and let it go at that. But Mr. Casey has written a story that will bring out sounds from the Radio horn hitherto unheard and in all probability will mystify even the most skilled of Radio engineers as to their cause. Will they be called forth from the world of the departed dead?

Can the Dead Return?

What is the basic force that makes the human mind function? What is telepathy? Is it not fundamentally Radio activity, a form of Radio transmission. Can the energy that starts a mass of brain cells into motion, that formulates thought and speech be propelled as the voice is propelled from the vibration of the fragile filament in a vacuum tube? Does this energy ever die? Can it be attuned, converted into controlled ether wave movement, refined to audible sensitiveness?

These are questions to be considered in the strange case of Peleg Turner in the first two chapters of "A Step On the Stairs," appearing in this issue of Radio Digest. Was it the voice of the dead Peleg that manifested itself, as he had predicted, through the Radio horn for the benefit of his heirs?

Gold Prizes for Best Solutions

Begin reading this marvelous story today and figure out your own solution to the mystery that haunted the old Turner manse. Was it natural or supernatural? Did both have a part and who was the living personality that shaped the tragic twists of fate?

Analyze it and prove your powers as a detective. Your ability will be rewarded not only by the satisfaction of knowing your own skill at unravelling a tangled skein of contradictory threads but by real money—real gold. The Radio Digest offers $500 in Gold for the correct solutions to the enigma.

And here is the big surprise that was promised last week!

Leading Stations Broadcast as Play

Fred Smith, one of the most experienced Radio dramatists in the country, has taken Mr. Casey's story and converted it into living and spiritual personalities who will come to you through the air. Radio Digest has offered this dramatization to a number of the strongest Radio stations in

(Continued on page 30)

Sun Greetings for "Mounties"

OLD VET of Royal Mounted Tells of Hardships Where the Night is 135 Days Long. Friends Send Radio Messages.

JAMES CAMPBELL, retired sergeant of the Canadian Royal Mounted Police, found much to interest him in the pages of the Winnipeg newspaper as he sat by the kitchen range at the home of his nephew who lives in one of those boxed-up, steam heated apartments in Minneapolis.

Presently the old veteran of the Arctic frontier peered over the rims of his steel bowed spectacles as the cheery lady of the house busied herself in turning flapjacks and stirring the ham that was sizzling in the pan.

"Do ye mind that this is the Twentieth of February?" he observed.

"And what does that mean?" asked the lady, "Somebody's birthday?"

For a moment he seemed oblivious to his surroundings as he slowly folded his paper and dropped it on the edge of the table. He crooned a curious chant, low and gutteral. Then he hopped to his feet and began a weird Indian dance about the kitchen floor.

"I'm pretty spry yet, what?" he paused in front of his chair and sat down again. "Today the sun is showing himself north of Fifty-Five and every biped that loves his God and fellow man up there is joining with the Eskimos in the Sun Dance. 'Tis a great occasion. Sure, he's only there long enough to promise he'll come back tomorrow, but seein' as it's the first time he's been nigh the top o' the world for 135 days it's worth the trouble."

* * *

"AREN'T you glad you're not up there any more, Uncle Jim?" asked the little lady who could not understand the heart of a soldier of the woods.

"In His Majesty's service, Margaret, a man is glad to be where his duty calls. If you are meanin' that duty does not call me there today, and tells me to be here, then here it is I'm glad to be. Though I think I could still do the Sun Dance with the best of 'em. Birthdays? Say, girl, when the sun forgets to shine for about five months, who's goin' to remember the birthdays in the dark—except that they're registered in the little black book of the command. And when they begin to accumulate past a certain number—

"But they're a merry crew above the Arctic today. Old Sol hoists a bloody eye over the hills of snow and ice, gives one wink and is gone again to warm himself for returnin' tomorrow when maybe he'll be givin' two winks. Each day he'll come back for a little longer and soon he'll be squintin' long and warm through the black trees bringin' the sap from the ground. That'll start the leaves comin' and the country will become more beautiful which will please Old Sol inducin' him to stay longer and longer until midsummer he'll be payin' visits in the middle of the night and forget to go down at all.

"Sure and don't I know the truth of it myself and don't I know the pleasure of seein' the sun on the Twentieth of February, which is no less than the comin' of the mail that mushes all the way from Edmonton by the dog teams? It's hard enough to be shut off in darkness 3,240 hours and each hour a little longer than the last—no word between you and your kin and never knowin' whether your own are dead or alive. Oh, and don't I know, the feel of the deadly white fingers of the bristling ice that freezes and squeezes the very marrow out of your bones? But never was there a man whose hand was the law that would complain of that."

The old man turned again to his paper.

"Don't they have the telegraph up there?" asked Margaret.

"Now, I was just a-comin' to that," he ran a long, leathery finger (*Continued on page 24*)

At the top is Sergt. White of the Royal Mounted located at Pangnirtung on the Arctic circle, who received the special greetings sent February 20. In the canoe are shown two trappers on Sluice lake, who picked up a concert from Annapolis in their boat. Below, Sergt. Treadgold, left, and Constable Larry Higgins of Pond's Inlet, who received messages from friends with the appearance of the sun.

Below are two little Eskimo pupils sent by Mrs. W. R. E. Moore, who, with her husband, teaches a school at Pilot Point, Alaska, 45 miles from the nearest white person. Mrs. Moore wrote to KMA, Shenandoah, Ia., telling of the Radio program they had received there and which was enjoyed by their Eskimo charges. Pilot Point, she described as "just a little jaunt" from Siberia, Russia.

Girl Solves Izzy's Problem

EVERYBODY Who Wants to Join Blah Club at WOAW, Omaha, Must Ride the Brindle Cow with the Tinkling Lavalliere. Membership now 35,000 and 25,000 on Waiting List

DIZZY IZZY was serious. He had a Problem. Even to try to be a Radio clown and be compelled to worry along with a Problem on your neck is enough to make anyone serious.

Things were always coming up and Dizzy Izzy had to put them down—or he would forget them. It made no difference that he had Mike at WOAW, Omaha, in front of him and all the Woodmen of the World back of him.

There are lots of things in this world that stump even woodmen. And the Problem stumped Dizzy Izzy. Once he turned the "mikrophobia" upside down and stuck his finger against a hot wire when the Problem seemed to Present itself there. Four hundred sets went dead. Dizzy explained to a twisting audience that a crystal crab in Lincoln had snapped at the end of his finger and made the blood come.

Still the Problem haunted him. It crept out of his subconscious mind at all sorts of inopportune times and shinned up the microphone stand like a diabolical imp to taunt and prod him.

What was it? What did it all mean?

* * *

WHAT was income tax, philosophy, ethics, poetry, breakfast, matrimony, world court, zero, music, the Einstein theory, higher mathematics, theology, static, 100 per cent, Eighteenth Amendment?

These questions all seemed to be a part of his Problem. They streamed through his mind as he nestled into a one-armed chair in Thompson's restaurant and drained the dregs of a loco weed sandwich.

His meditations were interrupted. A freakish looking girl with long hair done up in the old-fashioned way and skirts that came an inch below her knees approached with a glass of milk and a Bismark. Without even noticing Dizzy, she settled down cozily in the harbor across the arm of his chair. She tilted her glass of milk and Dizzy noticed that her throat was as white as the fluid she drank—even whiter. Her long lashes caressed her cheeks lovingly. Her slim, wax-like fingers had the daintiest tint of rosebud pink.

Dizzy admired the classic elevation of her alabaster brow. Suddenly he felt a surging desire to speak to her—to confide in her, to ask her advice as to his Problem. Here was one who surely would understand. He licked the last drop of the loco weed sandwich from the bowl and turned tremblingly toward the young woman.

"Kiss the cow and give her my regards," wrote one "Boob" to Dizzy Izzy (right), chief potentate of the Blah club, WOAW, Omaha.

"PARDON me, Miss," he stammered, taking his turtle shell specs from his eyes and wiping a green fog from the lenses with his paper napkin. "I hope you will pardon my, my-my, idiocy—idiocy—idiosyncrasy in speaking to you, but I have a very, very serious Problem, a very difficult Problem—"

"I'm not a school teacher, but I guess you are harmless, what is it?" She camly broke her Bismark.

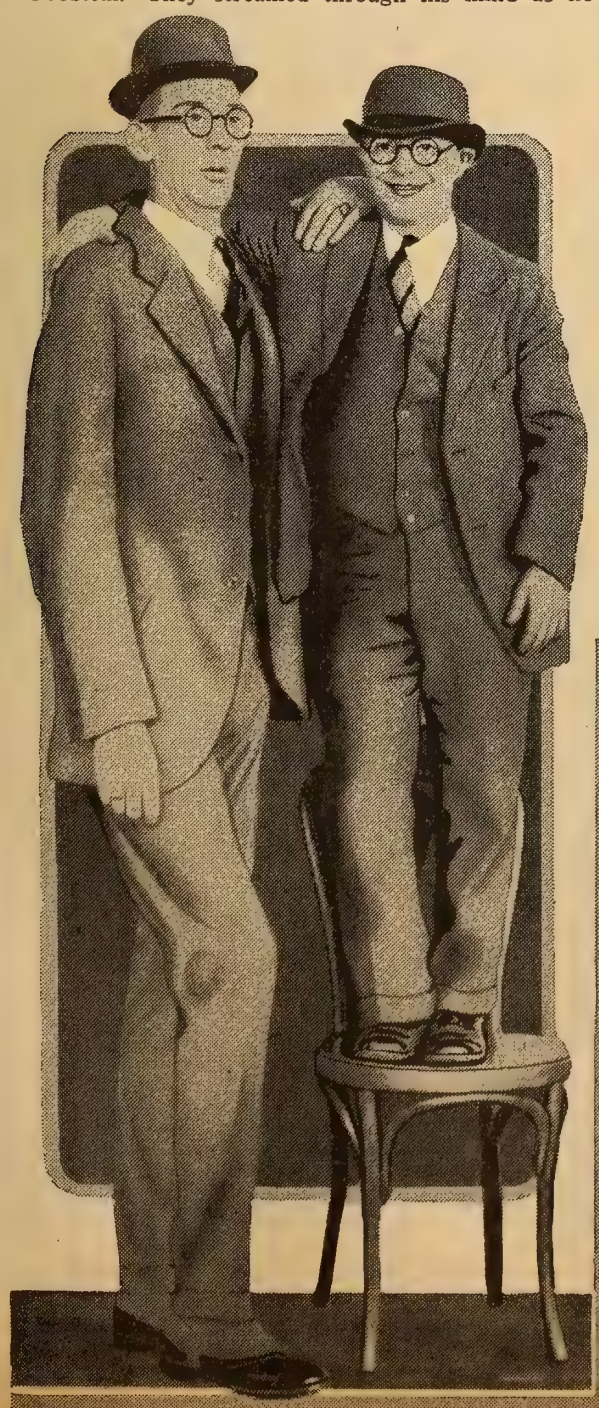
"Well, I've been thinking of the meaning of things—everything, you know—"

"For instance, what?" wiping a bit of red jelly from her dainty chin.

"Oh, just for example, we'll say love, matrimony, divorce, domestic—"

"Easy, old fellow; it's easy. The whole thing is just BLAH!"

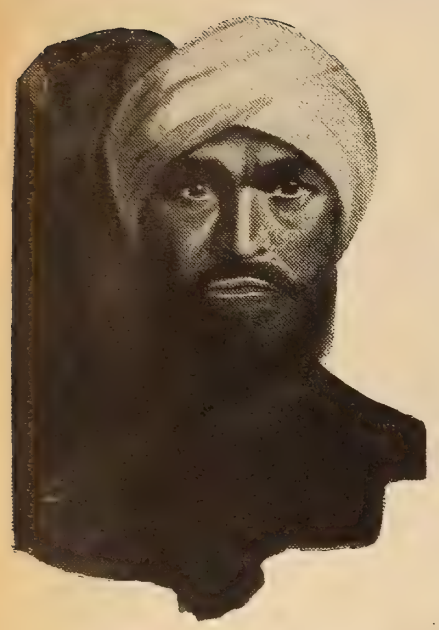
(*Continued on page 24*)



Sometimes Dizzy Izzy assumes human form and stalks forth as on the right. While again, is Izzy dizzy? He is at left aloft of a chair by "Eiffel Tower" Lew Farris. The Blah Therskites (below): standing, B. J. Sisk, composer; Fred Jessen, Sid Jolson (Cy Perkins), and "Gus." Seated: Ole, announcer; Louise Race and Izzie.

a STEP ON Read—

THIS Thrilling Story and Hear It Broadcast in Radario Form from Your Favorite Station



The door swung open with the noiselessness of oiled hinges and a tall dark man in the garments of the East stood facing her... Indian, perhaps, or Malaysian.

CHAPTER ONE

The Disappearing Visitor

UNDER the whispering cedars a one-armed man stood motionless, shielding his eyes with his hand and peering through the blizzard—almost impenetrable now that twilight was falling—toward the little boat landing at the foot of the driveway. There was a footfall on the brittle ice along the shore and then, presently, a ringing step on the packed snow near the park. The one-armed man stepped suddenly out of his shelter to confront a youthful figure in a heavy ulster. Recognition in such a light would have been impossible, even had the newcomer's face not been shielded by the long bill of a cap and the folds of a plaid muffler that crept up over his chin. Still, the one-armed man peered at him for a long time, silently and appraisingly.

"What do you want?" he demanded.

A youthful laugh answered him.

"Who are you?" countered the stranger.

"I'm Henry Millis," replied the one-armed man slowly. "I'm caretaker here. I was put here by Peleg Turner. I stayed here when his brother Jeremiah came here to live an' I know everybody they knew. . . . An' I don't know you."

"I dare say that's possible. What of it?"

Henry Millis paused unmindful of the blizzard driving into his face and seemed to be thinking carefully about his answer. . .

"There's this about it," he said at length. "Nobody ever has come to this house from off the sea there an' brought any good with them. There was a boat tied up to the landing there the night Jeremiah was shot an' Johnny Carton disappeared. There was somebody walked down that landing the night Peleg Turner died. I seen him come. I didn't see him go. In the mornin' there was a boat floatin' out there on the bay bottom side up an' old Peleg was lyin' dead up there in the house. . . . .An' now you come. You're the third."

"Yes, if your count is correct, I should be the third. . . .But I am no undertaker. I came across Pelican Bay in a launch because I had to be here by six o'clock. It wasn't such bad going until the snow began. I suppose I was lucky to get here but there's no mystery about it."

"Nobody's lucky to get here," growled Henry Millis. "Mind you, I'm givin' you fair warnin' young feller. If you belong up there at the house them as is there already will know it. If you don't belong there God help you."

"I'll take my chances." And the gray ulster moved off to be lost in the grayer shadows under the storm swept cedars while Henry Millis resumed his post under the trees with his eyes turned toward the boat landing—watching, waiting. . .

SAVE for the snow, driven in plumy masses across the bare front of the building and softening the harsh outline of red brick wall and red tile gable, the house was much as it had been when they carried old Peleg Turner's coffin out through the seldom used front door on what should have been his last voyage. The critical populace of Pelican Bay, admitted the changelessness of the Turner manse with considerable reluctance. It did not seem right that the taking off of so important a citizen should have produced so little physical effect upon the scenes with which he had been associated.

True, there was an air of permanence about the old place that had survived even its evil reputation. Nothing, so far as anybody knew had happened to it when Washington's men had impaled its first owner, a Tory spy, to that same front door with his own sword. Nor had there been any obvious results when another doubtfully identified gentleman of the Turner family had seen a ghost in the great, empty gunroom and had died with his face in his glass of port . . . . . although that was explained by some skeptics, it must be admitted, with the suggestion that he might not have seen a ghost at all—that apoplexy, abetted by alcohol, might have caused his passing quite as well as a supernatural visitation.

For generation after generation the house had stood there, firm as a fortress with its buttressed walls of Lincolnshire brick and its timbers of teak precisely as it had been when the first of the seagoing Turners had come home from the back-lots of the world and had built it for his Spanish bride.

Recently an ominous gloom has seemed to haunt the ancient abode. A depressed foreboding like a deepening shadow had seemed to spring from the darkened windows since the day that Jeremiah Turner had been found dead on the gunroom hearth, a bullet in his head.

The superstition grew from that very night when the lights that always had burned brightly in the gunroom had flickered out to be followed by the lifted latch that opened only to permit the passing of another Turner — through the door of death reserved by tradition for the final exit of the lord of the manor.

AN AUTOMOBILE crunched through the drifts under the porte-cochere and a girl alighted—a tiny figure against the massive outline of the hand-hewn ballustrades and door frames, even in the enveloping bulk of her fur coat. She raised the knocker at the side door and dropped it gently to be startled by the resultant clang that echoed through the unseen corridors beyond.

The door swung open with the noiselessness of oiled hinges and a tall dark man in the garments of the East stood facing her. . . . Indian, perhaps, or Malaysian. Old Peleg had picked his servants in odd corners of the world.

"I am Mary Williams," she said. "I received a message to be here at six o'clock."

"You are expected," the man at the door told her. "There are others here... They are in the the Big Room"—he seemed to be quoting a title rather than a description. "If the Sitt will give me her wraps, I shall be glad to escort the Sitt to the place of meeting. . . .One moment, please, here comes the caretaker. I think he wishes to speak with me."

The girl turned to see Henry Millis—now only one of many shadows under the porte-cochere—leaping up the three stairs from the driveway. She could see little of him even in the dim light from the hallway as he stopped at the threshold to address the Indian.

"There was somebody here, Hari Singh?" he asked. "A man with a gray overcoat and a plaid muffler? A young feller. . . .You ain't seen him?"

"There has been nobody here since you went down toward the boat landing," replied Hari Singh. "Nobody in the last hour except the lady here."

And Mary Williams marveled at the sudden panic in the eyes that were all she could make out of the haggard face of Henry Millis.

"Where did he go?" he demanded.

Hari Singh dismissed the matter with a shrug.

"Who knows where anybody goes?" he replied. "He may have been wise enough to change his mind about coming here."

"There ain't any good comes to the Turners from out of the sea," muttered Henry Millis. "That's what my grandmother said. That's what I say. No luck to the Turners out of the sea."

"So few of the Turners are left that it doesn't make much difference," deprecated Hari Singh. And he closed the door as Henry Millis stalked away into the deepening gloom.

CHAPTER TWO

The Voice of Peleg Turner

DINNER had been served in the high beamed hunt-room—a ghastly affair for the dozen strangers who had eyed one another suspiciously across the vast whiteness of the table. Now Hari Singh, soft-footed and uncannily efficient, had removed the napery and silver and polished crystal and the light from the wilting tapers in a ten-branched candlestick made little ineffectual pools of twilight in the black oak board.

The great beams of teak were lost in the shadows that gave the height of a cathedral to the ceiling. The paneled corners were in movement with weird reflections from the fire that was dying on the board hearth. About the room in the deep cushioned leather chairs that the first Turner had brought with his bride from Spain a hundred years ago, the strangers sat in isolated groups and talked in whispers as they appraised one another without pretext or shame.

Mary Williams was more fortunate than most of the guests at this strange banquet. She found herself seated next to a man whom she had met before. The extent of this good fortune was curtailed somewhat by the fact that she would rather have met almost any other man in the world. Still, she could talk to him and there was much about this affair that she could wish explained.

$500 in Gold

FOR THE SOLUTION OF

a Step On the Stairs

WITH the beginning of this exclusive and pioneering effort in coupling a master serial novelette with its production as a Radio play at a selected few of the country's best broadcasting stations, Radio Digest wishes to announce that $500.00 in Gold prizes will be awarded to the persons who can best solve the mystery.

The story, "A Step On the Stairs," is written by Robert J. Casey, an author whose works in the literary world need no introduction. Furthermore he is well versed in the needs of such fiction for Radio presentation. His work, in turn, is being Radio dramatized by Fred Smith, Managing Director of the United States Radio Society, who can be counted among the first few men to write and present Radio plays.

Read the story and hear it played weekly from the selected stations. Don't miss this thriller, whether or not you intend to submit a solution!

The chosen stations, which will broadcast "A Step On the Stairs" in Radio play form, are given on page thirteen. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week, the first appearing in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unravelling the mystery accurately, will win. In the event that two or more solutions are absolutely correct, the method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. The contest opens with the February 27 issue. All solutions must be received by Radio Digest not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue of Radio Digest, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon but one side of paper, and names and addresses should be written or printed plainly.

4. The decision of the judges, to be named later in the contest, will be final.

the STAIRS

By ROBERT J. CASEY

Radio Dramatization by
FRED SMITH, *Managing Director, U. S. Radio Society*
Illustrations by HILMER C. OLSON

"That's Ardwyn, the lawyer," he whispered to her as they pushed back their chairs to a point at the end of the room where they could survey the entire company. "He's the sallow looking man with the wallet. The one there at the end of the table. He seems to be running the show."

"Just what are we all here for?" inquired Mary.

"Search me. It's a weird crew they've cast us with. I don't think I ever saw any of them before, although I suppose they're all related to Old Peleg one way or another."

"I was introduced to that man with the beard at dinner—the one next to the lawyer. He gives me the shivers to look at him. He reminds me of a pirate."

"Maybe he is. A little thing like piracy wouldn't bother a grand jury that ever started to look into the history of this family. I'd trust a good pirate farther than that self-elected saint over there beyond the hearth. She has a murderous eye and a tongue that's all honey and arsenic . . . Our Aunt Helen, they tell me. That's our Cousin William she's talking to—the scared rabbit in the undertaker's costume . . . Listen to her talk . . . "

THERE was a vibrant quality in the voice of Helen Holmes that lifted it above the low hum of conversation throughout the room. She did not seem to be aware of its carrying powers. She was talking earnestly with Cousin William on a topic that seemed to be of the greatest importance—herself.

"I have tried to live down the reputation of the Turners," she was telling him. "My poor dear husband—dead and gone these twenty years—he always used to say to me, 'Nellie, you're an angel on earth. Nobody'd ever suspect the tribe of hellions you came from.' That's what he used to say to me—an' Heaven knows I tried to be worthy of him."

"Oh, but I guess you were," came the softer voice of Cousin William in dutiful echo. "I guess you must have been. Yes, yes."

"Well I'd like to see the man as says I wasn't. Here were these Turners marryin' heathen wimmin in foreign parts an' piling up gold—the curse of the world if I do say it. And I knew somethin' would happen to them. Which it certainly has . . . Just like I said it would."

"Quite right. It certainly has . . . Right there where your foot is they found Jeremiah Turner with his face in the ashes. He was shot right between the eyes. And they say the look in his face was that of a man peerin' plumb into Hell. That's what they say—yes!"

Cousin William's voice had carried farther than he was aware and a sudden silence fell over the guests. White faces stared wide eyed into the candlelight.

"For God's sake keep quiet," commanded Henry Graves with unmistakable evidence of rasped nerves. And then Ardwyn, the lawyer, took command of the situation by rising in his place at the end of the table.

"Don't allow yourselves to become overwrought, ladies and gentlemen," he suggested. "The hour is still earlier than I had counted upon when I set the time of the dinner at nine o'clock. I wished to give you all a chance to become acquainted with one another. That's what Mr. Turner wished when he asked me to call you all together here."

"Turner," gasped Henry Graves. "Why he's dead."

"HE WAS not always dead," replied the lawyer unemotionally. "But unlike so many of us born to a few brief days in this ephemeral world he foresaw that one day he must die . . . He foresaw it quite definitely after the tragic death of his brother and so he wrote out for me the documents which directed me to summon you here. I need not read to you the instructions he gave me as his lawyer. I have already summarized them. But this other paper is a message to you—to all of you—a word from Peleg Turner whom some of you helped to carry out through the front door on his last journey . . "

Clearing his throat, Ardwyn adjusted his glasses, and held a sheet of foolcap toward the candle light.

The great beams of teak were lost in the shadows that gave the height of a cathedral to the ceiling. . . . About the room the strangers sat in isolated groups and talked in whispers as they appraised one another without pretext or shame.

"When you, my relatives, the last of our clan, hear this message I shall be dead," continued the lawyer. "Frederick Ardwyn, my old friend and adviser, will be speaking for me. But more than that I shall be speaking through his lips and I ask that you pay close attention.

"I have felt the malign influence of this old house since I inherited it from my father, the elder Peleg Turner, twenty-five years ago. It is because I have felt that influence that I have lived in it so little. I knew when my brother Jeremiah was killed in this room and John Carton, my dead sister's boy whom I had brought up as a son, disappeared so mysteriously, that I, too, must look forward to satisfying the fates of this house. That Frederick Ardwyn is reading this message to you is proof enough that my intuitions were well founded. I have passed on—and some of you must follow me before many days are out.

"It is my one consolation in leaving those I have loved that in death I shall know the solution of the mysteries that have brought such sorrows to my house.

"AT MIDNIGHT tonight, therefore, I shall attempt to communicate with you by the only instrument that gives a voice to the great unfathomable ether—the Radio. I shall speak to those assembled here and I shall tell them what I have learned of the secrets of this cursed house. The lights must be turned out and the guests whom I have caused to be gathered here will sit quietly before the Radio receiver, the dials of which have been set to the markings hereinafter designated."

The lawyer stopped. There was a moment of silence, then a babel of hysterical comment.

"This is poppycock!" declared Henry Graves with a tone of conviction that his nervousness belied.

"Don't say that," advised Mary Williams. "You don't know . . . Perhaps Uncle Peleg knew. Perhaps he . . . "

New and better

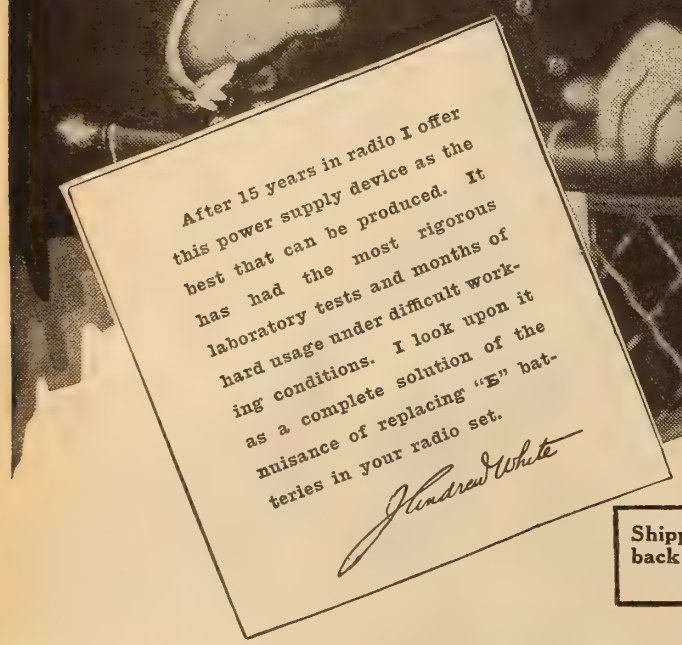
Uses No tube

Ends "B" battery troubles

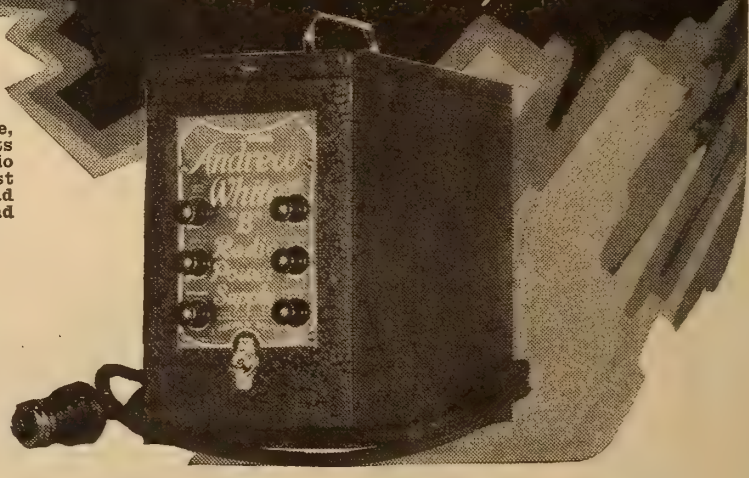
Andrew White "B" Radio Power Supply

for Alternating Current only

110 Volts 60 Cycle



Major J. Andrew White, America's famous sports broadcaster, pioneer radio editor, the country's first broadcast director and veteran radio dealer and manufacturer.



Shipped on a satisfaction or money-back basis on receipt of price in money order or currency.

Ready for use at all times, 135 volts of "B" battery current, all you need, now or in the future. It delivers steady supply, operating perfectly at all times all sets using up to 9 tubes. The new tubes and modern sets require 135 volts—don't buy less!

No Hum There is no hum. No noise at all. The current is delivered from EIGHT electrolytic cells. NO TUBES TO FLUCTUATE OR TO REPLACE.

Economical Takes so little current you will notice no difference on your electric light bill.

Durable Will deliver the full voltages you require for detector, radio frequency and amplifier tubes, strong and steady year after year, just as if you had brand new batteries all the time.

Convenient Plugs into electric light socket—nothing to get out of order at any time.

Improves Broadcast Reception

Large size condensers and steady current supply improve the performance of your radio set. You will have better quality of speech and music and greater volume.

No Parts Requiring Replacement or Renewal

A few territories now open for established dealers.

J. ANDREW WHITE, 37 West 43rd Street, New York

135 Volts!! Only $38

There is a great demand

Your dealer may not be able to supply you

MAIL THIS COUPON TODAY

J. Andrew White, 37 West 43rd Street, New York.

Enclosed is $38, for which ship me your new and better "B" Radio Power Supply at once, my money to be refunded if I am not satisfied and return the unit in 10 days.

THOUSANDS OF FANS HELP IN MUSIC WAR

CROWDS SWARM WAY INTO BALL GIVEN FOR FUNDS

Southern California Stations Unite First Time to Aid N. A. B. in Financing Copyright Fight

LOS ANGELES.—Los Angeles listeners finally got their silent night—but for one night only, and on that night the interest was not in hunting the elusive wave of a far off broadcaster but in the big Radio ball and frolic of the United Broadcasters of Southern California.

Banding together as a body for the first time in their history, the stations of southern California promoted the big Radio ball and for one night forgot rivalry and jealousy—but, as one announcer put it, for one night only—and invited the public to turn out and see the Radio stars whose voices heretofore formed the only link between them and the public.

Raises Funds for Copyright Fight

The purpose of the ball, as explained by the United Broadcasters, was to let the general public in on the fight that is being waged by the National Association of Broadcasters for adequate and equitable legislation on copyrighted music, and the way the Radio public turned out at $2 a head showed conclusively that they are with the broadcasters in this fight. The entire gross proceeds of the ball were forwarded to the headquarters of the National Association, the expense of the ball being entirely borne by the stations themselves.

Phil Cohen, local attorney for the American Society of Composers, Authors and Publishers, the organization that is the cause of all the agitation over the copyright question, attended the ball.

Thousands of Fans Attend

The ball was held at one of the largest and finest ballrooms in Los Angeles, El Patio, and was attended by thousands of fans to the capacity of the hall. Every announcer from all southern California stations, except the church broadcasters who could not be expected to participate in an event of this kind, was on hand to personally meet the public as well as a number of famous movie stars, among them being Leatrice Joy, Jetta Goudal, Ruth Roland, Alice Calhoun and Helene Costello. Adriene Dore, winner of second prize at the Atlantic City bathing beauty contest and judged America's most beautiful "girl in evening gown," was also present.

The program started at 8 p. m., Pacific time, and lasted until the last DX hunter had seen and heard his fill. Each of the cooperating stations, KFI, KHJ, KNX, KPSN, KFWB, KMTR, KFON, KFQZ, KNRC and KFXB, put on a short program with their particular stars, while dance music by massed bands furnished the crowd with entertainment between the many diversified acts.

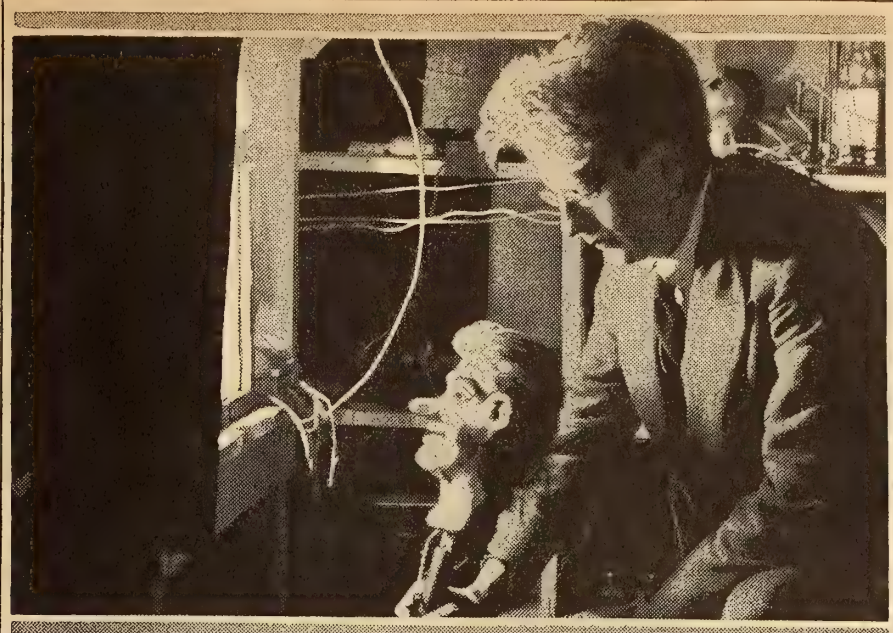
New Station for Chili

WASHINGTON.—A new broadcasting station is under construction at Santiago, Chile, and is expected to be in operation by June 1. The station, which will be owned and operated by the Compania Radio Chilean, will operate on 400 meters with 1,500 watts power. The call letters of the station will be CMBA.

SENDS LIVING PICTURES BY RADIO



J. L. Baird, of Glasgow, Scotland, above, has demonstrated a new form of Radio television with the device pictured here. He may exhibit in the United States soon.

"I DO NOT transmit photographs, or want to," declares J. L. Baird, the noted English engineer and inventor, who has invented an apparatus for television.

"I transmit," says Mr. Baird, "anything that happens to come before the transmitting end of my thoughts, its movements, and its form, with full detail. Television stands in the same relation to movement as broadcasting does to sound."

In a demonstration of his device in London, England, the inventor moved over several switches, started a motor, and lit several tubes. At first slowly, but with increasing speed, a thin sepia-colored line of light began to move across a ground plate glass screen at the end of a short black tunnel.

Inventor's Head Shown

When everything was running at the right speed the screen was evenly lit with a flickering light very similar to that produced by the early cinematograph.

"I will now put a doll's head before the transmitting apparatus and you can see the detail," said Mr. Baird, and in stooping to pick up the doll his own head and shoulders came before the eye of the apparatus, and the whole process of stooping down, picking up the doll's head, and placing it in position was clearly visible on the screen, even to the light and shade on his face as he moved about.

In another room a special portable receiver stood, called by Mr. Baird the "televisor." This was started and adjusted much as a Radio receiver is adjusted, and it reproduced what the transmitter was "seeing." This included the head of a man who walked about and opened and shut his mouth and eyes.

Radio engineers are confident that the era of commercial television is not far distant, and it is asserted that television sets, as well as Radio sets, will be placed on the market at a reasonable cost this year. Five hundred of Mr. Baird's sets are now being manufactured.

Efforts are being made, it is reported, to have Mr. Baird demonstrate his apparatus in the United States next fall at the Radio World's Fair in New York city. Arrangements are being negotiated.

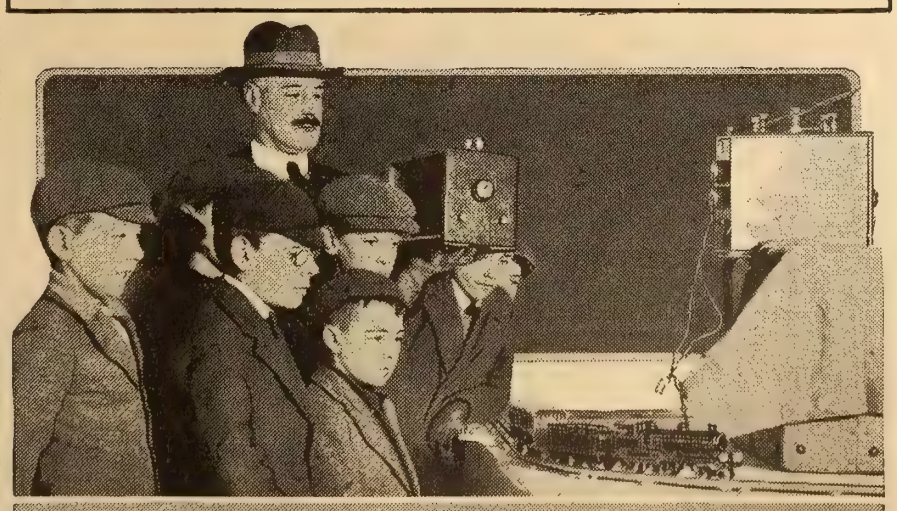
Canadian Broadcasters Unite to Promote Radio

Association to Improve Sending and Receiving Conditions

TORONTO.—All Radio stations in Canada are represented in the Canadian Association of Broadcasters which has recently been organized. The necessary formalities were concluded here at a meeting of representatives of the Canadian broadcasting stations. The following officers were elected: J. N. Cartier, CKAC, Montreal, president; M. Johnston, CFCA, Toronto, vice president; A. R. McEwan, Canadian National Railways Radio department, Montreal, secretary-treasurer; G. M. Bell, CKCK, Regina, and R. H. Combs, CKNC, Toronto, directors.

The announced purpose of the association is to improve the standard of broadcasting, to promote the interests of the owners of receiving sets, and to spread by means of Radio a wider knowledge of Canada, its advantages and opportunities.

ETHER IMPULSES CONTROL TRAIN



Major Raymond Phillips, London, England, holding control box in his hand, tells English schoolboys how ether waves can be made to control miniature train.

LONDON.—A model train controlled entirely by Radio was a feature of the School Boys' exposition which was recently conducted here.

Major Raymond Phillips, inventor of the system, declares there is no reason why it should not be applied to passenger trains.

In demonstrating his invention, he stood about sixty feet from the model. In his hand was a little box with an ordinary "buzzer" attached to it. As he touched the handle the train started away with a roar, but at another touch stopped, and then went backwards for a distance.

The achievement is accomplished by an adaptation of the ordinary principles of Radio transmission.

"I could take the driver away from a passenger train," the inventor stated, "without making any difference to the running. All that would be needed would be a fireman to stoke up the boiler, which would supply the steam in the ordinary way. Radio would operate the regulator of the locomotive and brakes."

The device does not transmit power to the

SMASH PRICE FIXING IN NEW WHITE BILL

HOUSE COMMITTEE ADDS TEETH FOR MONOPOLY

Also Inserts Provision for "Federal Radio Commission" to Regulate and Administer Radio

By L. M. Lamm

WASHINGTON, D. C.—The White Radio bill, as it has been reported to the house of representatives by the mercha marine committee, contains several important changes over the bill as it w introduced early in the session.

For one thing the committee inserted new monopoly clause in the bill wh was also contained in the White bill the last session of congress. This section, known as section four, as it is now contained in the bill reads as follows:

Anti-Monopoly Teeth Added

"Section 4. It shall be unlawful for any person, firm, company, or corporation, in any manner or by any means, (a) to send or carry, or to cause to be sent or carried, from one state, territory, or possession of the United States or the District of Columbia to any other state, territory, or possession of the United States; or (b) to bring, or to cause to be brought, into the United States or into any of its territories, or possessions from any foreign country, any Radio vacuum tubes or other Radio apparatus or any of the parts of either, whether patented or unpatented, accompanied or then or at any time affected or impressed by or with any condition, agreement, instruction, obligation, or limitation, the purpose or effect of which is to fix the price at which the purchaser may resell the same, or to prohibit or restrict the parties by whom or the purposes for which said tubes and apparatus or the parts thereof may be used."

Want Federal Commission

The committee has also inserted a provision in its reported bill which states that this act shall not apply to the Philippine Islands or the Canal Zone and provides that in Radio international matters these two places shall be represented by the secretary of state.

A still further change was made in the bill in that the United States was divided up into five zones instead of nine, and that there are to be five members of what is to be called, according to the new bill, the "Federal Radio Commission," instead of nine members as provided for in the original White bill.

Not more than three of these members are to be of the same political party and "no member of the commission shall be financially interested in the manufacture or sale of Radio apparatus or in the transmission or operation of Radio telegraphy, Radio telephony, or Radio broadcasting." The other changes in the bill as reported out by the committee are minor ones.

WGY Celebrates with Voice of 50,000 Watts

Broadcast Birthday Program Up from Nine Cities

SCHENECTADY, N. Y.—WGY, the broadcaster with the 50,000-watt voice, celebrated its fourth birthday on February 20 by broadcasting a program picked up from nine cities. Six other stations broadcast the program simultaneously.

When WGY first went on the air it had a 1,000-watt voice. Today it is licensed to speak regularly with 5,000 watts power and on Saturday and Sunday the station may express itself with ten times greater power or superpower. Further, WGY sometimes speaks with four different voices simultaneously for its words and music may be picked up on 41 meters, 109 meters, 1560 meters and 379.5 meters.

Hearing on Radio Monopoly Is Postponed Until April 1

WASHINGTON, D. C.—At the request of attorneys for the Radio Corporation of America, the taking of further testimony by the Federal Trade Commission in its Radio monopoly case was postponed from February 15 until April 1. This case has been postponed time after time, but generally at the instance of the commission itself. The hearing when it is continued will be held in New York city.

Associate Justice Broadcasts

NASHVILLE, Tenn.—Associate Justice Edward T. Sanford of the United States supreme court was speaker of honor over WSM here recently when the George Peabody College for Teachers held an alumni reunion via the air. Over ten thousand alumni in various parts of the country listened in.

CINCY'S CIVIC RADIO BOLSTERS BUSINESS

WSAI LIFTS VOICE OF CITY TO NATION OF LISTENERS

Programs Go to 400,000—Business Picks up—Citizens Gain New Self Respect

CINCINNATI.—When a city has reached the stage where it can pick business out of the air, it has achieved about the last word in commercial enterprise. The distinction belongs to Cincinnati.

Some weeks ago Cincinnati began a series of twenty Monday night community Radio concerts, broadcast over station WSAI, and made Radio and commercial history in so doing. It was the first time that a community, as such, had found ts voice, and that voice was lifted to nake the world happier. "These superprograms," the community broadcasting committee of the Chamber of Commerce announced, "are Cincinnati's contribution to the happiness of the world."

Unsolicited Business Turns Up

Business was not solicited—not even suggested—in connection with any of the programs. Indeed, it was made a hard and fast rule at the very outset that the concerts would be kept free from any suggestion of commercial advertising. Not even the name of the owner of the broadcasting station is permitted to figure in the announcements.

And yet, such is the magnetic power of Radio in the highest form of its application, that it is already yielding returns far beyond the expectations of those who fathered and fostered the community broadcasting project. The best and most lasting return, of course, is good will; and that the programs inspired from the beginning. And coming now, in increasing volume, is a return in the way of business to Cincinnati manufacturers and merchants.

Programs Go to 400,000 People

Many Cincinnati concerns have adopted a policy suggested by the community broadcasting committee, of sending monthly announcements to their respective mailing lists, in which the programs for the ensuing month are listed. Nearly 400,000 such announcements were mailed out last month. In addition, the programs are printed in the house organs of scores of other concerns.

The Cincinnati community concerts are under the direction of Fred Smith, one of the more popular Radio announcers. In conjunction with Edward J. Hoff, chairman of the community broadcasting committee, he has developed programs of an exceptionally high artistic standard. This goes, too, for the "Syncopated Hour," with which each program is concluded.

WENDALL HALL MAKES BIG RECORD CONTRACT

"Red-Headed Music Maker" to Be Exclusive Star

CHICAGO.—Wendell Hall, noted song composer, whose name has been linked with Radio for the last five years, has scored the greatest "hit" of his meteoric career. The "Red Headed Music Maker," as he is familiarly known to Radio fans all over the world, has signed a $100,000 contract with the Brunswick-Balke-Collender company to make records for them exclusively.

Papers were signed recently in New York which make the international Radio favorite one of the highest salaried artists of Syncopation and Jazz fame. Mr. Hall will record his latest compositions for Brunswick and also will sing many other popular song hits. He is to make sixteen recordings a year.

"A Celebrity a Day," New Feature at Station WGN

CHICAGO.—A novel feature, entitled "A Celebrity a Day," has been inaugurated by Station WGN, here. Each day a recognized leader in some field appears before the WGN microphone and gives a talk pursuant to his particular line of endeavor. Among those who have taken part in the new feature are: Richard Barthelmess, screen star; Garr Williams, cartoonist; Fielding H. ("Hurry-Up") Yost, Michigan athletic mentor; and Frank O. Lowden, former governor of Illinois.

"Alarm Clock Hour" at KMA

SHENANDOAH, Iowa.—To find a spot on the air where it would not be interfered with by any other station, KMA, May Seed and Nursery company here, now has an "alarm clock hour" of entertainment beginning at 6:00 a. m. Central time.

Voice Culture Is Given Through Denver Station

KOA Broadcasts Vocal Instructions To Students and Teachers

DENVER.—What is believed to be America's first Radio course in voice culture, was launched here recently by Station KOA of the General Electric broadcasting chain.

Thousands of listeners, especially voice teachers and pupils in small centers of population, have seized upon this opportunity to learn more concerning the principles of voice training. Lessons are given during the Monday evening educational program and are intended primarily as a supplement to personal instruction by resident teachers.

KGW WILL INSTALL HIGH-POWERED SET

PORTLAND STATION TO USE 1,000-WATT EQUIPMENT

Arrangements Complete to Have Super-Station Operating and New Studios Ready by April

PORTLAND, Ore.—Station KGW, the Morning Oregonian broadcaster here, has announced that within the next two months a superpower transmitter of 1,000 watts of power will be installed to replace the 500-watt equipment now in use. All arrangements have been completed for the inauguration of the new station around the middle of April.

The set now in use at KGW has been in daily use for the past four years, but with the improvements planned the station will enjoy the distinction of being the highest-powered, precision-built transmitter in the Northwest. Beautifully furnished double studios with an adjoining control room and artistically designed reception room for waiting artists, and a three-room office suite will add to the dignity of the enlarged station.

Berlin Broadcasts at 2LO

LONDON.—Irving Berlin, famous song-composer, who is here on honeymoon with his bride, formerly Ellen Mackay, daughter of the president of the Commercial Cable company, has broadcast from 2LO on the subject of the composition of popular melodies.

Radiotone Loud Speaker

Now *Only* $19.95

Was $25.00

The BEST Radio Affords

$1.00 down!

Yes, Genuine Radiotone loud speaker—the same loud speaker that is selling everywhere for $25.00—now at a sweeping cut price, only $19.95 and on easy monthly payments, besides! Only $1.00 with the coupon below brings the Radiotone to your home on approval for 30 days! No radio is complete without a loud speaker—a *good* loud speaker. The whole family may "listen in" at the same time, leisurely—instead of taking turns at the headphones. Or if you have a loud speaker now that isn't satisfactory, that doesn't bring in stations loud and clear, this is your opportunity to get a first class loud speaker—yes, the best and we'll *prove* it on this offer—at an astounding rock-bottom reduced price, direct—and on easy, monthly payments besides!

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crouching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black fiorduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-9812 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker, I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total reduced price, $19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8728A—$19.95

LEMON OR CUSTARD PIES HARD TO MAKE

HOW TO KEEP UNDERCRUST FIRM IS BIG PROBLEM

Miss Betty Crocker Gives Two Methods of Preparing Great American Dessert Properly

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

ONE of the questions we have had to answer hundreds of times is "How can I make a custard pie or perhaps a cream or lemon pie, without having a soggy undercrust?" And another that comes as often is "How can I make a nice creamy meringue that will stand up and not shrink and be tough?" I am going to try to answer these problems for you.

It is very important that the undercrust of any pie be well baked and not soggy, not only because a soggy crust is unpalatable, but also because it is indigestible. There are several ways of baking crust for the one crust pie. For cream, chocolate or lemon pies, the crust is usually baked before the filling is put in. You may also use this plan for custard pie if you wish. Sometimes for pumpkin and custard, we bake the crust in a very hot oven for five minutes, then add the filling and continue baking at a lower temperature. If the crust is not baked first, it may be protected by a coating of egg white so that the liquid of the filling will not soak into it. Beat the egg white just enough to break it up, then brush it over the pie crust before the filling is put in. This is a good method to use for juicy fruit pies or custard or pumpkin pies when the filling is baked in the uncooked crust. When the crust is baked before the filling is added, the egg white is unnecessary.

Difficult Problem

It is very difficult to bake custard pies successfully, because of the fact that the crust and filling require entirely different temperatures. All pie crusts or pastry of any kind should be baked in a very hot oven so that the steam and the layers of air in the dough may expand quickly to make a flaky crust. On the other hand, the custard filling is made of eggs and milk, both of which are tough-

(Continued on page 12)

PAVES THE WAY TO MEN'S HEARTS

Miss Vivette Corman, shown above, has won thousands of friends among the housewives of the country through the daily Table Talks of Westinghouse Station KYW, at 11:35 a. m., Central time, and the correspondence received at the station shows she has a host of admirers among the married men, who claim the Table Hour has given them a lot to be thankful for.

SHORT WAVES

By Marcella

"That adorable" (Gladyce's adjective) announcer of KYW who keeps his voice in trim from the Congress hotel studio and known as Harold Isbell, can also be crossed off the prospect list, for he is happily married. My, my, this KYW outfit sure keeps the ministers busy! Harold is in charge of the "Insomnia Club." Formerly of KFI, Los Angeles. No, I'm not sure whether his wife was ever in the movies He lives in Maywood, a western suburb of Chicago, but that's nothing against him. He has nice, curly hair and wears the latest in clothes. No mustache. What's the idea—are mustaches becoming popular with us ladies again? Well, yes, I do like a neat one, but hate them waxed.

* *

Anna, who is interested in Paul Johnson, the tall, handsome, brunette medic-announcer of WCCO, will no doubt be grieved to learn that after announcing a four-hour American Legion revue from the Gold Medal station, Paul had to go to the hospital and have his tonsils removed. However, he is still six feet two or three inches tall and his voice is even more sympathic now. Married? No.

* *

Why should a broadcasting station engineer receive so much applause, eh? "Romeo and Juliet," both of 'em, want to know if Walter C. Evans, "that charming Chief Engineer of KYW," is married. The answer is yes.

* *

Jack Nelson, WJJD's charming voice, is handsome, thin and—married. Another heartbreaker eliminated! But I'm sure, if you write to Mrs. Nelson, she will be glad to tell you all about what a fine husband Jack is.

* *

How-Do-You-Do Man Harry Geise, ex-WIBO, Chicago, regarding whose whereabouts many of my girl friends seem anxious, is now out in the land of palm and pepper trees, grease paint and celluloid—in other words, Hollywood, where men are men and long pants and hats to be shunned. Harry has been appearing at the various Los Angeles and Hollywood stations and probably will soon be a fixture at one of them. He likes Holly-

LEMON OR CUSTARD PIE

(Continued from page 11)

ened if baked at a high temperature. That means that if the oven is hot enough for the crust, the filling will be watery, and if the temperature is right for the filling the crust will be soggy. So no wonder that you have had trouble.

This is the way we solve that problem. Put the custard pie into a very hot oven for about 15 minutes to set the crust, then reduce the heat a slow oven so that the filling will not be overcooked. If you do not have a thermometer to gage your oven temperature, I would advise you to bake the crust five minutes in a very hot oven (about 500°F.) then add the filling and continue baking in a moderate oven. This is the way we make custard pie in our Gold Medal Model Kitchen:

Two eggs, ¼ cup sugar, ⅛ teaspoon of salt, 2 cups of milk, ½ teaspoon of vanilla, nutmeg.

Method: Beat the eggs slightly. Add sugar, salt, milk and flavoring. Pour into the crust. Place in a very hot oven and bake 15 minutes, 450°F. Reduce the temperature to 350°F. moderate oven and continue baking until done. This amount will make one nine-inch pie. If you use the other plan which I suggested, bake the crust five minutes in a very hot oven, then add the filling and bake about 40 minutes in a moderate oven, 350°F.

Recipe for Lemon Pie

There are many kinds of fillings for lemon pie, but the favorite seems to be the clear lemon filling covered with meringue. This is the kitchen tested recipe for lemon pie:

One cup sugar, ¼ teasoon of salt, 6 tablespoons of flour, 1½ cups of water, 5 tablespoons of lemon juice, grated rind of 1 lemon, 1 teaspoon of butter, 2 eggs.

Method: Mix sugar, salt and flour together. Add water and cook until clear. Add lemon juice, grated rind and butter. Add the beaten egg yolks and cook 2 minutes. Pour into a baked pie shell. Make a meringue of two egg whites and 2 tablespoons of sugar. Cover pie with meringue. Bake 20 minutes in a slow oven, 300°F.

And now for the meringue. The texture of the meringue will depend very much upon the freshness of the eggs used, and it will be tender or tough according to the temperature used in baking. Always remember that eggs should never be cooked at a high temperature because long cooking or high temperature toughens eggs. Therefore, your meringue should be baked in a slow oven, and never in a hot oven. Meringue made of granulated sugar seems to be the most satisfactory because it has a much better flavor than one made with powdered sugar. A meringue made of powdered sugar is lighter and fluffier and stands up better, but I think you will find that meringue made with granulated sugar is more satisfactory.

I hope that I have answered some of your questions and given you some suggestions that will help you to make a more perfect pie.

* *

A mammoth glee club concert was broadcast recently by WEAF, New York, when the third annual concert of the Associated glee clubs, directed by Walter Damrosch, was sent over the ether.

SHORT WAVES

By Marcella

(Continued from page 11)

wood, likes California, likes the climate, (adv.), and intends to stay and, in the words of Rob Wagner, become a Californian. And finally, to crush many maidens' hearts, I must add that he is married and has a daughter.

* *

To get rid of a bunch of correspondence all at once, I shall now dwell upon the "Ray-O-Vac" twins. This will take care of the nice, complimentary notes from D. H., "Miss Blarney," and a number of other friends who seem anxious regarding this duo. Both are married. Both sing. Russell Wildey is the pianist. Both are natives of Chicago, and have dark complexions and hair, which is natural, considering the soft coal smoke prevalent in their home town.

* *

Another boy chum gets curious! J. W. McC. wants me to "find out if Kay Ronayne, my favorite Radio entertainer, thinks Rube Bloom is the best piano player in the country? If not, who, or any ideas she may have?" Well, J. W., Kay tells me that she thinks Murray Bloom is the best. Close anyway, but she hastened to remark to me to tell you that she always accompanies herself. And she never gets the piano out of time with her singing, which proves she is a good accompanist.

* *

"Sweet Adeline" is on the right trail. Inquiries about a bachelor by the name of Lambdin "Tot" Kay, of WSB. Ever heard of him? Sure. Where has he gone? Still at Atlanta, although you probably tuned in for him while he was away for a few days helping out some other broadcaster. He is popular that way.

* *

Why ask me if I am married, John N? I told your several issues back that I was free and footloose. Sure, send on the candy, I have a pet Pekingese that loves it!

* *

Do we of the Digest ever list Jack Little under any other name in the programs, asks L. H. No, dear sir or madam, as the case may be, I nor we never do. It's always Jack Little in print, although he doesn't always advise us early enough of his route to keep you informed.

* *

Uxtry, Uxtry! Phillips Carlin, popular WEAF announcer to be divulged. Watch Marcella's further efforts in a future issue, may be the next. I'm only now trying to find out if he is married or not, and what his favorite dessert is. When I tell you, I bet he'll be inundated with his pet delicacy, if your letters are a barometer of your fervor.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

"a Step On the Stairs"

Will Be Broadcast as a Play

ROBERT J. CASEY'S thrilling mystery story appearing exclusively in Radio Digest and dramatized as a Radio play by Fred Smith, pioneer in this field, will be broadcast from the following important and leading stations covering the United States from coast to coast and from Canada to Mexico.

The schedule, where known at the time of going to press, is given. Stations whose time of giving the play is yet unknown, will announce this feature over their microphones.

WHERE AND WHEN TO DIAL

WOC, Davenport, Palmer School of Chiropractic. First episode at 10:30 p. m., Central time, on Friday, February 26. Dial 483.6 meters or 620 kilocycles.

WOAW, Omaha, Woodmen of the World. First episode at 9 p. m., Central time, on Saturday, February 27. Dial 526 meters or 570 kilocycles.

KGO, Oakland, Calif., General Electric company. First episode at 9:45 p. m., Pacific time, on Saturday, February 27. Dial 361.2 meters or 830 kilocycles.

KOA, Denver, General Electric company. First episode at 9:30 p. m., Mountain time, on Monday, March 1. Dial 322.4 meters or 930 kilocycles.

WCCO, Minneapolis-St. Paul, Gold Medal station. First episode at 10:05 p. m., Central time, on Tuesday, March 2. Dial 416.4 meters or 720 kilocycles.

WGY, Schenectady, General Electric company. First and second episodes at 8:15 p. m., Eastern time, on Friday, March 5. Dial 379.5 meters or 790 kilocycles.

WMAQ, Chicago, Chicago Daily News. First and second episodes at 9 p. m., Central time, on Wednesday, March 10. Dial 447.5 meters or 670 kilocycles.

WNAC, Boston, Shepard Stores. Time of producing first episode to be announced over the air. Dial 280.2 meters or 1,070 kilocycles.

WRC, Washington, Radio Corporation of America. Time of producing first episode to be announced over the air. Dial 468.5 meters or 640 kilocycles.

WHO, Des Moines, Bankers Life Insurance company. Time of producing first episode to be announced over the air. Dial 526 meters or 570 kilocycles.

WSAI, Cincinnati, United States Playing Card company. Time of producing first installment to be announced over the air. Dial 325.9 meters or 920 kilocycles.

A New York station, now concluding arrangements for the presentation of the serial mystery play, will be announced next week.

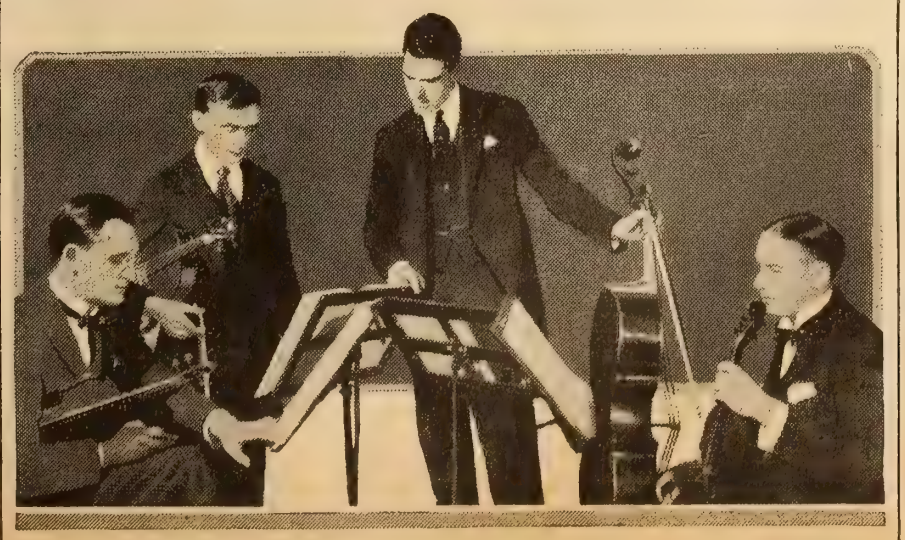
EPISODE ONE

THE SETTING

THE first episode takes place in the high-beamed hunt-room of the Turner homestead, a room that has been the scene of strange and mysterious crimes. The twelve guests, practically strangers to one another, who have just finished dinner, are sitting about the candle-lit table in the deep-cushioned leather chairs that the first Turner had brought with his bride from Spain a hundred years ago. Hari Singh, the Indian servant, has cleared the table. Mary Williams, pretty and curious, is asking questions of a man whom fate has thrown across her path for the second time.

THE CAST

Mary Williams.....A youthful guest
Henry Graves.....A mysterious man Mary had known formerly
Aunt Helen..... } Relatives
Cousin William..... }
Frederick Ardwyn.....Peleg Turner's lawyer
The Voice of the FYX announcer.....Through Radio receiver



The London String quartet composed of the four artists above, James Levy, 1st violinist; Thomas Petre, 2nd violinist; H. Waldo Warner, violaist; and C. Warwick Evans, cellist, will give the Atwater Kent program Sunday over the WEAF chain.

High Lights of the Week

GEORGE Washington university will make its entrance among the broadcasters of the East when a special program arranged by the students and faculty of that institution is broadcast by Station WRC, Washington, D. C., February 27th. Among the organizations who will take part in the program are the university glee club, the university string quartet, the university debating team, which has won honors both in the United States and abroad, and members of the faculty of the school.

An old friend returns to the air Sunday evening when WEMC, Berrien Springs, opens its new superpower station. Students of the college will entertain. The London String quartet will please the fans who enjoy the Atwater Kent program Sunday evenings through the WEAF chain.

The new voice of Pensacola, WCOA, will give a military program Monday with the 13th Coast Artillery band and members. Sgt. Leo Donna Rumma, the Soldier Caruso, who has made a name for himself, will sing.

Comedy will rule the air from KGO, Tuesday evening, March 2, when James (Jim) Madison, famous maker of the Madison Budget of jokes, familiar to stage people, will appear before a KGO microphone, reading some of his latest. He will also present a comic musical skit, "Musical Memories," assisted by the Sierra male quartet, which will show the evolution of the American popular song. Jigs and reels played on Joe Flanagan's accordion will lighten up the ether at WGBS this same evening.

Wednesday is the date set for the old-time fiddlers contest at KWSC. Washington will send representatives from all parts of the state. Another western attraction will be the hour in the "Southland" with the Blue Bell Four at KOA.

"Chinese Civilization" is the interesting title of the talk to be given by C. Chen, at WGY during the Chinese program Thursday. The WGY orchestra will feature oriental music. A midnight frolic called "The Silver Forest," is the Thursday feature of WBZ. The affair will be conducted along the lines of the famous Ziegfeld midnight frolic atop the New Amsterdam theater in New York.

A new educational feature at WTIC will be the cartoon lesson Friday by Bud Kingston, Radio and art editor of the Two Heralds of Bridgeport. Mr. Kingston will review any sketches his listeners wish to send in. Two well-known artists, Walter Gieseking, pianist, and Josef Szigeti, violinist will be featured on the Baldwin hour this same evening from the WJZ chain.

KWSC, Pullman, Wash. (348.6m-860kc), 7:30-9 p. m., Cougar Co-Ed orchestra.

STATION WSWS BACK UPON AIR LANE AGAIN

New 1000-Watt Transmitter Joins Ranks of Chicago Broadcasters

CHICAGO.—An old Radio favorite greatly improved and ready to meet its old friends and add a million new ones is being heard again on the air. WSWS, the S. W. Straus & Company station, formerly WCEE of Elgin, has resumed its place in the ranks of Chicago broadcasters.

Station WSWS is licensed to operate on the old wave band of former WCEE which is 275.8 meters. A division of time will be made with WORD at Batavia, Ill. A modern plant, housing a new 1,000-watt transmitter, has been constructed at Woodale, eighteen miles west of Chicago. All broadcasts will be handled by remote control from the studios in the Straus building.

The direction of program and chief announcing has been entrusted to George Junkin, formerly associated with the Drama League of America.

Talent schedules and program arrangements are in charge of John Clark, formerly assistant director of Station WHT, where his Radio playets and continuity presentations have been a feature of that station's programs since it has been on the air.

KDKA Has Big Musical Library to Draw From

Station Needs Large Collection of Manuscripts and Music

PITTSBURGH, Pa.—Equipping a musical library to meet the demands of aerial entertainment is a task of no mean caliber.

Taking KDKA as an example, its library, translated into monetary terms, represents an investment in excess of $5,000.

The repertory that this section has to draw from is one of the most unique and extensive collection of manuscripts and music that has ever been assembled by a single organization. Everything of importance, from Alpha to Omega in things musical, has a place in this library—which has become a source adequate to the diversified demands of KDKA's vast audience.

The repertory embraces all the oratorios, grand and comic operas, salon music, concertos, dance and classical selections, hymns and roundelays, ballads and dirges, music for solo instruments and smaller groups such as duets, quartets, and sextettes.

USES KENT HOUR TO HOLD CONGREGATION

CHURCH ATTENDANCE LOW AT EVENING SERVICES

Pastor Enlists Radio's Aid by Giving Excellent Sunday Night Programs Broadcast Through WEAF

DAVENPORT, Iowa.—"How to Keep the Atwater Kent Programs from Ruining Sunday Evening Church Services" should be the title of a recent letter received by WOC here from a pastor of a large church in a midwestern city.

An estimate gives credence that twenty or thirty millions of people throughout North America listen in each Sunday evening to the Atwater Kent artists broadcasting through WEAF and a dozen other linked stations, of which WOC is the most westerly.

The pastor writing the letter found that these superb programs tended to decrease the attendance of his Sunday evening services. Many church members preferred to tune in the Atwater Kent hour to hearing the church services.

Pastor Solves Problem

But the pastor used his head and beat Radio, or rather enlisted Radio in his cause.

His solution of this knotty problem was to bring Radio into the church. The church service is now so arranged as to conclude in time for the Atwater Kent features to be received from the nearest station on the WEAF chain, which in this case was WOC.

Instead now of the congregation hurriedly leaving at the conclusion of the church service—or before—they sit quietly in their seats and hear the very best music by the best artists ever heard via Radio by means of a set installed right in the church. And thus the problem of retaining good church attendance, while good Radio programs were on the air, was solved.

"Sam 'n' Henry" Still Mystery to Listeners

Boys from Birmingham Keep Radio Fans in Suspense

CHICAGO.—Guessing who "Sam 'n' Henry" are is rapidly becoming the favorite sport of Radio fans who listen regularly to WGN, and they are busy flooding the station's mail bags with all manner of wild surmises. "Sam 'n' Henry," are the two colored boys heard each evening over WGN at 10 o'clock, Central time.

Fans made their acquaintance about a month ago when they boarded the train in Birmingham, Ala., bound for Chicago. Each night since then one of their adventures has been chronicled in their own humorous dialect. Their ten-minute period each evening is rapidly proving one of WGN's best liked features. It is low comedy translated into terms of Radio entertainment, and regular fans have followed the boys through many humorous vicissitudes.

They have become so popular that listeners are beginning to inquire about their actual identity. Visitors to the studio at 10 o'clock—most of them attracted by the desire for a look at the happy pair—go away disappointed, as the boys are kept carefully concealed. As soon as their time on the air is completed, the WGN telephone operator prepares for many telephone calls from listeners who wish to hazard their guesses.

Foreign Listener Licenses Help to Prevent "Blooper"

WASHINGTON.—A survey taken of regulations in some countries governing the use of receiving sets reveals peculiar requirements. In Japan, for instance, to get a license to operate a Radio receiver, the listener must promise to tune in only Japanese stations. In New Zealand, the fan must be over fourteen years of age to get a license. In Greece, the fan must be a subject of that country. In other countries, fans must prove themselves trustworthy and of good conduct. In the United States—well, listen to the "bloopers."

WPG, the World's Playground station at Atlantic City, was one year old the beginning of this year. A special birthday party was celebrated during which twelve different hotels and clubs contributed to the program.

Regenerative Sets Not Alone Bloop

THE blooping, or rather anti-blooping campaign recently inaugurated by this publication as a result of the hideous demonstration of radiation afforded during International Radio Week, has brought thousands of pledges. It likewise has brought hundreds of letters from listeners which show that a mistaken idea is prevalent.

This idea is that ONLY a so-called "regenerative" receiver can radiate or bloop.

Nothing could deviate more from the truth. Why this belief has gained such a following, it is difficult to understand. Some one evidently has been "grinding an axe" for the regenerative set manufacturers. As a matter of fact a super-heterodyne can be—and often is—operated so as to bloop unmercifully.

A neutrodyne or a tuned radio frequency receiver can also make the ether merry with squeals and howls.

We might as well admit it. Only about two per cent of the tube sets in use won't bloop.

Radiation can be modified by set design and the circuit used. It can be made ALMOST foolproof, and even wholly so. The best cure for blooping is the education of listeners. We must learn how to listen in.

This sounds foolish, perhaps, but it is true. Many of us think we know all about it. We can tune them in from a thousand miles away, so we guess we don't radiate. Ha, there is the mistake. Just about the time we are turning them in a thousand miles away, we are setting up a disturbance in the ether that can be heard for miles around.

We believe magazines, newspapers, Radio clubs and broadcasting stations can do much to stop blooping. They can help educate listeners to operate sets in such a fashion as to avoid radiation entirely, or at least decrease it to a minimum.

We have been told by many readers that we are starting at the wrong end; that we are "looking through the wrong end of the telescope; that we should stop the manufacture of blooping receivers; and that we should "come out and say" that regenerative sets are causing the trouble.

But our answer is given. We back our statement that nearly every present day set will bloop—it all depends on the operation.

Learn how to tune the set properly. THAT is the secret of the "I Won't Bloop" pledge.

Celebrities Hold Interest

TALKS with general appeal, with popular interest, by authorities are being scheduled by the leading broadcasters. This is a good sign. Not alone does it show that broadcasting is becoming fully recognized by the leaders of today, but it shows that stations are diversifying their musical and service programs with information of the highest class.

We have listened in the past few months to a number of these talks. Commander Donald B. MacMillan, arctic explorer, has told from WJAZ and other stations what he learned on his last expedition. Floyd Gibbons, Chicago Tribune foreign staff correspondent, over WGN, described an intimate picture of the World War. Paul Scott Mower, Chicago Daily News foreign staff correspondent, was the pleasing surprise which greeted our ears from WMAQ. He told about his visit behind the Riffian lines with Abd-El-Krim. Lieutenant Smythe was tuned in both at WJZ and WAHG, telling of his canoe trip from Nova Scotia to New York.

There are others. We have not heard or noted all. The point we wish to make, however, is that talks by such men as these are, in our estimation, far more valuable and entertaining to the invisible audience than the usual run of repeated musical numbers. Talks, straight from the men who are best authorities on their respective subjects, are always welcome and not always obtainable.

We like to hear news of the world direct from the men, from the living voices of those men, who have lived the news stories they describe through the microphone. Stories direct from celebrities such as these are even better than when read from print. Such talks tenaciously hold the listeners' interest.

RADIO INDI-GEST

Radio Wanderlust

The wanderlust is in my hands tonight!
My fingers will not let the dials be!
I've wandered from the east coast to the west—
I've heard the restless splashing of the sea!

In cities—in the valleys—on the lake—
I've lingered only long enough to hear
The "Stand-by" or the "Sign-off"—then good bye!
I'm off for other stations far and near!

Across the mountains I have picked my way
To stop along the Californian coast!
But, restless, I have taken up the trail
For further conquests over which to boast!

The highways of the sky are beckoning me—
And O, I can't resist their thrilling call!
A million little songs along the way
Are singing and I'd like to hear them all!

But linger long I cannot seem to do!
For something calls me on and ever on!
It is the wanderlust!—It's magic spell
Has kept me sitting here 'till it is dawn!

CHARLES ALLEN BRANHAM

$.00,000 Reward

The other night I listened to an evening's entertainment from several stations and did not hear "Yes Sir, That's My Baby" or "The Prisoner's Song." How about it? LISSNER INN

One can never tell. Maybe "The Baby" was "The Prisoner's" darlink and he flew over the high prizun walls and they went out on the oshun in the grand ship all mounted in silvur and gold. Now they may both even be willink to die. We hope so.

The Scotch Get a Rest

Dear Indi: The following telegram was received at Station KFI during a rebroadcast through WGY Schenectady.

"KFI, I am hearing you on a crystal set in the Bronx. I knew I didn't have to spend a lot of money to hear the Pacific coast. Isidore Levinsky."

The Cure-All

My sister had the measles and my brother had the mumps,
And Ma took down with Rheumatiz and Pa was in the dumps;
But Santa brought a Radio, and soon as it was in
My poor old swelled-up brother most forgot his double chin.
And little specked sister with the guinea eggy nose
Got up and broke the looking glass and tumbled into clothes.
And Ma gave up her rheumatiz and took to playing golf,
And Pa and all the rest of us just laughed our blamed heads off.

The Radio, The Radio, Hurrah! By Jing!! Gee Whizz!!!
I'll let the world take all the rest and keep the best there is.

ALEX C. D. NOE

The Quantity of Mercy Is Restrained

There are several hundred fans who may be disappointed because we are not going to print all the last lines submitted for the alleged poem on what should happen to a pesky announcer. A wave of compassion prevents it. Oh, hearts of stone. We think there must be a lot of windows in front of which lilac blossoms wouldn't care to find seed nor canaries the courage to sing.

Lend Me Your Ear Phones

WE ARE TRYING TO FIND THE FIRST RADIO ENTHUSIAST. NOMINATIONS ARE OPEN FOR THE "FAMOUS FANS" CLUB. WE WILL START OFF THE LIST WITH BILL SHAKESPEARE, BECAUSE HIS "ARIEL" CAUSED A "TEMPEST." HAVE YOU ANYONE TO RECOMMEND FOR MEMBERSHIP?

L' Envoi

Thanks to thee, my European friend,
For the lesson thou hast taught
Of the number of vile villians here
Who remain unhung, uncaught,
Who poison the air with awful squeals
And a good set goes for naught.

F. L. DE VOTO

Heat Up the Incinerator, George

T. E. Blase of St. Paul asks, "What is the thing you call 'blooper'?" Well, friend, time and experience alone will tell you what a blooper is and then you can make up your own definition. But, anyway, he is everything we call him and we can't tell you what that is, because this edition must go through the mail. Look for scorching invective in our annual asbestos edition.

Must Be An Old Skate

I know a Radio fan who has water on the brain. The cold weather freezes it and causes things to slip his mind. DAVE

The Traffic Holdup

Condensed

BY DIELECTRIC

You know they are getting ready for the Sesquicentennial in Philadelphia, and the broadcasting stations there will consider themselves the mouthpieces of the nation during that important season. If I could suggest, without the support of General Butler, a small matter of hygiene, it would be to the effect that Station WOO seek a Radio dentist and have those teeth attended which cause a harmonic on a low wave length. As a mouthpiece, the Radio listeners have some aversion to it so long as this inexcusable faulty transmission continues. Have it removed, please.

Now we go to Ole Virginny, where WRVA at Richmond entertains. What I have to say concerning the excellence of their dance program will appear between these lines. It isn't that, that warrants using this space, but the manner of announcing. When one number is concluded the announcer grabs just enough time to give the call, city and succeeding selection before we're on our way again.

The Uptown theater in Chicago is receiving considerable attention through the broadcasting of its musical entertainment by Station WEBH. Possibly some of the features do not call forth excited comments of praise, though many of them may. The orchestra's playing of Liszt's "Les Preludes" was well done, a composition eliciting the best in a musician as it is one of the really beautiful works in the library of classics. Even those unfamiliar with it remark to that effect.

I know perfectly well how many there are who have no incentive for listening to grand opera productions. There was a time when the end of a first act seemed like the first half of eternity, but now even olives find favor with me. To those who have found something to like in this style of music, the recent series of performances by the Chicago Civic Opera company in Boston, will make friends for WNAC, in that city. The stars appearing were among the best to be heard, while the operas chosen for broadcasting could not easily have been improved upon.

Then there was Mary Garden. To have that artist appear before a mike and sing as she did at the French company dinner in New York, is something to remember. Of course, there is the chance of something going amiss whenever an especially attractive Radio program is arranged. So in this instance the recurring trouble Station WJZ had with their remote control made some listeners tear their hair and resort to foreign tongues to give greater liberty to their thoughts. Never has Dielectric heard this singer in better voice and her first appearances in this country are distinctly recalled. She is alone in a class.

Tuning to Station WHO, Des Moines, the other night in time to listen to a concert provided by the Bankers orchestra, I was very much pleased with the musical quality of the orchestration and the precision with which they played. These are the concerts which bring distant listeners back for more. Incidentally it may be remarked how distinctly the announcer gives the station call letters. Thanks.

Community concerts carry entertainment far outside the walls of local auditoriums; whether an influx of outsiders will result, remains to be seen. Purely as an enjoyable Radio feature these concerts are a success for they present (in most instances) features more or less unusual to listeners in. Cleveland inaugurated such a series and broadcasts the first through Station WEAR, opening with selections sung by a Swiss male choir and mixed voices. This music was new to most of us and very delightful.

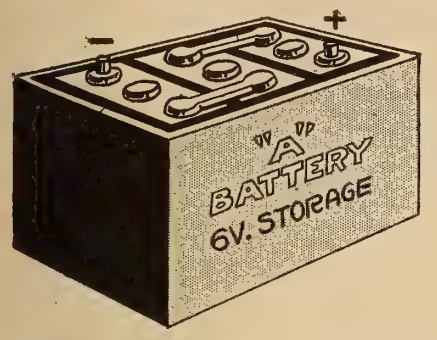
ABC Radio Fundamentals for Everybody

Chapter VIII—Types of Batteries

By Milo Gurney

BEFORE taking up a discussion relative to the two types of batteries used as sources of direct current which are required for the operation of Radio receivers employing vacuum tubes, it appears as essential that the nomenclature applied to such batteries, by which they are designated in terms of volts and amperes, or ampere hours, be given.

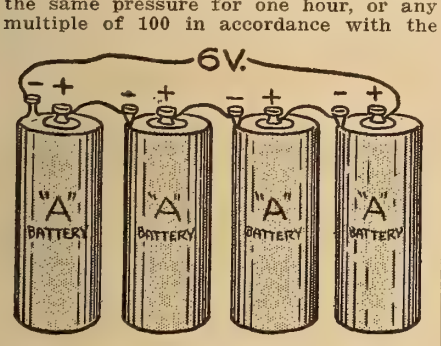
The volt is a unit of pressure, while the ampere is a unit of quantity, the unit of opposition to the flow of current in an electrical circuit being termed the ohm. Thus in any electrical circuit, through which current is caused to flow, we find the three factors of voltage, current and resistance. With these three factors known, it is obvious that if a pressure



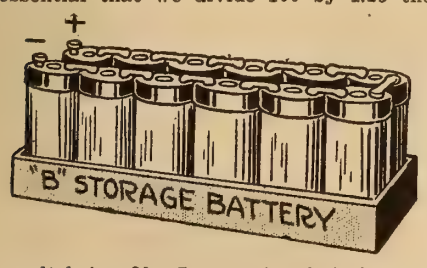
of one volt is applied against a resistance of one ohm, a current value of one ampere will flow.

Determining Strength

Radio batteries, and particularly those of the wet storage type, are rated in volts and amperes, such as 6 volts, 100 amperes, etc. Let us then assume that we have a battery which furnishes a pressure of six volts and whose capacity is 100 amperes. This means that the battery will deliver one ampere at six volts pressure for 100 hours, or 100 amperes at the same pressure for one hour, or any multiple of 100 in accordance with the



number of amperes used per hour. To further illustrate, the average five tube Radio receiver using 201-A type tubes requires a current or amperage of 1.25 amperes per hour to properly heat the filaments, their individual ampere draw being .25 of an ampere. Therefore, in order to determine the number of hours of service which a fully charged 100-ampere battery will operate such a receiver, before the battery will require recharging, it is only essential that we divide 100 by 1.25 the



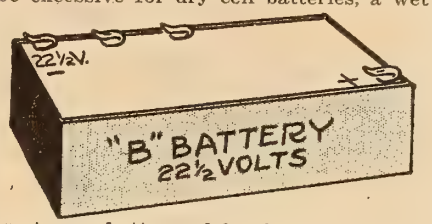
result being 80. In practice, it is best to consider but 75 per cent of the total ampere hour capacity of the battery, as the determining recharge factor, in order that a sufficient margin of safety be allowed.

A like condition prevails with the use of B batteries, with the exception that they are only rated in volts, as the current draw not only continuously varies, and is of the order of thousandths of an ampere, but usually remains as sufficient to supply one's requirements only until such time as the voltage of the battery has decreased to a point where it does not have a value powerful enough to force the required current through the resistance of the circuit.

Two Sources Needed

With this explanation, we may then pass on to indicate that each Radio receiver, as before stated, requires two sources of direct, or one-way current, for its successful operation. One is the B or plate supply battery, whose function is to maintain a positive potential or charge upon the plate of the vacuum tube, the other being the A or filament supply battery, which is required for the heating of the filament of the tube. While each of these batteries supplies only direct or one-way current, their values vary in accordance with the type of tubes used in the receiver. The A battery requirements vary from 1½ to 6 volts, the B from 16 to as high as 135, while, in special cases, voltages as high as 300 are found.

Portable receivers, and many of the super-heterodyne types, employ vacuum tubes whose filaments require but .06 of an ampere of current, and three volts for proper operation. These tubes are of the 199 class, the current being supplied usually from ordinary dry cell batteries, not unlike those used for door bell operation. The majority of receivers, however, use 201-A type tubes. These consume .25 of an ampere and operate at from 5 to 5.5 volts. As this amperage drain would be excessive for dry cell batteries, a wet



or storage battery of 6 volts, and a large ampere hour capacity, is generally used.

In addition, during the current year, there has appeared upon the market, current supply devices for filament lighting use, which operate directly from the alternating house lighting current, the function of these devices being to not only step down the voltage of the alternating current supply, but to also change it to direct current. Such converter substitutes are not sufficiently popular at the present time to warrant a detailed explanation of their operation.

B batteries, whose function has been explained, are common in both the dry and wet cell types, though through possible lack of proper charging apparatus, the dry cell type predominates, each is very efficient and of equal value.

Like the A battery substitute, the Radio market also affords B supply substitutes, which secure power from the

(Continued on page 24)

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

Genuine Fansteel

Balkite "B" Eliminator

Sent for Only

$1.00 Down

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

$5.00 a Month, if satisfied after trial

Only $1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your $1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only $5.00 a month until you have paid the total price of only $35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. Order by No. Y-8578A, $1.00 with coupon; $5.00 a month; total price $35.00.

A B C'S OF RADIO SETS

(Continued from page 23)

alternating lighting current. Their development is quite advanced over that of the A substitute with the result that there are several types which may be used with much satisfaction, where the purchaser is not concerned with first cost. Readers of Radio Digest have been offered an opportunity to not only study but also construct three forms or types of such B supply units, as very ably presented in the current issues by Mr. George Walters. The B supply units, as described by this capable writer, should become very popular, as they offer much of interest and satisfaction.

Care of Batteries

The need for charging an A battery is only determined by the use of a hydrometer, which is purchaseable at all Radio stores or battery service stations. A fully charged wet battery should register a specific gravity between 1275 and 1300, and an indication of its charge being dissipated is shown when such a reading indicates a value around 1150. One should not therefore rely upon a voltmeter reading to determine whether the battery is fully charged, but should determine its condition solely from hydrometer readings, as outlined. Never add acid to a storage battery. The solution within the battery should at all times just cover the plates of the battery; when the solution has evaporated to the point where the tops of the plates are exposed, a quantity of distilled water should be added until the plates are again immersed. In the maintainance of a wet battery, one will often find that the terminals become corroded with a white and green substance resembling verdigree, which refuses to respond to the usual treatment of being removed through wiping with a cloth. As each home is usually supplied with a box of ordinary baking soda, it is then well to remember that a teaspoonful of this soda dissolved in two ounces of water makes an excellent neutralizing agent for the removal of this accumulation, it being only necessary to apply the solution with a dampened cloth upon the terminals affected. Bubbles, which give off frying noises will at once appear as evidence that the cleansing process is taking place.

Once they are cleaned, it is then advisable to smear the terminals with a light covering of vaseline, which will tend to stop recurrence of the nastiness of A battery accumulations.

Keep Batteries Clean

B batteries, as well as A batteries should always be kept wiped clean, thus avoiding minute short circuits. B batteries should be tested with a reliable voltmeter, for voltage only. When they have deteriorated to 75 per cent of their initial voltage value they should then be discarded, as it is not possible to renew their life. For illustration, a 45-volt B battery has served its useful life when it registers 34 volts, though it may still be used if the plate supply requirements are below this figure. In like manner a 22½-volt battery has served its useful life when its voltage has dropped to 17 volts.

(Next week's article will start a discussion explaining the most prominent types of circuits now on the market, and how they function.—Editor's Note).

GIRL AIDS DIZZY IZZY

(Continued from page 5)

Crash! Dizzy's double-duty turtle shell specks fell from his nerveless fingers and broke into a thousand pieces. For a moment he half stood and half sat as a man awakening from a long dream. Slowly his scattered senses mobilized between his ears. His naked eyes filled with tears.

"I see it all—now," he gasped hoarsely. "You are right. That is the answer. You shall hear from me again. You have performed a great public service for I am none other than Dizzy Izzy, the announcer. The world is waiting to know. I shall bear the message. To me will go the honor, but I wil not forget. Eureka! THE BLAH CLUB!"

And that, boys and girls, was the true answer to Dizzy Izzy's Problem. Never again was he serious.

"What became of the young lady?"

Well, that is another story. But you have all heard of the great BLAH Club of WOAW. There are 35,000 registered members and a waiting list of 25,000 more, and it is so exclusive that anyone who doesn't care to will not be admitted to membership.

It has been three months, now, since Dizzy Izzy officiated at the first initiation ceremonies. Males and females over sixteen years old are called "Boobs" and "Boobesses," respectively. All members under sixteen are called "Boobies." Every candidate must ride Brindle Betsy thrice around the red barn to the tintinnabulation of the bovine lavalliere. When it comes to dismounting the candidate is royally knighted by a barrel stave saber in the hands of Dizzy Izzy and his Court which consists of Cy Perkins, Gus, Ole, Fred Jessen, Bill Goodrich, Eddie Stuart and Mac Ohman.

The Blah Club takes the air from Podunk Center, remote control over barb wire. The club rooms are in Cy Perkins' general store and undertaking parlors. The Blah Club has included such entertainers as Jack Little and Lew Farris, the Eiffel Tower of Radio. The slogan is, "A little nonsense now and then is relished by the wisest men." There are many features. One is the matrimonial bureau which hunts mates for spinsters and bachelors. A "Lost and Found" department is maintained for stray animals.

There is a Razz Bureau for the knockers.

Many interesting letters are received from prospective members. Some excerpts follow:

"Dear Izzie," writes an applicant for membership, "I want to be inducted into the mighty Blah Club. I feel that if I were a member I would have more fun. You will need to kick the cow good and hard when you take me in. I am a Church, not a School House. I have got a rather high standing and there isn't much in my belfry. I have a good many members and more than one organ. Yes, you can knock the cow, bell and all over if you want to. Your old Radio fan, Dwight Church."

Another offering his pedigree for membership says:

"I am an evolutionist, old enough to grandfather in two places. Eat all I can get but can't sleep on account of listening in. Work when I have to. Walk on my hind feet and I am a little lame in the head. Otherwise my better half says I am all right. Don't forget friend wife, give her all the cow bells and head the critter north by east.

"Recommend that the Blah Club members appropriate sum to rebuild the Kansas depot that the woodpeckers knocked down. Respectfully, O. J. Pruitt."

Political Blah is provided by Senator Snag of Podunk Center. This is the mysterious, secret pass-word that gets you by the ether waves—"Blah."

"MOUNTIES" GREET SUN

(Continued from page 4)

slowly down the column. "It says here that they are goin' to wireless some messages to the boys clean around the rim of the Circle from Greenland to Alaska—to all them as lives north of Fifty-Five. And to think that the second mail which left Edmonton on the first of February, will not reach Alavik on the McKenzie river until the last of March and, good time at that with 2,000 miles of slippery, shelving shores and shaggy hummock ice for the sledges on the river ways—while by the wireless 'tis all done in the same breath without so much as to hitch your chair or stir beyond the shadow of your roof beams at the far end. Here is what it says in the paper:

" 'The centuriesold rite of the SunDance will be performed by the Eskimos on February 20, for it is on that date that the sun will make its brief appearance above the horizon after an absence of 135 days, during which period the land above the Arctic has been shrouded in perpetual darkness.

" 'The white men at the posts of the Royal Canadian Mounted Police, as well as the men at the Posts of the big fur companies make it a point to join with the Eskimos in this ancient and primitive dance which takes place in some open flat space, unsually on the level ice along the coast.

" 'This year the event will be doubly memorable in the annals of the Arctic for the weird chant and the accordion music will be supplemented by the Radio, supplied by the four big Westinghouse Radio stations. Special arrangements were made last summer so that this broadcast would coincide exactly with the first appearance of the sun over the horizon.

" 'Robert M. Foster, the Radio operator of the C. G. S. "Arctic" installed the sets in Ellesmereland within 11 degrees of the Pole. Other sets were installed in North Devon Island, and still others in Baffinland, at points down to and including the Arctic Circle.

" 'Exactly at 10 p. m. E. S. T., on the night of February 20, Westinghouse Radio Stations KDKA at East Pittsburgh; WBZ at Springfield, Mass.; KYW at Chicago, and KFKX at Hastings, Nebr., will put on this special broadcast for points at and above the Arctic Circle.

" 'A special fivehour program designed for reception above the Arctic Circle will be broadcast by Westinghouse Station KFKX at Hastings, Nebr., which will be the fourth and last program on this prearranged schedule for reception at and above the Arctic Circle. This program will include the broadcasting of personal messages from relatives to the men in the far North, official messages from departments of the Canadian government; specially arranged late news bulletins, by courtesy of the United Press, and the Hastings Daily Tribune; an hour of vocal and instrumental classical music; a short sacred devotional period; special and unique musical features, and popular music by several orchestras. It will be late next summer before the men north of

Photogravures of Your Favorite Artists
GALLERY of RADIO STARS

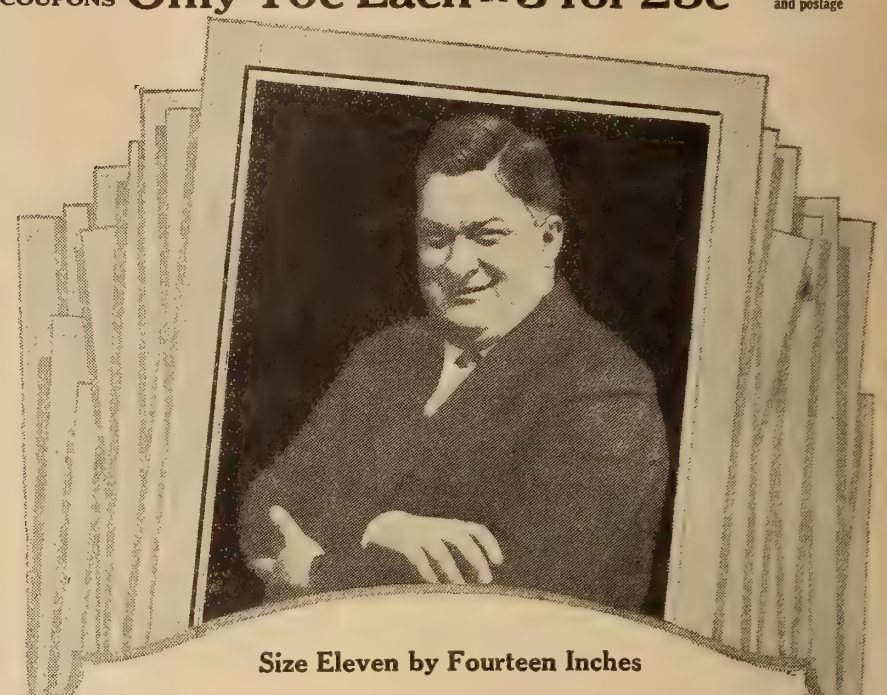
Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS Only 10c Each -- 3 for 25c To cover cost of mailing and postage



Size Eleven by Fourteen Inches

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
4 Paul Small, who won fame through Radio
5 Coon-Sanders' "Nighthawks" at KYW
6 George Hay, 1924 Gold Cup announcer
7 Harmony Girls, Edith Carpenter, Grace Ingram
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
11 Britt and Finch, popular songsters
12 Bob Emery, Big Brother of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
19 Aunt Jane, ladies' adviser at WOC
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
22 S. W. Barnett, ex-WOC, now WBAL
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" of WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ
28 Indiana Male Quartet, popular at WEBH
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, "Sweetheart of the Air" at KPRC
33 Pat Barnes, vaudeville announcer at WHT
34 R. V. Haller of KGW Hoot Owls fame
35 Henry L. Dixon, ukulele wizard of KYW
36 Quin Ryan, WGN's Uncle Walt and sports announcer
37 "Willie the Weeper," Ernest Rogers, WSB
38 Walter Wilson, "Uncle Bob" of KYW
39 Jack Chapman of Drake hotel repute
40 Ray-O-Vac Twins, known country-wide
41 Art Linick, KYW's Mrs. Schlagenhauer
42 Fred Hamm of WTAS, now WLIB, fame
43 Meyer Davis' Le Paradis orchestra of WRC
44 "Senator Schultz, WLW's illiterate comic
45 "Uncle John" Daggett of KHJ
46 D. R. P. Coats, 1925 Silver Cup announcer
47 Gene Rouse, WOAW's popular announcer
48 Freda Sanker, WKRC jazz orchestra director
49 Iris Ruth Pavey, KOA's invisible stage beauty
50 Queen Titania, star of KHJ Fairyland
51 Ipana Troubadours, on the WEAF Chain.

If your favorites are not in this list, send in a request to have them included in the Gallery of Radio Stars.

COUPON NO. 10

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage.

Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

How to Stop Blooping and Man-Made Static

Part III—Correct Receiver Operation

By the Technical Staff

FOR the benefit of those who have not been following this series it might be well to briefly run over the first two articles. In the first, it was pointed out that, while it is the Radio public that is making all the complaint about blooping and squealing, resulting in investigations into the situation by many agencies, it has invariably been proven that the Radio public is itself at fault. There being no local ordinances or articles to the constitution which will stop this evil, the only remedy seems to be driving the fact home that all must cooperate and that education in Radio set operation must be given.

Then in the second article, the various popular types of receivers were presented, and how and why they bloop was explained, with some suggestions as to the remedying of each type's faults. Single and three circuit sets, four and five tube layouts and super-heterodyne input arrangements were discussed. This brings us to the educational stage of this series and, since there are probably more regenerative one and three tube installations still in use than other types, they will be taken up first.

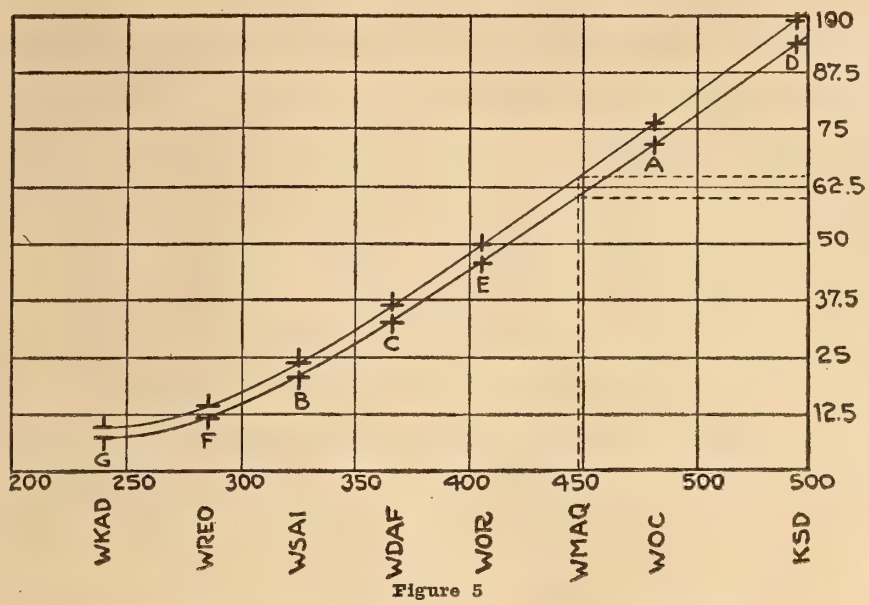

Figure 5

Need Proper Control

From the discussion presented so far in Radio Digest, and that published in other periodicals, the Radio fan may have gotten the impression that regeneration is a criminally devilish characteristic of Radio that should be totally abolished, sentenced to die immediately and maligned until forced to forever leave this U. S. A. Now this is not the case by any means—regeneration is a phenomenon arranged for man's use and which waited only to be discovered, just as was electricity, X-rays or motion pictures. True, a patent was granted on it, but it remains a phenomenon that can be made use of by innumerable circuit arrangements and there are many leading minds in the Radio art that feel a mistake was made by the patent department. Like many other things presented to a rapidly moving civilization, misuse has been made by set owners of the greatest aid to distant reception available at this time to the Radio field. Both law making and education should be along the lines of **proper control** of regeneration.

Getting back to our regenerative receivers, not preceded by one or more stages of radio frequency amplification, on the sets available in the Radio market, regeneration is not always described by this name. The dial which controls this feature of the equipment may be designated by any of the following terms: Regeneration, amplification, reaction, varind, tickler, sensitivity, feed-back and even volume. These controls are not, as a rule, effective in adjusting the receiver to be in tune with a station but are useful only in increasing the sensitivity. Some excellent suggestions are set forth by the Radio branch of the department of marine and fisheries of Canada for the proper use of this feature.

Some Simple Rules

"If you will take the trouble to observe the rules which follow, **you** will obtain greater satisfaction and enjoyment from your Radio receiving set, and at the same time cause minimum annoyance **to your neighbors.**

(1) Practice on tuning powerful stations first and do not try to pick up weak distant stations until you become more expert.

(2) Use both hands; one hand for control of regeneration and the other hand on the tuning control.

(3) Keep the regeneration control always **just below** the point of oscillation; your set is then in the most sensitive condition. This is the reason for using both hands for tuning.

(4) If your set then accidentally breaks into oscillation, turn back the regeneration control **at once.**

(5) Do not try to find a station by the "whistle." If your set is tuned just below the whistling point the signals will come in clear and your regeneration control can then be tuned a little further toward increase to help the volume.

(6) Do not force regeneration in an attempt to obtain loud speaker volume from a set not designed with sufficient audio frequency amplification for that purpose.

(7) Do not force regeneration in an attempt to hear stations **beyond the range** of your set; be content with those you can really hear **enjoyably.**

Don't Expect Too Much

The fact that you once heard a distant station on your receiving set is no indication that you can hear this station regularly, for occasionally a Radio broadcast from a distant station is received with extra strength due to some freak condition. When you have tried to tune in a station in the correct manner for a minute or two and are not able to hear it, do not unduly increase your regeneration and persistently wiggle your dials, for in so doing you may be causing annoyance (probably are) to some other broadcast listeners who would otherwise be able to enjoyably receive this distant station on a multi-tube receiver.

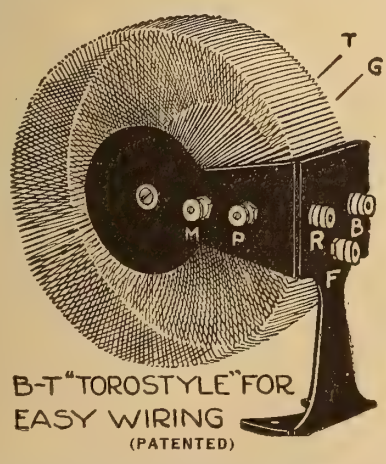
You can, accordingly, assist in eliminating blooping by: (a) Learning to operate correctly yourself and; (b) Not allowing children who are not old enough to understand the correct method of operation to cause interference from your set."

Keep Batteries Well Charged

The two rules so concisely set forth by the department as numbers 2 and 3 may be of more value with a little explanation. You may well ask, "How am I going to know when my set is just below the point of oscillation?" There are two easily learned ways of watching this. First of all, if you observed suggestion number 1, you should have learned that there is a certain definite relationship between the tuning dial and the regeneration control

(Continued on page 26)

COUNTERPHASE SIX--



The B-T Torostyle is used in the patented Counterphase circuit. 1 TA and 3 TC Torostyles are furnished in the No. 6 Kit.

IN the short time that the Counterphase has been offered to the Radio Public, its fame has spread to all parts of the U. S. and Canada, to say nothing of foreign countries. Unsolicited letters from all parts of the country attest its unparalleled popularity and success. Mr. M. E. K. of Indiana Harbor, Ind., writes: "— had KFI (Los Angeles) too loud on six tubes and WCAP (Washington) was broadcasting on nearly the same wave length at the same time—" EMW's letter from Minneapolis, contains an interesting fact: "—got WKAQ, San Juan, Porto Rico, using 25-foot indoor aerial picked up on loud speaker—" And so the letters come in every day in an ever-increasing number.

The set is easy to assemble. The essential parts are contained in the B-T kits for sale at all good dealers.

No. 5—Kit for 5-tube sets $28.50
No. 6—Kit for 6-tube sets 38.00

For real tone quality in your Counterphase or any other set, use B-T Euphonic Audio Transformers. They reproduce high and low notes with equal clarity and the price is not distorted.

2.2 to 1 . . . . . $5.00 **4.7 to 1 . . . . . $5.75**

Socket Insurance is not expensive, use B-T Universal Sockets. They take the old and new tubes. Price **75 cents each.**

The Silent Socket Stops Microphonic Noises. Try one on your detector. Price **$1.25 each.**

"BETTER TUNING"

Ninth edition just out. Tells all about the 4, 5 and 6-tube Counterphase, 2 control NAMELESS and other highly successful hookups. Sent on receipt of 10c in stamps or coin.

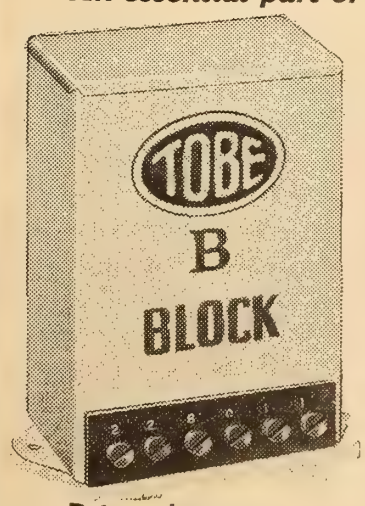
BREMER-TULLY MFG. CO.

532 South Canal Street **CHICAGO, ILL.**

"A Better Condenser"

The TOBE "B" BLOCK

An essential part of the hum-less B-eliminator



THE OFFICIAL RAYTHEON

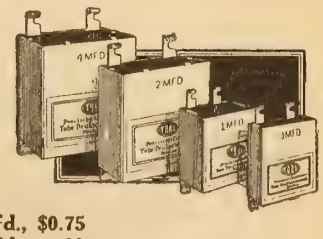
B-Eliminator Filter-Block containing one 8 Mfd., two 2 Mfd., and two 1 Mfd. filter condensers. Saves $2.50 in cost of parts,—saves space,—saves wiring in construction of this famous battery substitute.

A smaller TOBE B Block is also available, with one 8 Mfd., and two 2 Mfd., for Raytheon and other filter circuits.

Price $9.50

Price $11.00

The New TOBE HIGH VOLTAGE BI-PASS CONDENSERS



Prices: **0.1 mfd., $0.60 0.5 mfd., $0.75**
0.25 mfd., .70 1.0 mfd., .90
2.0 mfd., $1.75

These condensers are mounted in the standard TOBE shielded metal cases, with silvered finish and are designed for all usual radio by-pass uses and for ordinary "B" eliminators.

The TOBE model high-voltage filter condenser is also announced at our former prices. Each of these is individually tested and stamped with date of test. Accuracy guaranteed within 5 per cent of rating. For use where the very best parts are desired, as in power amplifiers and "B" eliminators, for power tubes and for experimental work. In silvered cases and silvered cartons.

Write us for circuit diagrams of all types of "B" battery eliminators. Ask your Dealer for TOBE Condensers

Tobe Deutschmann Co.

CORNHILL **BOSTON, MASS.**

HELP STOP BLOOPING

(Continued from page 25)

at all times. At the lower end of the tuning dial scale, the dial controlling regeneration must be retarded and at the upper end it can be further advanced. Unfortunately, this dial cannot well be logged, as can the tuning dial, since varying conditions of the plate or B batteries, and the storage or dry cell A battery, alter the settings of the regeneration control for different wave lengths settings of the tuning dial.

If storage B batteries are used and kept fully charged, and a trickle charger is used on the A battery to keep its voltage constant, this tickler or regeneration dial can be successfully logged and charted. A little study of this tickler dial and its use will soon show that when, for example, the tuning dial is at 20, the tickler is at about 10—when the tuning dial is at 40, the tickler must go up to 22—when station dial is at 60, the tickler setting has climbed to 48—with the station tuning dial at 90, the regeneration or "tickler" dial is to be set at 87. This relationship will, as mentioned before, vary a little unless the battery equipment outlined is included but will be approximately the same at all times, even with dry A and B batteries.

Learn Your Set

The second method of keeping track of regeneration is by listening to the static crackle always present to some extent. With the tuning dial set at, let us say, 40, for a certain station once heard, the regeneration control is increased very gradually until at about 20 when the static crackle will greatly increase in volume and the "live" sound of the set will increase. One soon learns just how strong these sounds get before breaking over into oscillation and, when that point is reached, do not try to force regeneration any more, either with the tickler dial or increase of filament brilliancy.

Suggestion 5 might also stand a little explanation. Too many users of these sets tune by deliberately throwing the set into oscillation and turning the wave length dial until the siren whistle, starting high and coming down in pitch, is heard. This denotes coming into a station's wave and, when one is squarely on the station, either no whistle is heard or but a slight grumbling sound. When a receiver, in a state of oscillation, is tuned-in in this way, exactly to a broadcasting station, it is said to be in a state of Zero Beat. This is a very poor method of tuning for the following reasons: (1) It causes whistles in receivers of all types, which are tuned to the same station, over a radius of several miles; (2) It distorts the quality of your own music; (3) It uses more B battery power and therefore the life of the B battery is considerably reduced; (4) It tends to materially reduce the life of the tube.

Test Set for Blooping

If you are in doubt as to whether your set can and does cause interference you can check the same by making the following test, but be careful to do so at a time when only a few people are apt to be listening. This is another department of marine and fisheries suggestion. Call a neighbor on the telephone and ask him to listen in on a particular station at a prearranged time and then tune your own set to the same station. Turn up your detector tube filament to normal brilliancy and put the regeneration control to its maximum; move your tuning dial five times slowly across the point corresponding to the tuning of that station, then telephone your neighbor and ask him if he heard the interference corresponding to these movements. If he did, you're a potential blooper and care should be used in learning that dial relationship.

This same test might well be tried by the four and five tube set owners, whether they have "neuts," "flexes" or "supers." An improperly adjusted neutrodyne, and most of them come under this heading, can and does radiate beautifully at one end of the tuning range. The flexes usually have a potentiometer control of oscillation that bears the same relationship to the tuning dials that the tickler does on a regenerative set, so named. They're all regenerative to some extent. The owner of a super-het should try this test with neighbors at a distance of two blocks, one-half mile and two miles to get the range and quantity of his interference. This interference can be cut down a great deal by decreasing the B battery voltage on the oscillator tube, and, in addition to helping his neighbors, the owner of such a set will be doing himself some good since he will eliminate the harmonics of powerful stations. Instead of finding such a station on about 8 points on the oscillator dial, he will find it on but 2 points, which is as it should be.

Keep Neutrodynes Neutralized

The neutrodyne owner, if this test shows interference on either a high wave station or a low one, should have his set re-neutralized by someone who knows how. If an experimenter of some experience, he can do it himself. The rules for neutralizing have been printed so many times in all the Radio periodicals that they need not be set down here. Sufficient to say, here, that it should be done on both a high wave station and a low one and an in-between setting of the neutrodons used.

Users of four and five tube outfits which have some means of oscillation control of the radio frequency tubes such as the radio frequency tubes' rheostat, a variable grid circuit resistance or a variable plate circuit resistor, will find the use of a chart of much value. From it, one can quickly set his dials at the points where a desired station would be heard, bring up the oscillation control until static crackle is at the known maximum before oscillation and, if the station is not heard, it either is not on the air or cannot be heard that evening because of adverse weather conditions. Wiggling of dials and fussing with the regeneration control will not help a bit. It just isn't going to come in and one might just as well switch his efforts to some other station within reach.

Plotting Condenser Curves

More advanced Radio men have a system which is called "plotting (or charting) the condenser curves" that enables them to quickly determine dial settings for any station they may wish to hear and, if the dials are set at the points indicated, the receiver is sufficiently sensitive, and the station desired is on the air, the program will be heard. Any owner of a Radio set can easily make up the necessary charts and the only material necessary is a sheet of "graph" paper divided into small squares so that there are 10 squares per inch each way. This paper can be had at any store carrying high school drafting materials, or supplies for engineers, draftsmen or architects.

Figure 5 shows one of these curves made up for a tuned radio frequency or neutrodyne receiver, considerably reduced in size, and, for the sake of clearness, with the smaller lines omitted. The owner of the set for which this chart was made first tuned in station WOC broadcasting on 483.6 meters. Wave lengths between 200 and 550 meters are indicated across the bottom line, so 483.6 is found on the bottom line and followed vertically to the point where it crosses the correct dial setting line, which is horizontal. Dial settings are shown vertically to the right. The dial settings for this station were 75½ for the first dial and 69 for each of the other two. The two small crosses at point A are therefore marked on the chart and another station tuned in.

How to Find New Stations

The second station, in this case, was WSAI with a wave length of 325.9 and the dial settings were 21 for the second and third dials and 24 for the first. The two crosses at point B were put in and, as the third station was WDAF on 365.6, the two crosses at point C were put in. Other stations were tuned in as points D, E, F, G which provided, altogether, seven points on which to make a curve. The points were then connected together as shown by the two long curving lines.

Now to use this chart for the finding of new stations, without straining the oscillation point or increasing filament brilliancy, and blooping all over the neighborhood, is as follows: The owner of this set wishes to tune in station WMAQ and finds by the program that the wave length is 447.5. On the bottom line he therefore finds the point 447.5 and follows that point vertically to the two points at which it crosses the curves drawn. In this case it strikes the curves for the first dial at 64 and the curve for the other two dials at 60. Station WMAQ will, therefore, be found at these dial settings if it is on the air and within the range of this receiver.

(Next week the discussion of blooping goes into the actual detailed construction of a device to be connected in between the antenna and the receiver that will stop blooping.—Editor's Note.)

"MOUNTIES" GREET SUN

(Continued from page 24)

the Arctic circle can advise the broadcasters of their reception of this program.'"

The sturdy old guardsman rested the paper on his knees and glanced sideways at the tower of savory cakes trembling near the smoking griddle.

"I say," he said, "do you really believe it could be possible that a lone man up there in a log hut under the very shadow of the North Pole could actually hear with the same breath, a man talking from here and the south of here, with never so much as a wire between the two of them?"

An hour later Sergeant James Campbell had finished his eleventh pancake and hurriedly excused himself from the table. In two minutes his sinewy form, erect and stalwart in a bearskin coat was silhouetted in the doorway. He went out without a word.

Scattered across the country four men bent over little desks on which were heaps of letters and telegrams. They sat reading the letters into queer receptacles that looked like the woodsmen's water-flask.

Into the far twilight of the frigid north at Craig Harbor, Ellesmereland, within twelve degrees of the Pole, Sergeant Joy sat in a dingy room with a pair of headphones over his ears. Around him were gathered Constables Bain and Dirsch of the Canadian Royal Mounted Service and four Eskimos from Etah, Greenland. A smile spread over the sergeant's face as his ears heard his name called through the air. There were messages for him from Mr. and Mrs. J. Rodolphe O'Malley, 428 Lyon St., Ottawa, Ont., and from others. There were messages also for his constable associates.

At Pangnirtung, virtually astride the Arctic Circle, Sergeant White sat in the log station with only half a dozen Eskimos for human society. On the rough hewn table in the dull glow of a hanging oil lamp rested a keenly sensitive loud speaker. It was known to be reliable and at the hour of ten, there was a breathless hush in the room. From the mouth of the horn came a voice:

"Greetings and cheers to you, Sergeant White, and to all those who serve with the Royal Canadian Mounted Police, from an old comrade. Sergeant James Campbell, stationed at Minneapolis by Captain Time."

Sergeant White swallowed something big and hard and yet quite intangible as this message among several others came distictly out of the magic vessel that so mysteriously unfolded sounds from the world that knocked at his door but once a year.

An old man leaned forward in a comfortable chair in a steam heated flat in Minneapolis. He too heard the message that came through the air from KYW, Chicago.

"Wonderful!" he gasped. "Man alive do you suppose he heard that the same way I did. I hope—I—I wish I was with him."

A STEP ON THE STAIRS

(Continued from page 7)

There was a shrill laugh from the rabbit-faced Cousin William and a frightened cry from Aunt Helen.

"At any rate," broke in the calm voice of the attorney, "at any rate we shall carry out my late client's wishes. We shall set the Radio receiver as he has suggested. We shall then extinguish the lights and sit quietly to see what midnight will bring."

Despite the murmur of protest he stepped to the receiver at the end of the fireplace and set the dials. Then he motioned to Hari Singh, who snuffed the candles one after another. There was no sound, save the smothered weeping of a woman as the last flame died, and then presently a whimpering protest . . .

"Light the lights . . . Light the lights . . . Oh God! I can't stand it . . . "

There was a sound as of breathing in the unseen speaker.

In the dark Henry Graves clasped Mary Williams' hand only to find himself repulsed with a nervous gesture.

"Don't try to pet me . . . I'm not an infant," the girl said with quavering petulance.

"You're frightened," suggested Henry.

"I'm not . . . N-n-not any more than you are."

"Hush . . . there's a whisper in the loud speaker."

EVEN the breathing of the unseen audience seemed to have stopped. The ticking of the clock on the mantel was the only sound to be heard save the whispering of the Radio. And then came a voice, muffled but distinguishable.

"This—this . . . "

A woman screamed. Something crashed in the dark.

"She's fainted," came the voice of Cousin William, suddenly firm and self-assured. "Get her out of here."

"Ladies and gentlemen," broke in the voice of the lawyer Ardwyn. "Whether you faint or not you shall stay here in this room until the clock strikes. That is what Peleg Turner told me to say to you and that is what you will have to do. Just by the way of precaution I have had the doors locked. Only one opens from the inside . . . That is the front door through which none but Turners have ever passed and then only in death."

He halted and as if it had been awaiting the opportunity the Radio voice spoke again.

"This is Station FYX."

A sigh, as if from all twelve guests in concert, smothered the announcement.

"You have tuned in to this station tonight," the voice of the Radio went on, "to hear . . . " A weird scream—a vagrant radiation familiar enough to all of those assembled in the house of Peleg Turner under ordinary circumstances—

(Continued on page 28)

The Crosley 5-tube RFL's, with their new and patented circuit, are specially recommended for inexperienced operators because they are non-radiating, non-oscillating, and cannot be made to howl even if mishandled. Two models—$60 and $75 without accessories.

THE CROSLEY RADIO CORPORATION, Cincinnati, Ohio

CROSLEY·RADIO

BETTER · COSTS LESS

Make Your Own Cone Loud Speaker —and *Save* $25.00

(All Parts Supplied)

Why pay $35 or more for a cone loud speaker when you can easily assemble a splendid super-sensitive one at home with the complete parts we send you—and save $25?

We include a special complete cone unit, blue print and simplified directions for assembling. You can easily set up this wonderful speaker in a few interesting hours. Large size, stands eighteen inches high, complete in every detail. Not only unmatched for beauty, but reproduces the finest sound of music or voice with faultless accuracy. Yet the cost is amazingly low—only $10 for the most approved form of speaker known. You make this big saving because we save the cost of assembling and packing and you save all jobbers' and dealers' profits.

Send No Money

Simply send name and address and the complete outfit will be sent you by return mail. When postman brings package, deposit with him only $10.00 in full payment. If you aren't more than delighted—if you're not absolutely convinced that you have a cone speaker equally as fine as any $35 cone sold—simply return the parts within ten days and your money will be instantly refunded. Never before has a better radio bargain been offered. You would pay at least $35 for a cone speaker of equal quality anywhere. Act at once. Write NOW.

Two-Tube Short Wave 15-130 Meter Receiver

Part III—The Wiring Made Easy

By John G. Ryan

THE more or less experienced set builder has long since found that the correct way to wire any receiver is to begin with the filament wiring, follow it with the R.F. or detector connections and finish with the audio amplifier. The reason for the filament leads coming first is not hard to understand since many connections from the plate and grid circuits must go to various points in the filament circuits and the wiring of those plate and grid parts could not be completed were the filament leads not in place. On the other hand, the filament wiring can all be put in and the tubes lighted without ever touching a high potential point. This procedure will, therefore, be followed here.

First connect the binding post at the left end of the row of four to the bottom terminal of the open circuit filament control jack which has been mounted with frame upwards. Now put in a wire from the next to bottom terminal, forward beside the jack to front edge of the sub pase, then to right to the right terminal of the Bradleystat, mounted with terminals upwards. From the left terminal of the Bradleystat run a wire back and to the left, up through the sub base to the rear left terminal of the detector socket. From the right end of the Amperite, drop wire through sub base and straight back to the wire connecting jack and Bradleystat. From this last named wire another goes straight forward and up through sub base to the soldering lug placed on the mounting screw at right front corner of the audio transformer. Now connect the left end of the Amperite to the left front terminal of the audio frequency amplifier socket. This completes the negative filament wiring.

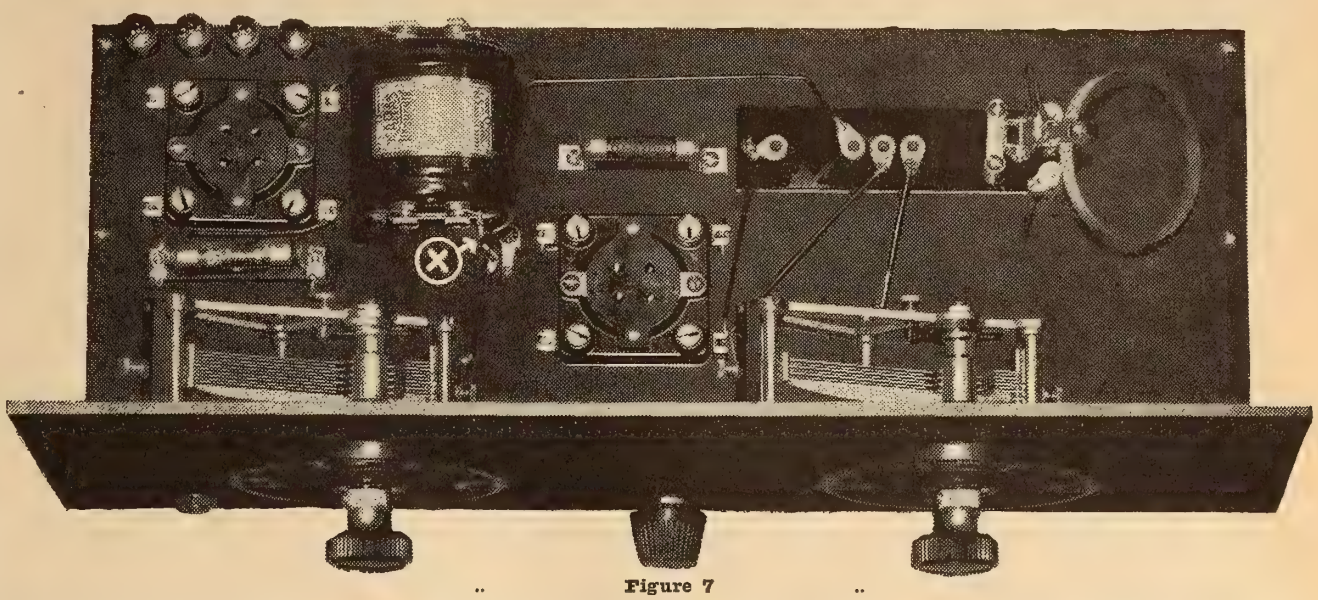

Figure 7

Positive Filament Wiring

Going now to the positive wiring, we first drop a wire through sub base from the rear left terminal of the audio frequency amplifier socket, bend it across to the right until opposite the left front terminal of the detector socket and then forward and up through to that terminal. This peculiar bend is made to leave room for the C battery added later. Where it passes the underside of the second binding post from left, connect it to that post by a short length of wire. By these operations we have completed the positive circuit and can begin on the detector circuits.

From the rotor of the left condenser drop a wire through the sub base and bend to right, then up through sub base to the rotor of the right condenser. Where this crosses the plus filament wire, solder to it. Now, on the upperside of set, run a wire from the F terminal on the coil mounting block, forward to the wire just put in where it joins the right condenser rotor. From the G terminal on that block, run another wire forward and up to the stator terminal at upper left side of the right condenser (.00014 mfd.). On the underside of sub base again, run a wire across to right from the left terminal of the Leakandenser up through sub base to the rear right terminal of the detector tube socket. Thus we have completed the detector grid tuning circuits.

In figure 2 presented with Part I of this series, the feedback coil is placed below the grid coil, G and F, and its upper end marked with the letter B. The lower end is identified with the letter F which should have been the letter P to correspond with the markings on the coil mounting block. From P on the coil mounting block, run a wire forward to the front right terminal on the detector tube socket. From the stator terminal of the left condenser at its lower right side, run a wire back between detector socket and transformer, then to right well behind Leakandenser to the B terminal on the coil mounting. Where this wire passes almost under the P terminal of the audio frequency transformer, run a short wire up to that terminal. It is this wire (X) which will have to be removed if you decide to put in a radio frequency choke, but it would be well to try the set first without it. The detector circuits will be completed if you now drop a wire down through sub base from the B terminal of the Karas transformer, back and to the left to the third binding post.

To complete the set we now proceed to the audio frequency amplifier part. The G post on the Karas transformer is at the rear right corner. From it, run a wire down almost to the sub base, then to the left to the G terminal of the audio amplifier socket which is also at the rear right corner. From F post of the transformer, drop a piece of bus bar down

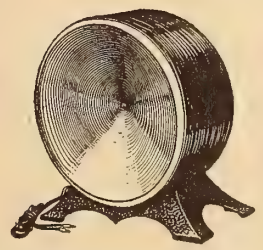
A new loud speaker principle

gives you all the thrill of the first row orchestra



The Acme "double free-edge cone" loud speaker. Round Model (shown), $25. Cabinet Model, $35.

NOW you can get the full joy of radio. Those thin, tinny piano notes, those muffled, nose-holding singers' voices—mere shadows of the living, thrilling originals—are gone forever. Now by a new principle, that of the "double free-edge cone," the new Acme loud speaker gives you volume reproduction of the human voice and all musical instruments with faithful exactness. It fills and rounds out, puts life, fire, reality, into the shadowy phantom voices you have been so accustomed to hearing.

No tense straining to make out muffled voices—no disappointment. You hear the natural voice speaking—not a megaphone.

After 5 years' effort and the testing of 256 different experimental models, the new Acme "double free-edge cone" loud speaker gives you front row seats at any broadcast entertainment.

The whole story of distortion and how the Acme Loud Speaker and other Acme apparatus overcome it is told in "Amplification without Distortion." 300,000 radio fans have found it helpful. Use coupon to get your copy. Acme Apparatus Company, pioneer radio and transformer engineers and manufacturers, Cambridge, Mass., U. S. A.

Above is section of loud speaker, showing two free-edge cones.

SHORT WAVE RECEIVER

(Continued from page 27)

through sub base and, on the underside, solder on a short piece of flexible wire for connection to the C battery. From the P terminal of the audio amplifier socket, front right corner, drop a wire through sub base to the top terminal of the jack and connect the next to top terminal to the fourth binding post. Then connect a short piece of flexible wire to the bus bar connecting the jack and the Bradleystat at the point where the wire leads off to the Amperite.

To hold the C battery in place we use the brass strip shown in Part II, the machine screw holding the front right corner of the transformer and that which holds the Amperite. It will be found that the C battery can be placed in the space provided in the brass strip when bent correctly, and that the holes in the strip will then fall right on the lower ends of the machine screws mentioned. You can either loosen the hex nuts you now have on those screws and slip the ends of the strip under them or you can put another hex nut on each to hold the strip. The battery should be set in with its terminals to the left and the negative 4½ clip to the rear. The flexible wire coming through from the Karas transformer's F post is now connected to the negative 4½ post on the battery and the flexible wire on the negative bus wire in the set goes to the plus post of the battery.

(The set is now completed and ready for operation. Next week, the concluding article shows how to connect the set to its accessories and goes into detail on the adjustments for satisfactory operation.—Editor's Note).

A STEP ON THE STAIRS

(Continued from page 26)

cut off the voice and a murmur of sobbing and hoarse breathing arose from all corners of the room.

"Do not be alarmed," suggested Ardwyn quietly. "We can expect interference here . . . And it is not yet midnight."

"I wish I was out of this," breathed Henry Graves fervently.

"Listen," commanded Mary Williams only half audibly. "I hear something."

IN THE black silence beyond the unseen doors something was moving. Three short taps, then, three more taps widely spaced, three short taps—the padpad of stealthy footsteps fading away into the muffling darkness.

"What's that?" cried Mary.

"SOS," came a whisper from across the room.

"A step on the stairs," suggested Henry . . . "The Indian probably or the caretaker." His tone gave evidence that he did not believe his own explanation.

There was a whirring sound from the mantelpiece.

"The clock is going to strike," whispered Mary.

"Midnight," boomed an unidentifiable voice. And then the chimes tolled the hours slowly with brazen, echoing challenge . . . one . . . two . . . three . . . up to twelve. Nothing happened. The echoes of the clock died into silence more complete, more ghastly than before.

"I feel a draft," came the low, agonized baritone of Aunt Helen. "What is it? God help us . . . Somebody has opened the front door."

"This," boomed the voice of the Radio with sudden clarity and volume. "This is Station FYX. We are about to broadcast . . . "

The groaning of Aunt Helen . . . the wild sobbing of men and women, speechless in the panic of the dark, were suddenly silenced by a crash from the Radio.

"Something's gone wrong at FYX," declared the lawyer Ardwyn, shaken out of his complacency for the first time.

A smashing of glass followed the first reports. Muffled cries filtered through the speaker.

"Help!" shouted a choking voice. "Don't let him get me . . . don't."

An echoing report, terribly real and convincing despite the distortion of the curving horn, ended the appeal.

"A pistol shot," murmured someone in the hunt-room. And then once more the voice of the announcer almost unrecognizable in its terror:

"There has been a murder at FYX," it repeated over and over again. "For the love of God send the police."

Who killed Jeremiah Turner? What is this curse that haunts the House of Turner? Where did the mysterious stranger go? Who made the sound of the step on the stairs? And, finally, what happened at the studio of Station FYX? Perhaps the next installment of Mr. Casey's thrilling mystery story, which will appear in next week's Radio Digest, will give a hint in answer to one of these questions.

Hear English Station Rugby In Far Lands by High Power

LONDON, Eng.—Preliminary trials of the great high-power Radio station near Rugby have shown that the station will fill its object. The power applied to the aerial has been increased step by step. Quarter-power was reached about a month ago, and reports came from Java and Hong Kong that the signals were very strong there.

More recently half-power was reached, and the station was heard well in Australia, and very strongly in America.

Continue Program Through Darkness

Lights Going Off in Studio Do Not Cause Even a Break in Entertainment at WSOE

MILWAUKEE.—If there is one thing that Radio engineers and announcers do not like to do, that is to be compelled to sign off before a program is completed because of equipment or wire trouble or because of the many other reasons which may compel a station to temporarily shut down.

During the broadcasting of a musical program from the Milwaukee automobile show by WSOE, the School of Engineering station, all lights in the studio went out but the station continued in operation because of the use of storage batteries.

Use Matches for Lights

Katherine Kies Hardtke was at the piano while several of the staff artists were singing a duet. Oscar Meissner, the announcer, stepped over to the artists, whispering, and asked them if they could finish the song. They replied they could.

The song was completed but the studio was still dark. Several artists, waiting their turn to broadcast, struck matches and held them near the piano and the next selection was broadcast.

Program Not Interrupted

By this time, O. W. Werwath and F. A. Vaughn, president and vice-president of the School of Engineering, had connected up flood lights from a different electrical circuit and the program continued.

It was a half hour later when the regular studio lights went on and not a single number was missed on the program. WSOE had kept on the air for its scheduled program and the operator, Morris Thomas, and announcer, Mr. Meissner, were satisfied.

Daily Worship at KFNF

SHENANDOAH, Iowa.—An impressive feature of KFNF, Henry Field Seed company station here, is the old-fashioned family worship broadcast each weekday morning at 7:30 Central time. The ceremony is simple but effective. It consists of a few songs by the seedhouse employes, Scripture reading by Mr. Field, and a short prayer.

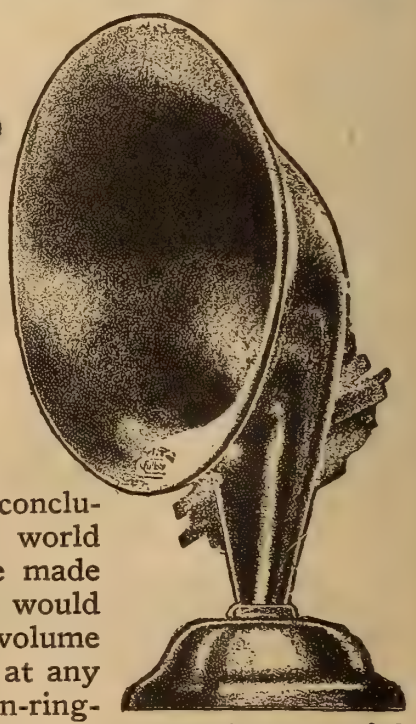
THE FORD of LOUD SPEAKERS



$6.50

Fultone Loud Speaker has conclusively proven to the radio world that a reproducer could be made and sold at $6.50 which would handle music or speech in volume as perfectly as any speaker at any price. The horn is solid, non-ringing and wide-throated enough to handle the powerful reproduction from super-heterodyne or reflex. The adjustable diaphragm permits matching Fultone to any receiver and "B" battery voltage.

The Fultone speaker will be shipped on a satisfaction or money back basis on receipt of price in money order or currency. The coupon is provided for your convenience in ordering if your dealer cannot supply you.

The Reader's View

For Silent Night

Knowing that the Radio Digest has quite an influence in the Radio world, I would like to repeat a suggestion that many listeners have made and advocated. That is that every Radio station in the United States have one silent night per week, regardless if there are one or many stations in any particular city, this to apply to large stations as well as small. If there should be more than one station in a city they should chose among themselves which is to be their silent night. Many programs do not go over on account of the congestion. A silent night is a benefit to the broadcasters instead of a determent.—H. F., Springfield, Ill.

"Thank You"

Realizing the time, expense and other incidentals to a broadcasting station, let us encourage WSMB. Surely one can "tune her out" if one so desires. If it gives any pleasure to anyone for WSMB to read her telegrams received, here's one who won't complain. My humble contribution is "Thank you." When I don't like her program, my set is selective enough to tune out.—A. J. J., Wilmington, N. C.

Suggest It to Your Radio Dealers

Why don't you get up a petition to Washington to have congress pass the appropriation for Radio inspectors in all larger cities. Conditions here are terrible on account of Power Peaks, local stations out of allocated wave bands and other causes that could be remedied.—M. S. M., Kansas City, Mo.

Keeping with Daughters

A mother with one girl in college, another graduating from high school in the spring and another a sophomore in high school, hears "school" day in and day out, with a little fear creeping into her mind that her girls are going beyond her educationally.

What joy when she learns of the Radio extension course offered by the University of Nebraska. The mother enrolls and after the first lesson, the family listen to her outline and the comments are so pleasing and favorable that the fear is abolished. She is indeed grateful to the Radio broadcasting stations, the professors and the university with a broad vision.—Mrs. H. C. T., Marysville, Mo.

Classical Is Brain of Music

In the issue of the Radio Digest of January 2, I noticed "Less Classical Music" under the Reader's Views by L. F. W. of Conway Springs, Kans., wherein the writer states that broadcasting would be improved 75 per cent if popular music and old-time music and music that is good took the place of classical music. I would like to ask the writer a question: Do you not think classical music good music?

To exclude classical music from programs would be like removing the human brain and then awaiting results, which of course we know the victim would be dead. It would be the same result with the Radio program if the classical music was excluded. It would be dead. We need a variety to satisfy.

The time has come when we must accept the psychology of broadcasting programs and also accept what has been supervised by the studio director with an open mind and not leave the subject of classical music to one person to say that 75 per cent of the broadcasting would be improved if classical music was excluded from programs. It takes far more technique to sing or play classical music than it does the so-called jazz.

If you cannot understand classical music study a little French or Spanish and than listen to its beauty. Take a little broader view on life and you will soon realize the beauty of classical music.—E. F. W., Rockford, Ill.

"Hot-Mush-in-the-Mouth"

I have been a regular reader of your paper since I received a set for Christmas, on December 23. I have been wondering whether it would be possible for you, through your paper, to conduct a campaign against what I call "Hot-Mush-in-the-Mouth" announcers. For instance, I tried for three or four different evenings, during a week or more, to locate one station. I get it regularly now. When the announcer gave the name of the next selection I could understand him. But when he announced the station he took up a handful of hot mush and put it in his mouth so that his call sounded exactly like another station 500 miles from his, the first two letters being the same. I have twenty or more dial listings on my log book for stations which I can not identify because of faulty announcing. If I preached like those fellows announce my job as pastor of a church would not last two weeks. A patient sufferer, who thanks you for help. —F. T. K., Littleton, Colo.

Stick to Announcing

In general, and of course there are exceptions, announcers or station managers confuse the function of announcers and entertainers. If the announcer would be brief and to the point, and confine himself to the essentials of announcing and let others do the entertaining, conditions would be better. Let them refer to the stations letters instead of saying, 'We," "Our," "Us," etc. By all means the station should be announced after every number as well as the offering and the performer. Let the public decide as to the beauty of the numbers—it is not necessary to be told by the announcer. The recent fad of a running discourse during musical numbers is a nuisance. Neither the talk or the music can be enjoyed.—V. A. M., Chicago.

A Few Complaints

To my estimation, American broadcasting has reached a stage where drastic measures must be taken to remedy the many faults.

For example, tuning in on any set of reasonable price, the zone from 246 meters to 297 meters is one of the most terrible messes on the air and there seems to be no remedy. I have tried antennaes of all shapes, sizes and directions and it is the same.

Another thing that impresses me strongly is the program arrangements. Starting with the dinner-hour concerts, every station tries this classical, then vocal, then jazz and old-time tunes. Why not have them mixed a little?

Still another thing is the method of signing off. I tuned in on Porto Rico several times and it was quite a thrill and made one feel proud of the island when it signed off with the national anthem, "The Star Spangled Banner." This "Home Sweet Home" stuff is getting old and is far from being characteristic of the word America.—C. H., Sterling, Nebr.

AND YE MINSTREL STILL WANDERS

THE Radio minstrel is here. He does not always play a guitar and sing, as did traveling minstrels in olden days. But he moves from broadcasting station to broadcasting station, playing upon odd instruments, for the pure love of it, and for the joy he gives listeners.

Within thirty days at KGO five Radio minstrels reported to the studio manager ready to do their bit entertaining silent audience of the day and night. One minstrel brought his "mouth organ" or harmonica; another played a Tyrolian zither; another carried a set of "sweet potatoes" or ocharinas, small terra-cotta instruments toned like flageolets; another drove to the station in a flivver and unloaded his "kitchen piano" or dulcimer, stringed and played with flexible hammers; and a fifth appeared with a sack containing a one stringed fiddle and bow of his own make. All instruments, unusual as they are, were peculiarly adapted to broadcasting, and music poured from the hearts of the players as it did from their brothers of old.

"We are only observing Bible teaching," said one of the minstrels. "We cast our music upon the ether—and, brother, it sure works! When I travel up and down this coast I come across friends everywhere—and chicken dinners, too."

Not Perfect Radio World.

Coming out from under the landslide of R. McB. M. from up Mansfield, Ohio, way, I'd like to shake a little of the mud off and feed this bird a little Radio seed which might, if he'll plant 'em in an investigation bed, grow into a few pointers which might serve to soothe his vicious breast.

It is evident from R. McB. M's line of chatter that he knows less of Radio than of common politeness, so it would be lying down on the job not to rise on my hin' laigs and tell him that a non-radiating Radio receiver has not been built yet —nor will one ever be built which will step out and get anything over the range of a crystal detector.

The so-called single circuit, carelessly handled, is a disturber, but it has nothing on neutralized circuits in the hands of inexperienced manipulators. An idiotic impression is widespread that a superheterodyne is the real sweet papa golden rule perambulator, when operated from a loop collector system—but ask anybody who knows what constitutes Radio energy as it is handled from loop or antenna into detector, and he'll tell you that the loop merely reduces the radiation, the range depending on the handling of the potentiometer or other potential variation conrol. I have used a six, a seven and eight tube super on loops, and they all disturb my neighbor fifty feet away—I haven't asked the more distant ones. This bird seems to think that interference is non-existent unless it's audible in the form of a squeal. I have many times been listening with various types of sets when some neutrodyne minus the "neut" would come absorbing in to the same frequency and walk away with the signal —the supers do it—the regenerators do it also. The only circuit which would not radiate damagingly when tuned up to or close to oscillation would be one properly neutralized well below the point of oscillation and such a set would be useless except on very powerful stations.

It isn't a perfect Radio world yet, but nothing is to be gained by condemning the pioneer regenerator when the pioneer is no more to blame than sweet papa multituber, nor is cussing the government going to help a bit.—C. O., Slaton, Texas.

Whad'yamean Just?

Under the head of "Telegram Programs," I sustain the objections of complaint. I arise to interpose others. Any moron ought to be able to recognize a piece of music after it has been broadcast 100 or 150 times. Then why take the time either before or after to announce, "You have **just** heard, "Let Me Call You Sweetheart," etc.

Also, why the **just?** The dictionary I consulted gives the definition of **just** as right; acting rightly; rendering or disposed to render to each one his due; upright; impartial; righteous; proper; adv. exactly; barely; nicely; almost. Not one of the definitions fit the word as it is used by announcers.—T. H., Okemah, Okla.

Paging Mr. Hoover

I have been reading the Radio Digest and have noticed several letters from people telling of the interference between stations. Here is some of the trouble I am having. The stations from 280 meters on down are so thick that I can not get much out of any of their programs. I heard KFJK and KWKH broadcasting at the same time and they are both on the same wave length, also WENR, KMOX, KFOB and KFNF are so near the same wave that their programs are not much good. Something ought to be done.—H. R. Cope, Lamesa, Texas.

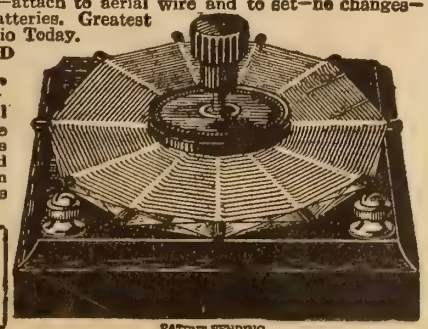
Fred W. Stein.

Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The ***Steinite Interference Eliminator*** shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD



PATENT PENDING.

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

TUBE SERVICE

Your set is no better than your poorest tube. They must be uniform

A good tube must have:

1. Good Tone Quality.
2. Impedance not too high
3. Low filament consumption.
4. Long life.

Pingree Tube Characteristics

Plate impedance 8500 — 10,000 ohms.

Amplification factor 8-9.

Filament consumption .25 amp.

Filament voltage 5.0 volts.

Plate voltage 16v-90v.

A—TYPE $2.00

PROTECTION

Each tube is tested rigidly on a Superradio Dynometer before shipment.

TRIAL OFFER

Try these tubes 10 days at our expense. If they are not what we claim, we will gladly refund your money.

PINGREE RADIO SERVICE, Inc.

170 Summer Street Boston, Mass.

TRIP TO NIAGARA FOR BEST CRITIC

WHT Asks Criticisms on U. S. L. Program—Couple Winning to See Falls

CHICAGO.—As an inducement to Radio listeners to state their desires in the matter of broadcasting programs, a trip to Niagara Falls has been offered to the couple submitting the best constructive criticism of Station WHT, located in the Wrigley building here.

The offer was made after it became evident that mail from listeners consisted of either the purely complimentary type or request letters. Listeners who dislike a program rarely take the trouble to write the station about it, station officials say.

The offer closes March 1 at which time the winner will be selected. It applies particularly to the "U. S. L." programs which are presented Tuesday and Thursday evenings. In case of a tie a duplicate award will be made.

Col. Edwin House Is New Announcer at WMBB Mike

CHICAGO.—Clyde Hager, chief announcer of Station WMBB of the Trianon, "The World's Most Beautiful Ballroom," has resigned his post and has been succeeded by Col. Edwin House, it was announced by N. R. Weaver, director of the station.

Colonel House was formally connected with Stations WLS and WGN and is widely known as a baritone soloist and community song leader and instructor. During the war he conducted community singing for the Y. M. C. A. and later toured two seasons with his Colorado Cowboy band.

A set does not have to be in a polished cabinet to give good results.

A single circuit set is not as selective as a two-circuit one.

SOLVE RADIO MYSTERY?

(Continued from page 3)

representative districts throughout the country who will place these episodes on the air concurrently with the story as it is published in Radio Digest.

Following are the first stations enrolled to broadcast "A Step On the Stairs," from the lips of the characters in the story:

WCCO, Gold Medal Station, Minneapolis-St. Paul; WOAW, Woodman of the World, Omaha; WGY, General Electric company, Schenectady; WMAQ, Chicago Daily News, Chicago; KOA, General Electric company, Denver; WOC, Palmer School of Chiropractic, Davenport; WNAC, Shepard Stores, Boston; KGO, General Electric company, Oakland, Calif.; WRC, Radio Corporation of America, Washington, D. C.; WHO, Bankers Life company, Des Moines, and WSAI, United States Playing Card company, Cincinnati.

One large station in New York city had announced at the time of going to press, that it desired to present the serial Radio play, but arrangements had not been concluded. WBAP, Star-Telegram, Fort Worth, Texas, will also present the feature beginning in April.

Rules Are Announced

The days and the hours on which the play may be heard from the various points are listed on page thirteen, together with the cast of characters who will be heard over the microphone. The story, as written by Robert Casey, begins on page six of this issue.

Keen-witted listeners and readers have an equal opportunity of winning part of the $500 prize money to be awarded for the best or nearest solutions of the mystery. The prizes are divided into: First, $250; second, $100; third to seventeenth, inclusive, ten dollars each.

All rules and announcements having a bearing on the contest will be found on page six, this issue, with the beginning of the serial mystery novelette.

Butte Radio Club Is Leader

BUTTE, Mont.—The Butte Radio club, which has the largest membership of any listeners' organization in the United States, is rapidly forging to the front as the leader in organizations of this kind. Other cities throughout the nation are asking advise from the Montana club, the latest communities wishing information on building Radio clubs being Salt Lake City and Beaumont, Texas.

Resigning Pastor Preaches Over Schenectady Station

SCHENECTADY, N. Y.—Dr. Bernard C. Clausen, the pastor who tries to resign his job every year, preached the morning and evening sermons for the audience of WGY, Sunday, recently, when the services of the First Baptist church of Syracuse were put on the air. With his annual resignation to his flock, Dr. Clausen submits a plan of procedure and definite objectives for the coming year. Up to the present he has resigned five times and his congregation, growing steadily, has refused to let him go.

Radiophone Broadcasting Stations

Corrected Every Week—Part IV

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

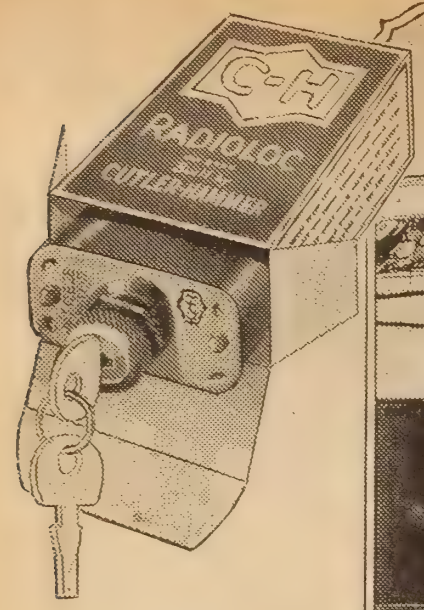
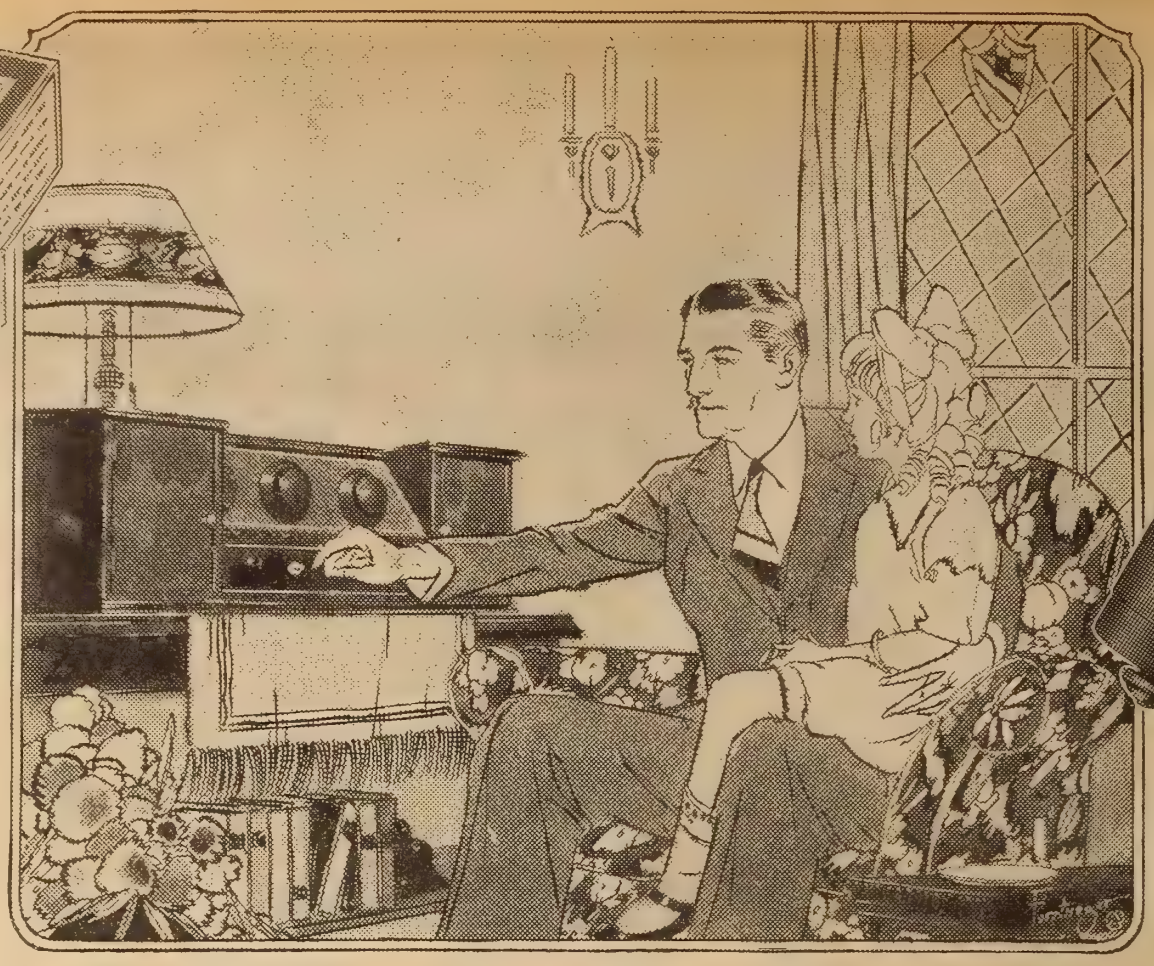
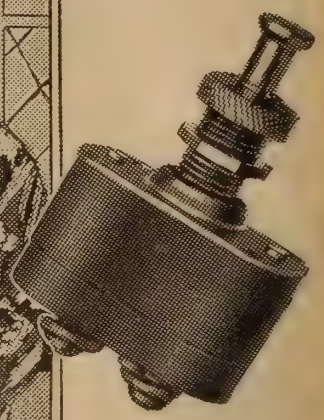
(The above listings complete the stations in the United States and part of the foreign broadcasters. Part V consists of a complete location index of stations and the remainder of the foreign list. This appears next week.)



C-H Radioloc
The radio switch that locks with a key. Protects tubes and batteries against children and meddling adults. One hole mounting—quiet operation. Dustproof case. Two keys with every switch.



C-H Heavy Duty Radio Switch
More than a million in use. Preferred by both home set-builders and manufacturers. Many have imitated the knob, but no one can duplicate the patented "floating contactor" construction — the secret of its long life.



Thus More Than a Million Concerts Start Every Night

THE first panel mounting switch built exclusively for radio service? It carried the Cutler-Hammer trade mark.

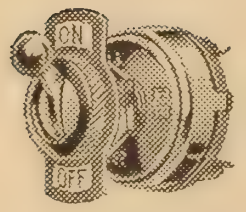
The first radio switch that locked with a key to protect tubes and batteries from meddling fingers? It was designed by C-H engineers.

The first handy toggle type radio switch? Yes—it, too, was built by Cutler-Hammer.

Little wonder that they are found in more than a million sets today. For they were designed to render the trouble-proof service for which they are now famous and their patented mechanism cannot be duplicated. Because they sell in such tremendous quantities their cost of production is remarkably low.

That explains why most radio fans build them into their sets, and why you find them on so many manufactured sets today.

Your new set will, most likely, have a C-H Switch, whether it is the product of your own hands or a huge factory.



C-H Radio Toggle Switch
The very popular toggle switch idea applied for the first time to radio. Beautiful appearance. "On" or "off" with a flip of the finger. Neatly etched plate to indicate position. Requires very little space back of panel. Contacts are broad and self cleaning. Quiet operation. One hole mounting. Nickel finish.

A list of some of the prominent radio manufacturers using C-H Radio Switches

Acme Apparatus Co.
American Bosch Magneto Co.
Argus Radio Corporation
Astral Radio Corporation

I WON'T BLOOP CLUB IS AIDING RECEPTION

FANS ENTHUSIASTIC OVER EFFORT TO CLEAR AIR

Campaign Surpasses Most Extravagant Dreams of Originators as Pledge Cards Pour In

Besides the banding together of the Radio listeners in for the purpose of gaining united cooperation in the elimination of preventable interference, the I Won't Bloop club has become a veritable correspondence school. That the pledges given as applications for membership in the club were made in all sincerity is plainly evidenced by the thousands of fans who have written to the Radio Digest for solutions of their individual problems. The steady stream of signed pledge cards that is flowing into the offices of the Radio Digest would indicate that the movement will cover a greater field than the originators even dreamed. At the present time, cooperation of individuals, Radio clubs, broadcasting stations and newspapers has resulted in the most widespread movement for the betterment of Radio reception in the history of Radio.

What Pledge Means

Organizations that have received chapters in the I Won't Bloop club are sending in long lists of listeners who have pledged to operate their sets so as to reduce radiation or blooping, to equip their sets with anti-blooping devices in cases where it will benefit reception and reduce interference, and lastly, if other methods fail, to renew them with sets designed to limit howling and squealing. The immediate response given the organization clearly demonstrates the listeners realize that if each fan operates his receiver with consideration for his neighbor, one of the biggest problems of reception will be solved.

Innocent of Damage

That very little preventable interference is caused by malice is the belief of the Radio Digest. We have been vindicated in our assertion that the majority of bloopers are innocent of the damage they are causing and ignorant of what precautions should be taken to prevent it. The response to our theory that education in receiver operation will reduce the nuisance has been gratifying. Hundreds of inquiries into individual problems and thousands of letters of commendation on the series of articles on the elimination of blooping and man-made static have been received.

We feel certain that the members of the I Won't Bloop club will in the future operate their sets properly, and in doing so not only help Radio reception in their own neighborhoods, but will also manipulate their sets with greater efficiency and satisfaction by increasing their range and entertainment. The Radio Digest believes that if every listener signed and followed the pledge of the I Won't Bloop club, more would be done for Radio reception than could ever be accomplished through legislation.

Are you willing to do your part in the campaign to clear the ether? If you have not already filled out a pledge card of the organization, do so today. Read the series of blooping articles and follow the suggestions. If you have problems that have not been covered in the series to date, present them to some authority who may be able to solve your difficulties with simple explanations or adjustments.

Enlist Your Neighbor

Enlist your neighbor. Ask him to cooperate with you. Then work together. The signing of a pledge card eliminates a potential blooper. Certificates of membership have been printed and are ready for distribution.

BEAUTY ON COVER IS 1926 WAMPAS MAID

MISS JOYCE COMPTON is the fluffy-haired maiden who peeps forth so shyly from the Radio Digest cover this week. Yes, of course, she is from Hollywood, California. More than that, she is one of the 1926 models of the annual Wampas beauties recently selected by the Western Association of Motion Picture Advertisers for Fame. Miss Compton may be seen on almost any screen almost any day in any city in the United States but you will be most likely to hear her voice over the Los Angeles Express Radio station, KNX. Wampas programs are presented there every Tuesday between the hours 10 and 11 p. m., Pacific time.

PLEDGE CARD

I am cooperating in this campaign with Station.....

Upon mailing this pledge to Radio Digest, "I Won't Bloop Club" membership card suitable for wallet or framing will be issued.

Wills-Lenglen Tennis Match Broadcast Through WNAC

BOSTON.—The ability of the Radio to give the big news first was truly demonstrated recently when Station WNAC, the Shepard Stores, here, gave to New England the results of the finals in the international tennis match between Helen Wills of America and Suzanne Lenglen of France which was held at Cannes.

The arrangements to broadcast this result were carefully completed by WNAC with the Boston Herald Traveler and the Associated Press.

Bill Proposes U. S. Monopoly Of Electrical Transmission

WASHINGTON, D. C.—Another Radio bill has been introduced in the house of representatives, this time by Representative Shallenberger of Illinois. The bill proposes "to secure to the United States a monopoly of electrical means for the transmission of intelligence for hire; to provide for the acquisition by the post-office department of the telephone and telegraph network; and to license certain telephone lines, Radio and telegraph agencies."

Looking Ahead

Whose Were the Snow-Covered Shoes Left at the Threshold of the "Door of Death?" Was Mary Williams as innocent as she seemed? Why did she repulse the ardent proposals of Henry Graves? Follow the "trail of the tigress" in the third installment of "A Step On the Stairs" in the next issue of Radio Digest.

Typical American Music Finds Its Elemental Source in the rhythm and chants of the American Indian, thinks Thurlow Lieurance, pianist and composer, who has spent most of his life in the study of native music, transcribing it to modern score. His story as told to WLS listeners in our next issue.

From a Nickel Picture Show in a Deserted Shoe Store to Multi-Millionaire owner of a string of amusement palaces and proprietor of Radio Station WMBB on the Trianon—"The World's Most Beautiful Ballroom"—is the history of Andrew Karzas. Story and picture in the next Radio Digest.

Boy Scouts Who Are Described as the Budding Flower of the American manhood of tomorrow have had much to do with the present success of Radio. A special page with a story from the New York headquarters is in preparation for a forthcoming issue of Radio Digest. Watch for it, boys.

Tuned R.F. Circuits, How You Get Them and Why, are an important part of Milo Gurney's next installment in the A. B. C. series. Present day Radio set owners will be interested in knowing how tuned radio frequency amplification was evolved.

More Methods for the Prevention of Blooping will be presented in the next issue by the Technical Staff. If only every listener in the country would consider the various arrangements being presented there would be no more squealing.

NEWS BRIEFS FROM THE BROADCASTERS

CINCINNATI SHRINE BAND OVER WLW WEDNESDAY

Play Shop Surprise Feature at WGN—Repertory Frolic WBZ Success—Irish Play at KGO

The popular Syrian Temple Shrine band, under the direction of Henry Fillmore, will return to WLW, Cincinnati, Wednesday, March 10, for a program of music and songs. This musical organization is known throughout the country for the excellence of its programs and makes two broadcasting engagements a year.

* *

A midnight frolic and after-theater dance, the first of a series entitled "The Silver Forest," was given by the Repertory theater last Thursday at WBZ, Springfield. The affair was conducted along the lines of the famous Ziegfeld midnight frolic atop the New Amsterdam theater in New York.

* *

An old-fashioned drama, "Kathleen Mavourneen," will be produced by the KGO players Thursday night, March 11, beginning at 8 p. m. Pacific time.

* *

Quin Ryan and Frank Dahm are the directing geniuses behind the new Play Shop feature broadcasting at 10:10 p. m. Central time every night at WGN, Chicago. Skilled actors, readers and musicians are presenting these skits, burlesques, comedies or tragedies.

* *

Don't turn up your nose at "Yes, We Have No Bananas." It comes of a very good family. "Its great grandfather was Handel's Hallelujah chorus," says Dr. Sigmund Spaeth, noted teacher and interpreter of music. Turning to his piano, he proves it. The highbrow learned to appreciate good jazz, and the lowbrow to understand a symphony at WLS, Chicago, last week when Dr. Spaeth gave a series of whimsical lectures on the appreciation of music.

* *

The fans to whom the Barber Shop ballads recall pleasant memories will welcome the new trio of Shave, Haircut and Shoe Shine at WBBM, Chicago. Their old-time harmony numbers are, to say the least, unique.

* *

The headliner artists of the WBZ programs have joined together in one large group that will be known as the WBZ Concert company. Ethel Curry, soprano; Ethel Woodman, contralto; Vincenzo Spolzino, tenor, are a few of the young artists in this organization.

* *

Whittall Anglo Persians, directed by Louis H. Katzman, may be heard on Friday nights over the WEAF chain. Oriental music will be featured by this group.

* *

Last week a real magician visited WLW, Cincinnati. Fans who listened to Howard Thurston's lecture on white magic have been able to pull rabbits out of hats, discover cards and handkerchiefs in strange places and in other ways puzzle their friends.

* *

Radio fans will have an opportunity to hear the cream of Victor Herbert's musical library while listening in on Wednesday nights to "Roxy and His Gang" over WEAF and a chain of stations. S. L. Rothafel has purchased from Ella Herbert, daughter of the famous composer, his entire personal library which contains not only Victor Herbert's own lilting melodies, but the symphonic scores, orchestrations and classic and light comedy music used by him during the many years he served as conductor of the leading orchestral organizations throughout the country.

* *

Dressed as Mother Goose and carrying a calico goose, Miss Bessie Lillian Taft has become well known to kiddies in New England. She believes that children may learn to love animals and be kind to them and she tells her stories with this end in view. Her Radio audience of little folks dial for WTIC Mondays at 6:30 p. m. Eastern time.

* *

An unusual program will be given Tuesday, March 9, when WLW, Cincinnati, transmits a program which was given in Hilversum, Holland. This unique event is to be broadcast by the Formica concert orchestra under the direction of William C. Stoess, and will give Radio fans the opportunity to hear a concert that is a replica of one given through broadcasting station HDO, Holland.

* *

Wednesday afternoon will be devoted to discussions and courses in dramatics

(Continued on page 21)

"MAGNETIC BLANKET" IS LIFTED

MYSTERY SERIAL IS SENSATION OF RADIO

"A STEP ON THE STAIRS" IMMEDIATE SUCCESS

Readers of Story Form and Listeners In Acclaim Work as Great Step Forward

"A Step On the Stairs" is out with a wow!

"It's a hit," wired E. H. Twamley, studio director of Station WOC, Davenport, Ia., to the Radio Digest. This was one of the first of the eighteen stations to put the remarkable story written especially for Radio transmission by Robert J. Casey on the air.

Scores of letters have been received by Radio Digest from readers who already are advancing theories as to the outcome of the story and seeking hints as to the solution of the first mysterious circumstances revealed in the first installment. Never in history has a new book come out with such an instantaneous audience. Millions will be following this remarkable story week by week as it unfolds with vivid realism in the pages of Radio Digest and through the air from the leading broadcasting stations of the nation.

Special Music Score

A special musical score of weird tunes and orchestral effects has been prepared to carry through the dramatization, serving much the same purpose as specially written music for the motion picture features. With lights turned low or enveloped in absolute darkness listeners are intrigued into an atmosphere that rustles with ghostly garments and eerie wails, the stage setting for the characters of the story. This makes possible a dramatic appreciation impossible under any other circumstances.

All the little tricks of suggestion and influence have been employed by Mr. Casey to make the listener feel in the very presence of the fantastic environment that haunts the old Turner manse where the successive owners have died and passed through the same fatal door to their graves.

Action Is Concentrated

The relatives are gathered about a table in the old hunt-room. The candles have been extinguished. They wait for the voice of the last master of the house —Peleg Turner—to come back to them through the Radio horn. He himself through his will has set the midnight hour for this mystic apparition. Then comes a shot. The voice, from a broadcasting station, states that a murder has been committed in the studio. Pandemonium follows.

In the current issue the situation becomes more tense. The thread of circumstances follows quickly. There are no tiresome descriptions. All is action and suspense. One grim incident follows another with surprising climaxes and at the end of the episode the underlying motives and unknown characters are more mysterious than ever. So far it has all taken place between 11:30 p. m. and 2 a. m.

One Man Knows Secret

Only one man knows the secret, the key to the whole situation and that man is Robert J. Casey. All the reader or listener needs to be is a mind reader and pluck the last chapter from the back of Mr. Casey's head. To be able to finish the story with a correct theory as to the outcome means a cash prize of $250 for the best answer, $100 for the next best answer and $10 each for the next fifteen best answers. The details are published on page 7.

"I am very glad that some constructive effort, with the power of publicity behind it, is being made to encourage the writing of Radio drama," wrote Mrs. Wilda Wilson Church, one of the foremost producers of Radio drama in the world, in her acceptance of "A Step On the Stairs" for Station KGO, General Electric Co., Oakland, Calif.

"Count on WSB for this big idea in Radio drama. By all means send us the dramatization of 'A Step On the Stairs'," wired Lambin Kay, director of the Atlanta Journal broadcasting station.

An error in the Radio Digest office last week caused the publication of the wrong station for Cincinnati as the one from which "A Step On the Stairs," would be broadcast. The correct station is WLW of the Crosley Radio Corp., one of the widest range stations in the country.

Orson Stiles of WOAW, Omaha, said in accepting the Casey story, "We are not

(Continued on page 30)

CREATORS OF "THE NIGHT HERD"

NANCE O'NEIL, above, came flying halfway across the continent to play the part of Delores in "The Night Herd," the $500 prize Radio drama which "opened" over WLS, Wednesday, February 17, before the largest first night audience for which any actress has ever had the privilege of appearing.

"The Night Herd," written by Levi Chambers Ballou, right, of Buffalo, N. Y., was produced under the direction of Alexander Dean, of the Drama league of America. George Arliss, who was one of the three judges who selected the winning play from more than five hundred entries, made the presentation of the Hoover trophy cup and the $500 cash prize offered by WLS and the drama league, to Mr. Ballou.

Following its presentation from WLS, "The Night Herd" went on tour and played from Cincinnati, on Thursday evening, February 18; WSB, Atlanta, Friday; WRC, Washington, Saturday; WIP, Philadelphia, Monday; and closed at WGBS, New York, Tuesday.

The entire cast travelled to the various stations and made its appearance "in person."

The second prize winning play, "Back Stage," by Hilliard Booth, Brevard, N. C., for which $200 was awarded, was to be produced at WLS on Wednesday, March 3. The play was to be toured to the same stations as presented "The Night Herd," and will be heard according to the same schedule of days.

On March 10, "Midnight," third prize play for which J. Frank Davis, of San Antonio, Texas, received $100, will be heard from WLS, Chicago. "Midnight" will also be toured and presented from the six cities on the same days of the weeks as listed for the first prize winner.

"We have ten more plays beside the winners which we will give later," said Harry D. Saddler, director of WLS dramatic productions, "and probably thirty per cent of the five hundred plays received will be usable in some form. For all the others produced we will pay the usual royalty."

The usual royalty per station is understood to be ten dollars a performance. This offer, it is believed, will stimulate the interest of writers in Radio.

Ear Phones Are Installed in Hospital for Canadian Vets

TORONTO, Canada.—When "Roxy" of the Capitol theater was broadcasting for the Canadian government last summer he told of what had been done through Radio for the incurable war veterans in United States hospitals and suggested that similar work be done in Canada. To encourage the action he and his "Gang" donated $500.

In the Christie Street hospital, here, 150 sets of ear phones have been installed to enable individual patients to listen in when the loud speakers were not in use. Although there are but 200 patients in the hospital, there are 300 beds and it is expected that each bed will be equipped with ear phones.

EXPLANATION LACKING, BUT RADIO BETTER

Leaving Brings Fans Joy

Mysterious Force That Has Enveloped Ether Departs; Reception Improves After Bad Spell

WASHINGTON, D. C.—The air is cleared again and the pale of gloom has gone. The atmosphere is once more cleared of a sinister, hovering figure, who seemed to press down upon the spirits of the Radio fans. The unknown stranger has rolled up his "magnetic blanket" that has enveloped the ether and has disappeared as silently and mysteriously as he came. With his going, happiness has returned to listeners in.

If one should not understand what the above means, there is no real cause for worry or alarm because no one else does either, except that reception conditions, which have been the worst experienced in winter during the past five months, have begun to improve. Electrical engineers are pondering on the phenomena and hope to have some means to prevent or master it on its next appearance.

Blame Everybody

Poor reception has been noticed over the entire continent since the first of the year and everybody with any connection with the Radio industry has come in for their share of blame for being responsible for it. The condition is said to have cost commercial broadcasters many thousands of dollars worth of publicity expected during the winter months through the usual good reception conditions.

Although the nature of the phenomena or what causes it is unknown, it just has to be called something, hence the name "magnetic blanket." The mysterious stranger started rolling it up about the end of the month and now during March, which is usually one of the best times in the year for Radio transmission, the listeners in may expect to enjoy broadcast programs.

Programs Distributed by Telephone Company

Broadcasts Picked Up and Furnished to Loud Speakers

DENVER.—On the heels of rapid developments in the broadcasting art, telephone officials at Hiawatha, Kans., are now able to provide loud speaker Radio service to their widely scattered subscribers, according to word received by KOA at Denver.

"Programs are picked up at a central receiving set and are then distributed over the lines to loud speakers in private homes," reads the communication from an enthusiastic listener of Hiawatha, R. A. Nevin. "This system is ideal except that we take what the operator gives us. On the whole, however, he gives us the best."

Similar experiments have been made near Colony, Okla., according to Guy H. Oglesby.

"We live out in the country about fifteen miles from the railroad," he declares. "Last night I connected my Radio on our 'home-owned' telephone line and enabled all my neighbors, approximately twenty farmers, to hear KOA, which is a favorite with us."

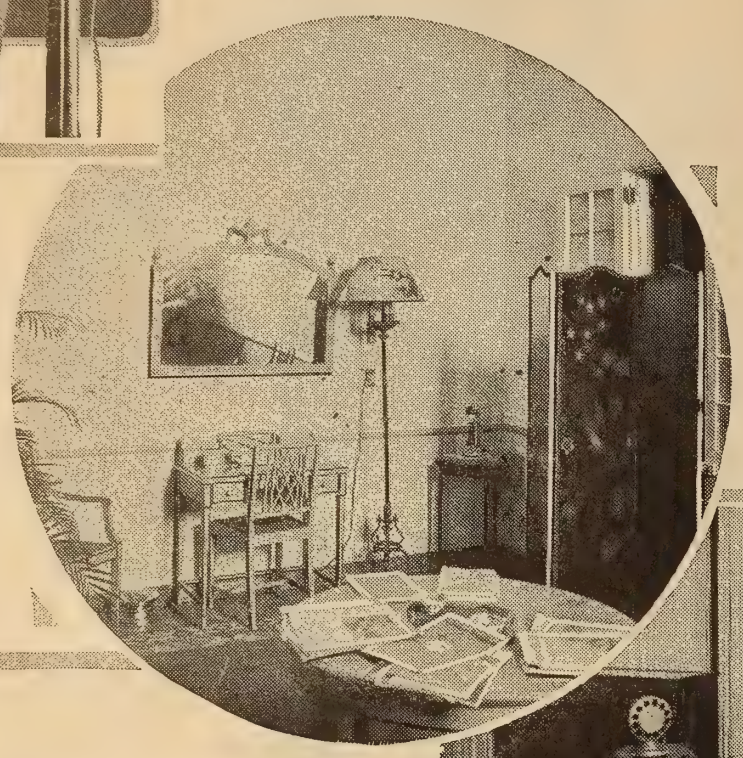
PWX Scintillates Exotic Charm

GEM OF THE ANTILLES Radiates Visions of Tropic Beauty to Colder Climes in North and South American Continents. Stimulates Foreign Interests.

"Estacion PWX,"—these words have been heard on both hemispheres from the lips of Announcer R. P. Falcon (above) at Havana, Cuba.



Cozy and artistic are the reception room (upper) and the studio (lower, center) in the famous station "sparkling" from the Gem of the Antilles.

Cuban pickaninny thinks he hears "those angel voices singin'" when Mr. Falcon (below) gives him the head phones. Luxurious verdure of tropics surround Station PWX (bottom).

By JACK FORREST

IT'S a cold, clear night—just right for exploring the ether. The local stations are signing off, one by one, and the DX broadcasters are coming in as clear as a bell. As you slowly move the dials in an experimental way, around the 400-meter wave length, another stranger comes in. A band concert! The music reminds you of castinets, stamping heels, a shawl and a high comb in jet-black hair. Who is playing the Spanish music?

It stops. There is that expectant thrill as you wait for a new announcer's "This is station——," but it doesn't come. Instead, a clock suddenly begins a loud "tick-tock, tick-tock." Somebody told you once about a station that uses a Big Ben for its "trade mark." What station was that? The ticking ceases, and the band begins a lively tango. Sounds like Spain. But it must be some western station. It stops again. Then a voice—

"Estacion PWX."

Havana! A foreign station! A voice across a wide stretch of the Atlantic, beyond the tip of Florida. The land of sugar cane and cigars! The tropics!

ONLY about half as far away from New York as the Pacific coast stations, but in another land. A land where Spanish is the native language, where tropical fruits grow abundantly, where cold winter and prohibition are unknown, and where Americans like to go. All these thoughts flash through your mind as the dials rest at 400 meters. The Spanish announcement changes to English to inform you that PWX is operated by the Cuban Telephone company. The words are slowly enunciated.

With a great deal of satisfaction you log the dial readings for future use. Your friends have boasted of getting PWX and you wondered why you had not tuned it in during your nocturnal hunting trips. Wait until they hear how strong it comes in on your loud speaker!

Whether it's because there's a lure to anything tropical, or because of the entertaining Spanish programs, PWX enjoys an unusual popularity among the Radio fans, not only of the West Indies, but of North and South America, the British Isles and continental Europe. Four nights a week the Cuban Telephone company broadcasts a program, either a band concert from the Malecon bandstand by the General Staff band of the Cuban army, under the direction of Jose Molina Torres, or a recital by Cuban musicians and singers from the station studio. Every Monday, Tuesday, Wednesday and Saturday evening, from 8:30 to 11:30, Eastern standard time the DX fans of America and Europe tune in on 400 meters to try to get Cuba through the locals, and when they get PWX, they find in most cases it comes in with a bang!

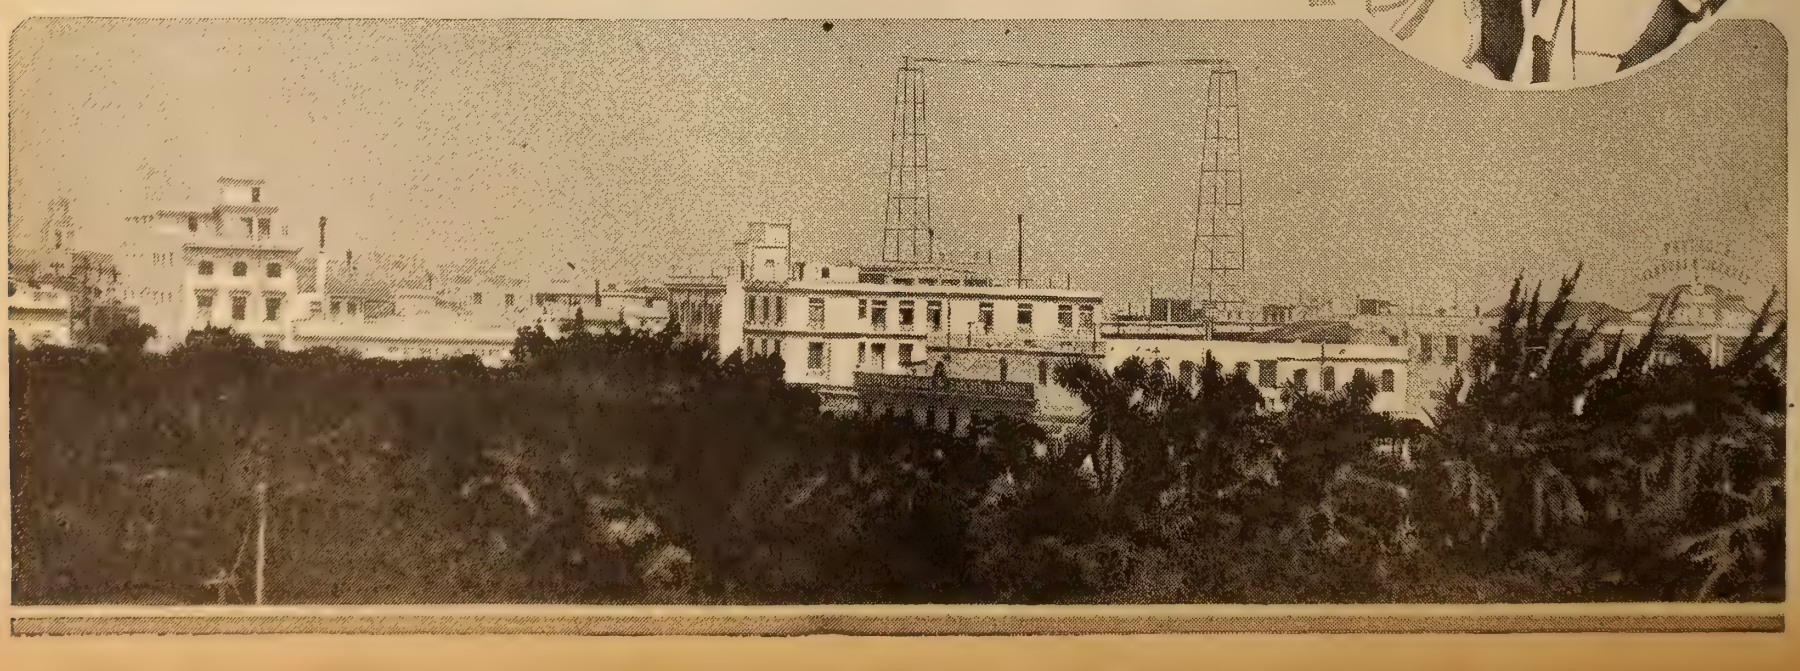
A short time ago, the station was on the air only two nights a week. But now, there are about 50,000 receiving sets in Cuba alone—most of them homemade, as the Custom House figures of November, 1925, show that a total of 20,000 were imported—and the bulky mails from the United States and South American countries show that the audience of PWX has grown immensely abroad. So the number of programs have been increased, and plans are being made to use the station every night. Several American and Cuban organizations have arranged for entertainments to be given weekly, and it looks as if PWX were soon going to be busy all through the week.

* * *

SINCE this standard 500-watt station opened in 1922, it has served not only to entertain thousands of families in the island where it is located, but also to carry information about Cuba abroad to lands where only a vague idea of the island had been held before. As far as its voice is being heard, PWX is spreading information about Cuba, its desirable climate and its activities. That is one of the services this station is performing which is of mutual benefit to the island and to the foreign audiences.

Why did the Cuban Telephone company build this powerful station at Havana, to entertain unseen millions, scattered from the Equator to the Arctic Circle, and from mid-Pacific to Europe? Because it was seen that the Radio station would be a means of assisting in the

(*Turn to page 24*)



"Hill Billies" Capture WRC

Boys from Blue Ridge Mountains Take Washington With Guitars, Fiddles and Banjos; Open New Line of American Airs

MODERN improvements make slow progress in the hill country of the South. During the World war it was discovered that some of the more remote communities were living much as they did a century ago.

But Radio has taken hold of the primitive inhabitants with amazing alacrity. It's effect on the development of their education and communication with the outer world promises benefits untold. They are learning a new language. They are discovering America as it is today. To some who were born and have grown old within a few miles of the homes of their fathers it is a revelation. They scarcely associate it as being in reality a part of their own world. They do not all have receiving sets but there is one in the general store and they come from far and near to hear the concerts. The storekeeper in many instances has made it possible for individual families to own their own receiving sets.

A few weeks ago Radio Station WRC at Washington, D. C., broadcast a concert by an organization called "The Hill Billies." The response was astounding.

Letters and post cards arrived from the mountains of Tennessee, from the hills of Kentucky and the Carolinas and the Blue Ridge counties of Maryland and Virginia. Phone calls, local and long distance, demanded favorite numbers, and repeats, and what not.

* * *

A VOICE with a distinct Georgia drawl asked that they play "Long Eared Mule," and added the significant remark: "You-all caint fool me, ah know where them boys come from. They's Hill Billies for suah. They ain't nobody kin play that music 'thout they is bawn in the hills and brung up thar."

And he was right. The Hill Billies are really boys from the ranges that skirt the east coast states. They are six keen-eyed, ruddy-cheeked youths who have captured the rhythms of the hills, and who, with fiddles and other stringed instruments, present the classics of the country entertainments.

There isn't a bar of jazz in the Hill Billy music. There isn't a note of weird modern harmony or anti-harmony, nor is there a single skip-stop syncopation. And yet the Hill Billy music, with its "Sally-Ann" rhythm and its "Cinday" swing, starts feet to tapping unrestrainedly and unashamed. It is the folk music of America, to which the backwoods youth and the farmer boys "hoe it down" on rough-plank dance floors.

The Hopkins boys, the nucleus of the organization, form a vocal quartet, which, although of debatable value as to timbre of voices and blending of tone, is of indisputable predominance in volume and exactness of harmony. All four are natural baritones, but somebody has to sing tenor and somebody has to growl bass, and that's that. Joe Hopkins, now first tenor, until recently sang deep bass, but had to change because Elmer, who had been first tenor, contracted a cold and couldn't carry higher than baritone. When they "cut loose," as they say, one is reminded of their native habitat, and feels that "the strength of the hills is theirs also." WRC experimented with transmission for some time, and finally decided that the only way to keep them from "blasting" the microphone was to put them outdoors and hide the mike in a closet.

* * *

THOSE Hopkins boys, Al, Elmer, John and Joe, come from down Ash county way in No'th Ca'lina. For several years they have been "tank-towning" the South, playing for church and fraternal entertainments and dances, with Elvis Alderman (of Carroll county, Vi'ginia, suh) fiddling along with them. Carroll, if you must know, is the county in which the famous Allen gang, feudists extraordinary, lives and has its being, and takes occasional pot-shots at unsociable neighbors. (*Continued on page 24*)

Behold here a real Hill Billy, "Fox-Hunt" Charlie Bowman (above) who lives in a log cabin back in the hills ten miles from Mountain City, Tenn. Charlie came to town for a fiddlers' contest and the Hopkins boys from North Carolina were so pleased with his performance they induced him to join the Hill Billies gang.

Below is the famous gang of Hill Billies who took nation's capital by storm. They are, from the left: A. E. Alderman of Carroll county, Virginia; Al, John and Joe Hopkins of "No'th Ca'lina," and "Fox-Hunt" Charlie Bowman of Tennessee. Every one of 'em from the "mountings" and born with the lingo.

a STEP On the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

MYSTERY, attaching to the manor house of the Turners, a sea-faring family of Pelican Bay, "since before the war" of the revolution, became an acute concern of the neighbors shortly before the opening of this story, when Jeremiah Turner, brother of Peleg Turner, owner of the place, was found murdered. John Carton, a favorite nephew disappeared and popular opinion identified him actively with the crime. Shortly thereafter Peleg Turner died. His death, apparently, was due to natural causes but his friends and relatives in Pelican Bay were free in the expression of their belief that more would come of it. Peleg Turner's body was carried out of the house as the bodies of the Turners always had been carried out, through a front door, opening from the old hunt-room, a door which legend and unbreakable custom had assigned to this one purpose.

The relatives of Peleg Turner gathered after his death to take part in a strange seance provided by his last will—to sit before a Radio receiver and listen while he should make an attempt to speak from the grave and solve the mysteries of the ancient house.

Through the storm that ushered in the evening of this weird meeting a man in a gray overcoat came across the dangerous waters of Pelican Bay, told Henry Millis, the caretaker, that he was one of the invited guests, and promptly thereafter disappeared.

In the house waiting for the word from Peleg Turner are Mary Williams, who maintains her belief in John Carton, Henry Graves, a distant cousin who would marry her, Aunt Helen Holmes, close relative of the Turners, Cousin William Turner, a diffident but sanctimonious youth, Frederick Ardwyn, Peleg's lawyer, Hari Singh, an East Indian servant, and other associates and relatives of the men who had died without solving the mystery of the hunt-room.

While the company was sitting before the radio receiver, locked in the darkened room, a step was heard on the stairs at the end of the outer hall and there came an untraceable echo of three short taps, three taps more widely spaced and then three more short taps —S-O-S. A draft gave sudden startling proof that someone had opened the front door through which none but the dead Turners had ever passed. But the fearsome effect of this discovery was lost in the noise of a fight in the broadcasting station to which the receiver was tuned—a pistol shot,—and then a call for help from the station announcer. Briefly, then, the unanswered puzzles of the Turner manse were these:

Who was the man in the gray coat and what became of him?
Whose was the step on the stairs?
Who opened the door reserved for the dead?
Who killed Jeremiah Turner?
What was the truth about the death of Peleg Turner?
What happened to John Carton?

THE STORY CONTINUES.

CHAPTER THREE

Through the Front Door

IN THE ensuing pandemonium it was impossible to distinguish between the detached, ghostly shrieks of the Radio and the fleshly and pertinent plaints of the dozen panic stricken men and women who were the guests of the departed Peleg Turner. The long hunt-room, doubly vast now that darkness aided imagination, was filled with the cries of terror-crazed women and the futile cursing of men, with the crashing of overturned furniture and the vain beating of fists against the heavy oak panels of the doors.

It was not until the energies of the milling, struggling crowd had waned and the first ecstacy of fear had been tempered that the voice of Frederick Ardwyn, the lawer, could be heard over the din.

"Ladies and gentlemen," he shouted. "Be quiet please. There is no danger. As Mr. Turner's lawyer—as his proxy at this meeting—I beg of you to believe that there is no cause for this commotion. Please be seated in the seats nearest where you happen to be. Mr. Graves, Mr. William Caryl and Mr. Milford Jones will please search the floor for the candles."

"But Mr. Ardwyn," came the plainting voice of Aunt Helen Holmes. "What has happened?"

"Nothing to be concerned about, Mrs. Holmes," the lawyer assured her. "We have let our nerves get the better of us because of the unusualness of this situation.

"But certainly there is nothing to cause alarm in a fight in a broadcasting station several miles away from here."

Aunt Helen's voice, still quavering in her reply, showed that she was far from being convinced.

"But the front door, Mr. Ardwyn," she reminded him. "The door that's never opened except when somebody's going to die . . . it was opened. I felt the draft. I know it was opened. And nobody's ever gone through it until he was a corpse."

"Hard luck for the fellow who broke in through it then," came an exasperated comment from the far corner of the room. "If I could find the bird that stepped on my hand I'd fix him so he wouldn't worry about Radio. But my glasses are busted and I can't see anyway in the dark. Get a match somebody . . . "

There was no response.

"Hasn't anybody got a match?"

Ardwyn once more counselled quiet.

"WE'LL get matches and a light in due time," he said. "And don't be alarmed about the front door. The latch is on the inside but no one could find the knobs to open it in the dark. I suspect anyway that it was nailed up as it generally is on such occasions after the last funeral."

"But somebody did open that door," protested Aunt Helen with increasing vehemence. "Do you mean to tell me I haven't the evidence of my own senses?"

"What of it?" inquired Ardwyn impatiently. "Suppose somebody did open the door, nothing has come of it. And I am telling you that it is humanly impossible to open that door in the dark. I have seen the locks . . . "

"Locks don't mean anything to a ghost," declared Aunt Helen.

The booming protest of the man who had bewailed the loss of his glasses broke into the weird ensemble of bodiless voices.

"It wasn't no ghost that stepped on my paw," he countered. "An' the ghost that busted my glasses has somethin' comin' to him . . . "

"I wish someone would light the lights," whimpered a woman. "I am afraid . . . "

"Please be patient one moment more," advised Ardwyn. "The only box of matches seems to have been lost with the candles. They ought to be at this end of the table . . . Mr. Graves will you please search the floor near where I am."

"Here?" inquired the unseen Graves.

"Yes . . . that's it . . . you are brushing against me now."

"I'm not," came the startled denial. "I'm not brushing against anything. I'm in a puddle of something here. Something sticky spilled on the floor."

"Who was that at my feet?"

Ardwyn's query went unanswered.

"Who was that at my feet?"

"For the love of heaven light the lights," interrupted the woman who a short time before had voiced her fear of the dark. She seemed close to hysteria. "Lights . . . "

"Who was that at my feet?" roared Ardwyn.

Panic once more stalked the hunt-room.

A CHAIR overturned and there followed that undefinable whispering—a chorus of sharply drawn breath and muffled ejaculation that is the speech of fright. Then as chaos seemed about to be loosed once more, Henry Graves suddenly gave a cry of satisfaction.

"Here they are," he called. "The matches and a candle." A scratching noise followed and a flame turned from blue to yellow at a point in the blackness where most of the guests in their bewilderment had least expected it to be.

"Thank Heaven for the light," was the fervent prayer of the woman who had called for it and she fell forward across the table top sobbing as the rising blaze of the candle wick indentified her as Hazel Stanton, a girl who had attracted the attention of Ardwyn at the beginning of the seance only because of her manifest poise and nerve. All about her were white, vacant faces, and startled, staring eyes.

"Who is that woman?" inquired Henry Graves. "She seems to have passed out."

"Her name is Stanton," replied Ardwyn, "Hazel Stanton. I don't know what branch of the family she comes from."

"I can't figure her either," admitted Graves. "But her face is familiar—or maybe it's that mop of red hair. I've seen her somewhere, and I'm suspicious." He broke off suddenly with a deprecating gesture. "I suppose I'm seeing things just like the rest," he added apologetically. "Who wouldn't be?"

"Who indeed?" conceded the attorney. "We'll get her a glass of water as soon as I can get the doors open. But first we'd better take an inventory.

"The place is certainly a wreck. Those upset chairs at the end of the room seem to show that everybody there made a dive for that barred window. Look at Mary Williams will you. Not 125 pounds of her and you'd think to see her that nothing had happened. I don't believe she left her chair.

"She's the only one in the company who showed much sense," conceded the lawyer admiringly. "All the rest are here apparently ruffled but unharmed." He turned toward Helen Holmes who seemed to be debating with herself the advisability of fainting. "You see," he told her. "If anybody came in through

"Thank Heaven for the light," was the fervent prayer of the woman who had called for it and she fell forward across the table top sobbing... All about her were white, vacant faces, and startled, staring eyes.

EIGHTEEN Leading Broadcasters Are Presenting This Mystery Story Weekly as a Play

the front door he didn't stay. There are no strangers here. The same ones who were here when we sat down to dinner are here now . . . "

A GASP from Henry Graves interrupted him.

"The bearded pirate," he cried chokingly. "Milford Jones—that was his name, wasn't it—where is he?"

"You're right," Ardwyn admitted in an awed tone. "He's gone. Where is Milford Jones? How did he get out?"

"The front door," shrieked Aunt Helen. "That's how he got out. I told you somebody opened the front door."

"Nonsense," declared Ardwyn unconvincingly. "As you can see, the front door is closed and there is a bar across it, even if one could ignore the locks. He couldn't have left the room that way."

"And the hall doors were locked and the windows are barred," debated Aunt Helen in a high, shrill unnatural voice. "And Milford Jones is gone."

"Yes," admitted Ardwyn reluctantly. "There seems to be no doubt about that point. There were twelve of us in this room. There are eleven. Milford Jones is gone."

CHAPTER FOUR

Tiger Bite

IN THE light of the lone candle, Henry Graves looked oddly at his right hand then hurriedly plunged it into his pocket.

"We need more light here," observed Ardwyn. "Aren't there any more candle ends on the floor, Graves."

"There aren't," Graves assured him. "The candles were just about burned out when we extinguished them, if you remember."

"Hari Singh," called Ardwyn. The Indian slipped in from the hallway as if he had been waiting a summons.

"Yes, Mr. Ardwyn."

"We need candles."

"There aren't any, Sahib. All of the house but this room is lighted by electricity. Mr. Turner liked candles in here but he was not often in the house. We did not keep a large supply."

"Fix up another room for us then," the lawyer suggested. "We shall leave here as soon as the light wanes. I do not suppose there is much use in continuing this seance."

"What interrupted it?" inquired Mary Williams. "Don't you think we ought to find out?"

"Miss Williams' suggestion is pertinent," the lawyer ruled. "Where is Station FYX?"

"It's scattered a bit," put in a youth whose voice, even unaccompanied by his blinking eyes, would have identified him as the unfortunate who had lost his glasses. "There's a studio in Portsmouth—ten miles up the bay road. The transmitting station is on Pelican point, probably half a mile from here on the same road."

"Well," commented Ardwyn, "We ought to find out everything we want to know over at the station. Will you volunteer to take a run over there Mr. Tolliver?"

The youth's reluctance was obvious, but it was apparent also that he felt the responsibility focused on him through the glances of the ten who silently awaited his answer.

"Well," he said, "Well . . . I suppose I could go. But I don't like to think of chilblains and I'm sure to get chilblains if I go wandering around through the cedars at this hour of the night. I think I've got 'em already and besides somebody busted by glasses."

He paused and looked around hopelessly as if expecting moral aid from someone of the ten who stared at him.

"Oh all right," he suddenly decided. "I'll go."

A MINUTE later the door had slammed behind him and through the noises of the storm came the sounds of a starting motor car. The guests of Peleg Turner settled back limply in their chairs to await his return. Whether or not their future conduct might hinge on the report from the broadcasting station; whether or not the sounds of rioting at FYX had anything at all to do with the mysterious old house and the more mysterious old dead man who had owned it, nobody thought of suggesting any action until Tolliver should bring back the news.

"He won't come back," croaked Aunt Helen dismally. "I feel in my bones that he won't be back."

. . . . .

The candle flame wavered in an unfelt wind. The storm howled in the chimney and stirred the dead ashes in the hearth. Then presently there came the squealing of brakes under the porte-cochere and Hari Singh moved quickly toward the door. Tolliver entered and shook the snow from his great-coat with exasperating deliberation.

"Well?" inquired Ardwyn, "What did you find?"

"The riot, mayhem and murder didn't occur at the FYX studio," reported Tolliver genially. He paused with fine appreciation of dramatics as his audience sighed.

"That is something at least," admitted Ardwyn. "We may feel some relief at knowing that these wild events did not take place so close to home."

"No," said Tolliver. "They didn't happen so close to home. They happened closer. They happened right here in our back yard. The riot was staged at the FYX station on Pelican point." Once more he paused, this time with obvious pleasure at the effect he had created.

"Go on Tolliver," grated Ardwyn. "Don't be an ass! What happened?"

"I'm getting to that," the messenger explained pettishly. "It wasn't my riot. I can't change it around to suit your specifications.

"I went away from here along the Bay road to the Pelican Point station and I almost ran over some bird who stepped out of the cedars in front of the car.

"I didn't stop to ask him any questions—didn't think much about him to tell you the truth. But come to think about it maybe I'd have done better if I had given him the look, see. I haven't found out yet who smashed my glasses.

"Well I gets over to the station and there everything is in a fine mess. There's a motorcycle policeman at the door and a couple of operators and announcers running around the place looking foolish—just like you'd expect them to look.

" 'Whatcha want?' asks the cop. I tells him I heard somebody has strangled a soprano and that I've come over all these weary miles just to find out if this good news can be true. He pumps me a little. Finds out about our little party over here an' then he lets me into the station.

"And here . . . I almost forgot . . . Here's something they found on the floor of the station. I wiped it from the cop." He drew an envelope from his pocket.

"I don't make much of an inspection. I'm thinkin' all the while of havin' the cop get over here quick an' find out who smashed my glasses an' take this traveling madhouse someplace where it can be put under lock an' key.

"FROM one of the operators I find out that tonight, just as they are gettin' ready for the midnight revue, a man comes bustin' in through the door. He shuts it an' then makes a dive for the door that leads into the battery shed. As they look back at it, they think he might have been thinkin' of headin' out through a back door there. Just then another man comes bustin' through the front door and the chief engineer comes out of the battery shed. The engineer gives one look at the fellow coming toward him an' lets out a yell—'Don't let him get me,' or something like that. And he makes a reach for his hip. The second man gets out a rod and begins to shoot and the engineer is creased along the top of the skull.

"He's on his way to a hospital in Portsmouth unconscious but alive. The station microphone is turned on at the time so all of these festivities go onto the air. The operators think maybe the first man who came through the station was hit. They found blood on the floor. But anyway he gets away. The bird who does the shooting, trips over a roll of cable and sprawls just long enough to let the other one get away.

"And that's about all there is except that there's a trail of blood in the snow near the studio an' quite a bit more of the same in the snow just outside our own cottage door, here. I noticed it as I came in. I also notice from where I stand that there is blood on the floor over there by the end of the table."

Ardwyn turned his attention suddenly from Tolliver.

"What is it Miss Williams?" he asked. The girl had risen and was staring white faced across the room.

"It's nothing," she said. "Mr. Tolliver startled me. I don't think those stains on the floor are blood. I'm sure they're not. Somebody is making a hideous joke of a very serious matter . . . "

"Blood or catsup, it's all the same to me," put in Tolliver magnanimously. "I think the whole plot is the silliest thing I ever got mixed up in. The idea of a wounded man coming here to this house for shelter—if he came—is the evening's brightest jape.

AND here . . . I almost forgot . . . Here's something they found on the floor of the station. I swiped it from the cop." He drew an envelope from his pocket. "It appears to be a letter . . . "

"God help us," breathed a voice that nobody thought to trace. And then Miss Williams, holding to the end of the table as she lowered herself weakly into her chair gave a spasmodic jerk that sent the candlestick and its lone light rocketing to the floor. Darkness came down and the old panic revived.

"The lights are out," cried Miss Stanton roused from a semi-stupor. "What has happened?"

"Nothing at all," Ardwyn assured her quickly. "Somebody jolted the candlestick off the table. We'll find it presently or we'll all go out into the library where we . . . ." His speech was suddenly interrupted by a cry of pain.

"A woman!" he exclaimed and the others in the room, vainly attempting to see what was happening in the blackness, caught a glimpse of a silhouetted figure momentarily outlined against the dim twilight that filtered through the doorway from a room beyond the hall. "A woman" he repeated. "I had her . . . . She's gone . . . . Hari Singh! Hari Singh! Find a light. . . ."

"Coming, Sahib," called Hari Singh from somewhere close by. And a match

$500 in Gold

FOR THE SOLUTION OF

a Step On the Stairs

WITH the beginning of this exclusive and pioneering effort in coupling a master serial novelette with its production as a Radio play at a selected few of the country's best broadcasting stations, Radio Digest wishes to announce that $500.00 in Gold prizes will be awarded to the persons who can best solve the mystery.

The story, "A Step On the Stairs," is written by Robert J. Casey, an author whose works in the literary world need no introduction. Furthermore he is well versed in the needs of such fiction for Radio presentation. His work, in turn, is being Radio dramatized by Fred Smith, Managing Director of the United States Radio Society, who can be counted among the first few men to write and present Radio plays.

Read the story and hear it played weekly from the selected stations. Don't miss this thriller, whether or not you intend to submit a solution!

The chosen stations, which will broadcast "A Step On the Stairs" in Radio play form, are given on page thirteen. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week, the first appearing in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unravelling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered in the selection of the winning solution.

RULES OF CONTEST

1. The contest opens with the February 27 issue. All solutions must be received by Radio Digest not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue of Radio Digest, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon but one side of paper, and names and addresses should be written or printed plainly.

4. The decision of the judges, to be named later in the contest, will be final.

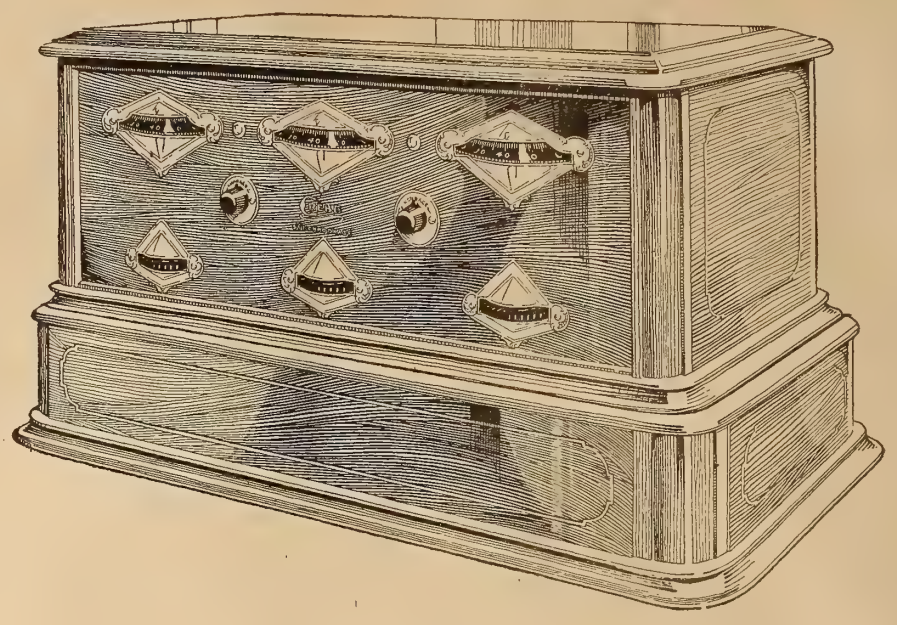
It is written:

"To see oneself is to be clear-sighted."

The clear-sighted see past the beautiful exterior of the Synchrophase to the true virtue within.

Doctor Ms

Synchrophase is also supplied without battery base.



For Those Who Understand and Appreciate Quality —in Reception —in Construction

THE appearance of the inside of radio receivers reveals little or nothing to the uninitiated. But men who are "radio-wise" see a vast difference in set construction.

By the former the ear only can be used in judgment; to the latter, the eye tells almost as much as the ear.

Look inside a Grebe Synchrophase. Your eye will be as delighted with the quality of construction as the ear will be satisfied with the superior receptivity, which this construction not only makes possible but maintains.

Ask your dealer to demonstrate.

A. H. Grebe & Co., Inc., 109 West 57th Street, New York

Factory: Richmond Hill, N. Y.

Western Branch: 443 So. San Pedro Street, Los Angeles, Cal.

This company owns and operates stations WAHG and WBOQ; also low-wave rebroadcasting stations, mobile WGMU and marine WRMU.

Exclusive Grebe Developments:

Grebe "Colortone"

Flexible Unit Control

Binocular Coils Reg. U. S. Pat. Off. *and Low-wave Extension Circuits*

REVISED RADIO BILL HAS NEW FEATURES

EACH STATE WOULD HAVE AT LEAST ONE STATION

Provides for Division of States Into Zones and Appointment of Advisory Committee

WASHINGTON.—The White Radio bill, as reported to the house by the merchant marine and fisheries committee, incorporates several new features. In the order of their importance, they follow:

1. A clause providing that a wave length shall be made available for at least one broadcasting station in each state.

2. A clause making it unlawful to transport in the United States vacuum tubes or other Radio apparatus or parts, patented or unpatented, upon which there is any restriction as to its use.

3. A clause dividing the United States into five Radio zones.

4. The appointment of a commission of five members, one member from each Radio zone, to which may be referred by the secretary of commerce, matters regarding the allocation of wave lengths.

In providing that each state shall have at least one broadcasting station, the bill says:

Each State a Station

"The secretary of commerce shall * * * determine the location of classes of stations or individual stations (with due consideration of the right of each state to have allocated to it, or to some person, firm, company or corporation within it, the use of a wave length for at least one broadcasting station located or to be located in such state, whenever application may be made therefor * * *."

The bill as amended also provides that "In considering applications for licenses and renewals for licenses, when and in so far as there is a demand for same, the secretary of commerce shall make an equitable distribution of licenses, bands of frequency or wave lengths and power among the different zones."

Division of Zones

The clause dividing the United States into zones follows:

"Section 9. For the purposes of this act, the United States is divided into five zones as follows; The first zone shall embrace the states of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, the District of Columbia, Porto Rico, and the Virgin Islands; the second zone shall embrace the states of Pennsylvania, Virginia, West Virginia, Ohio, Michigan, and Kentucky; the third zone shall embrace the states of North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Arkansas, Louisiana, Texas and Oklahoma; the fourth zone shall embrace the states of Indiana, Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas and Missouri; and the fifth zone shall embrace the states of Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon California, the Territory of Hawaii, and Alaska.

Station Changes

The San Antonio Light station, WCAR, put on a special program recently in celebration of the opening of its new 1,500-watt equipment. The wave length remains the same, 263 meters.

Two new broadcasters were licensed last week: KFYO, Texarkana, Tex., 10 watts, 209.7 meters, and KZIB, Manila, P. I., 20 watts, 249.9 meters.

The following changes in power have been authorized: KMMJ, Clay Center, Nebr., 1,000 watts; KNX, Los Angeles, Calif., 1,000 watts; WLIB, Chicago, 4,000 watts; WEW, St. Louis, 1,000 watts; WHT, Chicago, 3,500 watts.

The Jamestown Furniture Marketing bureau of Jamestown, N. Y., has leased WOCL of this city for a period of four months with an option of buying outright at the termination of the lease. WOCL is owned by the Newton Radio company.

Marshall Broadcasts Over WOS

MARSHALL, Mo.—A two-hour program introducing the musical talent of Marshall and Saline county was recently broadcast over Station WOS by remote control, the program being transferred to the studio at Jefferson City by long distance telephone.

A PIPE, FAIR LADY AND THE "MIKE"

This unbeatable combination, especially the pipe and mike part of it, is "Dick" R. V. Haller's favorite at KGW, Portland Oregonian station, for which he directs and announces. His grin is abetted by the pleasant task of selecting a program for Eva Olivotti, celebrated musical comedy star, from the score of "Wildflower," in whose road company she plays the leading role.

John McAllister, of Waterloo, Iowa, claims mention in the hall of Radio fan fame as a result of his $1,000 home built, sixteen tube receiver. He beats Henry P. Hayes, of Boston, Mass., by two tubes and $2.50.

SECOND COLLEGIATE NIGHT THROUGH WGY

TO BROADCAST PROGRAM SATURDAY, MARCH 6

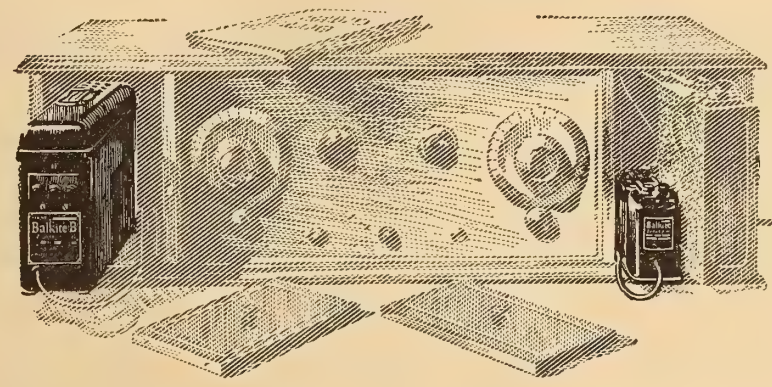
Thousand College Men Will Join in Giving Songs and Cheers of Alma Maters

SCHENECTADY, N. Y.—A thousand college men, representing seventy-five colleges and universities in the United States, the Far East, South America, European countries and the British Empire will cheer and sing for their Alma Maters again Saturday night, March 6, on the second program of the second International Intercollegiate night. Saturday, February 27, the first program was broadcast from the Edison club here over Station WGY.

The program will be international in scope. College songs and cheers of many nations will be heard.

The program last year proved a pronounced success not only for the alumni of the colleges represented but for all listeners who enjoy the rollicking songs of the campus and the yells of the athletic field.

Most of the participants on the program are engineers in the plant of the General Electric company at Schenectady, a city with more college men than any of equal population.



Convert your receiver into
A LIGHT SOCKET SET
with Balkite Radio Power Units

Balkite *Trickle Charger*
Converts any 6-volt "A" battery of 30 ampere hours capacity or more into an automatic "A" power unit that furnishes "A" current from the light socket. With 4-volt and smaller 6-volt batteries may be used as an intermittent charger. Or as a trickle charger if a resistance is added to cut down the charging rate, $10. West of Rockies, $10.50. In Canada, $15.

Balkite *Battery Charger*
The popular rapid charger for 6-volt "A" batteries. Noiseless. If your battery should be low you merely turn on the charger and operate the set. Special model for 25-40 cycles. $19.50. West of Rockies, $20. In Canada, $27.50.

Balkite "B"
Eliminates "B" batteries and supplies plate current from the light socket. Keeps the "B" circuit always full power. For sets of 6 tubes or less. $35. In Canada, $49.50.

Balkite "B" II
Supplies plate current from the light socket. Will serve any standard set. Especially adapted to sets of 6 tubes or more. $55. In Canada, $75.

Now you need wait no longer for a light socket set. Balkite Radio Power Units—the Balkite Trickle Charger and Balkite "B"—enable you to make a light socket set of your present receiver.

The Balkite Trickle Charger converts your "A" battery into an automatic "A" power unit that furnishes full "A" current from the light socket at all times. Balkite "B" replaces "B" batteries entirely and furnishes "B" current from the light socket. As an added convenience you may purchase from your dealer an automatic switch that cuts out the charger and turns on Balkite "B" during operation. This popular light socket installation is the last word in radio convenience—simple to install, economical, compact and composed entirely of units that have demonstrated their success over a long period of time.

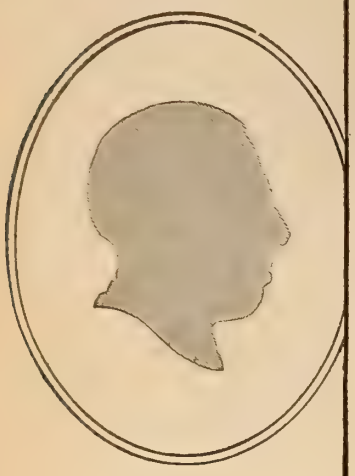
Noiseless—No bulbs—Permanent

All Balkite Radio Power Units are entirely noiseless, have no bulbs, no moving parts, nothing to break or get out of order. All are permanent pieces of equipment. Their current consumption is ridiculously low. All operate from 110-120 volt AC current, with models for 50, 60 and other cycles. *All are tested and listed as standard by the Underwriters' Laboratories.*

FANSTEEL
Balkite
Radio Power Units

Manufactured by FANSTEEL PRODUCTS COMPANY, Inc., *North Chicago, Ill.*

POWEL CROSLEY JR. • • • Radio Manufacturer



Day in, day out, the laboratories of The Crosley Radio Corporation are busy Night after night, the lights are burning as engineers and scientists of the Crosley research staff seek out the solutions of problems Powel Crosley, Jr., has set. New and better ways to make this part or that, revolutionary principles related to receiving and broadcasting, and entirely new fields for the employment of radio energy.

Always the eye of Mr. Crosley is on the work. Able as are his helpers in their respective fields, he alone directs their toil toward this goal or that. In his imagination originate the main objectives.

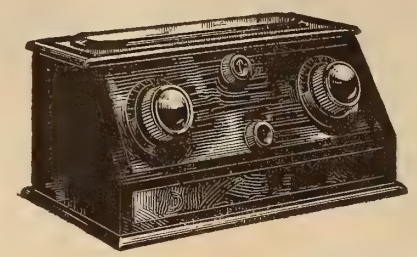
Out of this system of ceaseless search have come all those great improvements that Powel Crosley, Jr., has made in radio. Free of all restrictions of precedent and recognizing no bounds to possibility, Crosley research and engineering have already in several instances achieved the so-called "impossible." In fact, practically every Crosley improvement has been a radically new departure rather than a mere refinement of existing methods.

The Crosley Musicone is an outstanding example. In its first year it outsold all other makes, and today is replacing other types of loud speakers as fast as the world's largest radio plant can manufacture. True cascade amplification and the "*Crescendon*" are also examples of Crosley research results. And in this same department have originated the innumerable machines and devices now employed in the Crosley shops to simplify operations, speed production, and reduce costs.

Out of Powel Crosley's devotion to research great things indeed have come . . . but greater things than these may be expected.

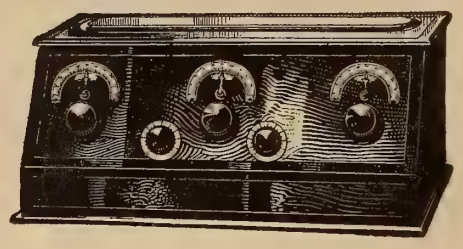
Better radio receiving in the common sense is not the only object of his search. It is Powel Crosley Junior's conviction that radio energy can perform new feats for the public's entertainment and benefit, perhaps radio motion pictures in the home. . . a thousand and one dreams are in this restless brain, and Crosley dreams so regularly come true. And even the potentialities of radio activity cannot hold his whole concern. Inasmuch as the great public service of Powel Crosley, Jr., has been in putting worth while radio reception within the common reach, he can clearly see that many other products which impose price burdens on the average man, likewise cry for cost reduction by mass production.

You may look to him to attack such problems as these. You may gauge your expectations of his success by the unusual facilities at his command and the repeated successes he has already won.



The Crosley 4-tube—4-29
in which the Crescendon is equal to one or more additional tubes of tuned radio frequency amplification **$29**

The Crescendon
—an amazing new volume control exclusive to Crosley sets. Hear it!



The Crosley 5-tube—5-38
All the volume, selectivity and purity of tone available in the best 5-tube set—plus the Crescendon . . **$38**

Widespread Popularity Marks Another Great Success

Spectacular as has been each stride in radio achieved by Powel Crosley, Jr., never before has a Crosley success received such prompt and widespread recognition. Here in the radio plant which has made more radios than any other factory in all the world, every man and machine is going at top speed, every hour is a crowded hour, every night a working day, as the result of orders for the four new Crosley sets.

Even the sweeping success of the Crosley Musicone did not match this merciless demand upon an organization tuned to mass production. With the first demonstrations by Crosley dealers, public approval was expressed in orders that have increased in volume day by day and show no inclination to relax.

This popularity is distributed quite evenly between the four new 4- and 5-tube sets. Thousands who had formerly believed that worth while reception was exclusive to high priced sets, have found in Crosley 4-29 and 5-38 all that they could ask of radio. The accurate selectivity and pure tone of these instruments would be enough. That magnificent volume achieved through the *Crescendon* is the final touch.

And in Crosley "RFL" types there is a revelation for all. For here true cascade amplification makes its first appearance. Here what was considered *impossible* in expert opinion has been achieved by amplification closely approaching theoretical maximum efficiency per tube!

Your nearby Crosley dealer is now demonstrating these truly remarkable sets. By all means hear them. What a joy to find . . . and in a low priced set . . rare beauty, rich tone, volume subject only to your desire, and no howling at any pitch by any mishandling under any conditions.

Each instrument delights the ear, fires the enthusiasm of the lay technician, converts the staunchest skeptic to love of radio.

See the new Crosley receiving sets at your dealer's or write Dept. 49 for descriptive catalog

Crosley manufactures radio receiving sets which are licensed under Armstrong U. S. Patent No. 1,113,149, or under patent applications of Radio Frequency Laboratories, Inc.

THREE RECIPES FOR WINTER CONSERVES

ORANGE MARMALADE CAN BE MADE ANY TIME

Miss Crocker Describes Method of Making Delicious Preserves if Fall Supply Is Used

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

A SHORT time ago I received a letter from a young housekeeper asking if there is anything she can make at this time of the year to fill the jam pot. Last fall, she had canned what she thought was a generous supply of jams, jellies and conserves, but now they are almost gone and her husband wants more spread for hot biscuits and Johnny cake. No doubt there are others of you in the same predicament or perhaps some of you, for one reason or another, were unable to do any canning or preserving last fall.

We usually think of August and September as the season for preserving, but it is very easy to make good jams and conserves in the winter, and furthermore, it is decidedly more comfortable to stand over a hot stove now than in August or September.

Winter Time Conserves

Delicious conserves may be made of dried fruits, peaches, apricots, or prunes combined with commercial canned pineapple, or berries, or with raisins, oranges, or grapefruit. If you are fortunate enough to have a supply of canned rhubarb left from last summer you can make some very delicious conserves with the winter fruits. Rhubarb, raisins, and oranges combine to make a delicious marmalade, or you may use rhubarb and pineapple with equally good results. Another good marmalade is made by combining apples and quince and, of course, there is nothing more delicious than orange marmalade. Nuts, the most expensive part of a conserve, are usually reserved for a special company treat, but if you have a supply of nuts from your woods, you can have a company treat every day.

Nuts should never be boiled in the mixture, as boiling develops a strong flavor. They should be blanched, and chopped, and added just a minute or two before the mixture is removed from the fire. All glasses and jars should be sterilized, before the mixture is poured into them, and after it is cold, the fruit should be covered with hot paraffin. If the paraffin is very hot, it will destroy any mold spores which may have settled on top of the fruit and thus prevent the formation of mold under the paraffin.

Orange Marmalade Recipe

Here is my kitchen-tested recipe for orange marmalade: Nine oranges, six lemons, four quarts of water, sugar.

Method: Peel the fruit, removing the peel in quarters. With a sharp knife or scissors cut the peel in thin strips. Slice fruit crosswise as thin as possible. Remove the seeds. Place fruit and peel in a preserve kettle. Pour over the water and let stand 36 hours. Boil for two hours. Measure the cooked fruit and add an equal amount of hot sugar. Cook until the mixture jells. Pour into sterilized glasses. When cold cover with hot paraffin. This amount will make ten glasses.

The reason for soaking the fruit in water for so long a time is to dissolve out the pectin so that the mixture will jell.

Apricot Conserve

The conserves made of dried fruit are perfectly delicious. I hope you will not scorn them until you have tried them. Here is the recipe for apricot conserve: One pound dried apricots, two cups shredded pineapple, juice of one-half lemon, sugar.

Method: Wash the apricots. Cover with water and let soak at least two hours. Cook very slowly in the water in which they were soaked. When almost done, add the pineapple. Cook until soft and measure. Add an equal amount of hot sugar. Cook to the jell test. Add the lemon juice just before it is done. Pour into sterilized glasses. When cold, pour over hot paraffin. This amount will make eight glasses.

Prune Conserve

The recipe for prune conserve is quite simple and very easily made. Two pounds prunes, four oranges, peel of one orange, juice of one-half lemon.

Method: Wash the prunes thoroughly. Cover with water and let soak at least an hour. Cook in the same water until

GREETS AND PLAYS FOR WOAW ARTISTS

The position of hostess and accompanist at a broadcasting studio is a new vocation opened to women with the advent of Radio. Marie Kieny, above, does it well at WOAW, Woodmen of the World, Omaha.

SHORT WAVES

By Marcella

After telling you last week how nice Harry Geise, ex-WIBO, was getting along on the Pacific coast, I regret to report that while last issue was on the press he was the figure of a rather unusual incident. It seems that he returned, meantime, to take a position at WWAE, Plainfield, Illinois. He also forgot to pay back alimony, so the story goes, to his ex-wife, to the amount of $375, and she had been hunting him relentlessly. While listening in one night recently she heard a familiar tune:

. . . I'm as happy as a cat—
Mamma don't know were I'm at,
What could be as fair as that?
How d'you do?

It was her former hubby, singing away to the tune of $375 to the good! Then she heard the call letters, WWAE. The next scene in the picture shows a deputy sheriff rapping on the studio door of WWAE. The next morning, after a sleepless night on a Cook county jail bed, the judge nominated Harry to membership in the "alimony club." Here Mr. Geise was accepted to membership and will stay, according to the jail chaperons, until business negotiations with Mrs. Geise are concluded—meaning Harry is to pay her $375 in legal tender. He is reported to have composed a new song for the male quartet of the alimony club. It goes something like this:

How d'you do, Mrs. Geise, how d'you do?
If you're gonna keep me here, what'll I do?
Till I pay, my dear, I fear
I'll be here for many a year,
Through the days of Christmas cheer,
How d'you do?

Tune in some night to it from WWAE, for rumor has it that the station is going to install a direct wire pickup to Harry's cell-studio. There, reports say, the "Prisoner's Song" will be one of the favorite numbers, together with, "Sittin' on the Inside, Lookin' on the Outside," and "Linger Awhile."

Seriously (?) speaking, however, those

SHORT WAVES
By Marcella

(Continued from page 11)

of my readers who wish to condole with Mr. Geise may address him care of the "Alimony Club," "Graystone" hotel, Illinois and N. Dearborn streets, Chicago.

P. S. Just heard an announcement from WWAE's Cook County jail pickup which states that "Mamma" Geise has collected her $375 and that our beloved Harry is free again. Tune in on Buenos Aires.

* *

Listen to this scorching letter from F. W. C., Providence, R. I.:

"Won't you please cut out the 'Marcella' stuff? Don't lower your columns to the level of movie magazines. What interest is it to know that XYZ has blue eyes, is married or single etc.? If we want b——, we can purchase the cheap movie sheets."

Now Frankie W. C., I want herewith and hereby to say that it's horrible of you to blaspheme my column that way. Frankly, Frankie, you wouldn't deny a poor working "goil" her only means of existence, would you? I didn't think you would, and as a reward, when you come to my office, or when I visit Providence, we two shall have a heart-to-heart chat, you old darling! Don't let your wife read this, though. Clip it out of the page and destroy it. For I know what she'll do to you. I was going to be a wife myself once, before I started on the downward path writing this awful "Marcella" column. Shades of prune juice!

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

CONSERVES IN WINTER

(Continued from page 11)

tender. Remove the seeds and return the pulp to any juice that is left. Add oranges cut in small pieces. Add the peel cut in very thin strips or put through a food chopper. Cook until soft and juicy. Measure and add an equal amount of sugar. Cook to the jell test. Add lemon juice just before the mixture is done. Pour into sterilized glasses. When cold cover with hot paraffin. This amount will make eight glasses.

I hope you will try some of these combinations. Perhaps you will discover some new ones and pass them on to me. So many discoveries are made through accident or chance.

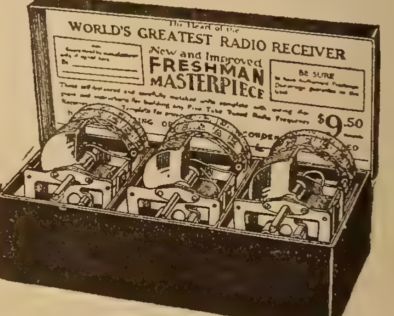
Jazz Wins Popular Vote

MINNEAPOLIS.—Jazz music scored a victory over classical music in a unique contest conducted by WAMD, here, when 12,663 fans voted for the popular brand of music against 4,680 for classical. In conducting the contest, only a piano was used. Leading exponents of both types of music appeared on half-hour programs over a period of several weeks.

CKY Clears Expenses

WINNIPEG, Man.—Manitoba's government-owned telephone and Radio systems have enjoyed a profitable year. The Radio branch, which operates CKY, is declared to be the only known station on the North American continent to have cleared expenses during 1925. CKY is the only station in Manitoba.

It's Easy to Build a Powerful Set
Using the New and Improved FRESHMAN "TRF" Low Loss Kit



Straight Line Wave Length Condensers With Low Loss Self Balanced Coils . . .

These are the identical units which have made the FRESHMAN MASTERPIECE factory built Receivers the World's Greatest Radio Sets.

$9.50

Complete instructions for building this powerful five tube receiver, written in plain everyday English, together with actual size schematic wiring diagram, are furnished with every FRESHMAN "TRF" Kit.

Sold by Authorized Freshman Dealers Only!

WBAP, Fort Worth, Texas, the Star-Telegram. Dial 475.9 meters or 630 kilocycles. Beginning in April. Schedule to be announced.

EPISODE TWO
THE SETTING

THE second episode takes place in the same setting as the first—the high-beamed hunt-room of the Turner manse. Following the indicated opening of the awful and symbolic front door, through which no Turners have passed except in death, and the fight in the broadcasting station which was heard over the Turner receiver, pandemonium is king. Ghostly shrieks rent the darkness. Cries of terror-crazed women and the futile cursing of men are heard, with the crashing of overturned furniture and the vain beating of fists against the heavy oak panels of the doors of the locked room—the room that has been the scene of strange and mysterious crimes.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Mr. Tolliver.....A youth and relative
Henry Graves.....A mysterious man Mary had known formerly
Hazel Stanton.....A young lady relative
Hari Singh.....Indian servant of Peleg Turner
Mary Williams.....A youthful guest

WLWL, New York, N. Y. (288.3m-1040kc), 9:15 p. m.,

High Lights of the Week

THROUGH the kindness of W. S. Quinby of Boston, music lovers unable to attend the Boston Symphony orchestra in person will have the pleasure of hearing the entire concert Saturday evening through WEEI. Fans feeling in the mood for a little fun may prefer to tune in for the San Antonio Light's Cookcoo club of WCAR's at eleven p. m. Central time.

The Atwater Kent artists over the WEAF chain this week are Josef Hoffman, America's best known pianist, and Elizabeth Day, soprano. The Sunday afternoon concert at KGO will attract many listeners. Incidental music from the Norwegian drama, "Sigurd Jalsafar," by Grieg will be featured.

Monday schedules another Grieg program when Amy Wheelock returns to WTIC, Hartford. Miss Wheelock will be remembered for the fine program she gave at this station last year.

Cowboys and cowgirls are gathering this week at Fort Worth, Texas, for the annual Southwestern Exposition and Fat Stock show. WBAP will pick up the events of the rodeo, Tuesday evening. These will be described by the Hired Hand himself.

Tuesday night is also important because the WBAL opera company makes its debut in "Cavalleria Rusticana."

All pessimists are invited to tune in for the meeting of the Optimist club of New Orleans, at WSMB, Wednesday. The Hart House string quartet which has been engaged by the Canadian National railways to appear exclusively at CNR stations, will appear Wednesday at CNRE. Lovers of classical music will enjoy this program.

A debate between students of the University of Chicago and Iowa State college is scheduled for Thursday evening over WMAQ, Chicago. The debate, which takes place in Mandel hall will be relayed direct to the station. The 9 p. m. Pacific time program of KPO, San Francisco, presents the operetta "El Toroso," under the direction of Katharine Sharpstein.

Fiddlers of the North-Atlantic states are contesting at WBZ, Springfield, Friday, for the Henry Ford loving cup to be awarded the winner. Perhaps these champions from various parts of the U. S. will meet and a national champion will be chosen.

"Radio Sunshine Girl" is the title given Nina Smiley, left, who sings at WMBB Sunday afternoons. Miss Smiley has attained considerable success as a composer and often sings her own songs. Hawaiian music fills the air when Willard Van Buren and Joe Guyman, below, invade the studio of WSOE, Milwaukee. Merlyn H. Gillette, right, does not always wear a ruff. He appeared in this kind of a collar when he sang in an operatic role at WCCO, recently. Mr. Gillette is a frequent visitor at this station.

Monday, March 8

songs; 10, music; 10:15, study club; 10:30, entertainment.
